DEPARTMENT OF COMMERCE AND LABOR

BUREAU OF THE CENSUS

S. N. D. NORTH, DIRECTOR

SPECIAL REPORTS

OCCUPATIONS

AT THE TWELFTH CENSUS

PREPARED UNDER THE SUPERVISION OF WILLIAM C. HUNT
CHIEF STATISTICIAN FOR POPULATION

WASHINGTON
GOVERNMENT PRINTING OFFICE

1904

4796 D21.1

A.198368

TABLE OF CONTENTS.

Maps and diagrams (list).....	Page. xiii
Letter of transmittal	xv

CHAPTER I.

RETURN OF OCCUPATIONS AT THE TWELFTH CENSUS.

Enumeration	xix, xx
Scope of the inquiry	xix
Area of enumeration	xix
Conditions of the enumeration	xix, xx
Classification.....	xxi-xxvi
Inherent difficulties.....	xxi
Basis of classification and methods of work in 1900.....	xxi, xxii
Results of the classification in 1900	xxii-xxv
Number of persons 10 years of age and over in the United States engaged in each of 303 specified occupations, in 1900.	xxiii-xxv
Changes in classification in 1900.....	xxv
Statement of occupations in general and indefinite terms	xxv, xxvi
Presentation	xxvii, xxviii
Statistics of occupations in main census reports.....	xxvii
Plan of special report on occupations	xxvii, xxviii
Use of terms in general and analytical tables.....	xxviii

CHAPTER II.

COMPARISON OF OCCUPATIONS AT THE TWELFTH AND PRECEDING CENSUSES.

Scope of inquiry from 1820 to 1900.....	xxix-xxxii
Census of 1820.....	xxix
Census of 1840	xxix, xxx
Number of persons engaged in different classes of occupations, by states and territories, in 1820 and 1840.....	xxx
Census of 1850	xxx, xxxi
Census of 1860.....	xxxi
Census of 1870.....	xxxi
Census of 1880.....	xxxi
Census of 1890.....	xxxi
Census of 1900.....	xxxi
Summary for censuses from 1850 to 1900	xxxi, xxxii
Comparison of occupations at the censuses of 1870 to 1900.....	xxxii-lii
Number of persons credited to the various occupation designations used at the censuses of 1870, 1880, 1890, and 1900, arranged according to the classification of occupations in 1900.....	xxxii-xlix
Number of persons engaged in specified occupations, for both sexes and for each sex separately, in 1870, 1880, 1890, and 1900.	l-lii
Comparison of occupations at the censuses of 1850 and 1860.....	liii-lxiv
Number of persons credited to the various occupation designations used at the censuses of 1850 and 1860, arranged according to the classification of occupations in 1900.....	liii-lxiii

TABLE OF CONTENTS.

CHAPTER III.

SUMMARY AND ANALYSIS OF RESULTS.

	Page.
Sufficiency of the occupation returns	lxv-lxxiii
Per cent which the number of males and of females engaged in gainful occupations forms of the total number of the same sex 10 years of age and over, by states and territories, in 1880, 1890, and 1900	lxv
Probable deficiency in number of children reported as at work in 1890.....	lxvi
Analysis of returns for 1890	lxvi-lxxii
Number of children engaged in gainful occupations compared with the total number of children of the same age, for both sexes and for each sex separately, in 1880, 1890, and 1900.....	lxvi
Number of children of each sex 10 to 14 years of age engaged in gainful occupations compared with the total number of the same sex and age, by states and territories, in 1890 and 1900.....	lxvii
Number of children of each sex 10 to 14 years of age returned as agricultural laborers compared with the total number of the same sex and age, by states and territories, in 1890 and 1900	lxix
Per cent which the number of children of each sex 10 to 15 years of age engaged in gainful occupations forms of the total number of the same sex and age, by states and territories, in 1880, 1890, and 1900.....	lxx
Number of children of each sex 10 to 15 years of age engaged in gainful occupations, as returned and as corrected, compared with the total number of the same sex and age, by states and territories, in 1890.....	lxxi
Return of farm laborers as farmers in 1890	lxxii, lxxiii
Number of agricultural laborers 10 years of age and over, in 1880, 1890, and 1900	lxxii
Number of farmers and farms, by states and territories, in 1880, 1890, and 1900.....	lxxiii
Number and proportion of persons occupied.....	lxxiv-lxxxvi
Distribution by sex	lxxiv-lxxxv
Number of persons engaged in gainful occupations compared with the total population and with the population 10 years of age and over, for both sexes and for each sex separately, in 1880, 1890, and 1900	lxxiv
Number of persons engaged in gainful occupations compared with the total population, by states and territories, in 1880, 1890, and 1900.....	lxxv
Number of persons engaged in gainful occupations compared with the population 10 years of age and over, by states and territories, in 1880, 1890, and 1900.....	lxxvi
Number of males engaged in gainful occupations compared with the total male population 10 years of age and over, by states and territories, in 1880, 1890, and 1900.....	lxxvii
Number of females engaged in gainful occupations compared with the total female population 10 years of age and over, by states and territories, in 1880, 1890, and 1900.....	lxxviii
Distribution by general nativity and color	lxxx-lxxxv
Distribution, by sex, general nativity, and color, of persons engaged in gainful occupations, by states and territories, in 1900	lxxx, lxxxi
Distribution, by general nativity and color, of the population 10 years of age and over and of persons engaged in gainful occupations, by geographic divisions, in 1900	lxxxii
Per cent distribution, by general nativity and color, of the population 10 years of age and over and of persons engaged in gainful occupations, for both sexes and for each sex separately, in 1890 and 1900.....	lxxxii
Per cent which the number of persons engaged in gainful occupations forms of the total number 10 years of age and over in each element of the population, for both sexes and for each sex separately, in 1890 and 1900.....	lxxxiii
Number of males in each principal element of the population engaged in gainful occupations compared with the total number of males in the same element 10 years of age and over, by states and territories, in 1900.....	lxxxiv
Number of females in each principal element of the population engaged in gainful occupations compared with the total number of females in the same element 10 years of age and over, by states and territories, in 1900.....	lxxxv
Comparative increase in persons engaged in gainful occupations	lxxxvi
Number and proportion of persons in the main classes of occupations.....	lxxxvi-cvi
Distribution by sex	lxxxvi-ciii
Distribution, by main classes, of persons engaged in gainful occupations, for both sexes and for each sex separately, in 1880, 1890, and 1900.....	lxxxvi
Distribution, by occupation subclasses, of persons engaged in manufacturing and mechanical pursuits, for both sexes and for each sex separately, in 1880, 1890, and 1900	lxxxvii
Number of persons engaged in gainful occupations and in each main class, by states and territories, in 1880, 1890, and 1900	lxxxviii, lxxxix
Number of males engaged in gainful occupations and in each main class, by states and territories, in 1880, 1890, and 1900.....	xc, xci

TABLE OF CONTENTS.

v

Number and proportion of persons in the main classes of occupations—Continued.

	Page.
Distribution by sex—Continued.	
Number of females engaged in gainful occupations and in each main class, by states and territories, in 1880, 1890, and 1900.....	xcii, xciii
Per cent distribution, by main classes, of persons engaged in gainful occupations, by states and territories, in 1880, 1890, and 1900.....	xciv
Per cent distribution, by main classes, of males engaged in gainful occupations, by states and territories, in 1880, 1890, and 1900.....	xcv
Per cent distribution, by main classes, of females engaged in gainful occupations, by states and territories, in 1880, 1890, and 1900.....	xcvi
Per cent which the number of persons engaged in agricultural pursuits, in trade and transportation, and in manufacturing and mechanical pursuits proper, forms of the total number of persons engaged in gainful occupations, by states and territories, in 1880 and 1900.....	xcviii
Number of persons of both sexes and of each sex engaged in each of three subclasses of occupations included under the main class of manufacturing and mechanical pursuits, by states and territories, in 1880, 1890, and 1900.....	c, ci
Per cent which the number of persons of both sexes and of each sex engaged in each of three subclasses of occupations included under the main class of manufacturing and mechanical pursuits forms of the total number engaged in gainful occupations, by states and territories, in 1880, 1890, and 1900.....	cii, ciii
Distribution by general nativity and color.....	civ-cvi
Distribution, by general nativity and color, of persons engaged in each main class of occupations, for both sexes and for each sex separately, in 1900.....	civ
Distribution, by main classes of occupations, of gainful workers in each principal element of the population in 1900, with per cent distribution for 1890, for both sexes and for each sex separately.....	cv
Number and proportion of persons in specified occupations.....	cvi-cxvii
Distribution by sex.....	cvi, cvii
Distribution, by specified occupations, of males and of females gainfully employed, in 1890 and 1900.....	cvi, cvii
Distribution by general nativity and color.....	cvii-cxvii
Distribution, by specified occupations, of males and of females in each principal element of the population gainfully employed, in 1890 and 1900.....	cviii-cx
Distribution, by specified occupations, of males and of females in the Chinese, Japanese, and Indian population gainfully employed, in 1900.....	cx, cxii
Occupations showing most marked changes since 1890 in the proportion of males in each principal element so occupied.....	cxii
Occupations showing most marked changes since 1890 in the proportion of females in each principal element so occupied.....	cxiii
Distribution, by general nativity and color, of persons engaged in specified occupations, in 1900.....	cxiv-cxvi
Distribution, by general nativity and color, of males and of females engaged in specified occupations, in 1900.....	cxvii
Occupations in which more than 75 per cent of the total number of females are native white, in 1900.....	cxviii-cxx
Distribution of persons occupied by age periods.....	cxviii
Number of males and of females of each specified age engaged in gainful occupations compared with the total number of the same sex and age, in 1890 and 1900.....	cxviii
Number of males and of females in each principal element of the population engaged in gainful occupations compared with the total number of the same sex and element in each specified age period, in 1900.....	cxix
Distribution, by age periods, of males and of females engaged in gainful occupations and in each main class, in 1900.....	cxix
Per cent distribution, by specified age groups, of males engaged in gainful occupations and in each main class, in 1900.....	cxix
Per cent distribution, by main classes of occupations, of males and of females of each specified age period gainfully employed, in 1900.....	cxix
Number and proportion of each sex in gainful occupations.....	cxxi-cxxviii
Proportion of each sex in main classes of occupations.....	cxxi-cxxiv
Distribution, by sex, of persons engaged in gainful occupations and in each main class, in 1880, 1890, and 1900.....	cxxi
Per cent distribution, by sex, of persons engaged in gainful occupations and in each main class, by states and territories, in 1880, 1890, and 1900.....	cxxi, cxxiii
Proportion of each sex in specified occupations.....	cxxiv-cxxviii
Distribution, by sex, of persons engaged in specified occupations in 1900, with per cent distribution for 1880 and 1890.....	cxxv-cxxvii
Per cent of females in each occupation group classified under professional service, in 1880, 1890, and 1900.....	cxxvii
Per cent of females in certain occupation groups classified under trade and transportation, in 1880, 1890, and 1900.....	cxxviii
Number and proportion of men, women, and children in gainful occupations.....	cxxviii-cxli
Changes in the proportions in continental United States.....	cxxviii, cxxix
Distribution, as men, women, and children, of persons engaged in gainful occupations, in 1880 and 1900.....	cxxix
Changes in the proportions in each state and territory.....	cxxix-cxxxi
Distribution, as men, women, and children, of the total number of persons engaged in gainful occupations, by states and territories, in 1880 and 1900.....	cxxix

TABLE OF CONTENTS.

Number and proportion of men, women, and children in gainful occupations—Continued.

	Page.
Changes in the proportions in each state and territory—Continued.	
Per cent distribution, as men, women, and children, of persons engaged in gainful occupations, by states and territories, in 1880 and 1900	cxxx
General character of the changes between 1880 and 1900 in the proportions which men, women, boys, and girls severally form of the total number of gainful workers	cxxxix
Per cent distribution, as men, women, and children, of persons engaged in gainful occupations in 1880 and 1900, by states and territories arranged in the order of the decreasing percentage of men in 1900	cxxxix
Changes in the proportions in the main classes of occupations	cxxxix, cxxxix
Distribution, as men, women, and children, of persons engaged in gainful occupations and in each main class, in 1880 and 1900	cxxxix
Changes in the proportions in specified occupations	cxxxix-cxxxix
Distribution, as men, women, and children, of the number of persons engaged in specified occupations, in 1880 and 1900	cxxxix-cxxxix
Per cent distribution, as men, women, and children, of persons engaged in specified occupations, in 1880 and 1900	cxxxix, cxxxix
Summary of the most marked changes shown for occupations classed under professional service	cxxxix
Summary of the most marked changes shown for occupations classed under domestic and personal service	cxxxix
Summary of the most marked changes shown for occupations classed under trade and transportation	cxxxix
Summary of the most marked changes shown for occupations classed under manufacturing and mechanical pursuits ..	cxxxix
Per cent distribution, as men, women, and children, of persons engaged in specified occupations in 1880 and 1900, arranged in the order of the highest percentage of men in 1900	cxxxix
Proportion of young persons and adults at work in 1900	cxxxix-cxli
Number of young persons (16 to 20) and of adults (21 and over) of each sex engaged in gainful occupations, with the percentages which they respectively form of all persons engaged in gainful occupations, by states and territories, in 1900 ..	cxli
Number of young persons (16 to 20) and of adults (21 and over) of each sex engaged in specified occupations, with the percentages which they respectively form of all persons engaged in the same occupation, in 1900	cxli-cxliii
Distribution, by main classes, of males 21 years of age and over engaged in gainful occupations, by states and territories, in 1900	cxli
Distribution, by general nativity and color, of males 21 years of age and over engaged in specified occupations, in 1900	cxli, cxli
Number and proportion of children at work	cxli-cxxxix
Proportion of children occupied	cxli-cxli
Number of children 10 to 15 years of age engaged in gainful occupations compared with the total number of children of the same age, for both sexes and for each sex separately, in 1880 and 1900	cxli
Number of children of each sex 10 to 15 years of age engaged in gainful occupations compared with the total number of the same sex and age, by states and territories, in 1880 and 1900	cxli
Number of children of each sex 10 to 15 years of age engaged in gainful occupations compared with the total number of the same sex and age for each principal element of the population, in 1900	cxli
Proportion of children in main classes of occupations	cxli-cxli
Distribution, by main classes, of children of each sex 10 to 15 years of age engaged in gainful occupations, and comparison of the number 10 to 15 with the total number of the same sex in each main class of occupations, in 1880 and 1900 ..	cxli
Distribution, by general nativity and color, of children 10 to 15 years of age engaged in gainful occupations and in each main class, for both sexes and for each sex separately, in 1900	cli
Distribution, by sex, of the number of children 10 to 15 years of age engaged in gainful occupations and in each main class, by states and territories, in 1900	cli, clii
Distribution, by general nativity and color, of the number of children of each sex 10 to 15 years of age engaged in gainful occupations and in each main class, by states and territories, in 1900	cliv-clix
Per cent distribution, by main classes, of children of each sex 10 to 15 years of age engaged in gainful occupations, by states and territories, in 1900	clx
Proportion of children occupied by year of age	clxi-cxxxix
Distribution, by year of age, of the number of children of each sex 10 to 15 engaged in specified occupations, in 1900 ..	clxi, clxi
Distribution, by year of age, of children 10 to 15 engaged in gainful occupations and in each main class, for both sexes and for each sex separately, in 1900	clxi
Per cent distribution by year of age of all children at work for both sexes and for each sex separately, in 1900	clxi
Distribution, by year of age, of children of each sex 10 to 15 engaged in specified occupations, in 1900	clxi
Distribution, by year of age, of children of each sex 10 to 15 engaged in gainful occupations, by states and territories, in 1900	clxi, clxvii

TABLE OF CONTENTS.

vii

Number and proportion of children at work—Continued.

	Page.
Proportion of children occupied by year of age—Continued.	
Per cent which the number of children of each sex of each specified age engaged in gainful occupations forms of the total number of gainful workers of the same sex 10 to 15 years of age, by states and territories, in 1900.....	clxviii
Distribution, by year of age, of the number of children of each sex 10 to 15 engaged in specified occupations, by states and territories, in 1900.....	clxix-clxxxv
Distribution of persons occupied by general nativity and parentage.....	clxxxvi-cxxii
Distribution by general nativity.....	clxxxvi-cxcii
Distribution, by general nativity, of the population 10 years of age and over and of persons engaged in gainful occupations, and comparison of the number engaged in gainful occupations with the population 10 years of age and over, in 1880, 1890, and 1900.....	clxxxvi
Distribution, by general nativity, of persons engaged in gainful occupations and in each main class, for both sexes and for each sex separately, in 1880, 1890, and 1900.....	clxxxvii
Distribution, by general nativity, of males and of females engaged in specified occupations, in 1890 and 1900..	clxxxvii-clxxxix
Per cent distribution, by main classes, of native and of foreign born persons engaged in gainful occupations, for both sexes and for each sex separately, in 1880, 1890, and 1900.....	cxc
Distribution by parentage.....	cxcii-cxxii
Number of persons of each specified parentage engaged in gainful occupations compared with the total number of the same parentage, for all persons and for native and foreign born persons separately, in 1900.....	cxcii
Per cent distribution, by birthplace of parents, of persons of foreign parentage engaged in gainful occupations, for all such persons and for the native and foreign born separately, in 1900.....	cxciii
Number of males and of females of each specified parentage engaged in gainful occupations, compared with the total number of the same sex and parentage, in 1900.....	cxciii
Distribution, by birthplace of parents, of persons engaged in gainful occupations and in each main class, for both sexes and for each sex separately, in 1900.....	cxciii, cxciv
Per cent distribution, by birthplace of parents, of persons of foreign parentage engaged in gainful occupations and in each main class, for both sexes and for each sex separately, in 1900.....	cxcv
Distribution, by main classes, of persons of each specified parentage engaged in gainful occupations, for both sexes and for each sex separately, in 1900.....	cxcvi, cxcvii
Per cent distribution, by main classes, of males of each specified parentage engaged in gainful occupations, in 1900....	cxcvii
Per cent distribution, by main classes, of females of each specified parentage engaged in gainful occupations, in 1900..	cxcviii
Distribution, by specified occupations, of males and of females of each specified parentage gainfully employed, in 1900.....	cxcix-cxx
Leading occupations for males of each specified parentage, in 1900.....	ccx, ccxi
Leading occupations for females of each specified parentage, in 1900.....	ccxi, ccxii
Per cent of female workers of each specified parentage engaged as servants and waitresses, in 1900.....	ccxii
Distribution of persons occupied by conjugal condition.....	ccxiii-cxxv
Proportion of gainful workers in each conjugal class.....	ccxiii-cxxv
Number of males and of females in each conjugal class engaged in gainful occupations compared with the total number of the same sex and conjugal class 10 years of age and over, in 1890 and 1900.....	ccxiii
Distribution, by age groups, of the total number of single, widowed, and divorced females 15 years of age and over, in 1900.....	ccxiii
Number of males and of females in each principal element of the population engaged in gainful occupations compared with the total number of the same sex and element in each conjugal class 10 years of age and over, in 1900.....	ccxiv
Distribution, by age groups, of the total number of widows 15 years of age and over in each of the white elements of the population, in 1900.....	ccxiv
Conjugal condition of males engaged in specified occupations.....	ccxv-cxx
Distribution, by conjugal condition, of males engaged in specified occupations in 1900, with per cent distribution for 1890 and 1900.....	ccxv, ccxvi
Occupation groups in which the percentage of married males exceeded 70 in 1900.....	ccxvi
Occupation groups in which the percentage of married males was less than 45 in 1900.....	ccxvii
Per cent distribution, by age groups and by conjugal condition, of males in specified occupations, with the difference between the per cent 25 years of age and over and the per cent married, widowed, or divorced, in 1900.....	ccxvii, ccxviii
Occupation groups in which the difference between the per cent of males 25 years of age and over and the per cent married, widowed, or divorced exceeded 18 in 1900.....	ccxix
Occupation groups in which the difference between the per cent of males 25 years of age and over and the per cent married, widowed, or divorced was less than 11 in 1900.....	ccxix
Proportion of divorced males in specified occupations.....	ccxx-cxxii
Number of divorced males engaged in specified occupations compared with the number of married, widowed, or divorced males so occupied, in 1890 and 1900.....	ccxx, ccxxi
Occupation groups in which the per cent of divorced males was exceptionally high in 1900.....	ccxxi
Occupation groups in which the per cent of divorced males was exceptionally low in 1900.....	ccxxi, ccxxii

	Page.
Distribution of persons occupied by conjugal condition—Continued.	
Conjugal condition of females engaged in specified occupations.....	ccxxii, ccxxiii
Distribution, by conjugal condition, of females engaged in specified occupations in 1900, with per cent distribution for 1890 and 1900.....	ccxxii
Per cent distribution, by conjugal condition, of females engaged in the occupation groups showing the highest percentage of single, in 1900.....	ccxxiii
Per cent distribution, by conjugal condition, of females engaged in the occupation groups showing the lowest percentage of single, in 1900.....	ccxxiii
Proportion of married women at work.....	ccxxiii, ccxxiv
Number of married women engaged in gainful occupations compared with the total number of married women, by states and territories, in 1890 and 1900.....	ccxxiii
Distribution of married women at work by specified occupations.....	ccxxiv, ccxxv
Distribution, by specified occupations, of married women in each principal element of the population, in 1900.....	ccxxiv
Distribution of persons occupied by months unemployed.....	ccxxv–ccxxvii
Inquiry as to unemployed.....	ccxxv
Comparison of returns of 1890 and 1900.....	ccxxv–ccxxvii
Number of persons in each element of the population unemployed during any portion of the census year, compared with the total number in the same element engaged in gainful occupations, for both sexes and for each sex separately, in 1900.....	ccxxvi
Per cent which the number of persons in each element of the population unemployed during any portion of the census year forms of the total number of the same element engaged in gainful occupations, for both sexes and for each sex separately, in 1890 and 1900.....	ccxxvi
Reasons for accepting the figures for 1900 as more correctly reflecting actual proportions of nonemployment than did those of 1890.....	ccxxvi–ccxxvii
1. Simpler and more definite schedule and instructions to enumerators in 1900.....	ccxxvi, ccxxvii
2. A closer and more thorough enumeration in 1900.....	ccxxvii–ccxxviii
3. Reasonableness of the proportion of months unemployed shown in 1900.....	ccxxviii, ccxxvii
Number of persons in each main class of occupations unemployed during any portion of the census year compared with the total number so occupied, for both sexes and for each sex separately, in 1890 and 1900.....	ccxxviii
Number of males in specified occupations unemployed during any portion of the census year compared with the total number of males so occupied, in 1890 and 1900.....	ccxxviii–ccxxx
Number of females in specified occupations unemployed during any portion of the census year compared with the total number of females so occupied, in 1890 and 1900.....	ccxxx
Occupations showing decrease in 1900, as compared with 1890, in the per cent of males or of females unemployed during any portion of the census year.....	ccxxxii
Per cent which the number of males and of females in specified occupations unemployed during any portion of the census year forms of the total number of the same sex so occupied, in 1890 and 1900.....	ccxxxii, ccxxxiii
Statistics of nonemployment as shown at the Twelfth Census.....	ccxxxiv–ccxxxvii
Distribution, by periods of months, of males and of females in each element of the population unemployed during the census year, in 1900.....	ccxxxiv
Distribution, by periods of months, of males and of females in each main class of occupations unemployed during the census year, in 1900.....	ccxxxv
Number of persons in each main class of occupations unemployed during any portion of the census year and per cent of total number so occupied, by states and territories, in 1900.....	ccxxxv, ccxxxvi
Per cent of total population dwelling in cities and country districts by geographic divisions in 1900.....	ccxxxvii
General summary.....	ccxxxvii–ccxlv
Population engaged in gainful occupations.....	ccxxxvii
Classification by occupations.....	ccxxxvii, ccxxxviii
Nativity and color of the working population.....	ccxxxviii, ccxxxix
Age classification of the working population.....	ccxxxix, ccxl
Proportion of females in gainful occupations.....	ccxl
Proportion of men, women, and children in the working population.....	ccxl, ccxli
Proportion of adults and young persons in the working population.....	ccxli
Children in gainful occupations.....	ccxlii
Foreign born in gainful occupations.....	ccxlii, ccxliii
Gainful workers of foreign parentage.....	ccxliii, ccxliv
Conjugal condition of the working population.....	ccxliv, ccxlv

TABLE OF CONTENTS.

GENERAL TABLES.

General tables, for the United States.....	Page. 3-87
Explanatory notes.....	5, 6
Table 1.—Total persons 10 years of age and over engaged in each of 303 specified occupations, classified by sex: 1900.....	7-9
Table 2.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex, general nativity, and color: 1900.....	10-13
Table 3.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations, distinguished as negro, Chinese, Japanese, and Indian, classified by sex: 1900.....	14, 15
Table 4.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods: 1900.....	16-19
Table 5.—Native white persons of native parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods: 1900.....	20-23
Table 6.—Native white persons of foreign parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods: 1900.....	24-27

TABLE OF CONTENTS.

General tables, for the United States—Continued.	Page.
Table 7.—Foreign white persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods: 1900	28-31
Table 8.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods: 1900	32-35
Table 9.—Negro persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods: 1900	36-39
Table 10.—Total persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age: 1900	40, 41
Table 11.—Native white persons of native parentage 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age: 1900	42, 43
Table 12.—Native white persons of foreign parentage 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age: 1900	44, 45
Table 13.—Foreign white persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age: 1900	46, 47
Table 14.—Colored persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age: 1900	48, 49
Table 15.—Negro persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age: 1900	50, 51
Table 16.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition: 1900	52, 53
Table 17.—Native white persons of native parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition: 1900	54, 55
Table 18.—Native white persons of foreign parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition: 1900	56, 57
Table 19.—Foreign white persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition: 1900	58, 59
Table 20.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition: 1900	60, 61
Table 21.—Negro persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition: 1900	62, 63
Table 22.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, distributed according to parentage: 1900	64-67
Table 23.—Total males 10 years of age and over engaged in each of 140 groups of occupations, distributed according to parentage: 1900	68-71
Table 24.—Total females 10 years of age and over engaged in each of 140 groups of occupations, distributed according to parentage: 1900	72-75
Table 25.—Total persons 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900	76, 77
Table 26.—Native white persons of native parentage 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900	78, 79
Table 27.—Native white persons of foreign parentage 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900	80, 81
Table 28.—Foreign white persons 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900	82, 83

LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE AND LABOR,

BUREAU OF THE CENSUS,

Washington, D. C., January 4, 1904.

SIR:

I have the honor to transmit herewith a special report on occupations. The publication of the statistics of occupations in the form of a special report was authorized by my predecessor, Hon. William R. Merriam, in order to insure the completion on or before July 1, 1902, of the main reports of the Twelfth Census, in conformity with the terms of the act of March 3, 1899, under which that census was taken.

For this reason, it was decided to limit the statistics of occupations in the main report on population to a presentation for states, territories, and principal cities of the number of persons, distinguished by sex, engaged in specified occupations, and to reserve the detailed classification by general nativity, color, age periods, parentage, conjugal condition, and months unemployed, for more complete presentation in a separate report.

The figures presented in the general tables of this report are based upon the returns of more than 53,000 enumerators, obtained in the general enumeration of population made as of June 1, 1900, in answer to one of 27 items of inquiry on the population schedule. The inquiry with respect to occupations related to persons 10 years of age and over and called for the occupation, trade, or profession of each person of that age gainfully employed; but the inquiry was confined to a simple statement of the kind of work done or character of service rendered, as the temporary organization of the census and the limited time given for preparation prevented any effort to distinguish employers from employees, or to ascertain whether the work was done at home or in a shop or factory, or to identify the employee with the establishment in which employed, as is done in some European countries.

The special report on occupations has been prepared in the division of population, under the supervision of Mr. William C. Hunt, chief statistician for population; the textual discussion has been contributed in part by Dr. Joseph A. Hill and Mr. William S. Rossiter, of the division of publications, while the maps and diagrams have been prepared in the geographical division, under the direction of Mr. Charles S. Sloane, acting geographer.

Very respectfully,

Director.

Hon. GEORGE B. CORTELYOU,

Secretary of Commerce and Labor.

REPORT ON OCCUPATIONS.

REPORT ON OCCUPATIONS.

CHAPTER I.

RETURN OF OCCUPATIONS AT THE TWELFTH CENSUS.

ENUMERATION.

SCOPE OF THE INQUIRY.

The inquiry with respect to occupations made on the population schedule at the Twelfth Census called for a statement of the occupation, trade, or profession of each person 10 years of age and over who was at work—that is, occupied in gainful labor. Comparatively few persons under that age are gainfully employed, and when, contrary to instructions, such persons were returned by the enumerator they were excluded from the tabulation, so that, as at preceding censuses, the statement of the number of persons reported as engaged in gainful occupations at the Twelfth Census is limited to those 10 years of age and upward.

The inquiry was confined to a simple statement of the kind of work done or character of service rendered. No attempt was made, by means of specific returns on the schedule, to distinguish employers from employees, although this distinction would often be indicated by the designation of the occupation required by the printed instructions; nor was any attempt made to ascertain whether the work was done at home or in a shop or factory, or, in the case of an employee, to record the name and location of the establishment in which employed, as is done in Belgium, France, Germany, and some other European countries. The desirability of extending the occupation inquiries to include these additional data, or at least a part of them, has been recognized by the officials of former censuses,¹ but the limitations of American census work up to 1900 have

not permitted detailed inquiries of this character, the temporary organization of the census and the limited time allowed for its completion rendering special caution necessary in guarding against undue elaboration of the schedules.

AREA OF ENUMERATION.

The statistics of occupations contained in this volume relate to that portion of the present area of the United States which, under the terms of the act approved March 3, 1899, was covered by the Twelfth Census enumeration; this includes the mainland of the United States, together with the outlying territories of Alaska and Hawaii and persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory. No provision was made for the enumeration of the inhabitants of the Philippine Islands, Porto Rico, Guam, and Samoa as a part of the Twelfth Census, as these islands were not in the possession of the United States at the time the act above referred to was passed.² A census of Porto Rico was subsequently ordered by the President, and was taken as of November 10, 1899, under the direction of the War Department; and a census of the Philippine Islands, provided for by act of Congress, was taken as of March 2, 1903, under the direction of the Philippine Commission; but as yet the results of the former census only are available.

CONDITIONS OF THE ENUMERATION.

The question of occupations was one of the 27 items of inquiry included in the population schedule to be answered, as far as applicable, for each person enumerated in the census. The occupation returns, therefore,

¹ The Superintendent of the Ninth and Tenth censuses (the late Francis A. Walker), in an article on "American Industry" in the *Atlantic Monthly* for December, 1869, comments very severely on the wholly inadequate enumeration and compilation of occupations at the census of 1860, and suggests the inclusion in the population schedule for 1870 of two additional inquiries in order to determine, in connection with the return of occupations, first, the number of persons working for themselves and sharing in the profits of business as distinguished from those receiving wages or salary, and, second, the number dependent upon each person whose occupation is reported. The Ninth Census, of which General Walker was appointed Superintendent February 7, 1870, was taken in the following June, but the population schedule did not contain the additional inquiries suggested in this article, probably for want of time to provide for their successful enumeration.

² Philippine Islands, Porto Rico, and Guam added by treaty between the United States and Spain, proclaimed April 11, 1899 (30 Stat. L., 1754); island of Tutuila and all other islands of the Samoan group east of longitude 171° west of Greenwich added by convention of the United States, Germany, and Great Britain, proclaimed February 16, 1900 (31 Stat. L., 1878).

form part of the information obtained in the general enumeration of population which was taken in June, 1900, through the agency of more than 53,000 enumerators. Detailed explanations concerning the manner of returning occupations were given in the printed instructions prepared for the use of the census enumerators in order to secure a definite statement of the profession, trade, or branch of work upon which each person depended chiefly for support, or in which he was engaged during the larger part of the time.

The distinctions to be observed by the enumerators in making their returns concerning occupations are best illustrated by the following extracts from the printed instructions:¹

This is a most important question. In reporting occupations avoid the use of general or indefinite terms which do not indicate the *kind of work done*. You need not give a person's occupation just as he expresses it. If he can not tell intelligibly what he is, find out what he *does*, and describe his occupation accordingly. Endeavor to ascertain always the *kind of work done*, and so state it.

Indicate in every case the kind of work done or character of service rendered. Do not state merely the article made or worked upon, or the place where the work is done. For example, the reply "carriage builder," or "works in carriage factory," is unsatisfactory, because men of different trades, such as blacksmiths, joiners, wheelwrights, painters, upholsterers, work together in building carriages. Such an answer, therefore, does not show what kind of work the person performs.

Return every person according to his own occupation, not that of his employer. For example, describe a blacksmith employed by a manufacturer of carriages as a carriage blacksmith and not as a carriage builder, or a cooper employed by a brewery as a cooper and not a brewer, etc.

If a person has two occupations, enter the more important one, that is, the one from which he gets the more money. If you can not learn that, enter the one in which he spends the more time. For example, describe a person who gets most of his income by managing a farm, but also preaches, as a "farmer," but if he gets more income from his preaching, describe him as a "preacher" and not as a farmer.

If a married woman has a gainful occupation, return the occupation accordingly, whether she does the work at her home or goes regularly to a place of employment, and whether she is regularly or only occasionally so employed. For example, "milliner," "dressmaker," "nurse," etc.

Report a student who supports himself by some occupation according to the occupation, if more time is given to that, but as a student, if more time is given to study. Thus report a student who does stenographic work as a student unless more of his time is spent in stenography. Report a salesman in a grocery store, who attends a night school as "salesman, groceries," because most of his day is spent in the store.

Do not confuse a *farmer* with a *farm laborer*. If a person works on a farm for a stated wage (in money or its equivalent), even though he may be a son or other relative of the person who conducts the farm, he should be entered as a *farm laborer*, and not as a farmer. On the other hand, if a person owns or rents a farm, or operates it with or for another person, for a fixed share of the products, he should be entered as a *farmer*, and not as a farm laborer. Enter the older children of a farmer (who work on the farm) as farm laborers, except when a father and son (or sons) jointly operate the farm for fixed shares of the product.

Do not confuse a *day laborer* at work for the city, town, or at odd

jobs with a *farm laborer* at work on the farm or plantation or in the employ of gardeners, nurserymen, etc. Do not say simply "laborer," but state in every case the *kind of work done*, as *day laborer*, *farm laborer*, *garden laborer*, etc. If a person is a laborer in a mill, workshop, or factory, specify the fact, in addition to the word laborer, as *laborer (cement works)*, etc.

Return as a *housekeeper* a woman who receives a stated wage or salary for her services, and do not confuse her with a woman who keeps house for her own family or for herself, without any gainful occupation, or with a grown daughter who assists in the household duties without pay. A wife or daughter who simply keeps house for her own family should not be returned as a housekeeper in any case.

Do not confound a clerk with a salesman, as is often done, especially in dry goods stores, grocery stores, and provision stores. Generally speaking, a person so employed is to be considered as a salesman, unless most of his service is in the office on the books and accounts; otherwise he should be returned as *salesman—dry goods*; *salesman—groceries*, etc.

Do not accept "maker" of an article or "works in" mill, shop, or factory, but strive always to find out the particular work done.

Do not use the words "factory operative," but specify the kind of work done, as *cotton mill—spinner*; *silk mill—weaver*, etc.

Avoid in all cases the use of the word "mechanic," and state whether a *carpenter*, *mason*, *house painter*, *machinist*, *plumber*, etc.

The doing of domestic errands or family chores out of school hours, where a child regularly attends school, is not an occupation. But if a boy or girl, above 10 years of age, is earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry, the kind of work performed should be stated.

It was not the intention nor desire to have the classification of occupations, or any part of it, intrusted to the enumerators; the ruling consideration governing their instructions was to have them state as precisely as possible the occupation of each person reported as at work, in order that the Census Office might have in its possession the means of determining, with reasonable accuracy, the number of persons engaged in different kinds of work as a means of livelihood, rather than the number occupied in making particular things or the number at work in given places. The time given to preparation for the Twelfth Census was so limited² that not much effort, beyond the printed instructions to enumerators, could be made to secure exact returns in accordance with the intentions expressed by the foregoing examples. There was little opportunity for the personal instruction of the enumerators by the census supervisors previous to the enumeration, or for the close supervision of their work during its continuance. Moreover, since the law directed that the main results of the census should be published prior to July 1, 1902, the detention of the completed schedules in the offices of the supervisors for critical examination before they were sent to the central office at Washington was impracticable. It is clear, therefore, that the accuracy of the returns was dependent largely upon the intelligence and interest of an army of enumerators.

² The act providing for taking the Twelfth Census and the establishment thereunder of a temporary census organization was not approved until March 3, 1899, or only 15 months prior to the time of beginning the general enumeration in June, 1900.

¹ These instructions are reproduced in full in Appendix A.

CLASSIFICATION.

INHERENT DIFFICULTIES.

Under the conditions described the classification of occupations is a difficult matter, and entirely satisfactory results are not possible. An attempt was made in 1900, as in 1890, to classify occupations, in a general way at least, according to the kind of work done or character of service rendered, but this idea could not be fully carried out.

One cause of perplexity is that a person may have more than one occupation; to prevent uncertainty and error some rule must be prescribed for the selection of the occupation to be returned as representing a person's usual or customary vocation. The rule laid down in the instructions was to enter the more important occupation—that is, the one from which the more money is obtained, or, if that can not be determined, the one in which the more time is spent. In practice the enumerator frequently enters both occupations, leaving the selection to the Census Office. This is particularly true with respect to a farmer who, besides cultivating a farm, is identified with some other business enterprise.

Another case which is sometimes a source of error is that in which the wife or children assist in the work of the head of the family and yet are not actually paid in wages for their labor. Such cases are particularly common in agricultural sections where the services of the family are regularly utilized in field work. This is a condition covered by the instruction to ignore "the doing of domestic errands or family chores out of school hours, where a child regularly attends school," but to include any person above 10 years of age who "is earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry."

A further possibility of error on the part of the enumerator arises from the copying of the schedules before they are forwarded to the supervisors for transmission to Washington. The printed instructions¹ emphasized the liability to errors in copying, but it is clear that they occurred in spite of the cautionary injunction, especially in such cases as the assignment to a female of an occupation which more naturally belongs to the head of the family or to a male member thereof for whom no occupation is reported, or the duplication of the occupation of a male member of the family for the wife, mother, daughter, or sister. In an inspection of

the schedules, such anomalous entries as these are often detected by the return for a woman of an occupation not ordinarily followed by her sex. In classifying occupations at the Twelfth Census an effort was made to correct or to exclude from the tabulations those cases in which the entry on the schedule was evidently an error, but in a few instances unusual occupations are still credited to women where the evidence of error in copying was not sufficient to warrant correction; the number of such cases is limited, however, and no further effort to verify the returns seemed advisable.

Under the time limit imposed by law, provision could not be made for a careful and detailed examination of the census returns. At the outset a temporary office does not possess a force competent to examine the schedules critically, and even if such a force existed, the office would be powerless to complete the returns in every particular prior to their detailed tabulation, unless erroneous schedules were first returned to the enumerators for correction.

For the reasons here stated the entries were generally accepted as given on the schedules and were tabulated accordingly. As a result, there is undoubtedly an element of indefiniteness and inaccuracy, and possibly omission in the returns, which, under a permanent census organization, can be very nearly, if not wholly, eliminated. The system of supervision should be made much closer than it has been heretofore and provision made for the examination and correction of returns prior to their receipt at the central office in Washington.

BASIS OF CLASSIFICATION AND METHODS OF WORK IN 1900.

Such being the conditions under which the census work had to be conducted, the only practicable scheme with respect to the work of classifying occupations was to adhere in all essential particulars to the classification of 1890; this was all the more imperative if the time limit governing the completion of the work was to be observed. An index to occupations, based upon that used at the census of 1890, was accordingly prepared in advance of the receipt of the enumerators' completed returns, in which, for purposes of tabulation, each of the more important terms likely to be used in reporting the classes of work carried on by persons engaged in gainful labor was assigned to one of 475 occupation groups. It was not the intention to make this index list exhaustive, because, in classifying the statements of the enumerators under the various occupation groups, the plan was to confine the primary work to the simpler designations (such as farmer or planter, farm or plantation laborer, clergyman or preacher, lawyer, physician or doctor, school teacher, carpenter, mason, painter,

¹ Instructions to Enumerators, paragraph 56, reads as follows: The copying of the schedules for transmission to this office involves liability to error, especially in the transposition of entries to the wrong lines. For this reason it is unsafe to copy the several columns one at a time. If copying is necessary, copy line by line, using a ruler to keep the place, and take great pains to see that the ruler is not displaced. But the right way to do your work is to make the original entries with such care that no copying is required.

blacksmith, dressmaker, milliner, seamstress, etc.), for which the classification was apparent on the face of the returns, reserving all other designations for more careful scrutiny and examination before their final assignment to a specific occupation group.

Every effort was made, as far as the limitations of the work permitted, to make the several occupation groups as complete as possible. To this end the primary classification work was confined, as already stated, to the simpler designations, comprising, in all, 391 different items, or occupation terms, and comprehending (in part only) less than one-half (225) of the 475 occupation groups selected for tabulation purposes. Under the system of machine tabulation used in the population work of the Twelfth Census, this primary work was conducted in connection with the punching of the cards¹ from which the detailed tabulations of general population data were derived, in order to cover as much ground as possible within the limited time at the disposal of the office. Specific instructions were issued to have this part of the work comprehend only the 391 items previously selected, and to punch all other returns of occupations under the general heading "Ot," meaning thereby "other" occupations. These, as already explained, were reserved for further examination. For this purpose provision was made in the course of the tabulation work to have these "Ot" cards thrown out mechanically by the tabulating machines for a separate handling and the transcription thereon of the occupation designation in the language used by the enumerator on the population schedule. When this process had been completed, assignment was made in each case to one of the 475 occupation groups, and reference was made to the schedules for manufactures and agriculture as a guide in making the assignment, wherever possible. The next step consisted in the mechanical exclusion by the tabulating machines of all cards for which the designation of occupation was not entirely consistent with the other facts recorded thereon, and the reexamination in such cases of the original entries on the population schedules. As already explained, there was difficulty even then in establishing the verity of the return, either because the original statement made by the person supplying the information might involve error in the sex, age, or occupation reported, or because of the blunders committed by the enumerator in copying the schedules, resulting possibly in the assignment of the occupation to the wrong member of the family or in the duplication or misplacement of some of the entries for a given family.

¹A separate card was used for each person, to which was transferred by punching, for purposes of later tabulation by electrical machines, all the information returned on the population schedule concerning the color, sex, age, nativity, occupation, etc., of each individual enumerated in the census.

RESULTS OF THE CLASSIFICATION IN 1900.

As a result of the effort in 1900 to classify the occupation returns in accordance with a previously prepared scheme, the 475 occupation designations selected for purposes of tabulation were reduced for presentation to 303, arranged under 140 groups, as against the 218 designations of 1890, with which they have been made comparable as far as the returns permitted.

The 172 designations which were combined with other designations, principally on account of the small number of persons reported under these designations, but partly as a matter of space, afford good and sufficient evidence of the futility of attempting many refinements in the subdivision of the occupation returns, especially under the conditions of the Twelfth Census work. Similar evidence is afforded, oftentimes, by those cases where a single designation used in 1890 has been subdivided for the classification in 1900 into two or more designations, which have been retained as a part of the 303 designations presented, but for which the enumerators' returns in many cases did not prove sufficiently explicit to permit of the fine distinctions nominally implied by the subdivision. Instances of this are found in the attempt to distinguish between carpetmakers (rag) and carpet factory operatives, between clock and watch makers and clock and watch repairers, between boot and shoe factory operatives and shoemakers (not in shoe factory), and the like.

For the presentation of the statistics of occupations in 1900, particularly for the detailed classification by general nativity and color, age periods, conjugal condition, parentage, etc., the more inclusive designations represented by the 140 occupation groups are more desirable, first, because they more nearly represent, in all probability, actual conditions, and, second, because, for purposes of comparison with preceding censuses, they are, on the whole, probably much more significant. This was the dominant idea, first, in the reduction of the number of specified occupations from 475 to 303 designations and, second, in the assignment of the 303 designations to 140 groups; and numerous instances could be found where it would have been a waste of space to have extended the general tables for a separate presentation of groups of workers representing, in the aggregate, only a comparatively small number of persons.

A detailed presentation, comprising the 303 specified occupations, is made in Table 1. for the entire area of enumeration and for continental United States separately. In this table the designations representing the 140 occupation groups are set out to the marginal line, while the 233 details into which 70 of these groups are divided are indented. Of the 303 specified occupations in 1900 more than one-half (161) are included under the general heading "manufacturing and mechanical pur-

suits," and these are arranged, as far as practicable, under the titles denoting the various industry groups as defined for the Twelfth Census by the division of manufactures. This arrangement was not made, however, with a view to furnishing a basis for the comparison of the number of persons engaged in the various manufacturing and mechanical pursuits as returned on

the schedules of population and of manufactures inasmuch as the two sets of returns are hardly comparable in any particular; its sole purpose was to bring together related groups of workers, as a matter of convenience in consultation, in preference to the adoption of a strictly alphabetical arrangement for so extended a list of occupation designations.

TABLE I.—NUMBER OF PERSONS 10 YEARS OF AGE AND OVER IN THE UNITED STATES ENGAGED IN EACH OF 303 SPECIFIED OCCUPATIONS: 1900.

OCCUPATIONS.	Entire area.	Continental United States.	OCCUPATIONS.	Entire area.	Continental United States.
All occupations.....	29,287,070	29,073,233	Domestic and personal service—Continued.		
Agricultural pursuits.....	10,438,219	10,381,765	Laborers (not specified).....	2,640,420	2,629,262
Agricultural laborers.....	4,459,346	4,410,877	Elevator tenders.....	12,691	12,690
Farm and plantation laborers.....	2,047,658	1,999,696	Laborers (coalyard).....	9,873	9,861
Farm laborers (members of family).....	2,366,313	2,366,149	Laborers (general).....	2,588,283	2,577,951
Garden and nursery laborers.....	45,375	45,032	Longshoremen.....	20,934	20,191
Dairymen and dairywomen.....	10,931	10,875	Stevedores.....	9,139	9,069
Farmers, planters, and overseers.....	5,681,257	5,674,875	Laundriers and laundresses.....	387,013	385,965
Farmers and planters.....	5,488,896	5,483,618	Laundry work (hand).....	365,056	364,020
Farmers (members of family).....	169,053	168,999	Laundry work (steam).....	21,957	21,945
Farm and plantation overseers.....	18,101	17,067	Nurses and midwives.....	121,269	120,956
Milk farmers.....	5,207	5,191	Nurses (trained).....	11,892	11,804
Gardeners, florists, nurserymen, etc.....	62,418	61,788	Nurses (not specified).....	103,747	103,523
Gardeners.....	37,181	36,577	Midwives.....	6,630	5,629
Florists, nurserymen, and vine growers.....	16,848	16,836	Restaurant keepers.....	34,023	33,844
Fruit growers.....	8,389	8,375	Saloon keepers.....	83,875	83,746
Lumbermen and raftsmen.....	72,190	72,020	Servants and waiters.....	1,565,440	1,560,721
Stock raisers, herders, and drovers.....	85,469	84,988	Servants.....	1,458,010	1,453,677
Stock raisers.....	37,709	37,629	Waiters.....	107,430	107,044
Stock herders and drovers.....	47,760	47,359	Soldiers, sailors, and marines (U. S.).....	128,736	43,195
Turpentine farmers and laborers.....	24,735	24,735	Soldiers (U. S.).....	105,894	34,998
Wood choppers.....	36,265	36,075	Sailors (U. S.).....	18,450	5,928
Other agricultural pursuits.....	5,608	5,532	Marines (U. S.).....	4,392	2,269
Apiarists.....	1,375	1,339	Watchmen, policemen, firemen, etc.....	131,191	130,590
Not specified.....	4,233	4,193	Watchmen, policemen, and detectives.....	116,615	116,056
Professional service.....	1,264,536	1,258,538	Firemen (fire department).....	14,576	14,534
Actors, professional showmen, etc.....	31,923	34,760	Other domestic and personal service.....	43,045	34,637
Actors.....	14,810	14,708	Bootblacks.....	8,243	8,230
Professional showmen.....	16,625	16,572	Hunters, trappers, guides, and scouts.....	11,340	3,048
Theatrical managers, etc.....	3,488	3,480	Not specified.....	23,462	23,359
Architects, designers, draftsmen, etc.....	29,560	29,524	Trade and transportation.....	4,778,233	4,766,964
Architects.....	10,604	10,581	Agents.....	241,333	241,162
Designers, draftsmen, and inventors.....	18,956	18,943	Agents (insurance and real estate).....	119,283	119,208
Artists and teachers of art.....	24,902	24,873	Agents (not specified).....	122,050	121,954
Clergymen.....	111,942	111,638	Bankers and brokers.....	73,384	73,277
Dentists.....	29,704	29,665	Bankers and brokers (money and stocks).....	66,047	65,943
Electricians.....	50,782	50,717	Brokers (commercial).....	7,337	7,334
Engineers (civil, etc.) and surveyors.....	43,535	43,239	Boatmen and sailors.....	80,024	78,406
Engineers (civil).....	20,153	20,063	Boatmen and canalmen.....	13,175	13,115
Engineers (mechanical and electrical).....	14,440	14,334	Pilots.....	4,976	4,896
Engineers (mining).....	2,908	2,888	Sailors.....	61,873	60,395
Surveyors.....	6,034	5,949	Bookkeepers and accountants.....	255,526	254,880
Journalists.....	30,098	30,038	Clerks and copyists.....	632,099	630,127
Lawyers.....	114,703	114,460	Clerks and copyists.....	570,105	568,181
Literary and scientific persons.....	18,907	18,844	Clerks (shipping).....	33,616	33,611
Authors and scientists.....	5,836	5,817	Letter and mail carriers.....	28,378	28,335
Librarians and assistants.....	4,184	4,180	Commercial travelers.....	92,936	92,919
Chemists, assayers, and metallurgists.....	8,887	8,847	Draymen, hackmen, teamsters, etc.....	541,115	538,933
Musicians and teachers of music.....	92,264	92,174	Draymen, teamsters, and expressmen.....	504,321	502,359
Officials (government).....	90,290	86,607	Carriage and hack drivers.....	36,794	36,574
Officials (national government).....	40,595	37,020	Foremen and overseers.....	55,503	55,450
Officials (state government).....	4,345	4,345	Foremen and overseers (livery stable).....	3,238	3,230
Officials (county government).....	22,777	22,697	Foremen and overseers (steam railroad).....	35,217	35,196
Officials (city or town government).....	22,573	22,545	Foremen and overseers (street railway).....	1,023	1,023
Physicians and surgeons.....	132,225	132,002	Foremen and overseers (not specified).....	16,025	16,001
Teachers and professors in colleges, etc.....	446,797	446,133	Hostlers.....	65,381	64,929
Teachers.....	439,522	438,861	Hucksters and peddlers.....	76,872	76,649
Professors in colleges and universities.....	7,275	7,272	Livery stable keepers.....	33,680	33,656
Other professional service.....	13,904	13,864	Merchants and dealers (except wholesale).....	792,887	790,886
Veterinary surgeons.....	8,190	8,163	Boots and shoes.....	15,239	15,239
Not specified.....	5,714	5,701	Cigars and tobacco.....	15,367	15,351
Domestic and personal service.....	5,693,778	5,580,657	Clothing and men's furnishings.....	18,097	18,095
Barbers and hairdressers.....	131,383	131,116	Coal and wood.....	20,866	20,860
Bartenders.....	88,937	88,817	Drugs and medicines.....	57,346	57,271
Boarding and lodging house keepers.....	71,371	71,281	Dry goods, fancy goods, and notions.....	45,840	45,820
Hotel keepers.....	54,931	54,797	General store.....	33,031	33,006
Housekeepers and stewards.....	155,524	155,153	Groceries.....	156,557	156,479
Janitors and sextons.....	56,620	56,577	Liquors and wines.....	13,119	13,108
Janitors.....	51,226	51,191	Lumber.....	16,774	16,772
Sextons.....	5,394	5,386	Produce and provisions.....	34,194	34,175
			Not specified.....	386,457	384,710

STATISTICS OF OCCUPATIONS.

TABLE I.—NUMBER OF PERSONS 10 YEARS OF AGE AND OVER IN THE UNITED STATES ENGAGED IN EACH OF 303 SPECIFIED OCCUPATIONS: 1900—Continued.

OCCUPATIONS.	Entire area.	Continental United States.	OCCUPATIONS.	Entire area.	Continental United States.
Trade and transportation—Continued.			Manufacturing and mechanical pursuits—Cont'd.		
Merchants and dealers (wholesale).....	42,343	42,326	<i>Fishing and mining.</i>		
Messengers and errand and office boys.....	71,695	71,622	Fishermen and oystermen.....	74,573	68,940
Bundle and cash boys.....	10,508	10,497	Miners and quarrymen.....	570,585	563,406
Messengers.....	44,460	44,425	Miners (coal).....	344,208	344,205
Office boys.....	16,727	16,700	Miners (gold and silver).....	59,095	52,024
Officials of banks and companies.....	74,246	74,072	Miners (not otherwise specified).....	132,634	132,593
Bank officials and cashiers.....	14,295	14,294	Quarrymen.....	34,598	34,584
Officials (insurance and trust companies, etc.).....	5,339	5,339	<i>Food and kindred products.</i>		
Officials (trade companies).....	20,479	20,389	Bakers.....	79,407	79,188
Officials (transportation companies).....	34,133	34,050	Butchers.....	113,449	113,193
Packers and shippers.....	59,769	59,545	Butter and cheese makers.....	19,261	19,241
Porters and helpers (in stores, etc.).....	54,274	54,191	Confectioners.....	31,242	31,194
Salesmen and saleswomen.....	611,787	611,139	Millers.....	40,576	40,548
Steam railroad employees.....	582,471	582,150	<i>Other food preparers.....</i>		
Baggagemen.....	19,085	19,085	Fish curers and packers.....	32,442	28,782
Brakemen.....	67,492	67,474	Meat and fruit canners and preservers.....	8,821	952
Conductors.....	42,935	42,929	Meat packers, curers, and picklers.....	9,251	9,249
Engineers and firemen.....	107,150	107,089	Meat packers, curers, and picklers.....	13,776	13,776
Laborers.....	249,576	249,377	Sugar makers and refiners.....	3,851	2,727
Station agents and employees.....	45,992	45,963	Not specified.....	2,243	2,078
Switchmen, yardmen, and flagmen.....	50,241	50,233	<i>Iron and steel and their products.</i>		
Stenographers and typewriters.....	112,464	112,364	Blacksmiths.....	227,076	226,477
Stenographers.....	98,827	98,743	Blacksmiths.....	218,585	217,993
Typewriters.....	13,637	13,621	Apprentices and helpers.....	8,491	8,484
Street railway employees.....	68,936	68,919	Iron and steel workers.....	290,724	290,538
Conductors.....	24,038	24,037	Iron and steel workers.....	203,220	203,069
Drivers.....	1,366	1,352	Molders.....	87,504	87,469
Laborers.....	4,644	4,644	Machinists.....	283,432	283,145
Motormen.....	37,436	37,434	Machinists.....	266,846	266,565
Station agents and employees.....	1,452	1,452	Apprentices and helpers.....	16,586	16,580
Telegraph and telephone linemen.....	14,765	14,757	Steam boiler makers.....	33,087	33,046
Telegraph and telephone operators.....	75,047	74,982	Steam boiler makers.....	31,191	31,150
Telegraph operators.....	55,852	55,824	Helpers.....	1,896	1,896
Telephone operators.....	19,195	19,158	<i>Stove, furnace, and grate makers.....</i>		
Undertakers.....	16,200	16,189	Stove, furnace, and grate makers.....	12,473	12,473
Other persons in trade and transportation.....	53,496	53,434	Tool and cutlery makers.....	28,122	28,122
Auctioneers.....	2,813	2,808	Wheelwrights.....	13,539	13,505
Decorators, drapers, and window dressers.....	3,053	3,052	Wireworkers.....	18,487	18,487
Newspaper carriers and newsboys.....	6,904	6,833	<i>Leather and its finished products.</i>		
Weighers, gaugers, and measurers.....	6,670	6,666	Boot and shoe makers and repairers.....	209,047	208,903
Not specified.....	34,056	34,015	Boot and shoe factory operatives.....	106,819	106,818
Manufacturing and mechanical pursuits.....	7,112,304	7,085,309	Shoemakers (not in shoe factory).....	101,643	101,500
<i>Building trades.</i>			Apprentices.....	586	585
Carpenters and joiners.....	602,741	600,252	Harness and saddle makers and repairers.....	40,193	40,101
Carpenters and joiners.....	587,082	584,635	Leather curriers and tanners.....	42,684	42,671
Ship carpenters.....	12,287	12,251	Curriers.....	15,770	15,769
Apprentices and helpers.....	3,372	3,366	Tanners.....	26,851	26,839
Masons (brick and stone).....	161,048	160,805	Apprentices.....	63	63
Masons.....	149,346	149,103	Trunk and leather-case makers, etc.....	7,051	7,051
Masons' laborers.....	9,284	9,284	Trunkmakers.....	3,657	3,657
Apprentices and helpers.....	2,418	2,418	Leather-case and pocketbook makers.....	3,394	3,394
Painters, glaziers, and varnishers.....	277,990	277,541	<i>Liquors and beverages.</i>		
Painters, glaziers, and varnishers.....	259,109	258,663	Bottlers and soda water makers, etc.....	10,546	10,519
Painters (carriages and wagons).....	17,850	17,347	Bottlers.....	9,718	9,716
Apprentices and helpers.....	1,531	1,531	Mineral and soda water makers.....	828	803
Paper hangers.....	22,004	21,990	Brewers and maltsters.....	20,984	20,962
Paper hangers.....	21,808	21,794	Distillers and rectifiers.....	3,146	3,144
Apprentices and helpers.....	196	196	<i>Lumber and its remanufactures.</i>		
Plasterers.....	35,706	35,694	Cabinetmakers.....	35,641	35,619
Plasterers.....	35,346	35,334	Coppers.....	37,226	37,200
Apprentices and helpers.....	860	860	Saw and planing mill employees.....	161,687	161,624
Plumbers and gas and steam fitters.....	97,884	97,785	Saw and planing mill employees.....	150,612	150,558
Plumbers and gas and steam fitters.....	92,315	92,216	Lumber yard employees.....	11,075	11,066
Apprentices and helpers.....	5,569	5,569	Other woodworkers.....	112,011	111,596
Roofers and slaters.....	9,068	9,067	Basketmakers.....	6,799	6,522

Apprentices.....	1,568	1,568			

CHANGES IN CLASSIFICATION IN 1900.

In the classification of occupations in 1890 several changes were made from that of 1880, but in 1900 that of 1890 was followed with a few changes in detail only. After mature consideration it was decided to make a transfer to "manufacturing and mechanical pursuits" of ① fishermen and oystermen and miners and quarrymen, classified in 1890 under "agricultural pursuits"; of engineers and firemen (not locomotive), classified in 1890 under "domestic and personal service"; and of officials of mining and quarrying companies, classified in 1890 with officials of banks, etc., under "trade and transportation." These transfers have been made also in the figures showing the number of persons engaged in each class of occupations in 1880 and 1890 wherever reproduced in this report for comparison with similar figures for 1900, except in the case of officials of mining and quarrying companies, the number of which was not separately published in the reports for those censuses.

STATEMENT OF OCCUPATIONS IN GENERAL AND INDEFINITE TERMS.

In 1900 farm and plantation laborers, garden and nursery laborers, stock herders and drovers, and the like, were frequently returned as farmers, gardeners,

florists, nurserymen, or stock raisers, but unless "farm" schedules were also returned for such persons they were classified under the "laborer" rather than the "proprietor" designation. For this reason the numbers of "gardeners, florists, nurserymen, etc." reported at the censuses of 1880 and 1890 are probably too high, as compared with the number reported in 1900.

Farm laborers were returned in 1900 under various designations, and often with no qualifying word indicating labor on farm or plantation, as, for example, help, helper, or hand; hired man (or boy); hireling, servant, employee, or assistant; laborer, laborer—day or month, laborer—cash or wages; wage worker, shareman, renter, etc. These and similar cases were included under the designation of farm laborer, especially in agricultural districts, unless the evidence of the schedule was entirely to the contrary.

The members of the families of farmers, particularly children, were also often reported as farmers rather than farm laborers, but their classification could be determined only according to age, no child under 16 being considered a farmer in any case. The result of the effort to classify correctly this class of persons in 1900 (see Table 1) shows that of the 4,410,877 agricultural laborers reported for continental United States, 2,366,149 were given as members of farm fami-

lies—that is, the wives, sons, and daughters of the farmers and planters operating the farms and plantations upon which they are reported as being employed. By comparing this number with the 1,999,696 farm laborers who have no blood or legal relationship to the persons for whom they are at work, it appears that considerably the larger proportion (53.6 per cent) of the farm labor was contributed by the members of farm families, not counting the labor of the farmer himself. A separate class is also made of members of families returned as farmers or planters where two or more members of the same family operate in common the farm or plantation upon which they resided at the time the census was taken. The number of such persons was not large, however, this class of farmers and planters for continental United States numbering 168,999, and constituting 3 per cent of all the persons returned as operating farms and plantations in 1900.

The large number of persons classified in 1900 under the designation “laborers (not specified)” is made up principally of persons living in city and town districts who were returned as either “laborers” without other description; common, general, or day laborers (or the equivalent terms thereof); city, town, or county laborers; laborers in parks and cemeteries; or laborers on streets, roads, sewers, drains, ditches, canals, water-works, etc. As previously stated, persons returned as “laborers” in agricultural districts were classified, as far as possible, as farm laborers and, similarly, assignment of other persons reported as laborers was made to manufacturing and mechanical pursuits, wherever the evidence on the schedule was sufficient to warrant such classification. In fact, every effort was made, as far as the nature of the returns permitted, to reduce the number of persons classified under the general designation “laborers (not specified),” but this effort did not prevent a very large increase in 1900 in this class of workers over the number reported in 1890.

Care was also taken, both in the instructions to enumerators and in the office work of classification, to distinguish between paid housekeepers and women who keep house for their families or themselves or who assist in the household duties without pay, and it is not believed that any considerable number of the latter class was included under the designation “housekeepers and stewards.” As much can not be said, however, concerning the return of nurses, and it is undoubtedly true that the large increase in this occupation in 1900 is due in part to the return as nurses, particularly in the South, of women who have the care of the younger children of the households in which they are employed, and who would have been more properly returned as servants.

This could not be determined from the schedules in most cases, however, and the only rule that could be applied consistently was not to include as a nurse any person under the age of 16, even though so reported. Effort was made, too, to separately classify trained nurses, and also to distinguish between launderers and laundresses working by hand and those working by steam processes, but how successful the effort has been it is difficult to say, owing, in very many cases, to the general nature of the returns.

The inclusion under “trade and transportation” of bookkeepers and clerks generally, irrespective of where they may happen to be employed, is largely a matter of necessity. An attempt was made in the classification work of 1900 to distinguish bookkeepers, clerks, stenographers, and typewriters employed in government offices, manufacturing establishments, and offices of professional people from those engaged in trade and transportation, but the results of this effort were too meager to admit of these distinctions being observed in the presentation of the occupation statistics. The returns for fully one-half of these groups of workers in 1900 were given in general terms only—such as bookkeeper, clerk, stenographer, typewriter—and thus did not afford any means whatever for a proper classification under their respective classes.

The large increase in the number of persons returned as salesmen and saleswomen, as compared with the relatively small increase in the number of persons reported as clerks and copyists (see Table IV, page 1), is indicative of the more accurate return in 1900 of these two classes of workers, the natural tendency being to report salesmen oftentimes as clerks in stores, when in reality their duties are not in any sense of a clerical nature.

In general it may be said that it was necessary to classify persons engaged in manufacturing and mechanical pursuits under general designations denoting the place of work or article produced, rather than under specific terms indicating the kind of work done, and that the proportion of indefiniteness in the returns of the groups of workers comprehending such general designations as makers, workers, employees, laborers, etc., ranges from one-fifth to one-half of the whole number of persons in each group.

Employees of car shops, carriage and wagon factories, and shipyards were separated wherever possible into metal and wood workers. Where this division could not be made on account of the indefiniteness of the returns, this class of employees has necessarily been included in the number reported as “not specified” under “other miscellaneous industries.”

PRESENTATION.

STATISTICS OF OCCUPATIONS IN MAIN CENSUS REPORTS.

In order to comply with the terms of the act of March 3, 1899, which provided that the main reports of the Twelfth Census should be published on or before July 1, 1902, or within two years from the date assigned by law for the completion of the enumeration, it was decided to limit the statistics of occupations in the main report on population¹ to a presentation of the number of persons, distinguished by sex, engaged in each of 303 specified occupations, in the entire United States and in the several states and territories, and the number in each of 140 occupation groups in each of the principal cities, reserving the detailed classification by general nativity, color, age periods, conjugal condition, parentage, and months unemployed, for more complete presentation in a separate report.

This plan not only gave time for a more careful examination and analysis of the results of the inquiry, but also permitted a more adequate and detailed treatment of the subject than would have been possible within the limits of a section of the main report on population. This is true in particular of the detailed classification by nativity, color, age, etc., of selected occupation groups for each state and territory and for each of the larger cities of the country.²

The more critical examination of the tabulations, including oftentimes a reference to the original entries on the population schedule, has made necessary minor changes in the statement of the total number of persons engaged in all gainful occupations and in certain of the occupation groups, published in Part II of the Report on Population. The net result of these changes, correcting errors occasioned by the pressure of work incident to the completion of the main report within the time prescribed by the law, is an increase for the United States of 1,148 in the total number of persons engaged in all gainful occupations, representing an increase of 1,663 in the number of males and a decrease of 515 in the number of females.

PLAN OF SPECIAL REPORT ON OCCUPATIONS.

In accordance with the plan herein outlined the returns of occupations at the Twelfth Census have been tabulated and are presented in this volume in three series of general tables, as follows:

Tables 1 to 30 inclusive, presenting for the entire United States, first, the number of persons 10 years of age and over, distinguished by sex, engaged in each of 303 specified occupations; and, second, the number of persons 10 years of age and over, distinguished by sex, engaged in each of 140 groups of occupations, classified

successively by general nativity, color, age periods, conjugal condition, parentage, and months unemployed.

Tables 31 to 41 inclusive, presenting for states and territories, first, the number of persons 10 years of age and over, distinguished by sex, engaged in all gainful occupations and in each of five main classes of occupations; second, the number of persons 10 years of age and over, distinguished by sex, engaged in each of 303 specified occupations; third, the number of persons 10 years of age and over, distinguished by sex, engaged in all gainful occupations and in each of five main classes of occupations, classified successively by general nativity, color, age periods, conjugal condition, parentage, and months unemployed; and, fourth, the number of persons of each sex 10 years of age and over engaged in selected groups of occupations (including, in many cases, minor occupation designations), classified by general nativity, color, conjugal condition, months unemployed, age periods, and parentage.

Tables 42 and 43, the former presenting, for each of the 161 cities having 25,000 inhabitants or more in 1900, the number of persons 10 years of age and over, distinguished by sex, engaged in each of 140 groups of occupations; and the latter presenting, for each of the 78 cities having 50,000 inhabitants or more in 1900, the number of persons of each sex 10 years of age and over engaged in selected groups of occupations (including, in many cases, minor occupation designations), classified by general nativity, color, conjugal condition, months unemployed, age periods, and parentage.

Preceding the general tables are three chapters of text and derived tables and two appendixes.

Chapter I relates to the return of occupations at the Twelfth Census comprising, first, a brief statement of the conditions under which the census of occupations was taken; and, second, a detailed explanation of the methods pursued in the classification of occupations in 1900, including a statement of the deviations from the classification used at the census of 1890.

Chapter II is devoted to a comparison of occupations at the Twelfth and preceding censuses comprising, first, a statement of the manner in which the returns concerning occupations were made at the censuses prior to 1900, giving the essential features of the instructions and explanations relating thereto, as far as they were available; and, second, a readjustment in accordance with the classification used at the census of 1900 of the occupation specifications contained in the printed reports of the earlier censuses.

Chapter III is a summary and analysis of results comprising a discussion, with explanatory tables, of the statistics of occupations contained in the general tables, in comparison with similar data for preceding censuses.

Appendix A is a reproduction of the instructions to enumerators concerning the return of occupations at the censuses of 1870, 1880, 1890, and 1900.

¹Twelfth Census, Vol. II, pages cxxvii-clvi; 503-601.

²See Tables 41 (page 220) and 43 (page 480) of the general tables.

Appendix B is a summary of the state and territorial laws regulating the employment of children.

A set of maps and diagrams, illustrating certain features of the statistics presented, has been inserted at the end of Chapter III.

In the general tables the states and territories are arranged in alphabetical order, but in the analytical presentations given in Chapter III they are arranged in geographical order under each of the five grand divisions into which continental United States is divided for census purposes.

USE OF TERMS IN GENERAL AND ANALYTICAL TABLES.

The terms used in the general and analytical tables are explained as follows:

UNITED STATES.—The entire area of enumeration at the Twelfth Census, comprising the states and territories constituting what is termed continental United States, the outlying territories of Alaska and Hawaii, and persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

CONTINENTAL UNITED STATES.—That part of the United States lying on the continent of North America south of the Canadian boundary.

MILITARY AND NAVAL.—Persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

HAWAII: WHITE.—The figures for white persons in Hawaii include Caucasians, Hawaiians, part Hawaiians, and South Sea Islanders.

COLORED.—Persons of negro descent, Chinese, Japanese, and Indians.

NEGRO.—All persons of negro descent.

INDIAN.—All Indians (including the Eskimos of Alaska), whether living in tribal relations or among the general population.

PARENTAGE:

Foreign parentage (or parents).—All persons, either of native or foreign birth, having either one or both parents foreign born.

Mixed foreign parentage.—All persons, either of native or foreign birth, having both parents foreign born but of different nationalities, as father born in Ireland and mother born in England, father born in Germany and mother born in Austria, etc.

Native parentage (or parents).—All persons, either of native or foreign birth, having both parents native born, or one parent native born and one parent for whom the birthplace is unknown, or both parents for whom the birthplace is unknown. Persons of this last description are sometimes referred to by the term "unknown parentage," but they are not of sufficient importance numerically to justify separate classification and are accordingly included with the class of native parentage.

UNEMPLOYED.—Persons ordinarily engaged in gainful labor but not employed during some portion of the census year (June 1, 1899 to May 31, 1900). The statistics are presented in connection with the occupations upon which persons so reported depend chiefly for support or in which they are usually engaged for the larger part of the time, in order to show to what extent the different classes of productive workers were unemployed during any portion of the census year, either at their customary occupation or in any other form of remunerative work.

CHAPTER II.

COMPARISON OF OCCUPATIONS AT THE TWELFTH AND PRECEDING CENSUSES.

SCOPE OF INQUIRY FROM 1820 TO 1900.

CENSUS OF 1820.

Inquiry was made for the first time at the census of 1820 as to the number of persons (including slaves) engaged in each of three great classes of occupations, namely, agriculture, commerce, and manufactures. This information formed part of the data to be collected on the population schedule by the marshals and their assistants, who were charged with the duty of taking the census. The number in each family engaged in each class of occupations was entered on the schedule against the name of the head of the family, the system of individual enumeration not being introduced until the census of 1850.

The character of the information expected is plainly indicated by the following extracts from the instructions to marshals at the census of 1820:

The purposes of the legislation in this act,¹ subsidiary to that of obtaining the aggregate amount of the population of the United States, are to ascertain in detail the proportional numbers of which it is composed, according to the circumstances of sex, color, age, condition of life, as heads or members of families, as free or slaves, as citizens or foreigners, and particularly of the classes (including slaves) engaged in agriculture, commerce, and manufactures.

* * * * *

The discrimination between persons engaged in agriculture, commerce, and manufactures will not be without its difficulties. No inconsiderable portion of the population will probably be found, the individuals of which being asked to which of those classes they belong, will answer, to all three. Yet, it is obviously not the intention of the legislature that any one individual should be included in more than one of them—of those whose occupations are exclusively agricultural or commercial, there can seldom arise a question, and in the column of manufactures will be included not only all the persons employed in what the act more specifically denominates manufacturing *establishments*, but all those artificers, handicraftsmen, and mechanics, whose labor is preeminently of the hand, and not upon the field.

By persons engaged in agriculture, commerce, or manufactures, your assistants will understand that they are to insert in those columns, not whole families, including infants and superannuated persons, but only those thus engaged by actual occupation. This construction is given to the act because it is believed to be best adapted to fulfill the intentions of the legislature, and because,

being susceptible of the other, it might be differently construed by different persons employed in the enumeration, and thus destroy the uniformity of returns, essential to a satisfactory result.

Besides this enumeration of manufactures, the marshals and their assistants are required, by the tenth section of the act, to take an account of the several *manufacturing establishments and their manufactures*, within their several districts, territories, and divisions; and the meaning of the legislature, by this provision, is illustrated by the clause in the oaths of the marshals and assistants, that they will take an account of the manufactures, *except household manufactures*, from which it seems fairly deducible, that, in the intention of the legislature, persons employed only upon household manufactures are not to be included in the column of persons bearing that denomination, the occupation of manufacturing being, in such cases, only incidental, and not the profession properly marking the class of society to which such individual belongs.

This, then, offers a criterion by which your assistants may select the column of occupation to which each individual may be set down, namely, to that which is the principal and not the occasional, or incidental, occupation of his life.²

CENSUS OF 1840.

The population schedule used at the census of 1830 did not call for similar data, but at the census of 1840 an effort was made, following the plan of enumeration in 1820, to obtain a statement of the number of persons in each family employed in each of seven principal classes of work, namely, mining, agriculture, commerce, manufactures and trades, navigation of the ocean, navigation of canals, lakes, and rivers, and learned professions and engineers.

The instructions to marshals at the census of 1840 did not contain any specific reference to the manner in which the number of persons employed in each of the seven classes of occupations mentioned was to be determined, but it is evident from the form of the inquiry that it was the intention to include, as in 1820, all members of the family (including slaves) who were so occupied.

The results of these two inquiries, representing the first attempts to classify the population according to leading classes of employment, are reproduced by states and territories in Table II.

¹ Census of 1820, page 9. The differences in the totals for the United States in this table, as compared with those given in the report for 1820, are due to errors in addition, as follows: 1,688 in agriculture, 7 in commerce, and 180 in manufactures.

² Sixth Census, pages 201, 475, and 477.

The figures presented in Table II are arranged with reference to the present boundaries of the states therein named, necessitating a division of the figures given (1) for Virginia for that part now known as West Virginia; (2) for the District of Columbia for that part re-ceded to Virginia in 1846; and (3), for 1820 only, for Michigan for that part now included in Wisconsin.

In using the total figures contained in this table, it must be borne in mind that they can not be taken as representing the whole number of persons gainfully employed at either census, as the inquiries comprehended certain classes only. The expansion from three to seven classes of employments in 1840 gave a number which was more nearly representative of the whole body of workers than was the case in 1820, but it did not include servants and other persons rendering personal service, and probably did not include government officials, clerks, and employees.

CENSUS OF 1850.

Detailed inquiry was made in 1850, for the first time, as to the name, sex, color, age, nativity, etc., of each person enumerated, and in this connection a specific

return was required of the profession, occupation, or trade followed by each free male over 15 years of age.

The return of occupations in 1850 was called for on the schedule for free inhabitants only,¹ and did not apply, as in 1820 and 1840, to females or to slaves. Detailed instructions were given concerning the manner in which the answers to the census inquiries were to be made, the instructions relating to occupations being as follows:

Under head 7, entitled "*Profession, occupation, or trade of each person over 15 years of age*," insert opposite the name of each male the specific profession, occupation, or trade which the said person is known and reputed to follow in the place where he resides, as clergyman, physician, lawyer, shoemaker, student, farmer, carpenter, laborer, tailor, boatman, sailor, or otherwise, as the fact may be. When more convenient, the name of the article he produces may be substituted.

When the individual is a clergyman, insert the initials of the denomination to which he belongs before his profession, as Meth. for Methodist, R. C. for Roman Catholic, O. S. P. for Old School Presbyterian, or other appropriate initials, as the fact may be. When a person follows several professions or occupations the name of the principal one only is to be given. If a person follows no

¹ Two schedules were used for the enumeration of population in 1850, one for free inhabitants and one for slaves.

particular occupation, the space is to be filled with the word "none."¹

The results of the inquiry were presented in the printed report by states and territories, first, in an alphabetical list comprising 323 occupation designations, and, second, in summarized form under the following general heads: Commerce, trade, manufactures, mechanic arts, and mining; agriculture; labor, not agricultural; army; sea and river navigation; law, medicine, and divinity; other pursuits requiring education; government, civil service; domestic servants; other occupations.

CENSUS OF 1860.

At the census of 1860 the inquiry relating to occupations, contained on the schedule for free inhabitants, was made to apply to each person, male or female, over 15 years of age, instead of being confined, as it was in 1850, to males only. This census was taken under the same provisions of law as that of 1850 and practically the same schedules and instructions were used. The results contained in the printed report for that census consisted of a statement, in the form of an alphabetical list, of the number of free persons over 15 years of age, without distinction of sex, engaged in each of 584 occupations.

CENSUS OF 1870.

The inquiry relative to occupations in 1870 was made to embrace the profession, occupation, or trade of each person, male or female. Detailed instructions² concerning the returns were contained in the book of instructions to marshals and their assistants, to whom, as at former censuses, the work of enumeration was intrusted. No age limit was specified on the schedule, but it was stipulated in the instructions that the inquiry was not to be made for infants or children too young to take any part in production, thereby, in effect, confining the returns to persons 10 years of age and over, the age limit observed in all succeeding censuses. The presentation of occupations comprised 338 specifications, classified under four main heads, namely, agriculture, professional and personal services, trade and transportation, and manufactures and mechanical and mining industries. The persons enumerated in each occupation were subdivided by sex, age (3 periods), and nationality (principal countries of birth).

CENSUS OF 1880.

The census of 1880 was taken under a new act, approved March 3, 1879, which entirely reorganized the census machinery, introducing the system employed at the present time. By this change the enumeration, which previously had been intrusted to the United States marshals and their assistants, was placed under

the charge of supervisors, specially appointed by the President, with the consent of the Senate, and the returns were collected by enumerators selected by the supervisors, with the approval of the Superintendent of the Census. At this census the occupation inquiry was specifically restricted on the schedule to persons 10 years of age and over. The instructions² to the enumerators were substantially identical with those used at the census of 1870, and the same methods were observed in the presentation of the returns; the subdivisions were by sex, age, and principal nationalities (fewer in number than in 1870); the number of occupation designations was reduced to 265.

CENSUS OF 1890.

At the census of 1890 no stipulation was made in either the schedule or the instructions² as to the age limit to be observed. It was intended to have the enumerator describe, as accurately as possible, the occupation of each and every person at work, irrespective of age, but the tabulations of the statistics of occupations did not include, in any case, persons under 10 years of age. The subdivisions according to sex, age periods, and nationalities of the foreign born were very much extended, and many other important details were added, comprehending general nativity and color, conjugal condition, illiteracy, inability to speak English, citizenship, birthplace of mothers, and months unemployed. The general plan of grouping the returns under four or five main class heads was maintained, but several changes from the classification of 1880 were made and the number of occupation designations still further reduced to 218.

CENSUS OF 1900.

As explained, the presentation of occupations at the Twelfth Census has been made to comprehend 303 designations of occupations arranged under 140 occupation groups, conforming, as nearly as possible, to the general classification used at the census of 1890.

SUMMARY FOR CENSUSES FROM 1850 TO 1900.

This brief review of the development of the occupation inquiry makes it evident that there has been no fixed classification or arrangement of occupations in the reports of the successive Federal censuses. Under the system of a temporary census organization prevailing up to the present time, the officials of each succeeding census had no means of knowing, in detail, the methods and plans of their predecessors, and therefore could not follow their lead with such fidelity as to make the returns of occupations entirely comparable with those of preceding censuses. Each census has been, to some extent, a law unto itself in these respects, as is indicated by the following summary of the number of

¹ Seventh Census, page xxii.

² These instructions are reproduced in full in Appendix A.

occupation designations contained in the printed reports at the censuses from 1850 to 1900, inclusive:

1850—323, for free males over 15 years of age.

1860—584, for free persons (without distinction of sex) over 15 years of age.

1870—338, for all persons (by sex) 10 years of age and over.

1880—265, for all persons (by sex) 10 years of age and over.

1890—218, for all persons (by sex) 10 years of age and over.

1900—303 (reduced to 140, for certain purposes), for all persons (by sex) 10 years of age and over.

COMPARISON OF OCCUPATIONS AT THE CENSUSES OF 1870 TO 1900.

This brief description of the scope and method of the occupation inquiry at successive censuses prepares the way for a presentation of the number of persons credited to the various occupation designations used at the several censuses, arranged according to the classification of occupations in 1900. This is done in two tables, namely, Table III relating to the censuses of 1870, 1880, 1890,

and 1900, and Table v relating to those of 1850 and 1860.

Table III shows the number of persons credited to each occupation designation in the census reports for 1870, 1880, 1890, and 1900, arranged under the 140 occupation groups (or subdivisions thereof) used in the 1900 classification. The figures for 1900 refer to continental

² Fruit growers (except grape growers) included in 1890 with farmers, planters, and overseers.

United States, including Indian Territory and Indian reservations—areas not included in previous censuses of population.

Officials and employees in 1880 were combined for certain designations under "trade and transportation," as "officials and employees of telegraph companies," "officials and employees of street railroad companies," etc. This prevented their arrangement strictly in accordance with the classification of 1900, but for purposes of comparison the number of persons so reported in 1880 has been distributed on the basis of the separate statement made for officials and employees at the census of 1870.

The notes appended to Table 1 (page 7) of the general tables explanatory of the figures reported for 1900 are not repeated in Table III, but explanatory notes are used in all

cases where the classifications of occupations at the several censuses do not coincide, or where fuller information is needed for the proper understanding of the figures.

The return of occupations at the censuses from 1870 to 1900, inclusive, comprehended, as previously stated, all persons, both male and female, 10 years of age and over, and the results for these censuses are, therefore, on the same basis as far as the class of the population considered is concerned. In comparing the figures contained in Table III, however, it should be remembered that there was an omission of population in the Southern states in 1870, representing, approximately, 1,260,000 people,¹ which necessarily affects somewhat the returns of occupations at that census.

Hair cleaners, dressers, and workers	1,965	Fireworks makers	101
Quartz and stamp mill operatives and laborers	1,449	Fur workers	1,191
Others in manufacturing, mechanical, and mining industries	13,542	Glue makers	241
		Hair cleaners and dressers	1,026
		Hose makers (leather and other)	248
		Ink makers	78
		Musical instrument makers (not specified)	377
		Plaster molders	223
		Quartz and stamp mill laborers	617
		Truss makers	74
		Whip makers	609
		Window shade makers	245

⁶ Combined in 1890 with telegraph and telephone linemen under "trade and transportation."⁷ Combined in 1880 and 1890 with piano and organ makers. (See "other woodworkers" under "lumber and its manufactures.")⁸ Carriage and wagon makers and ship and boat builders classified in 1900 according to kind of work done, as metal work, woodwork, etc.

1 STATISTICS OF OCCUPATIONS.

The detailed presentation in Table III of the number of persons credited to each specified occupation at the last four censuses is supplemented by Table IV, showing, wherever practicable, a classification by sex of the total number of persons reported at these censuses in the several occupation groups of the 1900 classification. To a limited extent the subdivisions under the main groups are also given, in order particularly to

supply the figures for males and females at each census, wherever they seemed fairly comparable.

Some changes have been made in the assignment of occupation designations under class heads for the censuses of 1870, 1880, and 1890, in order that the class totals may correspond with those for 1900; consequently the totals as presented in Table IV differ from those contained in the printed reports for the three censuses named.

TABLE IV.—NUMBER OF PERSONS ENGAGED IN SPECIFIED OCCUPATIONS, FOR BOTH SEXES AND FOR EACH SEX SEPARATELY: 1870, 1880, 1890, AND 1900.

¹ For continental United States.² Does not include apprentices.³ Does not include molders or apprentices.⁴ Clockmakers.⁵ Box factory operatives; probably includes boxmakers (wood).⁶ Does not include carpetmakers (rag); included in 1900 with "other textile workers."⁷ Does not include officials of mining and quarrying companies, classified in 1890 with officials of banks and companies, under "trade and transportation."

COMPARISON OF OCCUPATIONS AT THE CENSUSES OF 1850 AND 1860.

As previously stated, the occupation inquiry at the census of 1850 was confined to free males over 15 years of age, and at the census of 1860 was extended to include all free persons above that age without distinction of sex. The results, therefore, are not strictly comparable with those of later censuses; but for historical purposes and for convenience of consultation the occupation designations reported at these two censuses, numbering 323 in 1850 and 584 in 1860, with the persons credited

thereto, comprising 5,329,506¹ free males at the former census and 8,235,557² free persons of both sexes at the latter, have been arranged under the 140 main groups of the 1900 classification in the following table:

¹Not including 42,370 students and cadets given in the report for 1850 as a part of the table of occupations.

²Not including 51,486 students, nuns, and sisters of charity, given in the report for 1860 as a part of the table of occupations.

TABLE V.—NUMBER OF PERSONS CREDITED TO THE VARIOUS OCCUPATION DESIGNATIONS USED AT THE CENSUSES OF 1850 AND 1860, ARRANGED ACCORDING TO THE CLASSIFICATION OF OCCUPATIONS IN 1900.

¹ Musical instrument makers combined in 1850 with pianoforte makers, under "other woodworkers."

All designations of "manufacturers" in 1850 and 1860 have not been assigned in Table v to the 1900 occupation group of "manufacturers and officials." Those designations for which the number of persons reported indicated that the employees of manufacturing establishments were included have been assigned to other groups, as, paper manufacturers to paper and pulp mill operatives, silk manufacturers to silk mill operatives, etc.

The returns of occupations at the censuses of 1850 and 1860 were not very satisfactory, either as to their completeness or the detail in which the occupations were stated. This was particularly the case in 1850, and the presentation of the occupation tables was accompanied by the following explanatory remarks:¹

It is much to be regretted that no better exposition could be made in this publication of the employments of the people of the United States. * * * The tables which are given include only the free males over 15 years of age, differing from those of previous returns, which include the females also. It is easy, at a glance, to detect the frequent deficiencies of the figures. States are returned

with an aggregate of certain occupations greatly short of what is known to be the fact, and what can be proved by local directories and registers. Occupations are not mentioned, which, in the same manner, are ascertained to exist. A small state will approximate to the number of a large one, in occupations that are known to obtain in very nearly equal proportions in all of the states. The ratio of occupations to the whole number of males over 15 years of age in the several states varies, without regard to, and even in spite of, known rules. The occupations on the population sheet differ widely, more widely than was called for, from those collected on the sheets of industry, and aggregated and annexed, etc.

The heading "other occupations" will account for some of these discrepancies. Under it are absorbed a great variety of minor employments, which being in number too few for a state, were thought to be better placed under this head than under any specific ones. The carelessness of the enumerators accounts for others; but more are explained in reflecting how many occupations often belong to the same person, who, in returning them, will not be very apt to follow any general rule, though instructed to do so.

Had the heading "other occupations" not been already adopted, and a very large portion of the work arranged under it, the Superintendent would have excluded it, and separated each employment by itself, however unimportant; or if this had not been practicable, would have laid down a rule for condensation, and, in a note, enumerated all of the employments which were disposed of thus. Such a course would have been pursued in any case, whatever the

¹ Seventh Census, pages lxvi and 1015.

labor involved, if the table¹ which follows, and which is arranged under certain limited classes, could have been by that means perfected. The difficulty was still existing—together incapable of removal—of separating the laborers so as to show how many were agricultural, nonagricultural, or engaged in the services of commerce, etc. All that could be done was to arrange the data to the best advantage, and to indicate by the notes, for the information of the reader, how that arrangement or reclassification was made. In general, it is assumed, for these purposes, that the laborers are not agricultural, though, without question, a great many are, and “other occupations” are taken to include only persons that are employed in trade or manufactures. This arrangement will be more nearly correct than any other. The reader can judge for himself, however, and frame any other tables if he prefers. The subject will receive attention again.

* * * * *

In the construction of this table (Table x, for each state and territory) it was deemed advisable to follow as closely as possible the returns of the assistant marshals, notwithstanding some difficulties occurred which seemed to require a greater condensation of the headings. The principal one arises from the fact that frequently two or more occupations are united under one general business, in which case the assistant marshal generally returns the individual as following that particular employment which is the most common or important, and consequently the incidental pursuit is not shown in the table. An enumeration of some of these headings which might have been condensed will at once show the mode of rendering them consistent, viz: “Cabinet and chair makers,” and “undertakers”; “carpenters,” “joiners,” and “builders”; “clock and watch makers,” and “jewelers”; “copper and tin smiths”; “dairymen” and “milkmen”; “drivers,” “carters,” and “teamsters”; “machinists” and “engine manufacturers”; “plough

makers” and “agricultural implement makers”; “refectory keepers,” “barkeepers,” etc.; “lath, shingle, and stave makers”; etc. Another apparent discrepancy results from the fact that frequently one individual has two distinct pursuits, or a regular and incidental occupation. This case includes almost all holders of small offices, whose regular pursuit is given by the assistant marshal, but whose official occupation is lost. This will account for the small number of “bank officers,” “insurance company officers,” “city, county, and town officers,” etc. A third difficulty is, that the officers have frequently returned the employees and operatives of large manufacturing establishments as “laborers,” and consequently the “factory hands” are not sufficiently represented in the tables. To supply this deficiency, there is attached to each of the tables a brief statement of the numbers of male hands employed in several of the leading interests, as shown by the industrial schedules.

The report for 1860 contains no statement relative to the sufficiency or explicitness of the occupation returns, but the Superintendent of the Ninth Census (1870),² in commenting upon the return of occupations under general and unmeaning terms, says:

In the census of 1860 the occurrence of these vague and unsatisfactory terms was so frequent that the utmost efforts in compilation could not have succeeded in removing tens of thousands of cases where, from the specification of the occupation, it was impossible to judge to which of the great branches of industry—manufactures, agriculture, mining, commerce, or professional life—the person reported belonged; or to avoid tens of thousands more where, the great branch of industry being determined, it was entirely impossible to say to which of its principal departments he should be assigned.

CHAPTER III.

SUMMARY AND ANALYSIS OF RESULTS.

SUFFICIENCY OF THE OCCUPATION RETURNS.

The return of occupations has been made at each of the last four censuses with reference to persons of each sex 10 years of age and over, but, for reasons already explained,¹ this discussion is confined to the results shown for the last three censuses only, namely, 1880, 1890, and 1900.

The differences in the age and sex constitution of the population affect to a greater or less extent the proportions of workers reported in the several states and territories. Some of the variations which occur may be due to the manner in which the enumeration was made in the various sections of the country, either at the same census or at different censuses. It is essential at the very outset of this discussion, therefore, to make a comparison for continental United States, as shown by Table VI below, of the proportion of males and of females 10

years of age and over reported as engaged in gainful occupations in each state and territory, at each of the last three censuses, in order to establish, as nearly as possible, the relative sufficiency of the occupation returns at these periods.

An inspection of the percentages contained in Table VI shows that, while many of the variations in the proportions of workers can be ascribed very properly to differences of age and sex, the greatly decreased proportion of workers in many of the states and territories in 1890, as compared with 1880 and 1900, suggest the possibility of a deficiency in the returns of occupations in such cases, affecting certain classes of gainful workers and possibly one or more occupation groups. Accordingly, the variations above noted were analyzed and found to be most pronounced in the returns for children at work as agricultural laborers, as hereinafter explained.

¹Chapter II, page xxxiii.

TABLE VI.—PER CENT WHICH THE NUMBER OF MALES AND OF FEMALES ENGAGED IN GAINFUL OCCUPATIONS FORMS OF THE TOTAL NUMBER OF THE SAME SEX 10 YEARS OF AGE AND OVER, BY STATES AND TERRITORIES: 1880, 1890, AND 1900.

PROBABLE DEFICIENCY IN NUMBER OF CHILDREN
REPORTED AS AT WORK IN 1890.

In the discussion relating to occupations in the Report on Population for 1890, attention was called to the marked decrease shown in the proportion of persons 10 to 14 years of age at work, as compared with the proportion of those 10 to 15 years of age at the preceding census; but as the instructions to enumerators in 1890 were practically the same as those which had been prepared by Gen. F. A. Walker, Superintendent of the Tenth Census, and used by him in 1880, there did not appear to be any good reason for doubting the accuracy of the returns for 1890. Moreover, confidence in these returns was strengthened by the fact that the changes they seemed to indicate were such as might easily have occurred, and possible reasons for these variations were suggested in the report for 1890. But when the figures for the succeeding census (1900) became available, an analysis of the returns for 1890, in the light of those for both 1880 and 1900, at once revealed the fact that the abrupt change shown in 1890 was not maintained in 1900; on the contrary, the proportion of children from 10 to 15 years of age who were at work in 1900 showed significant uniformity with the proportion in 1880, especially in the Southern states, in which the supposed change in 1890 was most pronounced. It appeared not unlikely, therefore, that the census of 1890 understated the number of children from 10 to 14 years of age gainfully occupied.

It is to be regretted that the age period representing children employed in 1890 (10 to 14) differs slightly from that used in 1880 and 1900 (10 to 15), because no readjustment of figures can make the three census periods comparable with absolute accuracy. But even if allowance be made for some variation due to this cause, there still remains so marked a difference in the figures for 1890, as compared with those for 1880 and 1900, that some other explanation is demanded. From a careful study of such facts as are available, the following conclusions appear to be justified:

1. The similarity of the proportions, in all states and territories, of persons between 10 and 15 years of age gainfully employed in 1880 and 1900 proves that there has been no marked change in this age group during the twenty-year period. Therefore the marked deficiency in the proportion of persons from 10 to 14 years of age gainfully employed in 1890 should be regarded as probably erroneous.

2. This deficiency was practically confined to agricultural pursuits, and within this main class to agricultural laborers; it was most marked in the Southern states, and for the entire country appears to have been considerably more than half a million.

3. By using, for 1890, the mean between figures based upon the proportions of each sex from 10 to 15 years of age at work in 1880 and 1900 for each state and terri-

tory, the total number of agricultural laborers is increased by 582,522. The use of this mean is justified by the facts, and produces figures more trustworthy than the actual returns for 1890.

ANALYSIS OF RETURNS FOR 1890.

As the figures for the number of children gainfully occupied in 1900 were prepared for both the 10 to 14 and 10 to 15 age periods, it is possible to make an exact comparison of the former with the returns for 1890, and of the latter with those for 1880. This is done in Table VII, in which the relative importance of the number of children engaged in gainful occupations at each census is clearly shown.

TABLE VII.—*Number of children engaged in gainful occupations compared with the total number of children of the same age, for both sexes and for each sex separately: 1880, 1890, and 1900.*

A.—CHILDREN 10 TO 14 YEARS OF AGE.

¹ For continental United States.

In Table VII the upper portion shows, for 1890 and 1900, the total number of children from 10 to 14 years of age and the number and per cent reported as gainfully employed. The difference in the percentages here shown is very marked, the change for males being especially noticeable.

The lower portion of the table shows, for 1880 and 1900, corresponding figures for children from 10 to 15 years of age. The differences between the percentages for 1880 and 1900 herein shown are insignificant, indicating clearly that the marked decrease in the number of children from 10 to 14 years of age gainfully occupied in 1890, as shown by the returns for that census, can not be regarded as normal.

When the general facts indicated in Table VII were analyzed for each state and territory separately, it was found that in the North Atlantic states, with the exception of Maine, New Jersey, and Pennsylvania, the

SUMMARY AND ANALYSIS OF RESULTS.

lxvii

returns showed a larger proportion of children at work in 1890 than in 1900; that in the Southern states the returns were very incomplete for both males and females; and that in the North Central and Western states they were noticeably defective for males.

The extent to which the returns of children from 10 to 14 years of age at work in 1890 appear to have been deficient in different sections of the country is revealed by a comparison with similar figures for 1900, in the following table:

TABLE VIII.—NUMBER OF CHILDREN OF EACH SEX 10 TO 14 YEARS OF AGE ENGAGED IN GAINFUL OCCUPATIONS COMPARED WITH THE TOTAL NUMBER OF THE SAME SEX AND AGE, BY STATES AND TERRITORIES: 1890 AND 1900.

STATES AND TERRITORIES.	MALES 10 TO 14 YEARS OF AGE: 1900.			MALES 10 TO 14 YEARS OF AGE: 1890.			FEMALES 10 TO 14 YEARS OF AGE: 1900.			FEMALES 10 TO 14 YEARS OF AGE: 1890.

The significance of the variations shown in Table VIII for the several geographic divisions should not be overlooked. In the North Atlantic division, where manufacturing and mechanical industries predominate, the proportion of agricultural laborers is comparatively small, and some fluctuation, due to industrial changes, but hardly in the direction shown, might reasonably be expected. Yet this group of states showed the least change, while in those geographic divisions where agriculture is the prevailing industry, and changes therefore least likely, the variation was most marked. Hence it is reasonable to suppose that if any omissions were made by the enumerators they must have occurred almost wholly in connection with the return of persons engaged in agricultural labor.

Examination of the schedules for 1890 makes it clear that the enumerators at that census did not properly interpret the instructions concerning children at work on farms.¹ The enumerator was required to make an entry on the schedules, in the space devoted to occupations, for every person enumerated, either by the

return of a specific occupation or by the use of some term indicative of status in the family, as *housewife*, for a woman keeping house; *housework*, for a grown daughter assisting in household duties without pay; *at school*; *at home*, for a person too young to go to school; or *no occupation*. The entries for nonworking members of the household were not so specifically required in 1880, and in 1890 doubtless the enumerator, when uncertain concerning the younger members of a family, either used the entry *at school* or left the space blank.

In certain districts the number of children from 10 to 14 years of age returned without gainful occupation was so large as to create the suspicion that many children at work in 1890 had been erroneously reported by the enumerators. A considerable number of schedules for 1890, therefore, were examined in detail and the character of the returns suggested strongly the inference that in many cases, especially those of large families living on farms, the older children, although returned without occupation, were engaged in farm labor, within the meaning of the instructions. The reasonableness of this inference is fully borne out by the figures contained in Table IX, in which comparison is made for each state and territory of the relative proportions of children from 10 to 14 years of age who were actually returned as agricultural laborers at the two censuses named.

¹The instructions concerning this subject issued to enumerators in 1890 (which were practically identical with those issued in 1880) were as follows: The doing of domestic errands or family chores out of school hours, where a child regularly attends school, should not be considered an occupation. But if a boy or girl, whatever the age, is earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry, the kind of work performed should be stated.

SUMMARY AND ANALYSIS OF RESULTS.

lxix

TABLE IX.—NUMBER OF CHILDREN OF EACH SEX 10 TO 14 YEARS OF AGE RETURNED AS AGRICULTURAL LABORERS COMPARED WITH THE TOTAL NUMBER OF THE SAME SEX AND AGE, BY STATES AND TERRITORIES: 1890 AND 1900.

¹ Less than one-tenth of 1 per cent.

From the evidence afforded by the percentages given in Table IX, when compared with those contained in Table VIII, it is clear that the discrepancies between the proportions of children reported as at work in 1890 and 1900 are due to omissions in the returns of persons engaged in agricultural labor in 1890, and that these omissions were confined almost wholly to the children of farm families.

Having established a strong probability of error, the next step was the preparation of figures which could be offered and generally accepted as more accurate than the original returns. Obviously, it was necessary to

make comparable the figures for the three censuses—1880, 1890, and 1900. Accordingly, the number of persons from 10 to 14 years of age reported as engaged in gainful occupations in 1890 was increased in the proportion which the number from 10 to 14 years of age at work in 1900 bore to the number from 10 to 15 years of age at work in that year. Having thus made the figures for 1890 more nearly comparable with those for 1880 and 1900, the percentages derived therefrom are now brought into comparison in Table X with similar percentages based upon the actual returns for the other two census periods.

TABLE X.—PER CENT WHICH THE NUMBER OF CHILDREN OF EACH SEX 10 TO 15 YEARS OF AGE ENGAGED IN GAINFUL OCCUPATIONS FORMS OF THE TOTAL NUMBER OF THE SAME SEX AND AGE, BY STATES AND TERRITORIES: 1880, 1890, AND 1900.

¹ Dakota territory.

The substantial agreement between the percentages denoting the proportions of children at work in 1880 and in 1900, for continental United States, for each of its geographic divisions, and in general for each of the states and territories, proves that the change during the twenty-year period was very slight. As the percentages for 1890 show an apparent difference which is very marked, it is clear that the use, for that year, of the mean between figures based upon the proportions of males and females from 10 to 15 years of age at work in

1880 and in 1900 would produce figures more accurate than the actual returns.

Table XI presents, for continental United States and for each state and territory, the number and percentage of males and females from 10 to 15 years of age engaged in gainful occupations in 1890, as corrected by the use of the mean between figures based upon the 1880 and 1900 proportions, in comparison with the figures approximately as returned; that is, figures derived from the actual returns for persons from 10 to 14 years of age, as previously explained.

SUMMARY AND ANALYSIS OF RESULTS.

lxxi

TABLE XI.—NUMBER OF CHILDREN OF EACH SEX 10 TO 15 YEARS OF AGE ENGAGED IN GAINFUL OCCUPATIONS, AS RETURNED AND AS CORRECTED, COMPARED WITH THE TOTAL NUMBER OF THE SAME SEX AND AGE, BY STATES AND TERRITORIES: 1890.

The corrected figures presented in Table XI undoubtedly reflect more accurately than do the returns for the census of 1890 the actual facts concerning children at work in that year. It appears, therefore, that instead of a total of 921,249 persons of both sexes from 10 to 15 years of age gainfully employed in 1890, as based upon the returns for those from 10 to 14 years of age, the total was, approximately, 1,503,771, showing a difference of 582,522, of which nearly three-fourths are found in the South Atlantic and South Central divisions.¹

It is interesting to observe that in a large majority of those states in which the use of the mean between figures based upon the proportions shown in 1880 and in 1900 reduces the number of all persons 10 to 15 years of age gainfully employed in 1890, the same method produces an increase in the number of agricultural laborers 10 to 15 years of age in that year. This fact may be regarded as an interesting corroboration of the inaccuracy of the returns for agricultural laborers from 10 to 15 years of age, not only in those states in which there has been a decrease for all occupations, but even in those localities where there appears to have been a normal increase.

From the foregoing analysis the presumption of deficiency in the returns for agricultural laborers from 10 to 15 years of age in 1890 is so strong that it is believed to justify the substitution of corrected figures throughout this volume, and this accordingly has been done.

RETURN OF FARM LABORERS AS FARMERS IN 1890.

The whole number of agricultural laborers actually returned in 1890 was 3,004,061, as against a similar return in 1880 of 3,323,876, and in 1900, for continental United States, of 4,410,877. These figures show, on their face, a decrease in the number of agricultural laborers of 319,815 from 1880 to 1890, and an increase of 1,406,816 from 1890 to 1900; but even after making allowance for the 582,522 children added to this occupation group by the correction of the 1890 figures, there still remains a considerable disparity in the figures for the three censuses, as shown by the following summary:

Number of agricultural laborers 10 years of age and over: 1880, 1890, and 1900.

CENSUS YEARS.	Number of agricultural laborers.	Increase over preceding census year.
1900 ¹	4,410,877	824,294
1890.....	3,586,583	262,707
1880.....	3,323,876	

¹ For continental United States.

In this summary the corrected figures for 1890 are employed, but the increase shown for the decade from 1880 to 1890—262,707—is small as compared with that for the next decade, when it amounted to over 800,000. It is clear, therefore, that there must have been either a violent change from 1890 to 1900 or that a further deficiency exists in the number of agricultural laborers of all ages for 1890. If, as is very probable, this deficiency is due to the return by the enumerators of agricultural laborers under some other classification, it is most natural to suppose that they were reported as farmers. Some light can be thrown on this possibility by comparing in Table XII (page lxxiii) for the three censuses the number of farms, as reported on the agricultural schedule, and the number of farmers, as reported on the population schedule.

In order to make the number of farms, as defined for census purposes, as nearly comparable as possible with the number denoting farmers in Table XII, the latter head has been made to include gardeners, florists, nurserymen, etc., and stock raisers, as well as farmers, planters, and overseers. It was found in the classification work of 1900 that farm and plantation laborers, garden and nursery laborers, and stock herders and drovers were frequently returned as farmers, gardeners, florists, nurserymen, or stock raisers, but unless farm schedules were also returned for such persons they were classified under the laborer rather than the proprietor designation. By this means a much closer correspondence was reached between the population and agricultural returns than had been the case heretofore, and this is clearly brought out by the figures contained in Table XII. In 1880 there was a difference of nearly 300,000 between the number of farms and farmers, but this figure is insignificant when compared with the immense difference of 818,326 shown in 1890. While it is true that in 1880, and to some extent in 1890, the surplus of farmers over farms was due to the definitions employed at those two censuses, this fact is not sufficient to explain the apparently abnormal surplus shown in 1890. It is probable, therefore, that a considerable number of persons were erroneously returned as farmers in 1890 who should have been returned as farm laborers.

¹ As it is only natural to suppose that there were some omissions among persons over 15 years of age, tables were prepared in order to determine whether such omissions were sufficient in number to deserve consideration; but these tables showed that although deficiencies existed in some Southern states and in one or two North Central states, they were inconsiderable and could not be defined clearly.

1 Dakota territory.

STATISTICS OF OCCUPATIONS.

NUMBER AND PROPORTION OF PERSONS OCCUPIED.

DISTRIBUTION BY SEX.

According to the census of 1900 there were 29,287,070 persons 10 years of age and over engaged in gainful occupations in the United States, including Alaska, Hawaii, and the military and naval stations abroad. For continental United States the number was 29,073,233, which was one-half (50.2 per cent) of all persons 10 years of age and over and nearly two-fifths (38.3 per cent) of the entire population. Of this number 23,753,836 were males and 5,319,397 were females. The former constituted 80 per cent, or four-fifths, of the male population 10 years of age and over and 61.2 per cent, or more than three-fifths, of the entire male population; the latter represented 18.8 per cent and 14.3 per cent, respectively, of the corresponding totals for females.

The number and proportion of males and of females engaged in gainful occupations in 1900, for the entire area of enumeration and for continental United States, are compared with similar results for 1880 and 1890 in the summary following.

This summary shows that there was an increased proportion of gainful workers for each sex in 1900 as compared with 1880 and 1890. The percentage of the total population of continental United States 10 years of age and over so engaged was 50.2 in 1900, 49.2 in 1890, and 47.3 in 1880.

The relative proportions of each sex returned as gainfully occupied at the census of 1900 are shown graphically in Diagram 1, Plate 1, by a square repre-

senting the population 10 years of age and over, divided as to sex and shaded so as to indicate in each case the proportion of wage-earners.

Number of persons engaged in gainful occupations compared with the total population and with the population 10 years of age and over, for both sexes and for each sex separately: 1880, 1890, and 1900.

¹ Corrected figures; see explanation on page lxvi.

The number of persons engaged in gainful occupations in 1880, 1890, and 1900, by states and territories, is compared with the total population in Table XIII, and with the total number of persons 10 years of age and over, by sex, in Tables XIV, XV, and XVI.

SUMMARY AND ANALYSIS OF RESULTS.

¹ Corrected figures; see explanation on page lxvi.² Dakota territory.

Productive workers are shown by Table XIII (page lxxv) to have increased from a little over one-third of the entire population of continental United States in 1880 to almost two-fifths in 1900, the percentages being 34.7 in 1880, 37.2 in 1890, and 38.3 in 1900. The proportion of workers to the total population was somewhat smaller in 1900, as compared with 1890, in New Hampshire, Massachusetts, Rhode Island, Connecticut, North Dakota, South Dakota, Nebraska, Louisiana, and Oklahoma, and in all the states of the Western division except Oregon; but of the five geographic divisions the Western is the only one in which the proportion decreased in the division as a whole. During the preceding decade also a decrease was shown for many of the states in this division, and for North Dakota and South Dakota, in the North Central division. These decreases in the proportions of workers to the total population in the more westerly states are probably due to the changing conditions of their settlement, affecting the age and sex constitution of the population.

From Table XIV it appears that in the North Atlantic division Rhode Island had the largest proportion of the population 10 years of age and over gainfully employed in 1900, 55.7 per cent, as compared with 55.3 per cent in 1890 and 53.1 per cent in 1880. The proportions next in rank in 1900 were 53.3 per cent for Massachusetts, 52.9 per cent for New Hampshire, and 52.8 per cent for Connecticut. Somewhat more than 50 per cent of all persons 10 years of age and over were at work also in New York, New Jersey, and Pennsylvania, leaving Maine and Vermont as the only states in this division in which, in 1900, less than one-half of the population under consideration were gainfully occupied.

For each of the states in this division the proportion of males at work in 1900 was large, being more than four-fifths of the entire male population 10 years of age and over in each state except Maine and Vermont, and not much less in these states. The proportion of females at work also was large for many of the states in this division, particularly for Rhode Island and Massachusetts, where they constituted, in 1900, very nearly three-tenths of all the females 10 years of age and over.

The proportion of the population 10 years of age and over engaged in gainful occupations was somewhat larger in 1900 than in 1890 in all the states of this division except Massachusetts, for which the proportion reported in 1900 was nearly the same as that in 1890. In Rhode Island, Massachusetts, New Hampshire, Connecticut, and Vermont the proportion for males was slightly less in 1900 than in 1890, while in each of these states the proportion for females was somewhat larger in 1900 than at the preceding census.

In this division manufacturing interests are especially prominent; in Rhode Island, Massachusetts, Connecticut, New Hampshire, New Jersey, and Pennsylvania from 40 to more than 50 per cent of the entire number of persons at work in 1900 were engaged in manufacturing and mechanical pursuits. Agricultural pursuits, on

the other hand, were represented by a comparatively small proportion of the total number of workers in these states, the percentage being much below the average for the country in every state except Vermont. (See Table XXV, page xciv.)

In the South Atlantic division the proportion of gainful workers in 1900 was largest in South Carolina, where they constituted fully three-fifths (60.6 per cent) of all persons 10 years of age and over. For the District of Columbia, also, the proportion was high, this being due largely to the number of government employees. For Georgia the proportion was the same as that for the District of Columbia, 54.8 per cent; next in order was North Carolina with 53.2 per cent and then Florida with 52.3 per cent. In all of these states agricultural pursuits predominate, and large numbers of women and children are employed in field work, resulting in comparatively large proportions of each sex gainfully occupied. In this division there are only three states—Maryland, Virginia, and West Virginia—in which less than one-half of all persons 10 years of age and over in 1900 were gainfully employed; and, as compared with 1890, the proportion showed an increase in all the states of this division except Georgia, where it remained stationary.

Of the states and territories comprising the South Central division, Mississippi and Alabama showed the largest proportions of gainful workers in 1900. In these states and in Louisiana and Arkansas the proportions exceeded one-half of the population 10 years of age and over, while in the other states and territories of this division they ranged between 45 and 50 per cent. In the states and territories of this division agricultural pursuits occupy from one-half to more than three-fourths of all the gainful workers; and here, as in the South Atlantic division, the employment of women and children in field work makes the proportions of gainful workers relatively large for each sex. As compared with 1890, there was an increased proportion of both males and females at work in 1900 in all the states and territories of this division except Louisiana.

In the North Central division North Dakota was the only state which had, in 1900, more than one-half of its population 10 years of age and over engaged in gainful occupations, the percentages in the remaining states ranging from 45.1 per cent for Kansas to 49.5 per cent for Minnesota. In each state of this division the proportion of females at work was larger in 1900 than in 1890, while the proportion of males at work in 1900 was slightly smaller in Minnesota, North Dakota, South Dakota, Nebraska, and Wisconsin, and somewhat larger in the remaining states of the division.

In all the states and territories of the Western division except New Mexico and Utah, more than one-half of the total population 10 years of age and over in 1900 were engaged in gainful occupations, and for many of these states and territories the proportions were very large—namely, 61.4 per cent for Wyoming, 59.9 per cent for Montana, 56.7 per cent for both Arizona and Nevada, and 55.2 per cent for Washington. In this

region of extensive mining interests a very large proportion of all males were adults, and hence the proportion of males 10 years of age and over gainfully occupied was large, while, on the other hand, the proportion of females at work was small. In each state and territory of this division the proportion of gainful workers showed a decrease from 1890 to 1900, owing in great measure to the fact that mining towns and camps have given place to settled communities. The same

cause, moreover, has resulted in an increase in the proportion of females at work except in Wyoming and Colorado.

In general, Table xv (page lxxvii) shows that the proportion of males 10 years of age and over gainfully employed does not vary greatly for different states and territories. The usual percentage is between 75 and 85. In one state only (Utah) does it fall below 75, and in two states only (Wyoming and Alabama) does it

¹ Less than one-tenth of 1 per cent.

SUMMARY AND ANALYSIS OF RESULTS.

lxxxii

exceed 85. But the corresponding percentages for females, shown in Table xvi (page lxxviii), vary more widely, ranging from 7.9 in Oklahoma to 38 in South Carolina. In the manufacturing states of the North Atlantic division the percentages for females are comparatively high, and also in those Southern states where the negro element is prominent; in the agricultural states of the Middle West they are comparatively low, as they are also in most of the states in the region farther west.

DISTRIBUTION BY GENERAL NATIVITY AND COLOR.

The distribution of the gainful workers in 1900 according to general nativity and color, by sex, and the proportion which each of the principal elements, without distinction of sex, bore to the total number of persons occupied, are presented by states and territories in Table xvii.

ENGAGED IN GAINFUL OCCUPATIONS, BY STATES AND TERRITORIES: 1900.

From the preceding table it appears that of the whole body of gainful workers in continental United States in 1900, 47.7 per cent were native white of native parents, 18.3 per cent native white of foreign parents, 19.7 per cent foreign white, 13.7 per cent negro, and 0.6 per cent Chinese, Japanese, and Indian.

In Table XVIII the distribution by general nativity and color of the population gainfully employed is compared with the distribution of the total population 10 years of age and over in continental United States and in each geographic division.

TABLE XVIII.—*Distribution, by general nativity and color, of the population 10 years of age and over and of persons engaged in gainful occupations, by geographic divisions: 1900.*

Chinese, Japanese, and Indian.....	160,968	5.0	112,115	6.6

This table shows that the foreign white and negro elements each constituted in 1900 a somewhat larger per cent of the total population gainfully employed than they did of the total population 10 years of age and over, while the two native white elements each constituted a smaller per cent. This relationship holds good for each of the geographic divisions except the North Atlantic, which shows no difference in the two percentages for native white of foreign parents. It will also be noticed that in the Western division, as compared with the other divisions, the Chinese, Japanese, and Indians combined

constituted a considerable proportion of the whole number at work in 1900, and that this proportion was in excess of that shown for the total population 10 years of age and over. From the percentages given in Table XVII (page lxxx) it appears that these elements combined constituted more than one-fifth (22.5 per cent) of all the gainful workers in Arizona and fully one-sixth (16.8 per cent) of all those in Nevada, principally because of the large number of Indians at work.

The following summary for continental United States gives, for both sexes and for each sex separately, for 1890 and 1900, the per cent distribution by general nativity and color of the population 10 years of age and over, and of all such persons gainfully occupied.

The figures for the Chinese, Japanese, and Indian elements of the population are given in detail for 1900, but no similar statement can be made for 1890, as they were not separately tabulated. Furthermore, the Indian population enumerated at the census of 1900 comprised all Indians, including reservation Indians, while the general enumeration of 1890 included only Indians living out of tribal relations.

Per cent distribution, by general nativity and color, of the population 10 years of age and over and of persons engaged in gainful occupations, for both sexes and for each sex separately: 1890 and 1900.

SEX, GENERAL NATIVITY, AND COLOR.	POPULATION 10 YEARS OF AGE AND OVER.		PERSONS ENGAGED IN GAINFUL OCCUPATIONS.

¹ Based upon corrected figures; see explanation on page lxvi.

² Less than one-tenth of 1 per cent.

This summary shows that the native white of foreign parents gainfully occupied constituted a somewhat larger proportion of the whole body of workers in 1900 than in 1890, and that this was practically offset by a considerably smaller proportion for the foreign white element. There was a similar increase in the proportion of native white of foreign parents to the total population 10 years of age and over, also accompanied by a

decrease in the proportion for foreign white. The change in the distribution of the population 10 years of age and over is due to the increase in the native white element of foreign parentage as a whole; the change in the proportion of workers in the several elements of the population is due in part to the same cause, but in part also to a large increase in the number of females at work, particularly for the native white elements of both native and foreign parentage.

A comparison of the proportion which the number of females of each element at work bore to the whole number of females at work at the two censuses reveals an increase from 34.3 to 36.2 per cent for native white females of native parentage and from 20.1 to 22.3 per cent for native white females of foreign parentage; these are offset by a decrease from 19.4 to 16.5 per cent for foreign white females and from 26.1 to 24.8 per cent for negro females.

The change from 1890 to 1900 in the proportion which those at work bore to the whole number of persons 10 years of age and over in each element of the population is shown by the following summary for continental United States:

Per cent which the number of persons engaged in gainful occupations forms of the total number 10 years of age and over in each element of the population, for both sexes and for each sex separately: 1890 and 1900.

¹ Based upon corrected figures; see explanation on page lxvi.

From this summary we find again that the proportion of female workers was higher in 1900 than in 1890

for each element of the native white population, as well as for the negro population, but that for foreign white females the proportion at work was slightly lower. The figures also show for 1900, as compared with 1890, a larger proportion of male workers in the two native white elements, and a slightly decreased proportion among the foreign white and negro males.

The proportions of male workers in each of the four principal elements in 1900, arranged in the order of their importance, are as follows: Foreign white, 89.7 per cent; negroes, 84.1 per cent; native white of native parents, 77.3 per cent; and native white of foreign parents, 75.4 per cent. For females, however, the order is very different, the highest percentage of workers, 40.7, being for the negro element, and the lowest, 13, for the native white of native parents; the percentages for the native white of foreign parents and the foreign white are 21.7 and 19.1, respectively.

The variations in these proportions are due to a considerable extent to the different age constitution of the several elements, but also, in part, to the difference in the degree to which employment is sought by the respective elements, particularly in the earlier years of life. This affects in particular the percentage for the white female population of foreign birth or parentage, among whom a very large number from 15 to 24 years of age are at work; for the female negro population the proportion at work is large for every period of life.

A comparison, for each of the four principal elements of the population in 1900, of the number of gainful workers of each sex with the total number 10 years of age and over, is made by states and territories in Tables XIX and XX; but in using the percentages given therein the reader should consider the varying conditions affecting them, as explained in the foregoing paragraph. The relative proportion of wage-earners for each of the principal elements of the population of continental United States, 10 years of age and over in 1900, is also presented graphically in a series of small squares, in Diagrams 2 and 3 on Plate 1. The entire area of each square is subdivided into rectangles, showing in Diagram 3 the proportion of each sex, and in Diagram 2 that of each element, and so shaded as to indicate, for each of these subdivisions, the proportion of wage-earners.

STATISTICS OF OCCUPATIONS.

COMPARATIVE INCREASE IN PERSONS ENGAGED IN GAINFUL OCCUPATIONS.

The statistics of occupations contained in the census report of 1890 related only to the population comprehended by the general enumeration at that census—that is, the population of continental United States, exclusive of Indian Territory and Indian reservations. That portion of the mainland excluded from the general enumeration, together with Alaska, was specially enumerated in 1890 under the provisions of the census act, but no comparable data were secured relative to the occupations of the people living within these areas. In order, therefore, to ascertain the increase, during the past two decades, in the number of persons gainfully occupied in continental United States, it is necessary, first, to estimate the proportion of persons at work of the total population specially enumerated on the mainland of the United States in 1890, on the basis of the proportion for the equivalent population in 1900, and, second, to make allowance for the number of children estimated to have been omitted from the returns of

occupations at that census. Hence, for the purpose of ascertaining the increase, from 1890 to 1900, in the number of persons occupied, there must be added to the 22,735,661 persons reported as engaged in gainful occupations in 1890 an estimated total of 680,964 persons—made up of 98,442 persons constituting the number of gainful workers for the areas specially enumerated, and 582,522 children omitted from the returns of occupations in certain states and territories (see page lxxvi)—making an aggregate of 23,416,625 persons. But to ascertain the increase in the number of gainful workers from 1880 to 1890, it is only necessary to add to the number (22,735,661) reported for 1890 the number of children estimated to have been omitted therefrom, making a total, for this purpose, of 23,318,183 persons. These two totals for 1890, when compared with similar figures for 1880 and 1900, show an approximate increase, for continental United States, of 5,656,608, or 24.2 per cent, from 1890 to 1900, and of 5,926,084, or 34.1 per cent, from 1880 to 1890, as compared with an increase in total population, during the same periods, of 20.7 and 24.9 per cent, respectively.

NUMBER AND PROPORTION OF PERSONS IN THE MAIN CLASSES OF OCCUPATIONS.

DISTRIBUTION BY SEX.

In Table XXI the number of persons of both sexes and of each sex engaged in gainful occupations in 1900 is distributed by main classes of occupations and is compared with a similar distribution for 1880 and 1890.

As explained in Chapter I (see page xxv), the figures given under each class of occupations in 1880 and 1890 have been readjusted in accordance with the classification of occupations at the census of 1900; they differ,

therefore, both from the figures for 1880 as contained in the report for that census, and from the figures for 1880 and 1890 as contained in the report for 1890. It should be remembered also that the classification of occupations now in use is based, as far as possible, upon the kind of work performed, so that the figures represent, not the whole number of persons directly or indirectly connected with a given industry, but only the number reported as engaged in the specified kind of work.

TABLE XXI.—DISTRIBUTION, BY MAIN CLASSES, OF PERSONS ENGAGED IN GAINFUL OCCUPATIONS, FOR BOTH SEXES AND FOR EACH SEX SEPARATELY: 1880, 1890, AND 1900.

¹ Corrected figures; see explanation on page lxxvi.

It is evident from a comparison of the figures in Table XXI that agricultural pursuits constituted in 1900 the leading class of occupations for males and also for both sexes combined, 39.6 per cent of the male workers and 35.7 per cent of the workers of both sexes in continental United States being engaged in this branch of occupations. For female workers, domestic and personal service formed the principal branch of occupations, employing 39.4 per cent of the gainful workers of this sex. Next to agricultural pursuits the most important class of occupations for males in 1900 was manufacturing and mechanical pursuits; then came trade and transportation, domestic and personal service, and professional service, in the order named. For females also manufacturing and mechanical pursuits formed the class of occupations second in importance, ranking next to domestic and personal service; agricultural pursuits were third, followed in order by trade and transportation and professional service.

It is noticeable that the relative importance of agricultural pursuits is less marked in 1900 than it was at the two preceding censuses, the proportion of the total number of gainful workers of both sexes engaged in that branch of occupations having decreased in each decade since 1880, while the proportions engaged in professional service and in trade and transportation have increased. This statement holds true also of each sex separately. It is evident, then, that the professions and trade and transportation are absorbing an increasing proportion of the growing army of workers of each sex, while the agricultural class constitutes a diminishing proportion. For females there was a decline also in the relative importance of domestic and personal service, the per cent of the total number of gainful workers of this sex engaged in that branch of occupations having decreased from 44.6 in 1880 to 41.6 in 1890 and to 39.4 in 1900; for males the proportion engaged in domestic and personal service has increased somewhat since 1890—producing a slight increase for both sexes combined—but has decreased compared with 1880. The percentages for manufacturing and mechanical pursuits in 1900 show little change compared with 1890, but are somewhat greater than in 1880.

The proportion of workers in the several classes of occupations in 1900 is no doubt affected somewhat by the manner in which the returns of occupations were made by the enumerators. For instance, many persons who might have been reported as engaged in some specific branch of industry were returned simply as "laborers" and therefore were of necessity classified as "laborers (not specified)" under the main head of domestic and personal service. This defect in the returns may explain, in part, the fact that the proportion of persons engaged in manufacturing and mechanical pursuits appears to have remained stationary from 1890 to 1900, while the proportion engaged in domestic and personal service shows an increase.

As previously stated (see page xxv), the heading "manufacturing and mechanical pursuits" includes persons engaged in fishing and in mining and quarrying. In order to ascertain the number of persons engaged in manufacturing and mechanical pursuits proper, it is necessary to separate this class into three subclasses of occupations, as follows:

Distribution, by occupation subclasses, of persons engaged in manufacturing and mechanical pursuits, for both sexes and for each sex separately: 1880, 1890, and 1900.

¹ For continental United States.

² Based upon corrected figures; see explanation on page lxvi.

³ Includes officials of mining and quarrying companies, not separately reported in 1880 and 1890.

⁴ Less than one-tenth of 1 per cent.

This summary shows that the total number of persons engaged in manufacturing and mechanical pursuits proper constituted 22.1 per cent of the entire number of persons at work in 1900, as compared with 22.4 per cent in 1890 and 20.1 per cent in 1880; persons engaged in mining and quarrying numbered 580,761, and constituted 2 per cent of all gainful workers in 1900, as against 1.7 per cent in 1890 and 1.4 per cent in 1880. As already explained, the census classification of occupations is based, as far as possible, upon the kind of work performed, so that these figures represent not the whole number of persons directly or indirectly connected with the mining and quarrying industry, but only those who were returned either as officials of mining and quarrying companies or as miners and quarrymen.

The total number of gainful workers in each state and territory in 1880, 1890, and 1900 are distributed by main classes of occupations, for both sexes and for each sex separately, in Tables XXII to XXVII.

¹Based upon corrected figures; see explanation on page lxvi.²Dakota territory.

In the North Atlantic division, as shown by Table xxv, very nearly two-fifths (39.3 per cent) of all gainful workers in 1900 were engaged in manufacturing and mechanical pursuits. In many of the separate states the proportion was very much higher, particularly in Rhode Island (52.7 per cent), Massachusetts (46.9 per cent), and Connecticut (45.9 per cent). On the other hand, in Maine and Vermont the proportion for this class of workers was relatively small, being 31.8 in the former state and 26.8 in the latter, while in New York only 34.5 per cent, or not much more than one-third, of the workers were engaged in this class of occupations.

In the South Atlantic division fully one-half (50.8 per cent) of all persons at work in 1900 were engaged in agricultural pursuits, but the proportion in the several states varied greatly, ranging (if the District of Columbia be excluded) from two-tenths in Maryland to more than six-tenths in North Carolina and Georgia and very nearly seven-tenths in South Carolina. In Delaware and Maryland there was a large proportion of persons engaged in manufacturing and mechanical pursuits, constituting 31.1 per cent of the whole number of persons at work in the former state and 29 per cent in the latter.

In the South Central division the proportion of persons engaged in agricultural pursuits in 1900 was even larger than in the South Atlantic division, being equivalent to almost two-thirds (63.4 per cent) of the total working population and ranging from considerably more than one-half in Kentucky, Louisiana, and Tennessee to more than three-fourths in Mississippi.

In the North Central division the proportion engaged in agricultural pursuits in 1900 was largest in North Dakota and South Dakota, in which states this class constituted fully three-fifths of all persons gainfully employed, while in Kansas the proportion was more than one-half, and in Nebraska and Iowa nearly one-half. In the more easterly states of this division a considerable proportion of the gainful workers were engaged in manufacturing and mechanical pursuits, ranging from 23 per cent in Indiana to 30 per cent in Ohio; but in the division as a whole the per cent engaged in these pursuits was only 22.6, while the per cent engaged in agricultural pursuits was 36.6.

In the Western division the proportion of agricultural workers in 1900 was largest in Idaho and New Mexico, where they formed somewhat more than two-fifths of all the gainful workers; the proportion engaged in manufacturing and mechanical pursuits was largest in Colorado, Montana, and Arizona. In this division a relatively large number of persons were reported as engaged in mining and quarrying, industries which are included under the general head "manufacturing and mechanical pursuits;" in Idaho, Colorado, Nevada, Arizona, and Montana the proportion so engaged in 1900 ranged from 11.7 to 15.2 per cent of the

whole number of workers (see Table xxx). The number and proportion of those engaged in mining and quarrying in 1900 and 1890 are shown for each state and territory in Tables xxix and xxx.

The relative proportions, in 1900, of gainful workers in the five main classes of occupations, for the several states and territories arranged in the order of their importance with respect to agricultural pursuits, are illustrated graphically in the diagram on Plate 3, in which the proportions engaged in manufacturing and mechanical pursuits proper, in mining and quarrying, and in fishing are distinguished.

The series of cartograms on Plate 4 indicates, for each main class of occupations and for the subclass, mining and quarrying, separately, the states and territories in which workers of that class formed the largest proportions of all gainful workers in the state in 1900.

Since males constitute by far the greater portion, more than four-fifths, of the total number of gainful workers, the per cent distribution of this sex by classes of occupations shown in Table xxvi naturally conforms in a general way to that for both sexes shown in Table xxv and already discussed in the preceding paragraphs. Vermont is the only state in the North Atlantic division in which, in 1900, the males engaged in agricultural pursuits constituted more than two-fifths of all the males at work; in Maine the proportion was about one-third. In the other states of the division the largest proportion of male workers were engaged in manufacturing and mechanical pursuits, the proportion ranging from more than one-half in Rhode Island to about one-third in New York. In Delaware and Maryland, also, the proportion of males engaged in manufacturing and mechanical pursuits was somewhat larger than the proportion engaged in agricultural pursuits, but in all the remaining states and territories in the South Atlantic and South Central divisions, by far the largest proportion of male workers were employed in agriculture. This is true also with respect to the North Central states, with the exception of Ohio, where the proportions of males engaged in agriculture and in manufacturing and mechanical pursuits were practically the same. In the Western division, agricultural pursuits constituted the leading class of occupations for males in all states and territories except Montana, Colorado, and Arizona; in these three states manufacturing and mechanical pursuits were of greater relative importance.

In many of the states in the North Atlantic division, as shown by Table xxvii, manufacturing and mechanical pursuits constituted the most important class of occupations for female workers in 1900. The proportion engaged in these pursuits was largest (57.2 per cent) in Rhode Island; in New Hampshire, Massachusetts, and Connecticut the proportions were 52.5 per cent, 46.4 per cent, and 45.2 per cent, respectively. In many of the Southern states, where large numbers of women and children are employed in field work, the

largest proportion of the female workers were engaged in agricultural pursuits, the proportions reaching 71.8 per cent in Mississippi, 64.5 per cent in Alabama, and 63.5 per cent in South Carolina. Elsewhere the proportion was largest in domestic and personal service, and this class of occupations comprised a considerable proportion of female workers in all states and territories.

In a large majority of the states and territories the figures for 1900, when compared with those for the two preceding censuses (see Table xxv), indicate a general decrease in the proportion of persons engaged in agricultural pursuits. For continental United States as a whole the proportion of persons so engaged decreased from 44.3 per cent in 1880 to 35.7 per cent in 1900. Of the five geographic divisions, the Western is the only one in which the proportion has increased during this twenty-year period. In this division the proportion was larger in 1900 than in 1880 in all but three states—Washington, Oregon, and Utah; but

outside of this division the only states which had an increased proportion in 1900 were the two Dakotas, in the North Central division.

The decline since 1880 in the proportion of agricultural workers has been offset by a considerable increase, for all states and territories, in the proportion of persons engaged in trade and transportation, and, for nearly all of the states and territories, in that of persons engaged in manufacturing and mechanical pursuits proper, the exceptions in the latter case being Rhode Island, Massachusetts, Connecticut, District of Columbia, Utah, Wyoming, Nevada, Idaho, and the two Dakotas. The changes which have occurred since 1880 in the proportions of gainful workers in each of these three classes are shown in the following presentation (derived from Tables xxv and xxx), by states and territories arranged in the order of the percentages for 1900; and for persons engaged in agricultural pursuits and in manufacturing and mechanical pursuits proper, in the diagram on Plate 2.

TABLE XXVIII.—PER CENT WHICH THE NUMBER OF PERSONS ENGAGED IN AGRICULTURAL PURSUITS, IN TRADE AND TRANSPORTATION, AND IN MANUFACTURING AND MECHANICAL PURSUITS PROPER, FORMS OF THE TOTAL NUMBER OF PERSONS ENGAGED IN GAINFUL OCCUPATIONS, BY STATES AND TERRITORIES: 1880 AND 1900.

A considerable increase in the proportion engaged in professional service (see Table xxv) has taken place in the great majority of the states and territories, this increase being especially marked in some Eastern states

with a large per cent of urban population, as Massachusetts, New York, and New Jersey; it is also marked in Illinois and Kansas, and in many of the states in the Western division, notably Colorado, Utah, Nevada, and

California. The changes in the per cent for domestic and personal service show considerable diversity—an increase in many states and a decrease in others.

The general character of the changes since 1880 in the distribution of the male working population by main classes of occupations (see Table xxvi) corresponds to that just noted for both sexes; that is, in nearly all the states except some of the Western there has been a decrease in the proportion engaged in agricultural pursuits accompanied by increases in the proportions engaged in trade and transportation and in manufacturing and mechanical pursuits. For female workers (see Table xxvii) the general character of the changes in distribution by main classes of occupations from 1880 to 1900 has been as follows: The small percentage of workers of this sex engaged in agricultural pursuits in the North Atlantic division has increased. This is also the case to a more marked degree in the North Central and Western divisions. But in the Southern divisions, where the percentage of females engaged in agricultural pursuits is large, there has been a marked decrease. The percentage for professional service shows an increase for every division except the North Central. Domestic and personal service shows a decrease in the North and West, but not much change in the South. In trade and transportation there has been an increase common to all divisions and very marked in the two Northern divisions and in the Western. For manufacturing and mechanical pursuits, on the other hand, the increase has been very marked in the South, while there has been only a slight increase in the North Central division, a decrease in the North Atlantic, and a more marked decrease in the Western.

Table xxix gives for each geographic division and each state or territory the number of persons of both sexes and of each sex engaged in each of three subclasses of occupations included under the main class "manufac-

turing and mechanical pursuits," while Table xxx gives the per cent which the number, in each case, forms of the total number engaged in all gainful occupations.

It is evident from a comparison of the figures in these tables that in most of the states and territories only a small proportion of the total number of persons classified under the main head of manufacturing and mechanical pursuits were engaged in mining and quarrying or in fishing, the great majority being engaged in manufacturing and mechanical pursuits proper.

In Alaska the number of persons engaged in fishing in 1900 constituted 13.7 per cent of the total number gainfully employed; in the states and territories of continental United States the highest per cent, 2.1, was that shown for the state of Maryland.

The occupation of mining and quarrying, like that of fishing, attains its greatest importance relative to other occupations in Alaska, where it furnished employment to 23 per cent of all the gainful workers in that territory. In continental United States the percentage of gainful workers engaged in mining and quarrying was exceptionally high in the states composing the Western division, ranging from 3.3 in Oregon to 15.2 in Montana. But it is noticeable that in the leading mining states of this division, namely, Montana, Arizona, Nevada, Colorado, and Idaho, the per cent of workers engaged in this subclass was considerably smaller in 1900 than it was in 1880, indicating the development of other occupations during the intervening twenty-year period. Outside of the Western division the highest per cent was that shown for Pennsylvania, 7.5; in West Virginia the per cent was 6.6; in Indian Territory it was 3.2. The remaining states and territories show smaller percentages, ranging from less than one-tenth of 1 per cent in Mississippi and Louisiana to 2.6 per cent in Michigan.

STATISTICS OF OCCUPATIONS.

TABLE XXIX.—NUMBER OF PERSONS OF BOTH SEXES AND OF EACH SEX ENGAGED IN EACH OF THREE SUBCLASSES
STATES AND TERRITORIES:

¹ Less than one-tenth of 1 per cent.

Of the total number of persons engaged in each class of occupations in continental United States in 1900, the native white of native parents formed a larger proportion than any other element. This element constituted more than one-half (57.8 per cent) of all persons engaged in agricultural pursuits, as compared with about one-fifth—the proportion next in rank—for negroes; thus these two elements together constituted more than three-fourths of the total. Among those engaged in professional service, the same element constituted an even larger proportion—very nearly two-thirds (64.1 per cent), as compared with one-fifth for native white of foreign parents, the element next in importance. Of all persons engaged in trade and transportation the native white of native parents constituted fully one-half (50.4 per cent), as compared with a little more than one-fourth for native white of foreign parents and not quite one-fifth for foreign white. In the two remaining classes the proportions of the principal elements were more evenly divided, but for each, as above stated, the native white of native parents had the largest proportion—39.8 per cent in manufacturing and mechanical pursuits and 33 per cent in domestic and personal service.

Comparing the per cent distribution shown for the

sexes, the most noticeable differences result from the relatively greater prominence among female workers of the negro element in agricultural pursuits and in domestic and personal service, and of the native white of foreign parents in trade and transportation and in manufacturing and mechanical pursuits. The first named element constituted in 1900 substantially three-fifths (59.5 per cent) of all females engaged in agricultural pursuits, and very nearly one-third (32.6 per cent) of all those in domestic and personal service; the latter element constituted over two-fifths (40.7 per cent) of all females in trade and transportation and considerably more than one-third (36.4 per cent) of all those engaged in manufacturing and mechanical pursuits, nearly equaling, in each case, the proportion of native white females of native parents in the same class.

The presentation by general nativity and color, given in Table xxxii, relates only to the four principal elements, namely, native white of native parents, native white of foreign parents, foreign white, and negro. In this table the total number of gainful workers of each element in continental United States in 1900, for both sexes and for each sex separately, are distributed by main classes of occupations and compared with a per cent distribution for 1890.

SUMMARY AND ANALYSIS OF RESULTS.

cv

¹ Based upon corrected figures; see explanation on page lxvi.

From this table it is evident that the native white of native parents and the negroes were engaged in agricultural pursuits in 1900 to a greater extent than in any other class of occupations, the proportions being 43.3 per cent and 53.7 per cent, respectively. The large proportion of all gainful workers in this class of occupations is due to the high percentages for these two elements. For white persons of foreign birth or foreign parentage the proportion of all gainful workers engaged in manufacturing and mechanical pursuits was larger than that in any other class of occupations, being 34 per cent for native white of foreign parents and 37.8 per cent for foreign white.

Comparing the sexes in respect to this distribution of the gainful workers by main classes of occupations, a noticeable contrast appears in the proportions shown for domestic and personal service. This class of occupations comprised in 1900 fully three-tenths of all the native white females of either parentage engaged in gainful occupations and more than one-half of the for-

eign white and of the negro, while the proportion of male workers found in this occupational class ranged from about one-tenth for native white of native parents to somewhat more than two-tenths for negroes. The largest proportion of the native white females of foreign parentage in 1900 were engaged in manufacturing and mechanical pursuits, but for the other two white elements this class was second in importance to that of domestic and personal service. In each of the two native white elements the proportion of female workers in the manufacturing and mechanical class exceeded that of male workers, but for the foreign white element the proportion of male workers was the larger. It is noticeable that for the native white of native parents the proportion of females engaged in professional pursuits is much larger than that of males—a difference caused by the greater extent to which women are engaged in the occupation of teaching. The difference is less marked in the other elements of the population.

STATISTICS OF OCCUPATIONS.

The great majority of negroes of both sexes at work in 1900 were found in two of the five main classes of occupations, namely, agricultural pursuits and domestic and personal service, the percentages for these two classes combined being 82.1 for negro males and 96 for negro females. The negro element was the only one in which the proportion of females engaged in agricultural pursuits was large (44.2 per cent) and not very far below that for males (58.3 per cent). A considerable proportion, however, of the native white females of native parents (16.5 per cent) were also engaged in agricultural pursuits, more than half being farmers, while of the negro women in this branch of occupations seven-eighths were agricultural laborers.

Each element showed a decreased proportion of its total number of gainful workers engaged in agricultural pursuits in 1900 as compared with 1890, the decrease being considerably more than 5 in the percentage for the negro element and over 3 in the percentages for the native white of native parents and the foreign white. These decreases in the proportions for the agricultural class were offset by increased proportions for all other classes with the following exceptions: The proportion of native white of native parents engaged in professional pursuits remained unchanged; the proportion of each of the native white elements engaged in manufac-

turing and mechanical pursuits and the proportion of foreign white in domestic and personal service decreased, influenced largely by the decreases in the proportion of females engaged in these classes of occupations.

The proportion which the number of gainful workers for each of the principal elements in continental United States in 1900 formed of the total number of persons engaged in gainful occupations (see Table xviii) and for each principal element the relative proportion in each main class of occupations (see Table xxxii) are presented in combination in the square diagram on Plate 5. The total area of the square, representing the total number of persons gainfully occupied, is divided by heavy horizontal lines into rectangles indicating the relative importance of the principal elements, the negro, Chinese, Japanese, and Indian elements being combined and presented as colored. Each rectangle is divided by vertical lines into sections indicating, for the element represented, the relative importance of the five main classes of occupations, each class being given a distinctive color. Each main class is in turn divided by light horizontal lines into small rectangles or sections representing a further subdivision of gainful workers into specified occupation groups. These small rectangles are numbered serially, and a separate index is given for each class of occupations below the diagram.

NUMBER AND PROPORTION OF PERSONS IN SPECIFIED OCCUPATIONS.

DISTRIBUTION BY SEX.

In Table xxxiii the persons of each sex engaged in gainful occupations in 1890 and 1900, for continental United States, are further distributed by occupation groups. The table specifies the principal occupation groups for each sex, giving the number in each group

and the per cent of the total number. In this and succeeding tables in this section the principal occupation groups, or combinations thereof, are alphabetically arranged under each of the five main classes of occupations, thus disregarding the grouping by industry heads given for the manufacturing and mechanical class in the general tables.

¹ Corrected figures; see explanation on page lxxvi.

² Includes brassworkers, clock and watch makers and repairers, gold and silver workers, tin plate and tinware makers, and "other metal workers."

³ Includes carpet factory operatives, hosiery and knitting mill operatives, silk mill operatives, woolen mill operatives, and "other textile mill operatives."

⁴ Includes cabinetmakers, coopers, and "other woodworkers."

⁵ Includes carpet factory operatives and "other textile mill operatives."

According to the figures in Table xxxiii the decrease in the proportion of males engaged in agricultural pursuits in 1900, as compared with 1890, appears to be mainly confined to farmers, planters, and overseers, no change being shown in the proportion of agricultural laborers; but, as previously stated (see page lxxii), the enumerators in 1890 returned as farmers a large number of persons who should have been returned as farm laborers. It is probable, therefore, that the decreased proportion shown for this main class is in reality divided between the laborer and proprietor groups of farm and plantation workers. For males this is the largest decrease in the proportion of any occupation group. Some of the smaller groups, however, show relative decreases which are more marked in comparison with their size. Farmers and planters have increased in number, although constituting a decreased proportion of the total number of males gainfully employed; but some of the smaller groups have not increased at all. Of boot and shoe makers and repairers there were not so many in 1900 as in 1890. As a result, the per cent which this group forms of the total number of males gainfully employed decreased from 0.9 to 0.7, a difference of only 0.2, but a greater difference proportionately than that shown for farmers and planters. The number of carpenters and joiners also diminished; so too did the number of masons (brick and stone) and of textile mill operatives (not otherwise specified).

For females a large decrease is shown in the proportion of servants and waitresses—from 30.4 per cent in 1890 to 24.1 per cent in 1900. This was partly offset by increased proportions for the other principal occu-

pations included under "domestic and personal service;" but there was, as a result of this large decrease, a net loss of 2.2 in the per cent representing the total for this class of occupations. The increased proportion of female workers in the trade and transportation class—9.4 per cent in 1900 as against 5.7 per cent in 1890—is shown to have been due almost wholly to the proportional increases in the number of bookkeepers and accountants, saleswomen, and stenographers and typewriters.

The decrease in the proportion of female workers engaged in agricultural pursuits is confined to agricultural laborers, the proportion of farmers, planters, and overseers being slightly larger than it was in 1890. Under "manufacturing and mechanical pursuits" there are three closely allied occupations—dressmakers, seamstresses, and tailoresses—which showed marked decreases in the proportions which they constituted of the total number of females gainfully employed. These and some other relative decreases were partially offset by relative gains in other occupations in this main class, so that there was but a small decrease in the percentage for the class as a whole.

DISTRIBUTION BY GENERAL NATIVITY AND COLOR.

The gainful workers of each sex among the native white, foreign white, and negro elements in 1890 and 1900 are distributed by principal occupation groups, for continental United States, in Table xxxiv, while a similar distribution of the gainful workers among the Chinese, Japanese, and Indian elements in 1900 only is made in Table xxxv.

			Textile workers (not otherwise specified) ²	1,637	14.0
			All others in this class	309	2.6

¹ Includes cabinetmakers, coopers, and "other woodworkers."² Mostly blanket weavers.

In effect Table xxxiv constitutes an analysis by general nativity and color of those changes in the occupational distribution of the working population during the decade 1890 to 1900 which are shown for all elements combined in Table xxxiii (page cvi). In making comparisons it should be remembered that in many instances a large increase in the number of persons engaged in a given occupation group produces only a slight change in the per cent which that group forms of the total number gainfully employed. For males the most marked changes in the proportions shown in these tables occurred in eight occupation groups, and these changes are summarized for each element in comparison with the corresponding proportions for all males in the tabular statement which follows.

Occupations showing most marked changes since 1890 in the proportion of males in each principal element so occupied.¹

OCCUPATIONS.	MALES.									
	Total.		Native white—native parents.		Native white—foreign parents.		Foreign white.		Negro.

¹ Percentages for 1890 based upon corrected figures; see explanation on page lxxi.² Less than one-tenth of 1 per cent.

From the summary on the preceding page it is apparent that the decrease, already noted (see page cvii), in the proportion of male workers engaged in the occupation of farmers, planters, and overseers is common to each principal element except the negro; but for agricultural laborers an increased proportion is shown for the two native white elements and a decreased proportion for the foreign white and negro elements. Of the other occupation groups included in the foregoing summary, carpenters and joiners show a decreased proportion for each element and clerks and copyists for each element except the negro, for which there has been no change. The remaining groups with one exception show increases for each element, the exception being the group of laborers (not specified) which shows a decrease for the foreign white element only.

There are fifteen occupation groups for females in which considerable changes proportionally have taken place since 1890, the varying proportions shown in Tables xxxiii and xxxiv for each principal element at each census being summarized as follows:

Occupations showing most marked changes since 1890 in the proportion of females in each principal element so occupied.¹

OCCUPATIONS.	FEMALES.									
	Total.		Native white—native parents.		Native white—foreign parents.		Foreign white.		Negro.

¹ Percentages for 1890 based upon corrected figures; see explanation on page lxvi.

² Less than one-tenth of 1 per cent.

The above summary shows that for each element of the population there has been a large decrease since 1890 in the proportion of female workers employed as servants and waitresses and for the negro element in the proportion employed as agricultural laborers. There has been also for each element of the population except the negro a decrease in the proportion of females

employed as woolen mill operatives. In the case of cotton mill operatives there have been decreases in the white elements of foreign birth or foreign parentage, partly offset by an increase for the native white of native parentage. In the occupation of teachers and professors in colleges a decrease is shown for the native white of native parents, but an increase for each of the other elements. It will be noticed that the decrease in the proportion of female workers employed as dressmakers, seamstresses, and tailoresses, already noted in another connection, is confined mainly to the two native white elements, the foreign white showing an increase for each of these occupations except that of dressmakers, for which the percentage remains unchanged. Proportional increases are shown for each element in laborers (not specified), laundresses, and nurses and midwives, and for all but the negro element in bookkeepers and accountants, housekeepers and stewardesses, saleswomen, and stenographers and typewriters.

The gainful workers among the Chinese, Japanese, and Indian elements in 1900, for continental United States, as shown by the figures contained in Table xxxv, were confined to a comparatively few occupation groups. Of all the Chinese males at work, fully seven-tenths were found in four occupation groups, namely, launderers, 31 per cent; servants and waiters, 15.5 per cent; laborers (not specified), 12.6 per cent; agricultural laborers, 11.1 per cent. For the Japanese element there was an even greater concentration of male workers, very nearly nine-tenths being found in the following groups: Steam railroad employees (principally laborers), 28.1 per cent; laborers (not specified), 24.9 per cent; agricultural laborers, 22.3 per cent; servants and waiters, 13.2 per cent. These two elements are found mainly in the Western states and the number of females among them is very small. For the Indian element, however, there was a considerable proportion of female as well as male workers, and more than three-fifths (63.1 per cent) of all the males and more than two-fifths (40.8 per cent) of all the females at work were returned as either farmers, planters, and overseers or as agricultural laborers.

In the tables just discussed the gainful workers in each element of the population are distributed by occupation groups. In Tables xxxvi and xxxvii, which follow, the gainful workers in each occupation group, for continental United States, are distributed by elements of the population, the whole number in each occupation group being taken as 100 per cent.

SUMMARY AND ANALYSIS OF RESULTS.

cxiii

¹ Less than one-tenth of 1 per cent.² Includes all workers in iron and steel and other metals.³ Includes carpet factory operatives and "other textile mill operatives."

The composition of each of the principal occupation groups with respect to nativity and color, and also that of each of the main classes of occupations and of all classes combined, is shown graphically by the diagram on Plate 6. In this diagram the total length of the bar, in each case, represents 100 per cent, the length of the colored portions representing the per cent of the total in each of the five elements of the population. The figures upon which these proportions are based are contained in Table xxxvi, and comprise forty-one leading occupation groups, in twenty-six of which the males largely predominate. Of the remaining groups there are eight in which the females constitute much the larger proportion, and seven in which they have a considerable representation, varying from somewhat less than one-fifth to upward of one-half of the whole number. The eight occupation groups included in the first-named class comprise teachers and professors in colleges, etc., housekeepers and stewards, launderers and laundresses, nurses and midwives, servants and waiters, stenographers and typewriters, dressmakers, and seamstresses, while in the second class are included bookkeepers and

accountants, salesmen and saleswomen, boot and shoe makers and repairers, cotton mill operatives, textile mill operatives (not otherwise specified), tailors and tailoresses, and tobacco and cigar factory operatives.

In somewhat more than one-third of all the occupations considered in Table xxxvii, native white males of native parents constituted a majority of the male workers. This element attains its greatest prominence in the professions, constituting 75.6 per cent of the lawyers, 74.1 per cent of the physicians and surgeons, 73.6 per cent of the dentists, and 71.5 per cent of the teachers and professors in colleges, etc. The native white males of foreign parents did not constitute a majority of the males in any of the principal occupation groups under consideration, but in six of these groups they attained a greater prominence than any other element. The six groups referred to and the percentages represented by this element are as follows: Plumbers and gas and steam fitters, 45.4 per cent; messengers and errand and office boys, 43 per cent; brassworkers, 38.5 per cent; steam boiler makers, 36.6 per cent; bartenders, 36.2 per cent; and gold and silver workers, 35.1 per cent. Foreign

white males constituted 75.8 per cent of the tailors and 71.9 per cent of the brewers and maltsters; they also constituted a majority of the cabinetmakers, the bakers, the hucksters and peddlers, the hat and cap makers, and the bleachery and dye works operatives. Of the occupations specified in the table there are only three in which the per cent of negroes exceeded that of any other element, namely, turpentine farmers and laborers, 83.9 per cent; porters and helpers (in stores, etc.), 53.7 per cent; and servants and waiters, 43.5 per cent. Fully one-half of all the males returned as launderers were Chinese and Japanese (almost wholly Chinese), and these races also formed a considerable percentage (5.6) of all the males returned as servants and waiters.

Of the total number of females gainfully employed, the native white of native parents constituted a larger proportion (36.2 per cent) than any other element, and in almost one-third of the principal occupation groups for this sex, a majority of the female workers belonged to this element of the population. In some of the other groups there was a rather even distribution among the different elements. This was notably the case with the large group of females returned as servants and waitresses, of whom 27.3 per cent were native white of native parents; 19.8 per cent, native white of foreign parents; 25.9 per cent, foreign white; and 26.9 per cent, negro. In eighteen, or more than one-half, of the occupation groups specified for females in the table, the two native white elements taken together constituted by far the largest proportions of all the females returned, the percentages for the two elements combined ranging in these groups from 76.8 to 93.8, as shown by the following summary:

Occupations in which more than 75 per cent of the total number of females are native white: 1900.

OCCUPATIONS.	NATIVE WHITE.		
	Total.	Native parents.	Foreign parents.

Metal workers	78.6	30.4	48.2
Silk mill operatives	76.8	33.6	43.2

Females employed in textile mills in 1900 were rather evenly distributed among the three white elements, the proportion represented by the foreign white being especially large as compared with that shown for this element in most of the other occupation groups here considered. The foreign white element, however, constituted an equally large proportion (38.2 per cent) of all the females returned as tailoresses, and an even larger proportion (42.1 per cent) of all those classed as merchants and dealers. The negro element constituted in 1900 more than three-fourths of all the females returned as agricultural laborers, very nearly two-thirds of all those returned as laborers (not specified) and as laundresses, and somewhat more than one-fourth of all the female servants and waitresses.

DISTRIBUTION OF PERSONS OCCUPIED BY AGE PERIODS.

Persons engaged in gainful occupations in 1900 were distributed according to nine age groups, as follows: 10 to 15, 16 to 20, 21 to 24, 25 to 34, 35 to 44, 45 to 54, 55 to 64, 65 and over, and age unknown. In 1890 a somewhat similar distribution by age was made, but in 1880 the age classification of those gainfully employed was limited to three groups, namely, 10 to 15, 16 to 59, and 60 and over. Comparison by age groups in detail is limited, therefore, to the last two censuses, using corrected figures for the age group 10 to 15 in 1890, as hereinbefore explained.

Table xxxviii (page cxviii) presents, for continental United States, the whole number of males and of females reported in each specified age group, and the number and percentage engaged in gainful occupations, at the censuses of 1890 and 1900.

In 1900 approximately 95 per cent of the total number of males in each of the four age groups covering the period from 21 to 54 years, inclusive, were gainfully employed, the percentage being highest (96.6) in the age group 35 to 44. In the age group 55 to 64 the per

cent falls to 90, and in the next age group, 65 and over, to 68.4. The youngest age group, 10 to 15, shows a percentage of only 26.1; but in the next group, 16 to 20, the percentage is 76.8. It is evident from this comparison that all but a small number of the men of each generation join the working force of the community before they reach the age of 25, and all but a small number remain in active service until they are past 55—a period of more than thirty years. The females show a very different life history as regards the extent to which they enlist in the army of workers. The highest per cent of employment for this sex in 1900 was 32.3, and was attained in the age group 16 to 20; it was only slightly lower in the next group, 21 to 24. But after 24 there was a very marked decrease, representing the effect of matrimony in depleting the ranks of the gainful workers of this sex.

In 1900, as compared with 1890, the proportion of males at work was slightly larger for the first two age groups, 10 to 15 and 16 to 24—particularly for the latter—but was somewhat smaller for each age group from

25 years upward. In the proportion of females occupied, on the other hand, an increase was shown in 1900 for each age group except "age unknown," these increases being largely the result of the greater opportunities afforded for the employment of women in recent years as compared with ten or twenty years ago.

¹ Corrected figures; see explanation on page lxvi.

Table xxxix below shows, for each of the four principal elements of the population in continental United States in 1900, the proportion of males and of females in each specified age group who were engaged in gainful occupations.

The proportion of children of each sex at work in 1900, represented by the per cent gainfully employed in the age group 10 to 15, as shown by Table xxxix, was much larger among negroes than in any other element of the population, being 49.3 per cent for males and 30.6 per cent for females. The elements next in order were as follows: For males, foreign white (29.2), native white of native parents (24.3), native white of foreign parents (16.9); for females, foreign white (20.3), native white of foreign parents (7.9), native white of native parents (5.7).

For the next older age group, comprising persons from 16 to 20 years of age, the order of the elements with respect to the proportion at work was the same for both sexes; the foreign white showed the highest percentage, followed by negro, native white of foreign parents, and native white of native parents, in the order named. In this age group the percentage of males at work ranged from 88.2 for the first-named element to 72.7 for the last; for females the percentages were smaller and showed wider variations, being, for the four elements in the order just given, 56.8, 49.6, 40, and 20.8. The first three of these percentages constitute for the elements to which they severally relate the maximum proportion of females at work in any age group; but for native white females of native parents the percentage in this age group is exceeded by that in the next older group, 21 to 24.

In the period from 21 to 54 years of age the per cent of males gainfully employed was very high in all elements of the population with no very marked differences, the per cent being slightly higher for foreign white than for any other element in each of the three groups covering the period from 21 to 44 years, inclusive, and slightly higher for negroes than for any other element in the next age group, 45 to 54. In the age group 55 to 64 the difference between the per cent for negroes and the white element becomes more marked, while in the group 65 and over the per cent of negroes gainfully employed was much higher than that for any of the white elements. This probably means that few of the negroes have acquired a competence enabling them to give up work as they approach old age.

In the case of females the contrast between the negroes

and the whites as regards the per cent gainfully employed is very striking. For white women the per cent undergoes a marked reduction as soon as they enter the marrying period of life; but for negro women matrimony brings no such exemption from the necessity of gainful labor, and the per cent of workers undergoes no very marked reduction until they enter the period of old age, 65 years and over. The per cent gainfully employed is highest for negroes in every age group except that of 16 to 20, in which it is highest for foreign white.

Table XL shows, for males and females separately, the proportion which the number in each age group engaged in gainful occupations and in each main class of occupations formed of the whole number similarly engaged in continental United States in 1900.

The chief purpose of this presentation is to show from what age groups the gainful workers are mostly drawn, and further, what proportion of the whole number engaged in each class of occupations is contributed by the younger portions of the population as compared with the older.

Nearly one-half (48.6 per cent) of the total number of males gainfully employed in 1900 were between the ages of 16 and 34, inclusive. If the period be extended to include all ages between 16 and 44, inclusive, the proportion increases to more than two-thirds (68.4 per cent). In other words, the great majority of the men who do the world's work are comparatively young men. This preponderance of young men is less marked in agriculture and in the professions than in the other main classes of occupations. In agriculture, however, there was a comparatively large proportion of boys between the ages of 10 and 15 years, inclusive.

The following summary shows, for continental United States, the distribution of males gainfully employed by

three age periods, the first representing the period of youth, the second that of young manhood and middle age, and the third that of old age:

Per cent distribution, by specified age groups, of males engaged in gainful occupations and in each main class: 1900.

AGE PERIODS.	All occupations.	Agricultural pursuits.	Professional service.	Domestic and personal service.	Trade and transportation.	Manufacturing and mechanical pursuits.
Total	100.0	100.0	100.0	100.0	100.0	100.0
10 to 20 years	17.3	22.7	4.6	16.9	13.1	13.8
21 to 54 years	70.1	62.0	80.1	72.1	77.0	75.3
55 years and over.....	12.3	15.1	15.0	10.5	9.5	10.6
Age unknown.....	0.3	0.2	0.3	0.5	0.4	0.3

In agriculture the per cent for the youngest of these age periods is exceptionally high, because of the extent to which boys are employed on their fathers' farms and are therefore returned in the census as agricultural laborers; in professional service the corresponding per

cent is exceptionally low because these pursuits require a rather long preparatory training, and, therefore, are not open to persons of this age group. The other callings occupy an intermediate position in these respects, and exhibit no very striking contrasts, although the percentage in the youngest age group is somewhat higher for domestic and personal service than for either trade and transportation or manufacturing and mechanical pursuits. In the old age group, 55 and over, the per cent is higher for agricultural pursuits and for professional service than for the other classes.

For females gainfully employed the proportion in the earlier years of life is much higher than it is for males, a difference which, as already remarked, is to be attributed to the effect of marriage in terminating the occupational career of this sex. Almost one-third (32.4 per cent) of the female workers in 1900 and hardly more than one-sixth (17.3 per cent) of the male were under 21 years of age; or taking a higher age limit, close to one-half (49.3 per cent) of the former and less than three-tenths (28.6 per cent) of the latter were under 25 years of age.

In Table XLI the total number of gainful workers of each sex in each specified age group in 1900 is distributed on a percentage basis by main classes of occupations, for continental United States.

TABLE XLI.—*Per cent distribution, by main classes of occupations, of males and of females of each specified age period gainfully employed: 1900.*

SEX AND AGE PERIODS.	Agricultural pursuits.	Professional service.	Domestic and personal service.	Trade and transportation.	Manufacturing and mechanical pursuits.
Males	39.6	3.5	14.7	17.9	24.3
10 to 15 years.....	67.6	0.2	10.8	7.9	13.5
16 to 20 years.....	44.9	1.3	15.9	16.0	21.9
21 to 24 years.....	36.7	3.1	16.5	19.8	23.9

Age unknown	30.2	3.8	24.5	20.3	21.2
Females.....	18.4	8.1	39.4	9.4	24.7
10 to 15 years.....	42.7	0.2	29.2	4.6	23.3
16 to 20 years.....	14.4	5.6	38.4	11.9	29.7
21 to 24 years.....	9.3	13.2	37.9	13.9	25.7
25 to 34 years.....	10.6	12.6	39.6	11.1	26.1
35 to 44 years.....	16.9	8.3	43.5	6.6	24.7
45 to 54 years.....	26.5	5.4	45.6	4.5	18.0
55 to 64 years.....	34.7	3.9	43.9	3.8	13.7
65 years and over	44.1	2.1	40.8	3.0	10.0
Age unknown	19.7	6.6	60.3	3.9	9.5

Of the total number of males from 10 to 15 years of age who were at work in 1900, more than two-thirds

(67.6 per cent) were engaged in agricultural pursuits, while of those from 16 to 20 years of age the corresponding proportion was considerably less than one-half (44.9 per cent). In the next three age groups, covering the period from 21 to 44, inclusive, the proportion is approximately one-third, being lowest (32.2) in the group 25 to 34. It then increases in each successive higher age group, reaching more than one-half for the group 65 and over. Of the female workers from 10 to 15 years of age, 42.7 per cent, or more than two-fifths, were engaged in agricultural pursuits, but less than 15 per cent of those from 16 to 20 and less than 10 per cent of those from 21 to 24 years of age were so engaged; from 25 years upward there was a constantly increasing proportion, the percentage reaching 44.1 in the group 65 and over, or a little more than the percentage in the youngest age group.

The steady fall noted in the percentages for males in the successive age groups from 10 to 34, followed by a steady rise in the later periods, is peculiar to agricultural pursuits. In each of the other classes of occupations the percentage for males is lower in youth and also (with the exception of professional service) in old age than in the intervening period. The employment on the farm of the children of farmers doubtless explains the high per cent for agricultural pursuits in the period of youth. For the increase of the per cent in the age groups above 44 years the explanation is not so obvious; but if, as the census figures indicate, agricultural pursuits are becoming of less importance relative to other occupations, the change would naturally affect first the distribution for the age groups just above the period at which men ordinarily make their choice of an occupation.

The percentages of male workers engaged in manufacturing and mechanical pursuits were highest for the period between 25 and 44 years of age, the percentages being 26.9 between 25 and 34 and 27.2 between 35 and 44; but for females the highest percentages were shown for a younger period, that from 16 to 34, the percentages being 29.7, 25.7, and 26.1, for the age groups 16 to 20, 21 to 24, and 25 to 34, respectively.

There was a large proportion of females in domestic and personal service for each age group from 16 years upward, the maximum percentage, 45.6, being that for the age group 45 to 54. The large percentage shown for this class of occupations among females in the group "age unknown" is probably due largely to the return of servants for whom no age was reported.

NUMBER AND PROPORTION OF EACH SEX IN GAINFUL OCCUPATIONS.

PROPORTION OF EACH SEX IN MAIN CLASSES OF OCCUPATIONS.

The number and proportion of males and of females engaged in all gainful occupations, and in each of the five main classes, in 1880, 1890, and 1900, are shown for continental United States in Table XLII.

TABLE XLII.—*Distribution, by sex, of persons engaged in gainful occupations and in each main class: 1880, 1890, and 1900.*

¹ Corrected figures; see explanation on page lxvi.

From this table it appears that females constituted a somewhat larger proportion of the whole number of persons occupied in 1900 than in either 1880 or 1890, the percentages being 18.3 for 1900, 17.2 for 1890, and 15.2 for 1880. Moreover, the proportion of females shows an increase, continuing through both decades, in each class of occupations except domestic and personal

service, in which an increase from 34.6 per cent in 1880 to 39.5 per cent in 1890 was followed by a decrease to 37.5 in 1900. In trade and transportation the proportion of females increased from 3.4 per cent in 1880 to 6.9 per cent in 1890 and to 10.6 per cent in 1900, this marked advance being mainly the result of the large increase in the number of females employed in clerical capacities and as saleswomen. The proportion of females in manufacturing and mechanical pursuits, which increased from 16.7 per cent to 18.1 per cent during the decade from 1880 to 1890, remained nearly stationary during the following decade, being only 18.5 per cent in 1900.

It may not be superfluous to call attention to the fact that the increases or decreases in the percentages constantly referred to in this section indicate merely changes in the relative numerical importance of the two sexes. The decrease just noted in the per cent of females employed in domestic and personal service, for instance, does not mean that there are fewer women in this class of occupations than formerly. As a matter of fact there are more; but the number has not increased to the same extent as the number of men, and consequently the per cent which women form of the total has decreased.

The per cent distribution by sex of the total number of persons engaged in all gainful occupations, and in each main class of occupations, at the censuses of 1880, 1890, and 1900 is presented for each state and territory in Table XLIII, the figures upon which the percentages are based being given in Tables XXII to XXIV (pages lxxxviii to xciii). In considering this table, however, it should be remembered that the relative proportions of each sex engaged in gainful occupations and in each of the main classes in the several states and territories are necessarily dependent in some degree upon the proportion in which the sexes are distributed through the country, as well as upon the opportunities which are open for the employment of women in different localities.

² Dakota territory.

A comparison by states and geographic divisions of the figures presented in Table XLIII, covering the three censuses, 1880, 1890, and 1900, shows that the increase already noted in the proportion of females engaged in gainful occupations, as compared with the proportion of males, is common to all sections of the country. In every geographic division and in every state and territory, except three, females formed an increased proportion from 1880 to 1900 of the total number of persons gainfully employed, and in the three states excepted—Georgia, Florida, and Louisiana—the proportion remained practically stationary. The increase was most marked in the Western division.

In trade and transportation the increase in the employment of females as compared with males was very marked for the country as a whole during both decades, and was apparent to a greater or less degree not only in every geographic division but in every state and territory without exception. It represents the increasing extent to which women are employed as stenographers, typewriters, telegraph and telephone operators, bookkeepers, clerks, and saleswomen.

In agricultural pursuits there has been also a general though not very marked increase in the proportion of females. It will be noticed that the percentages are exceptionally high in the South, where negro women are very extensively employed as agricultural laborers. In South Carolina, Alabama, and Mississippi females constituted in 1900 over one-fourth of the total number of persons engaged in agricultural pursuits, and in Louisiana the proportion was almost as high. In Louisiana, however, and also in Florida, there was some decrease in the percentage for 1900 as compared with that for 1890. The marked increase of the percentage shown in the table for Arizona is due to the inclusion in 1900 of all Indians (reservation and other), whereas in the two preceding censuses only those Indians living out of tribal relations were included.

The per cent which females form of the total number of persons engaged in professional pursuits showed a slight decrease from 1890 to 1900 in the North Atlantic division, and in each of the states composing this division except Rhode Island and New Jersey. But in all other divisions and in all other states except Ohio, Illinois, and Iowa the per cent has increased, the increase being most marked in the Southern and West-

ern states. For females, teaching is by far the most important of the occupations included in this main class, and doubtless determines to a large extent the percentage for the class.

In manufacturing and mechanical pursuits the increase in the proportion of females was not very marked during the last decade. For the North Atlantic division as a whole the per cent was hardly higher in 1900 than in 1890; and for every New England state except Vermont it was lower. But in all the South Atlantic states except Virginia, West Virginia, and Florida, in all the North Central states except North Dakota, and in all the Western states the percentage shows an increase. In the South Central division as a whole there was a slight decrease produced by decreases in the states of Alabama, Mississippi, Louisiana, and Arkansas. During the preceding decade—1880 to 1890—the increase in the per cent which females formed of the total number of persons employed in this branch of occupations was much more marked and much more general.

In domestic and personal service the per cent of females shows an uninterrupted increase since 1880 in the Western division only, indicating probably the settlement of the country and the advance in many sections from the primitive conditions of the mining camp to a more developed and complex organization of society; but in each of the other divisions an increase in the per cent from 1880 to 1890 has been followed by a decrease from 1890 to 1900, apparent in every state or territory included in those divisions except Delaware and Michigan.

PROPORTION OF EACH SEX IN SPECIFIED OCCUPATIONS.

In Table XLIV the changes since 1880 in the proportions which each sex forms of the total number of gainful workers for continental United States are shown in detail for occupation groups.

The percentages for 1880 and 1890 in this table are based upon the absolute numbers given in Table IV (page 1). The proportions of female workers in each main class and in certain occupation groups in 1900 are also illustrated graphically in the diagram on Plate 7. In this diagram the total length of the bar represents 100 per cent in each case, while the black portion represents the per cent of males and the white portion the per cent of females.

SUMMARY AND ANALYSIS OF RESULTS.

CXXV

TABLE XLIV.—DISTRIBUTION, BY SEX, OF PERSONS ENGAGED IN SPECIFIED OCCUPATIONS IN 1900, WITH PER CENT DISTRIBUTION FOR 1880 AND 1890.

OCCUPATIONS.	PERSONS ENGAGED IN GAINFUL OCCUPATIONS: 1900.			PER CENT WHICH EACH SEX FORMS OF TOTAL NUMBER OF PERSONS SO OCCUPIED.					
	Total.	Males.	Females.	1900		1890		1880

¹ Less than one-tenth of 1 per cent.

Of the total number of females engaged in professional pursuits in continental United States in 1900, more than three-fourths were teachers and professors in colleges, etc.; and in that occupation the per cent which females form of the total number of both sexes is high, and has advanced from 67.8 in 1880 to 73.4 in 1900. Influenced largely by this change, the proportion of females in the entire class of professional service increased, during the period named, in all states and territories with five exceptions. But of even greater significance, perhaps, is the almost uniform increase in the proportion of females in the other occupation groups included under this main head; for while the percentages are in most cases still small, a comparison with the earlier censuses indicates clearly the general movement among females toward professions which until recently have been filled almost exclusively by

men. The comparison is presented in the following tabular statement giving the percentages in 1880, 1890, and 1900, as shown in Table XLIV:

Per cent of females in each occupation group classified under professional service: 1880, 1890, and 1900.

OCCUPATIONS.	1900	1890	1880
Professional service.....	34.2	33.0	29.4
Actors, professional showmen, etc.....	19.7	16.5	27.0
Actors.....	43.3	40.6	37.8
Architects, designers, draftsmen, etc.....	3.5	1.9	1.2
Artists and teachers of art.....	44.3	48.1	22.6
Clergymen.....	3.0	1.3	0.3
Dentists.....	2.7	1.9	0.5
Electricians.....	0.8
Engineers (civil, etc.) and surveyors.....	0.2
Journalists.....	7.3	4.1	2.3
Lawyers.....	0.9	0.2	0.1
Literary and scientific persons.....	31.8	24.6	11.9
Musicians and teachers of music.....	56.8	65.5	43.3
Officials (government).....	9.4	5.9	3.1
Physicians and surgeons.....	5.6	4.3	2.8
Teachers and professors in colleges, etc.....	73.4	70.8	67.8
Other professional service.....	16.9	6.0

In domestic and personal service there appears no such marked and uniform tendency toward an increase in the per cent of female workers. By far the largest number of females in this branch of occupations—more than three-fourths of the total number—are either servants and waiters or launderers and laundresses; and each of these occupations shows a slight decrease in the proportion of females from 1880 to 1900. Decreased proportions are also shown from 1880 to 1900 for hairdressers and nurses, while increased proportions are shown for boarding and lodging house keepers, hotel keepers, and janitors.

In trade and transportation a prevailing tendency toward an increase in the proportion of females again appears, though of course confined to those callings which are open to women. In many of these the increase has been very marked. This is the case with bookkeepers and accountants, clerks and copyists, stenographers and typewriters, messengers and errand and office boys, packers and shippers, and telegraph and telephone operators. The following comparison indicates what the most noteworthy advances in the proportionate employment of females in this class have been and the uniformity with which they have occurred for the three census periods—1880, 1890, and 1900:

Per cent of females in certain occupation groups classified under trade and transportation: 1880, 1890, and 1900.

OCCUPATIONS.	1900	1890	1880
Trade and transportation.....	10.6	6.9	3.4
Bookkeepers, clerks, stenographers, etc.....	24.6	15.1	6.0
Bookkeepers and accountants.....	29.1	17.4	
Clerks and copyists.....	13.5	11.5	(¹)
Stenographers and typewriters.....	76.6	63.6	
Merchants and dealers.....	4.1	3.7	3.1
Messengers and errand and office boys.....	9.3	5.7	2.9
Packers and shippers.....	33.6	26.1	5.7
Salesmen and saleswomen.....	24.4	22.1	24.0
Telegraph and telephone operators.....	30.1	16.2	5.5

¹ Not separately returned in 1880.

In the class of manufacturing and mechanical pursuits there was a very general increase from 1880 to 1890 in the proportion of female workers employed in those groups of occupations which are open to that sex; but from 1890 to 1900 some of the more important occupations showed decreases which, however, were rather more than offset by increases in other occupations of this class, producing, as already noted, a slight increase in the percentage for the class as a whole. Most of the decreases here referred to occurred in occupations grouped under textiles, and include the occupations of bleachery and dye works, cotton mill, woolen mill, and carpet factory operatives, of tailors and tailoresses, and

of lace and embroidery makers. On the other hand, there was a considerable increase in the per cent of women in the occupations of hat and cap makers, shirt, collar, and cuff makers, hosiery and knitting mill operatives, and sewing machine operators, and in the residual occupation group, "other textile mill operatives." Dressmakers, milliners, and seamstresses are almost all women, but it is noticeable that the high proportions represented by this sex show a slight decrease. Outside the textile industries the only very noteworthy decreases from 1890 to 1900 in the proportion of females were those shown for operatives in paper and pulp mills and in rubber factories; some of the more important increases are those for confectioners, boot and shoe makers and repairers, gold and silver workers, bookbinders, boxmakers (paper), glovemakers, and tobacco and cigar factory operatives.

As would be expected, the females in this class are most numerous in the manufacturing states of the north-east. Indeed, in the states in which the textile industries are especially prominent, females constituted in 1900 somewhat more than one-fourth of all persons employed in the manufacturing and mechanical class.

The more important facts brought out by this analysis of the distribution of gainful workers by sex may be thus summarized:

There has been a general and marked increase in the extent to which women are engaged in gainful occupations, as measured by the increase in the per cent which they form of all gainful workers. In the last decade this increase was most marked in the Western states.

Of the main classes of occupations, trade and transportation shows the greatest and most general increase in the employment of this sex, resulting mainly from the increasing number employed in such occupations as stenographers, typewriters, telegraph operators, telephone operators, saleswomen, and clerks.

There has been a marked movement on the part of women toward increased participation in professional pursuits which have hitherto been almost exclusively in the hands of men.

The increase already noted in the per cent of women employed in trade and transportation and in many professional pursuits, considered in connection with the decrease in the per cent employed in domestic and personal service and in some of the more important occupations included under manufacturing and mechanical pursuits, suggests that women as a class are turning away from pursuits commonly accounted menial and are engaging more generally in those which are supposed to represent a higher grade in the social scale.

NUMBER AND PROPORTION OF MEN, WOMEN, AND CHILDREN IN GAINFUL OCCUPATIONS.

CHANGES IN THE PROPORTIONS IN CONTINENTAL UNITED STATES.

The significance of the changes which have occurred since 1880 in the proportions of the sexes at work, as noted in the preceding section, is much more clearly

shown when a separation of those gainfully employed is made according to the respective proportions of men, women, and children. These proportions are shown for 1880 and 1900 in the summary on the following page. As has already been stated, in 1880 the age classification of persons gainfully occupied was limited to three age

SUMMARY AND ANALYSIS OF RESULTS.

cxxix

periods, namely, 10 to 15, 16 to 59, and 60 and over; hence, for purposes of comparison, the figures for men and women must include persons 16 years of age and over.

Distribution, as men, women, and children, of persons engaged in gainful occupations: 1880 and 1900.

CLASS.	1900		1880	
	Number.	Per cent.	Number.	Per cent.
Total.....	29,073,233	100.0	17,392,099	100.0
Men	22,489,425	77.3	13,919,755	80.0
Women	4,833,630	16.6	2,363,988	13.5
Children	1,750,178	6.1	1,118,356	6.5
Boys	1,264,411	4.4	825,187	4.8
Girls	485,767	1.7	293,169	1.7

These figures for the two censuses show that during the past twenty years there has been a loss in the proportion of gainful workers consisting of men and children and a gain in the proportion consisting of women, the increase in the per cent of women being 3.1, which is offset by a decrease of 2.7 in the per cent of men and 0.4 in that of boys.

CHANGES IN THE PROPORTIONS IN EACH STATE AND TERRITORY.

Table XLV presents, by states and territories, the total number of men, women, and children engaged in gainful occupations in 1880 and in 1900, and Table XLVI shows the percentages of the total represented by each of these groups.

TABLE XLV.—DISTRIBUTION, AS MEN, WOMEN, AND CHILDREN, OF THE TOTAL NUMBER OF PERSONS ENGAGED IN GAINFUL OCCUPATIONS, BY STATES AND TERRITORIES: 1880 AND 1900.

STATES AND TERRITORIES.	1880						1880

¹ Dakota territory.² Less than one-tenth of 1 per cent.

Table XLVI shows that in all except three states—South Carolina, Mississippi, and Louisiana—the proportion of women among the whole number of persons occupied was larger in 1900 than in 1880. Many states show an increase also in the proportion of children of one or both sexes. The following tabular statement shows, by states and territories, the general character of the changes between 1880 and 1900 in the proportions which men, women, boys, and girls severally form of the total number of gainful workers, an increase in the proportion represented by any one of these four classes being indicated by a star:

¹ Dakota territory in 1880.

The proportions which men, women, and children form of all persons gainfully occupied in each state and territory of continental United States at the two censuses are illustrated graphically by the diagram on Plate 8, in which the respective proportions for 1900 are

shown by the white bar and those for 1880 by the black bar; the states and territories are arranged in the decreasing order of the proportions for men in 1900. The figures upon which the diagram is based, taken from Table XLVI, are reproduced in the following summary:

Per cent distribution, as men, women, and children, of persons engaged in gainful occupations in 1880 and 1900, by states and territories arranged in the order of the decreasing percentage of men in 1900.

¹ Dakota territory.

CHANGES IN THE PROPORTIONS IN THE MAIN CLASSES OF OCCUPATIONS.

The main classes of occupations in which the decrease in the proportion of men was most pronounced are clearly indicated in the summary on the following page.

STATISTICS OF OCCUPATIONS.

Distribution, as men, women, and children, of persons engaged in gainful occupations and in each main class: 1880 and 1900.

CENSUS YEARS AND CLASSES OF OCCUPATIONS.	Total persons gainfully occupied.	MEN.		WOMEN.		BOYS.		GIRLS.

¹ Less than one-tenth of 1 per cent.

This summary shows that for each of the main classes of occupations there was a loss in the proportion of men at work in continental United States in 1900, as compared with 1880, offset by a gain in the proportion of women alone in domestic and personal service, of women and boys in professional service, and of women, boys, and girls in the other three classes. The proportion of men engaged in agricultural pursuits declined from 84.7 per cent in 1880 to 82.4 per cent in 1900, this decline being offset by an increase in the proportions of both women and children. Similar changes took place in manufacturing and mechanical pursuits, the proportion of men declining during the twenty years, from 81 per cent to 79.1 per cent, while the proportions of women and children correspondingly increased. In domestic and personal service there was a loss not only in the proportion of men, but also in that of children, while the proportion of women in this class increased from 31.5 per cent to 35 per cent. But it is in the two remaining classes that the changes during the twenty-year period were greatest. The pro-

portion of men declined from 94.7 per cent to 87.3 per cent in trade and transportation, and from 70.6 per cent to 65.7 per cent in professional service; the loss in the proportion of men was offset in the former class by an increase in the proportions of women and children, and in the latter by an increase in the proportions of women and boys, the proportion of girls remaining stationary. The most notable increase in the proportion of women is found in trade and transportation—from 3.2 per cent in 1880 to 10.1 per cent in 1900.

CHANGES IN THE PROPORTIONS IN SPECIFIED OCCUPATIONS.

Dealing with specific occupations, in many cases the changes in the composition of the workers are still more striking. Table XLVII presents, for continental United States, the number of persons in each of 140 groups of occupations in 1880 and in 1900, classified as men, women, and children, and in Table XLVIII this classification is presented by percentages.

STATISTICS OF OCCUPATIONS.

TABLE XLVII.—DISTRIBUTION, AS MEN, WOMEN, AND CHILDREN, OF THE NUMBER OF PERSONS ENGAGED IN SPECIFIED OCCUPATIONS: 1880 AND 1900—Continued.

OCCUPATIONS.	1900						1880					
	Total persons gainfully occupied.	Men.	Women.	Children.			Total persons gainfully occupied.	Men.	Women.	Children.		
				Total.	Boys.	Girls.				Total.	Boys.	Girls.
Manufacturing and mechanical pursuits—Continued.												
Fishing and mining.												
Fishermen and oystermen	68,940	66,518	428	1,994	1,960	34	41,352	40,468	61	823	819	4
Miners and quarrymen	563,406	538,312	885	24,209	24,105	104	249,397	236,844	65	12,488	12,474	14
Food and kindred products.												
Bakers	79,188	73,310	3,930	1,948	1,550	398	41,309	39,641	1,016	652	605	47
Butchers	113,193	111,436	378	1,379	1,379	76,241	75,673	568	568
Butter and cheese makers	19,241	18,228	615	398	365	33	4,570	4,181	337	52	49	3
Confectioners	31,194	21,333	7,805	2,056	647	1,409	13,692	11,723	1,677	292	169	123
Millers	40,548	40,121	179	248	241	7	58,440	53,069	73	298	294	4
Other food preparers	28,782	22,471	4,348	1,963	1,169	794	8,623	7,218	1,012	393	227	166
Iron and steel and their products.												
Blacksmiths	226,477	224,770	190	1,517	1,514	3	172,726	172,170	556	556
Iron and steel workers	290,538	280,026	2,928	7,584	7,215	369	130,346	125,730	1,218	3,398	3,202	196
Machinists	283,145	278,432	549	4,164	4,142	22	101,130	100,558	572	572
Steam boiler makers	33,046	32,717	8	321	321	12,771	12,624	147	147
Stove, furnace, and grate makers....	12,473	12,135	37	301	295	6	3,341	3,261	80	80
Tool and cutlery makers	28,122	26,639	653	830	737	93	15,588	14,395	477	716	636	80
Wheelwrights	13,505	13,384	10	111	111	15,592	15,376	216	216
Wireworkers	18,487	15,994	1,651	842	707	135	7,170	6,620	215	335	305	30
Leather and its finished products.												
Boot and shoe makers and repairers.	208,903	164,181	36,490	8,232	5,212	3,020	194,079	170,596	19,830	3,653	2,476	1,177
Harness and saddle makers and re- pairers.	40,101	39,040	525	536	466	70	39,960	38,101	1,523	336	308	28
Leather curriers and tanners.....	42,671	39,804	1,490	1,377	1,113	264	29,842	29,245	195	402	397	5
Trunk and leather-case makers, etc.	7,051	4,953	1,232	866	619	347	4,410	3,706	324	380	325	55
Liquors and beverages.												
Bottlers and soda water makers, etc.	10,519	9,130	639	750	595	155	2,081	1,909	62	110	103	7
Brewers and maltsters	20,962	20,221	209	532	466	66	16,278	16,089	60	129	128	1
Distillers and rectifiers	3,144	3,090	30	24	24	3,245	3,212	8	25	25
Lumber and its remanufactures.												
Cabinetmakers	35,619	35,255	67	297	297	50,654	48,649	550	1,615	1,525	90
Coopers	37,200	36,109	101	990	978	12	53,199	52,189	1,010	1,010
Saw and planing mill employees....	161,624	156,360	340	4,924	4,891	33	92,357	89,764	35	2,558	2,552	6
Other woodworkers	111,596	99,981	5,906	5,709	4,810	899	30,337	28,438	908	991	896	95
Metals and metal products other than iron and steel.												
Brassworkers	26,760	25,062	783	915	808	107	11,568	10,435	646	487	396	91
Clock and watch makers and re- pairers.	24,120	18,907	4,596	617	398	219	13,820	11,716	1,732	372	286	86
Gold and silver workers	26,112	18,937	5,767	1,408	795	613	28,405	25,975	1,824	606	463	143
Tin plate and tinware makers	70,505	66,188	1,446	2,871	2,542	329	42,818	41,092	959	767	689	78
Other metal workers	56,602	52,648	2,064	1,890	1,634	256	16,394	15,767	301	326	302	24
Paper and printing.												
Bookbinders	30,278	14,010	14,303	1,965	636	1,329	13,833	7,987	5,086	760	355	405
Boxmakers (paper)	21,098	3,267	14,498	3,333	529	2,804	15,762	17,924	16,108	11,730	1,708	1,022
Engravers	11,151	10,453	430	268	245	23	4,577	4,411	101	65	63	2
Paper and pulp mill operatives	36,328	26,062	8,709	1,557	842	715	21,430	14,076	6,213	1,141	635	506

¹ Less than one-tenth of 1 per cent.

Table XLVIII shows that for the occupations classed as agricultural pursuits, the changes between 1880 and 1900 in the proportions of men, women, and children employed were on the whole comparatively insignificant. The most marked change was that shown for farmers, planters, and overseers—an occupation in which the proportion of women increased from 1.3 per cent to 5.4 per cent, while the proportion of men correspondingly decreased. Of all women engaged in agricultural pursuits in 1900 more than one-half were agricultural laborers, and for this group there was a trifling increase in the proportions of boys and girls, offset by similar decreases in the proportions of men and women. For gardeners, florists, nurserymen, etc., there was an increase in the proportions of both men and women, offset by a decrease in the proportions for boys and girls; for wood choppers and for turpentine farmers and laborers, on the other hand, there was an increase in the proportion of boys, at the expense of men in the former case and of both men and women in the latter.

More than three-fourths of all women engaged in professional service in 1900 were teachers or professors, and in this occupation the percentage of women increased from 67.6 in 1880 to 73.3 in 1900. There was likewise an increase in the proportion of women and a decrease in that of men in every other occupation group of this class, except that of actors, professional showmen, etc.; and in most cases the changes were quite marked. In the cases of architects, clergymen, dentists, lawyers, and physicians and surgeons, the percentages of women in 1900 were small, but showed a marked advance as compared with the 1880 percentages. The seven occupation groups of this class showing the greatest changes in proportions between 1880 and 1900, arranged in the order of their numerical importance as measured by the total column for 1900 in Table XLVII, are as follows:

Summary of the most marked changes shown for occupations classed under professional service.

OCCUPATIONS.	PERCENTAGE OF—							
	Men.		Women.		Boys.		Girls.	
	1900	1880	1900	1880	1900	1880	1900	1880

¹ Less than one-tenth of 1 per cent.

A little more than three-fourths of all persons engaged in domestic and personal service in 1900 were classed under two heads, namely, laborers (not specified) and servants and waiters. In the former group the pro-

portion of women increased from 2.8 per cent in 1880 to 4.1 per cent in 1900, while the proportion of men decreased from 91.7 per cent to 91 per cent and that of boys from 4.9 per cent to 4.3 per cent. In 1880 the returns for servants and waiters included those for housekeepers and stewards, so that it is impossible to make separate comparisons for these two groups. But on combining the returns for 1900 it is found that of the total number in the two groups 15.4 per cent were men, 76.5 per cent were women, 1.2 per cent were boys, and 6.9 per cent were girls; and on making a comparison with the corresponding percentages for 1880—13.8, 75.9, 2.2, and 8.1, respectively—it appears that the percentages for men and women increased during the twenty-year period, while those for boys and girls decreased. For launderers and laundresses and for barbers and hairdressers there was a decrease in the proportion of women, offset by an increase in the proportions of men and girls in the former group and of men alone in the latter. The increase in the proportion of men employed as launderers doubtless is due in large measure to the introduction of machinery. On the other hand, there has been a very marked decrease in the proportion of men returned as boarding and lodging house keepers, hotel keepers, and janitors and sextons, offset by an increase in the proportion of women in the first two cases and of both women and children in the third. In the following summary the occupation groups of this class showing the greatest changes in proportions are arranged in the order of their numerical importance:

Summary of the most marked changes shown for occupations classed under domestic and personal service.

OCCUPATIONS.	PERCENTAGE OF—							
	Men.		Women.		Boys.		Girls.	
	1900	1880	1900	1880	1900	1880	1900	1880

Hotel keepers.....	84.4	93.4	15.6	6.6

¹ Less than one-tenth of 1 per cent.

Under trade and transportation, retail merchants and dealers ranked first in numerical importance in 1900; in 1880, however, they were reported in combination with wholesale merchants, so that for purposes of comparison the two groups must be considered together. For both classes of merchants combined the changes during the twenty-year period were slight, the proportion of women increasing from 3.1 per cent to 4.1 per cent, and that of boys from less than one-tenth of 1 per cent to 0.3 per cent, while the proportion of men decreased from 96.9 per cent to 95.6 per cent, and that of girls remained less than one-tenth of 1 per cent. The greatest changes in the proportions of men and

women, however, took place in the three groups which have been combined, for comparative purposes, under the head of bookkeepers, clerks, stenographers, etc. For these three groups, taken together, the proportion of women increased from 5.7 per cent to 23.9 per cent, or over fourfold, and that of girls from 0.3 per cent to 0.7 per cent, or more than double; these increases were offset by a striking decrease for men—from 90.8 per cent to 73.5 per cent—and a slighter decrease for boys. For salesmen and saleswomen the proportion of boys increased more than fivefold and the proportions of women and girls increased slightly, while there was a corresponding decrease for men; it is interesting to note that the number of persons reported for this group increased from 32,279 in 1880 to 611,139 in 1900, but some part of this great difference is probably due to the return in 1880 of many salesmen as clerks. Notable changes have occurred since 1880 in three other groups in this class, namely, packers and shippers, telegraph and telephone operators, and porters and helpers (in stores, etc.). For packers and shippers the proportions of women, boys, and girls greatly increased, the proportion of men undergoing a corresponding decline; among telegraph and telephone operators the proportions of women and girls showed a very marked increase, while those for men and boys decreased; and among porters and helpers the proportion of men increased at the expense of the other three classes. For steam railroad employees, agents, and draymen, hackmen, teamsters, etc.—three groups of numerical importance—the changes were on the whole slight, although in the case of agents the proportion of women increased nearly fourfold. In the case of messengers and errand and office boys there has been a marked increase in the proportions of women and girls at the expense of men and boys. It is interesting to note that while in 1880 all officials of banks and companies were men, in 1900 women formed 1.7 per cent of the total. In the following summary the occupation groups of this class, in which the changes in the proportions of men, women, and children were most marked, are arranged in the order of their numerical importance:

Summary of the most marked changes shown for occupations classed under trade and transportation.

OCCUPATIONS.	PERCENTAGE OF—							
	Men.		Women.		Boys.		Girls.	
	1900	1880	1900	1880	1900	1880	1900	1880

Telegraph and telephone operators.	68.9	88.0	29.3	5.3	1.0	6.5	0.8	0.2
Packers and shippers.....	63.6	93.2	28.6	5.1	2.8	1.1	5.0	0.6
Porters and helpers (in stores, etc.).	94.3	85.7	0.9	5.4	4.7	7.7	0.1	1.2

Among the occupation groups classed as manufacturing and mechanical pursuits in 1900, carpenters, miners, dressmakers, iron and steel workers, machinists, and painters, in the order named, were of the greatest numerical importance. In all of these groups, except dressmakers, the workers are nearly all men, though in each case women have made a slight advance. In 1880 dressmakers, milliners, and seamstresses were reported together; on combining the returns for these three occupations in 1900, it is found that the proportion of women decreased from 97.2 per cent to 95.6 per cent, while there were trifling increases in the small proportions of men, boys, and girls. In this main class of occupations the greatest changes took place in those groups in which both men and women were employed to a considerable extent, representing, of course, occupations open to both sexes; and the change in almost every instance consisted of an increase in the percentage of women, and, in most cases, of girls, accompanied by a decrease in the percentage of men and perhaps of boys. The most notable exceptions are found in the groups of cotton mill operatives, tailors and tailoresses, and paper and pulp mill operatives. In each of these occupations the percentage of women decreased from 1880 to 1890, and that of men increased. The most important changes in this class of occupations are indicated in the following summary, the groups being arranged in the order of their numerical importance:

Summary of the most marked changes shown for occupations classed under manufacturing and mechanical pursuits.

² Paper and wood combined.

Except in the case of textile mill operatives, the changes shown in the above summary are quite marked, being greatest for glove makers, tobacco and cigar fac-

tory operatives, gold and silver workers, and confectioners. Taking textile mill operatives in detail, in cotton mills there was a decrease in the proportion of women, offset by an increase for men, boys, and girls; in hosiery and knitting mills and in textile mills not specified, there was an increased proportion of both women and girls at the expense of men and boys; in silk mills, and also in woolen mills and carpet factories (for which, as already stated, the changes were slight), there was an increase in the proportion of women only. Among tailors and tailoresses there was a decrease in the proportion of women, with an increase for men and for children of both sexes. Among paper and pulp mill operatives there was an increase in the proportion of men, offset by a decrease in the proportions for women and children.

The proportions of men, women, and children returned in 1880 and in 1900 for certain occupation groups in which, in 1900, women were represented by an appreciable—although perhaps small—percentage and men were represented by a percentage not exceeding 95 or less than 10, are illustrated graphically by the diagram on Plate 9. In this diagram the proportions for 1900 are represented by the white bar and those for 1880 by the black bar. These occupation groups, arranged according to the decreasing order of the proportions for men in 1900, are shown by the following summary:

Per cent distribution, as men, women, and children, of persons engaged in specified occupations in 1880 and 1900, arranged in the order of the highest percentage of men in 1900.

³ Includes housekeepers and stewards.

PROPORTION OF YOUNG PERSONS AND ADULTS AT WORK IN 1900.

The terms men and women, as used in the preceding discussion, comprehend all persons of each sex 16 years of age and over. If the comparison for men and women could have been confined to adults—persons 21 years of age and over—much more significant changes might have been revealed, but no figures on this basis are available for 1880. Some idea of the probabilities in this direction can be gained, however, by noting the comparatively large proportions of young persons—from 16 to 20 years of age—engaged in gainful occupations in 1900. The number of young persons and adults of each sex engaged in gainful occupations in 1900, with the percentage they formed of the total number of persons at work, is presented for each state and territory in Table XLIX, which is an elaboration of the figures for men and women in Tables XLV and XLVI.

STATISTICS OF OCCUPATIONS.

TABLE XLIX.—NUMBER OF YOUNG PERSONS (16 TO 20) AND OF ADULTS (21 AND OVER) OF EACH SEX ENGAGED IN GAINFUL OCCUPATIONS, WITH THE PERCENTAGES WHICH THEY RESPECTIVELY FORM OF ALL PERSONS ENGAGED IN GAINFUL OCCUPATIONS, BY STATES AND TERRITORIES: 1900.

* Less than one-tenth of 1 per cent.

Table XLIX shows that in all the Southern states—except Delaware, Maryland, and the District of Columbia—young persons of the male sex constituted between 10 and 13 per cent of the total number of persons gainfully employed in 1900. In all the North Central states they constituted between 9 and 10.5 per cent. Both these sections have large agricultural interests and it is probable that the great majority of the males in this

age period were agricultural laborers. In most of the other states the percentages were not so high.

For females of the same age period the percentages are much smaller. The only geographic division for which, as a whole, females from 16 to 20 years of age gainfully occupied in 1900 formed more than 5 per cent of the total number of all persons at work was the North Atlantic. In this division there were five

states—Massachusetts, Rhode Island, Connecticut, New York, and New Jersey—in which females of this age group at work formed more than 5 per cent of the total number of persons gainfully occupied; in the South Atlantic there were three—Maryland, South Carolina, and Georgia; in the North Central there was only one—Wisconsin; and in the South Central there were two—Alabama and Mississippi. In Rhode Island, Massachusetts, Connecticut, and New Jersey a considerable proportion of the females at work in this age group are

employees in textile mills; in many Southern states a large proportion are negroes employed as agricultural laborers.

The number of young persons and adults of each sex engaged in each of 140 occupation groups in continental United States in 1900, with the percentage they formed of the total number of persons similarly occupied, is presented in Table L, which is an elaboration of the figures for men and women in Tables XLVII and XLVIII.

TABLE L.—NUMBER OF YOUNG PERSONS (16 TO 20) AND OF ADULTS (21 AND OVER) OF EACH SEX ENGAGED IN SPECIFIED OCCUPATIONS, WITH THE PERCENTAGES WHICH THEY RESPECTIVELY FORM OF ALL PERSONS ENGAGED IN THE SAME OCCUPATION: 1900.

¹ Less than one-tenth of 1 per cent.

Table L shows that males from 16 to 20 years of age, while constituting 9.8 per cent of all gainful workers in 1900, comprised, under agricultural pursuits, 26.2 per cent of all agricultural laborers; under professional service, 16 per cent of all electricians; under domestic and personal service, 20 per cent of all United States soldiers, sailors, and marines; under trade and transportation, 30.9 per cent of all messengers and errand and office boys and 18.9 per cent of all clerks and copyists; and under manufacturing and mechanical pursuits, 18.3 per cent of all glassworkers and of all trunk and leather-case makers, 16.2 per cent of all bottlers and soda water makers, 16.1 per cent of all printers, lithographers, and pressmen, and more than one-tenth of all persons in many other occupation groups.

Considering, similarly, females 16 to 20 years of age, it appears that this class of workers, constituting 4.2 per cent of all gainful workers in 1900, comprised, under professional service, 12.3 per cent of all teachers and pro-

fessors in colleges, etc. and 10.2 per cent of all musicians and teachers of music; under domestic and personal service, 23.9 per cent of all servants and waiters, 14.9 per cent of all housekeepers and stewards, and 10.6 per cent of all nurses and midwives; under trade and transportation, 23.5 per cent of all stenographers and typewriters, 15 per cent of all packers and shippers, and 11.9 per cent of all telegraph and telephone operators; and under manufacturing and mechanical pursuits, 33.5 per cent of all paper box makers, 26.2 per cent of all shirt, collar, and cuff makers, 25.5 per cent of all milliners, 23.1 per cent of all seamstresses, 15.8 per cent of all dressmakers, 17.8 per cent of all persons in the combined groups of textile mill operatives, and between one-fifth and one-tenth of all bookbinders, glovemakers, tobacco and cigar factory operatives, confectioners, hat and cap makers, and rubber factory operatives.

This separation into young persons and adults of the total number of males engaged in gainful occupations

in 1900 incidentally gives the proportion which the males of voting age engaged in each of 140 groups of occupations formed of the total number of persons similarly engaged. The presentation in Table L is supplemented by two other tables for males 21 years of age and over gainfully occupied in 1900—Table LI, giving for each state and territory a distribution, by main classes of occupations, of the whole number engaged in gainful occupations, and Table LII, giving for continental United States a distribution, by general nativity and color, of the number engaged in each group of occupations.

These three presentations, taken together, furnish very complete information concerning the occupations of the potential voters of the country in 1900, giving, first, the proportion which they formed of the total number engaged in each of the several classes and groups of occupations; second, the proportions in which, in each state and territory, they were distributed among the main classes of occupations; and, third, the proportions in which each group of occupations was made up of the different elements of the voting population.

TABLE LI.—DISTRIBUTION, BY MAIN CLASSES, OF MALES 21 YEARS OF AGE AND OVER ENGAGED IN GAINFUL OCCUPATIONS, BY STATES AND TERRITORIES: 1900.

NUMBER AND PROPORTION OF CHILDREN AT WORK.

PROPORTION OF CHILDREN OCCUPIED.

The employment of children in gainful occupations forms a subject of special interest and importance. The statistics showing the extent to which children are employed are derived from the returns on the population schedules and are presented with considerable detail in this volume, the totals for the United States in 1900 being given in Tables 4 to 15, and the figures for states and territories in Tables 35 and 36. Partly on account of the uncertainty of the returns for children at work in 1890, and partly because, all things considered, it seems useful to extend the discussion of the prevalence of child labor over a period of twenty years rather than a shorter interval, comparisons of the figures for 1900 are made with similar figures for 1880 instead of 1890.

At the census of 1880 a total of 1,118,356 children from 10 to 15 years of age, comprising 825,187 males and 293,169 females, was reported as engaged in gainful occupations; the total reported at the Twelfth Census, twenty years later, for continental United States, was 1,750,178, comprising 1,264,411 males and 485,767 females. The number of children at work is compared with the total number of children from 10 to 15 years of age by sex, at each census, in the following summary:

Number of children 10 to 15 years of age engaged in gainful occupations compared with the total number of children of the same age, for both sexes and for each sex separately: 1880 and 1900.

SEX AND CENSUS YEARS.	CHILDREN 10 TO 15 YEARS OF AGE.		
	Total.	Engaged in gainful occupations.	
		Number.	Percent.
1900			
Both sexes.....	9,613,252	1,750,178	18.2
Males.....	4,852,427	1,264,411	26.1
Females.....	4,760,825	485,767	10.2
1880			
Both sexes.....	6,649,483	1,118,356	16.8
Males.....	3,376,114	825,187	24.4
Females.....	3,273,369	293,169	9.0

The above summary shows that the proportion of children of each sex at work was larger in 1900 than in 1880. Out of a total of 9,613,252 children in 1900 there were 1,750,178, or 18.2 per cent, at work, while out of a total of 6,649,483 children in 1880, 1,118,356, or 16.8 per cent, were at work. The corresponding percentages by sex were, for males 26.1 and 24.4 and for females 10.2 and 9.

The number of children of each sex at work in 1880 and 1900, and the proportion which they form of the total number of children of the same sex are shown for each state and territory in Table LIII (page cxlviii).

It will be seen by this table that the percentages for continental United States show, as previously stated, a slightly increased proportion of children of each sex at work in 1900 as compared with 1880; and an increased proportion is shown also for each sex in each geographic division except the South Central, in which the proportion for female children was slightly smaller in 1900 than in 1880. The increases referred to are perhaps rather more marked in the North Atlantic division than in any other, though the change in the proportions is not very great in any division, taken as a whole.

A comparison by individual states and territories reveals a much greater diversity in the direction and extent of the changes. The proportion of children at work was smaller in 1900 than in 1880 for males in New Hampshire, and for both males and females in Vermont, Massachusetts, Rhode Island, and Connecticut; in the other states of the North Atlantic division it was larger. In all the states comprising the North Central division the proportion of female children at work was larger in 1900 than in 1880; this is true also of all but three states with respect to the proportion of male children at work. The three states excepted are Illinois, in which the proportion of male children at work remained practically unchanged, and Ohio and Indiana, in which the proportion decreased, the decrease being especially marked in Indiana. In the Western division an increase was shown in the proportion of both male and female children at work in Montana, Arizona, Idaho, Washington, Oregon, and California; a decrease in the proportion for each sex in Colorado and Utah, and an increase in the proportion for one sex and a decrease for the other in the remaining states and territories. In the two Southern divisions there was an increase in the proportion shown for each sex in 1900, as compared with 1880, in Maryland, the District of Columbia, West Virginia, South Carolina, Kentucky, Mississippi, and Arkansas, and a decrease in the proportion for each sex in Georgia, Florida, and Texas. In Virginia, Tennessee, and Louisiana the proportion for males was larger and that for females smaller in 1900 than in 1880, while in the remaining states of these divisions—Delaware, North Carolina, and Alabama—the conditions were reversed.

STATISTICS OF OCCUPATIONS.

TABLE LIII.—NUMBER OF CHILDREN OF EACH SEX 10 TO 15 YEARS OF AGE ENGAGED IN GAINFUL OCCUPATIONS COMPARED WITH THE TOTAL NUMBER OF THE SAME SEX AND AGE, BY STATES AND TERRITORIES: 1880 AND 1900.

STATES AND TERRITORIES.	MALES 10 TO 15 YEARS OF AGE: 1900.			MALES 10 TO 15 YEARS OF AGE: 1880.			FEMALES 10 TO 15 YEARS OF AGE: 1900.			FEMALES 10 TO 15 YEARS OF AGE: 1880.

¹ Dakota territory.

The proportion of male children at work shows an increase in all but 16 states, and the proportion of female children, in all but 14 states. While in general the changes are not very marked, in some states the difference between the per cent for 1880 and that for 1900 is large. Such differences may be in some degree the result of differences in the methods of enumeration at the two censuses.

At the census of 1900 a separate presentation was made of children at work according to general nativity and color, and the proportion of each element in continental United States reported as at work at that census is stated in the following table:

TABLE LIV.—Number of children of each sex 10 to 15 years of age engaged in gainful occupations compared with the total number of the same sex and age for each principal element of the population: 1900.

SEX, GENERAL NATIVITY, AND COLOR.	CHILDREN 10 TO 15 YEARS OF AGE.		
	Total.	Engaged in gainful occupations.	
		Number.	Per cent.
Males.....	4,852,427	1,264,411	26.1
Native white—native parents.....	2,805,250	682,731	24.3
Native white—foreign parents.....	1,182,948	200,417	16.9
Foreign white.....	199,635	58,236	29.2
Colored.....	664,594	323,027	48.6
Negro.....	646,541	319,055	49.3
Females.....	4,760,825	485,767	10.2
Native white—native parents.....	2,727,245	154,671	5.7
Native white—foreign parents.....	1,177,347	92,793	7.9
Foreign white.....	195,771	39,708	20.3
Colored.....	660,462	198,595	30.1
Negro.....	643,943	197,219	30.6

Of the negro males from 10 to 15 years of age in 1900 very nearly one-half were at work, while of the foreign white males in the same age group less than three-tenths were at work, of the native white males of native parents less than one-fourth, and of the native white males of foreign parents only a little more than one-sixth. For females from 10 to 15 years the proportion employed in gainful labor was also highest among negroes, constituting more than three-tenths of all negro females in that age group as compared with about one-fifth for foreign white females, less than one-twelfth for native white females of foreign parents, and about one-eighteenth for native white females of native parents.

PROPORTION OF CHILDREN IN MAIN CLASSES OF OCCUPATIONS.

The percentages in Table LIV indicate the extent to which children were gainfully employed in each of the principal elements of the population in 1900. The next step is to determine the manner in which they were employed—that is, first, what proportion of all children gainfully occupied at the two censuses was found in each of the five main classes of occupations—and, second, the relative importance of child labor as indicated by the proportion, for each census, which children formed of the total number of persons in all occupations and of the number in each class of occupations. The data required for these purposes are presented for continental United States in the following table:

TABLE LV.—DISTRIBUTION, BY MAIN CLASSES, OF CHILDREN OF EACH SEX 10 TO 15 YEARS OF AGE ENGAGED IN GAINFUL OCCUPATIONS, AND COMPARISON OF THE NUMBER 10 TO 15 WITH THE TOTAL NUMBER OF THE SAME SEX IN EACH MAIN CLASS OF OCCUPATIONS: 1880 AND 1900.

SEX AND CLASSES OF OCCUPATIONS.	PERSONS ENGAGED IN GAINFUL OCCUPATIONS: 1900.				PERSONS ENGAGED IN GAINFUL OCCUPATIONS: 1880.

¹ Less than one-tenth of 1 per cent.

Considering, first, the proportion of the total number of children at work found in each class of occupations, as shown by the first column of percentages in Table LV, it appears that more than two-thirds of the male children

gainfully employed in 1900 and more than two-fifths of the female were engaged in agricultural pursuits. For male children the class of occupations comprising the next largest proportion was that of manufacturing and

mechanical pursuits, then domestic and personal service, trade and transportation, and professional service, in the order named. For female children domestic and personal service formed the class of occupations second in importance to agricultural pursuits, manufacturing and mechanical pursuits ranking next, then trade and transportation and professional service.

Comparing this distribution by occupational classes with that shown for 1880, it will be noticed that the proportion of the working children of either sex engaged in agricultural pursuits and in domestic and personal service was smaller in 1900 than in 1880, while the proportion in trade and transportation and in manufacturing and mechanical pursuits was larger, the gain being rather more marked for female than for male children.

In this connection a brief statement relative to the composition of these five main classes, pointing out the principal occupations for children included under each, may be of interest. A complete analysis by occupations is given in Table LX (page clxii). An examination of this table shows that almost all children of either sex engaged in agricultural pursuits were agricultural laborers. The majority of the comparatively few children reported under professional service were engaged in occupations connected with teaching, music, art, or the stage; a considerable number of the male children, however, were reported as electricians. The class of domestic and personal service exhibits a marked contrast in the occupational distribution of the two sexes. More than four-fifths of the male children in this class were reported as laborers (not specified), while more than four-fifths of the female were servants and waitresses; at the same time a considerable number of the female children were returned as laborers (not specified), and a considerable number of the male as servants and waiters. For male children engaged in trade and transportation the leading occupations were, first, messengers and errand and office boys, second, clerks and copyists, third, salesmen, and fourth, draymen, hackmen, teamsters, etc., these four occupations comprising about four-fifths of the total number in this class; for female children the most important of the occupations included under this head was that of saleswomen, next, that of clerks and copyists, and then messengers and errand and office girls, these three occupations comprising about seven-tenths of the total. In the class of manufacturing and mechanical pursuits concentration by occupations is much less marked. For male children the occupation of miners and quarrymen was the most important numerically. The various textile mill operatives formed important occupations for both sexes; and a considerable proportion of the female children were employed as seamstresses, dressmakers, tailoresses, milliners, and shirt, collar, and cuff makers.

As shown in Table LV by the second column of percentages for each census year, children from 10 to 15

years of age at work constituted in 1900 a somewhat smaller proportion of the whole number of persons gainfully occupied than they did in 1880. Males of this age group constituted only 5.3 per cent of all males at work in 1900, as against 5.6 per cent in 1880; at the same time the percentage increased in each of the main classes of occupations except domestic and personal service. The percentage which female children form of the total number of female workers decreased from 11.1 in 1880 to 9.1 in 1900; and a decrease appears in each of the main classes of occupations except manufacturing and mechanical pursuits.

It will be noticed on comparing the figures in Table LV with those shown in the summary on page cxlvii that, while the children at work formed a larger proportion of the total number of children in 1900 than they did in 1880, they formed a smaller proportion of the total number of gainful workers of all ages. In other words, children are more generally employed in gainful occupations than they were formerly; but, while the number so employed has increased faster than the total number of children 10 to 15 years of age, it has not increased so fast as the total number of gainful workers of all ages.

In Table LVI (page cli) the children from 10 to 15 years of age engaged in gainful occupations and in each class of occupations in continental United States in 1900, in the aggregate and by sex, are distributed by general nativity and color.

The per cent distribution of the total number of child workers in 1900 according to nativity and color, as shown by Table LVI, was as follows: Native white of native parents, 47.8 per cent; native white of foreign parents, 16.8 per cent; foreign white, 5.6 per cent; negro, 29.5 per cent; Chinese, Japanese, and Indian combined, 0.3 per cent. Comparing these percentages with a similar distribution of the entire population at work (native white of native parents, 47.7 per cent; native white of foreign parents, 18.3 per cent; foreign white, 19.7 per cent; negro, 13.7 per cent; Chinese, Japanese, and Indian combined, 0.6 per cent), it appears that the negro children at work formed a larger proportion of all children gainfully occupied than all negroes at work formed of the entire working population. The foreign white, on the other hand, and the native white of foreign parents are represented by higher percentages among the total number of workers than among child workers. In case of the native white of native parents the percentages are practically identical.

More than one-half (53.1 per cent) of all children engaged in agricultural pursuits in 1900 were native white of native parents, the next largest proportion, 38.2 per cent, being that shown for negroes; these two elements together constituted more than nine-tenths of the whole number of children in this class of occupations. Each of the two native white elements consti-

tuted more than two-fifths of all children in trade and transportation and very nearly the same proportion of all children in manufacturing and mechanical pursuits. The foreign white had its largest proportion, 17.9 per cent, in manufacturing and mechanical pursuits, as compared with its proportion in each of the other main classes, while the negro element was most largely represented in agricultural pursuits and in domestic and personal service.

The most notable differences between the sexes are found in agricultural pursuits; of all male children in this class of occupations very nearly three-fifths were native white of native parents and only about three-tenths were negroes, while of all female children in this

class more than seven-tenths were negroes and only about one-fourth were native white of native parents. Another instance of a somewhat similar contrast is found in trade and transportation; native white females of foreign parents constituted more than one-half of the whole number of female children in this class of occupations, the native white of native parents constituting less than one-third, while of the male children in this class the native white of native parents formed a larger proportion than the native white of foreign parents, although the difference is not very marked, the one element comprising somewhat more, the other element somewhat less, than two-fifths of the total number.

TABLE LVI.—DISTRIBUTION, BY GENERAL NATIVITY AND COLOR, OF CHILDREN 10 TO 15 YEARS OF AGE ENGAGED IN GAINFUL OCCUPATIONS AND IN EACH MAIN CLASS, FOR BOTH SEXES AND FOR EACH SEX SEPARATELY: 1900.

¹ Less than one-tenth of 1 per cent.

Table LVII (page clii) is a reproduction by states and territories, arranged geographically, of that portion of Table 35 (page 166) of the general tables which shows the number of persons 10 to 15 years of age, by sex, engaged in each main class of occupations in 1900. Table LVII is supplemented by Table LVIII, in which the number of children of each sex in all gainful occupations and in each main class is distributed according to general nativity and color. This information, which is not shown

in the general tables, is supplied here to show numerically the extent to which the children at work in each state and territory in 1900 were drawn from each of the principal population groups. A per cent distribution, by main classes of occupations, of the whole number of children of each sex at work in 1900, without regard to general nativity and color, is given by states and territories in Table LIX.

¹ Less than one-tenth of 1 per cent.

Table LIX gives a very good idea of the conditions surrounding the employment of children in the different states and territories in 1900. In nearly all the North Atlantic states by far the largest proportion of the children at work were engaged in manufacturing and mechanical pursuits, this being the case particularly with respect to females. In Vermont, however, considerably more than one-half of the male children at work were engaged in agricultural pursuits, and an even larger proportion of the female in domestic and personal service; and in New York 39.2 per cent of all male children at work were engaged in trade and transportation, as compared with 33 per cent in manufacturing and mechanical pursuits.

In each of the states of the South Atlantic division, except the District of Columbia, the largest proportion of all male children at work in 1900 were engaged in agricultural pursuits; in Delaware and Maryland, however, a relatively large proportion were engaged in manufacturing and mechanical pursuits, and the proportion engaged in agriculture was accordingly considerably smaller than in the other states of the division. In the District of Columbia more than three-fifths of all male children at work were engaged in trade and transportation. For female children agricultural pursuits formed the most important class of occupations in the Carolinas and in Georgia and Florida, but in the other states of this division the largest proportion of the female children gainfully employed were engaged in domestic and personal service. In Maryland and Delaware the proportion engaged in manufacturing and mechanical pursuits was also large.

In the South Central states the proportion of the working children engaged in agricultural pursuits in 1900 was even greater than in the South Atlantic states. For male children the percentages ranged from 81 in Louisiana to 93.9 in Oklahoma. The corresponding percentages for female children were almost as high except in Kentucky, Tennessee, and Oklahoma. In Tennessee and Oklahoma, while more than one-half of the female children at work were engaged in this branch of occupations, a considerable proportion were engaged in domestic and personal service. In Kentucky the proportion engaged in agriculture was not quite one-fourth, while nearly one-half were employed in domestic and personal service and somewhat more than one-fifth in manufacturing and mechanical pursuits.

Agricultural pursuits also constituted the leading class of occupations for male children in the North Central division. In the states of this division west of the Mississippi the percentages were about as high as in the South Central division, but in the states lying east of that river a much smaller proportion of the male children at work were engaged in this class of occupations, a considerable proportion being engaged in manufacturing and mechanical pursuits and in domestic and personal service. In this division compara-

tively few of the working girls were engaged in agricultural pursuits; the largest number of them were employed in domestic and personal service, the percentages for this class of occupations ranging from 45.4 in Illinois to 82.6 in North Dakota. Manufacturing and mechanical pursuits formed an important class of occupations for female children in all states of this division east of the Mississippi and in Missouri, the percentages employed in this class of occupations ranging in these states from 25.1 in Indiana to 37.8 in Ohio.

In each of the states and territories of the Western division, except California, the largest proportion of all male children at work in 1900 were engaged in agricultural pursuits, the proportion ranging from somewhat more than two-fifths in Montana and Colorado to over four-fifths in Idaho. In California the male children at work in 1900, exclusive of those engaged in professional service, were more evenly divided between the classes, there being 30.7 per cent in trade and transportation, 26 per cent in manufacturing and mechanical pursuits, 21.7 per cent in agricultural pursuits, and 20.8 per cent in domestic and personal service. For all the states and territories of this division, except California, the number of female children at work in 1900 was small, so that the percentages are not particularly significant. In California considerably more than one-half (54.3 per cent) of all female children at work in 1900 were engaged in domestic and personal service; nevertheless, the proportion of female children engaged in manufacturing and mechanical pursuits was larger than that for males in the same class—31.4 per cent as against 26 per cent.

PROPORTION OF CHILDREN OCCUPIED BY YEAR OF AGE.

As the labor laws of the several states prescribe different age limits under which the employment of children is either forbidden altogether or permitted only after certain conditions have been observed, it is desirable that the data presented by the census should furnish a more precise measure of the extent to which children are employed at different ages than that afforded by the figures for the age group 10 to 15, taken as a whole. In order to meet this requirement a special tabulation has been made since the close of the general work of the Twelfth Census, showing the number of boys and girls of each year of age from 10 to 15, inclusive, who were reported in any gainful occupation in 1900. The results of this special tabulation are given in Tables 10 to 15 of the general tables for the United States, and in Table 36 of the general tables for states and territories. Table LX, which is similar in form to Table 10 of the general tables, shows, for continental United States, the number of males and of females from 10 to 15 years of age engaged in certain occupation groups in 1900, distributed according to year of age. Of the 140 groups of occupations used for purposes of general presentation, this table includes only those in which, at the census of 1900, children of the specified ages were reported as being engaged.

STATISTICS OF OCCUPATIONS.

TABLE LX.—DISTRIBUTION, BY YEAR OF AGE, OF THE NUMBER OF CHILDREN OF EACH SEX 10 TO 15 ENGAGED IN SPECIFIED OCCUPATIONS: 1900.

STATISTICS OF OCCUPATIONS.

The number of persons of each sex, for each year of age from 10 to 15, inclusive, engaged in each main class of occupations, together with the proportion which the

number for each year of age forms of the total number from 10 to 15 in that class, is given for continental United States in the following table:

TABLE LXI.—DISTRIBUTION, BY YEAR OF AGE, OF CHILDREN 10 TO 15 ENGAGED IN GAINFUL OCCUPATIONS AND IN EACH MAIN CLASS, FOR BOTH SEXES AND FOR EACH SEX SEPARATELY: 1900.

The per cent distribution by year of age of all the children at work in 1900, as given in Table LXI, is summarized for both sexes and for each sex as follows:

YEAR OF AGE.	Both sexes.	Males.	Females.
Total	100.0	100.0	100.0
10 years.....	8.1	8.3	7.5
11 years.....	9.1	9.5	8.1
12 years.....	12.7	12.9	11.9
13 years.....	15.3	15.6	14.7
14 years.....	23.2	22.9	24.1
15 years.....	31.6	30.8	33.7

Cumulatively stated, the numbers and percentages for both sexes combined were as follows: Under 12 years, 300,883, or 17.2 per cent; under 13 years, 522,196, or 29.9 per cent; under 14 years, 790,623, or 45.2 per cent; under 15 years, 1,197,324, or 68.4 per cent. The percentages for the two sexes do not differ widely, but the proportion of all the female children at work under 14 years of age was smaller than that of the male, the difference amounting to 4.1 per cent.

In agricultural pursuits more than one-half (55.6 per cent) of the male children and more than three-fifths (62.2 per cent) of the female were under 14 years of age; but in each of the other four classes of occupations much the larger proportion of each sex was

either 14 or 15 years of age, the combined proportions ranging, for these two years in the four classes, from more than three-fifths to more than four-fifths of the whole number.

Table LXII (page clxv) presents for continental United States a proportionate distribution of males and of females from 10 to 15 years of age engaged in specified groups of occupations in 1900, similar to that just given for the five main classes of occupations.

In order to make the groups of workers given in Table LXII as comprehensive as possible, the following combinations of occupations are used: Bookkeepers, clerks, stenographers, etc.; metal workers (of all kinds); packers and porters; textile mill operatives (in part); textile workers (in part); and woodworkers (of all kinds).

The proportion of child workers under 12 years of age, as shown by Table LXII, was exceptionally large in the occupations of agricultural laborers, laborers (not specified), servants and waiters, and cotton mill operatives, and for male children in the occupation of stock raisers, herders, and drovers. The percentages for males under 12 in these occupation groups were: Agricultural laborers, 23.2; stock raisers, herders, and drovers, 21.6; servants and waiters, 18.1; cotton mill operatives, 15.8; and laborers (not specified), 11.7.

SUMMARY AND ANALYSIS OF RESULTS.

clxv

Those for females under 12 were: Agricultural laborers, 26.8; laborers (not specified), 19.9; cotton mill operatives, 13.6; and servants and waitresses, 10. Of the male children employed in mines and quarries more than 7 per cent were under 12 years of age, and of those in tobacco and cigar factories more than 6 per cent were under that age.

The figures contained in Table LXII are of general interest as showing the conditions for continental United States taken as a whole, but data of this character have much greater significance when the state is made the

unit of presentation. The first presentation on this basis is a proportionate distribution by year of age, in Table LXIII, of the total number of children of each sex engaged in all gainful occupations in 1900.

STATISTICS OF OCCUPATIONS.

The percentages contained in Table LXIII are cumulatively expressed, for purposes of analysis, in Table LXIV under each of three age limits, namely, under 12 years, under 14 years, and under 15 years.

TABLE LXIV.—*Per cent which the number of children of each sex of each specified age engaged in gainful occupations forms of the total number of gainful workers of the same sex 10 to 15 years of age, by states and territories: 1900.*

In the more southerly section of the South Atlantic division—extending from Virginia to Florida—and uniformly throughout the South Central division, as shown by Table LXIV, from about one-fifth to more than one-fourth of all the male children at work in 1900 were under 12 years of age. This statement is also

true with respect to female children at work in these states except the two Virginias and Kentucky, in which the proportions are somewhat below one-fifth but are high as compared with the proportions for females in many other states. In several of the states of the North Central and Western divisions also, particularly in Arizona, South Dakota, and New Mexico, those under 12 years of age constituted considerable proportions of all the children of each sex at work; in Arizona the large proportion (32.7 per cent) for females—the highest for either sex in any state or territory—is due mainly to the inclusion of Indians, as already explained.

In all the North Atlantic states except Pennsylvania, and in Michigan, Wisconsin, California, and the District of Columbia, on the other hand, males under 12 years of age constituted less than 5 per cent of all male children at work in 1900, the highest percentage being 4.8, for both Michigan and Wisconsin, and the lowest 0.5, for Massachusetts. In all the states named, as well as in many of the other Northern and Western states, the per cent of all the female children at work in 1900 who were under 12 years of age was also less than 5; and in this connection it should be noted that in most of those states and territories for which a large proportion of children under 12 at work is shown, there is not a wide difference between the percentages for the two sexes, but that in the other states and territories the proportion of females under 12 is usually considerably less than that of males.

In general, it may be said that the proportions of children under 12 years of age at work in 1900 in the several states and territories were high or low according to the relative predominance of agricultural pursuits, and also in a somewhat less degree according to the extent to which the employment of children was restricted by legislative enactment. Children are employed in agricultural labor very generally throughout the South, and to a less extent in the North and West, and if the analysis is extended to include those under 14 years of age it is found from Table LXIV that in some of the Southern states more than three-fifths, and in all of them, except Kentucky and the Virginias, fully one-half of all the children of each sex at work in 1900 were included within this age limit. In states with important manufacturing interests the proportion of children under 12 or 14 years of age at work is also influenced somewhat by restrictive legislation concerning their employment in industrial and mercantile pursuits. A noticeable contrast in this respect is shown for Rhode Island as compared with Massachusetts and Connecticut, due to a difference in the laws prohibiting the employment of children under certain ages in these states.¹ In Rhode Island 24.3 per cent of all the male children and 22.2 per cent of all the female children at work in 1900 were under 14 years of age, while in neither of the other two states mentioned did the proportion under that age exceed 8 per cent for either sex.

¹ See Appendix B.

In Table LXV a presentation is made for each state and territory of the leading occupation groups in which children were reported as having been engaged during any portion of the census year.¹ The statements contained in this table—particularly those referring to children in the earlier years of life—have been carefully verified by reference to the original returns on the population schedules, and represent, as far as the returns of the census enumerators can be relied upon, the conditions with respect to the employment of children as they existed during the period covered by the Twelfth Census.

For this table, as for Table LXII, certain occupation groups have been combined in whole or in part as follows:

Bookkeepers, clerks, stenographers, etc.—Bookkeepers and accountants; clerks and copyists; stenographers and typewriters.

Lumbermen and wood choppers.—Lumbermen and raftsmen; wood choppers.

Metal workers.—Blacksmiths; brassworkers; clock and watch makers and repairers; gold and silver workers; iron and steel workers; machinists; steam boiler

makers; stove, furnace, and grate makers; tin plate and tinware makers; tool and cutlery makers; wheelwrights; wireworkers; other metal workers.

Packers and porters.—Packers and shippers; porters and helpers (in stores, etc.).

Printers and bookbinders.—Bookbinders; printers, lithographers, and pressmen.

Textile mill operatives.—Carpet factory operatives; cotton mill operatives; hosiery and knitting mill operatives; silk mill operatives; woolen mill operatives; other textile mill operatives.

Textile workers.—Dressmakers; hat and cap makers; milliners; seamstresses; shirt, collar, and cuff makers; tailors and tailoresses; other textile workers.

Woodworkers.—Cabinetmakers; coopers; saw and planing mill employees; other woodworkers.

No detailed analysis of the figures in Table LXV is required, nor is it the purpose of this report to discuss the question of child labor from the standpoint of these statistics taken in connection with the labor laws operative in the several states in 1900; but for the convenience of the reader, a synopsis of the legislation as it existed at the period of the Twelfth Census is published in Appendix B.

DISTRIBUTION OF PERSONS OCCUPIED BY GENERAL NATIVITY AND PARENTAGE.

DISTRIBUTION BY GENERAL NATIVITY.

A distribution, by general nativity, of the total number of persons 10 years of age and over in continental United States, and of the number of such persons gainfully occupied, is given by sex for 1900, and in the aggregate for 1880 and 1890, in Table LXVI. As the native and foreign born elements of the colored population were not separately tabulated by age in 1880 or in 1890, the figures in Table LXVI showing the native and foreign born population 10 years of age and over at those censuses have been estimated by dividing the colored population according to the proportions of native and foreign colored revealed by the tabulations of the census of 1900.

TABLE LXVI.—*Distribution, by general nativity, of the population 10 years of age and over and of persons engaged in gainful occupations, and comparison of the number engaged in gainful occupations with the population 10 years of age and over: 1880, 1890, and 1900.*

CENSUS YEARS, SEX, AND GENERAL NATIVITY.	POPULATION 10 YEARS OF AGE AND OVER.		PERSONS ENGAGED IN GAINFUL OCCUPATIONS.		
	Number.	Per cent.	Number.	Per cent.	Per cent of popula- tion 10 years of age and over.

Foreign born	8,890,544	18.8	5,237,866	22.5	58.9
1880					
Aggregate	36,761,607	100.0	17,392,099	100.0	47.3
Native born.....	30,300,001	82.4	13,897,452	79.9	45.9
Foreign born	6,461,606	17.6	3,494,647	20.1	54.1

¹ Corrected figures; see explanation on page lxvi.

² Estimated.

The proportions of native and foreign born among persons gainfully occupied were exactly the same in

1900 as in 1880; in 1890, however, the proportion of native born among persons gainfully occupied was less, and that of foreign born correspondingly greater, than at the other two censuses. It is likely that this variation was due in large measure to the heavy immigration during the decade 1880 to 1890, since, according to the reports of the Bureau of Immigration, a decrease of nearly 30 per cent was shown for the following decade. The figures presented in Table LXVI show that even the general movement of immigration to the United States during the past two decades has not been sufficient to advance the proportion of foreign born persons at work. The tendency toward increase in the relative strength of the native born is not likely to be checked in the future unless immigration increases decidedly over its already high record.

At each census the percentage which persons engaged in gainful occupations formed of the population 10 years of age and over, as shown by Table LXVI, was much larger for the foreign born than for the native born, principally because the proportion of adults (21 years of age and over) is much larger among the foreign born. On considering the figures by sex, it is found that, while the difference between the proportions of native and foreign born females at work in 1900 is insignificant, the difference in the proportions for males is very marked. In 1900 nearly nine-tenths of the foreign born males 10 years of age and over were gainfully occupied, as compared with less than eight-tenths of the native born males. A comparison of the age distribution of these two classes shows that a little more than three-tenths of the native born male population 10 years of age and over were between 10 and 21 years of age, as compared with about one-tenth of the foreign born males; but probably this difference does not fully account for the difference in the proportion gainfully employed, because the foreign born, coming to this country to improve their condition, undoubtedly represent on the average a lower grade of economic well-being than the native born, and as a natural result engage in gainful occupations at a younger age.

The distribution, by general nativity, of the total number of persons of each sex engaged in each main class of occupations at the last three censuses is presented for continental United States in Table LXVII.

SUMMARY AND ANALYSIS OF RESULTS.

¹ Corrected figures; see explanation on page lxvi.

This table shows that for both sexes combined and for males alone the per cent of foreign born in 1900 was highest in manufacturing and mechanical pursuits and lowest in agricultural pursuits. Among females, however, the proportion of foreign born in manufacturing and mechanical pursuits, though large, is slightly exceeded by the proportion in domestic and personal service. Doubtless the large proportion of foreign born in the class of manufacturing and mechanical pursuits is due to the tendency of the foreign born to remain in cities or closely settled communities.

Between 1880 and 1900 there was a decline in the proportion of foreign born among the whole number

of persons of each sex engaged in each main class of occupations, except in the case of females engaged in agricultural pursuits. The decline was most marked in trade and transportation and especially noteworthy for females. This change is probably due to the growth of certain occupations in this class which were recruited largely from the native element. On the whole, however, the variations shown in this table are not sufficiently great to possess much significance.

Table LXVIII shows, for males and females separately, the proportions of native and foreign born engaged in each of the principal occupation groups in 1890 and 1900, for continental United States.

¹ Includes stove, furnace, and grate makers, wheelwrights, and "other metal workers."² Includes carpet factory operatives, hosiery and knitting mill operatives, and "other textile mill operatives."³ Corrected figures; see explanation on page lxxvi.⁴ Includes all workers in iron and steel and other metals.⁵ Includes carpet factory operatives and "other textile mill operatives."

Table LXVIII presents interesting evidence of the extent to which the foreign element of the population is represented in the different occupation groups. The groups in which this element of the population formed more than one-half of the male workers in 1900 are—in the order of the decreasing per cent of foreign born—tailors, brewers and maltsters, launderers, hucksters and peddlers, cabinetmakers, bakers, bleachery and dye works operatives, and hat and cap makers. In these groups the per cent of foreign born ranges from 76.3 for tailors to 50.4 for hat and cap makers. The largest proportions of native born males were found among lawyers, telegraph and telephone operators, agricultural laborers, teachers and professors in colleges, etc., stenographers and typewriters, and dentists. For these six occupation groups—three of which are professional pursuits—the proportions of native born range from 93.7 to 91.2. The most notable increase since 1890 in the proportion of foreign born males is in the group of hat and cap makers, which advanced during the decade into the class of occupations having more than 50 per cent foreign born; on the other hand, saloon keepers, miners, silk mill operatives, and food preparers (not otherwise specified) dropped out of this class. For the great majority—all but 19 of the 107—of the occupations for males included in the preceding table the per cent of foreign born decreased to a greater or less extent. Some of the more notable decreases in addition to those just mentioned were shown in the occupations of launderers, cotton mill operatives, and soldiers, sailors, and marines (U. S.).

The conspicuous decrease in the per cent of foreign born among United States soldiers, sailors, and marines is due to the fact that the large increase in the military and naval forces between 1890 and 1900 was brought about mainly by enlistments from the native born population. It should be remembered that the comparison in this table is confined to continental United States, and therefore does not include the large proportion of United States military and naval forces stationed abroad in 1900. But the per cent of foreign born is practically the same for all soldiers, sailors, and marines as it is for the portion in continental United States.

In the leading occupations presented for females, the largest proportions of foreign born in 1900 were found among merchants and dealers (except wholesale), 42.1 per cent; tailoresses, 38.4 per cent; cotton mill operatives, 38.2 per cent; and woolen mill operatives, 32.1 per cent. The occupations in which native born females formed more than 90 per cent of the total are agricultural laborers; teachers and professors in colleges, etc.; telegraph and telephone operators; musicians and teachers of music; laborers (not specified); stenographers and typewriters; printers, lithographers, and presswomen; bookkeepers and accountants; and clerks and copyists. In this list professional service and trade and transportation are both prominent. The high percentage of native born among agricultural laborers and laborers (not specified) reflects the extent to which

negro women are engaged in these occupations. The greatest advance since 1890 in the proportion of foreign born females is in the group of tailoresses, in which the proportion increased from 32 per cent in 1890 to 38.4 per cent in 1900. Since 1890 boarding and lodging house keepers, nurses and midwives, and servants and waitresses have dropped out of the class in which the foreign born formed more than 30 per cent of all females, and clerks and copyists have advanced into the class in which native born females formed more than 90 per cent of the total number. The fact that the maximum proportions for foreign born females are so much lower than the maximum proportions for males is possibly accounted for by the low ratio of female to male immigrants.

Although slight increases in the proportions of foreign born were shown between 1890 and 1900 in a few cases, the general tendency for both sexes was in the direction of decrease; all the notable changes were decreases, except the two cases referred to (hat and cap makers and tailoresses).

Persons of native and foreign birth engaged in gainful occupations in 1880, 1890, and 1900 are distributed for continental United States, in Table LXIX, by main classes of occupations.

TABLE LXIX.—Per cent distribution, by main classes, of native and of foreign born persons engaged in gainful occupations, for both sexes and for each sex separately: 1880, 1890, and 1900.

¹ Based upon corrected figures; see explanation on page lxvi.

A marked decline in the proportion of both native and foreign born persons—especially native born males—engaged in agricultural pursuits is clearly indicated in this table; the only exception is found in the case of foreign born females, of whom the number engaged in this class of occupations in 1900 was small. The decline since 1880 in the relative importance of agricultural pursuits, together with a slighter decline in domestic and personal service, is offset by increases

in the proportions engaged in trade and transportation and in manufacturing and mechanical pursuits.

It will be observed that, although the proportion of males of native birth engaged in agricultural pursuits has steadily declined since 1880, it still remains larger than that for any other of the five classes; this is also true of females of both native and foreign birth engaged in domestic and personal service. Of foreign born males at work the largest proportion at each census were engaged in manufacturing and mechanical pursuits, while much the largest proportion of foreign born females gainfully occupied were engaged in domestic and personal service.

DISTRIBUTION BY PARENTAGE.

The nativity of the gainful workers in continental United States has been considered, first, by dividing the white and the colored into their elements, and second, by dividing the whole number as native and for-

eign born. A third method of consideration is a division according to the nativity of the parents. Such a separation is made, for both native and foreign born persons, in Table LXX, which also gives, for each specified parentage, the proportion of persons at work.

In this and the tables following, as explained on page xxviii, the term "of native parentage" refers to persons, either of native or foreign birth, having both parents native born, or one parent native born and one parent for whom the birthplace is unknown, or both parents for whom the birthplace is unknown, while the term "of foreign parentage" refers to persons, either of native or foreign birth, having either one or both parents foreign born. The countries named in the first column represent, for persons of foreign parentage, the birthplace either of both parents or of one parent only when the other parent is of native birth, while the term "of mixed foreign parentage" refers to those having both parents foreign born, but of different nationalities.

TABLE LXX.—NUMBER OF PERSONS OF EACH SPECIFIED PARENTAGE ENGAGED IN GAINFUL OCCUPATIONS COMPARED WITH THE TOTAL NUMBER OF THE SAME PARENTAGE, FOR ALL PERSONS AND FOR NATIVE AND FOREIGN BORN PERSONS SEPARATELY: 1900.

¹Includes Newfoundland.

²Includes all other foreign countries.

It will be noticed on referring to Table LXX that the percentages of persons of each specified parentage gainfully employed in 1900 were much higher for the foreign born than for the native born. The contrast is the more marked because the number of the native and foreign born at work has been compared with the total number of native and foreign born, and not with the number 10 years of age and over, the figures for the latter by countries of parentage not being available. The inclusion of children under 10 years of age decreases very materially the percentages of native born gainfully employed, while not affecting very greatly the percentages of foreign born; in 1900 native born persons at work constituted 35.4 per cent of the total

native born population as against 48.6 per cent (see Table LXVI, page clxxxvi) of the native born population 10 years of age and over, while the gainful workers of foreign birth constituted 56.6 per cent of the entire foreign born population as against 57.7 per cent of the foreign born population 10 years of age and over. Moreover, the inclusion of children under 10 probably explains the wider range and greater diversity in the percentages by birthplace of parents for the native born of foreign parents as compared with the percentages for the foreign born of foreign parents, because the proportion of children in the former element of the population is determined largely by the period which has elapsed since their parents immigrated to this country. If the

immigration is recent, the second generation of course consists principally of children; if, on the other hand, the immigration is of earlier date, the proportion of children in the second generation is correspondingly small. Therefore, among the native born of foreign parents the percentage gainfully occupied depends largely upon the period of immigration. For example, the small percentage of native born persons of Russian, Hungarian, or Italian parentage gainfully occupied in 1900 is doubtless due to the fact that the influx of immigrants from Russia, Hungary, and Italy is of a comparatively recent date, so that in 1900 the native born children of these immigrants were in most cases too young to engage in gainful occupations. Conversely, the native born population of Irish, Scotch, English and Welsh, French, or German parentage show the largest percentages at work—evidently because these nationalities represent a comparatively early immigration movement. In case of the foreign born the period of immigration does not exert much influence, because the great majority of immigrants are of working age when they come to this country; but such variations as exist are probably due largely to differences in the age constitution or in the proportions of the sexes, the higher percentages indicating perhaps a relatively low proportion of children or of females.

The 11,166,361 workers of foreign parentage in continental United States in 1900 constituted over three-eighths (38.4 per cent) of the total number of persons gainfully occupied. The per cent distribution of this class of gainful workers according to specified countries of parentage is presented in Table LXXI.

TABLE LXXI.—*Per cent distribution, by birthplace of parents, of persons of foreign parentage engaged in gainful occupations, for all such persons and for the native and foreign born separately: 1900.*

² Includes all other foreign countries.

It is evident from this table that the three most important constituents in our working population of foreign parentage in 1900 were the Germans, the Irish, and the English, including in the latter term the English Canadians, the Scotch, and the Welsh, and that these groups, representing persons of German or British parentage, comprised two-thirds (67.2 per cent) of the total. A separate presentation is made in the table for the foreign born of foreign parents, or immigrants, and for the native born of foreign parents, or the children of immigrants. Of the former there were 5,845,919 engaged in gainful occupations in 1900, of which number 3,283,399, or 56.1 per cent, were of German or British parentage. Of the native born of foreign parents, or the children of immigrants, there were 5,320,442 engaged in gainful occupations, of which number 4,233,420, or 79.5 per cent, were of German or British parentage. The latter percentage is much larger than the former, simply because the English, Irish, and Germans represent an early immigration movement as compared with other nationalities, and accordingly the second generation has attained greater relative importance as a working force in the community. In fact, in the case of the Germans, the Irish, and the English and Welsh, the second generation of workers is numerically greater than the first (see Table LXX), the only other nationality of which this is true being the French, whose immigration is comparatively insignificant but belongs to the same period. A comparison with an earlier census shows that the relative importance of the British and Germans in the first generation of foreign workers, or immigrant class, has undergone a marked decrease. In 1880 the total number of foreign born gainfully employed was 3,494,647, of whom 2,829,652, or 81 per cent, were born in Germany, Great Britain, Ireland, or Canada. In 1900 the corresponding percentage for foreign born of German or British parentage, including both English and French Canadians, was 59.8. The figures for the census of 1900, being based upon the birthplace of the parents of the immigrants, are not entirely comparable with those of the census of 1880, which are based upon the birthplace of the immigrants themselves. The comparison is sufficiently exact, however, to measure approximately the declining importance of the British and German elements in the foreign born working population, which is the result of the preponderant immigration of other nationalities in recent years. This relative decline has been to a large extent offset by the increasing importance of these elements in the second generation of foreign workers.

The figures presented in Table LXX for persons engaged in gainful occupations are analyzed by sex in Table LXXII.

SUMMARY AND ANALYSIS OF RESULTS.

Table LXXII possesses significance, in that it indicates for each sex separately what proportion of the population of each specified parentage was gainfully occupied in 1900. It will be noted that for the different countries this proportion varies for males from more than one-half to three-fourths, and for females from approximately one-eleventh to one-fourth, of the total number. In the case of males the French showed the highest proportion gainfully occupied. This is closely followed by the proportions for a number of other nationalities, notably the Hungarian, Irish, Scotch, and English and Welsh.

The proportion of females at work in 1900 was highest for the Irish (24.8 per cent), followed by the French Canadians (20.1 per cent), and lowest for the Italians (8.9 per cent). A good share of the Irish were engaged in domestic and personal service, but in the case of the French Canadians a very large proportion were employed as mill and factory operatives.

In Table LXXIII, which follows, is presented, for continental United States, a distribution by birthplace of parents of the total number of persons and the number of each sex engaged in gainful occupations and in each of the five main classes of occupations.

TABLE LXXIII.—DISTRIBUTION, BY BIRTHPLACE OF PARENTS, OF PERSONS ENGAGED IN GAINFUL OCCUPATIONS AND IN EACH MAIN CLASS, FOR BOTH SEXES AND FOR EACH SEX SEPARATELY: 1900.

³ Includes all other foreign countries.

immigration is recent, the second generation of course consists principally of children; if, on the other hand, the immigration is of earlier date, the proportion of children in the second generation is correspondingly small. Therefore, among the native born of foreign parents the percentage gainfully occupied depends largely upon the period of immigration. For example, the small percentage of native born persons of Russian, Hungarian, or Italian parentage gainfully occupied in 1900 is doubtless due to the fact that the influx of immigrants from Russia, Hungary, and Italy is of a comparatively recent date, so that in 1900 the native born children of these immigrants were in most cases too young to engage in gainful occupations. Conversely, the native born population of Irish, Scotch, English and Welsh, French, or German parentage show the largest percentages at work—evidently because these nationalities represent a comparatively early immigration movement. In case of the foreign born the period of immigration does not exert much influence, because the great majority of immigrants are of working age when they come to this country; but such variations as exist are probably due largely to differences in the age constitution or in the proportions of the sexes, the higher percentages indicating perhaps a relatively low proportion of children or of females.

The 11,166,361 workers of foreign parentage in continental United States in 1900 constituted over three-eighths (38.4 per cent) of the total number of persons gainfully occupied. The per cent distribution of this class of gainful workers according to specified countries of parentage is presented in Table LXXI.

TABLE LXXI.—*Per cent distribution, by birthplace of parents, of persons of foreign parentage engaged in gainful occupations, for all such persons and for the native and foreign born separately: 1900.*

It is evident from this table that the three most important constituents in our working population of foreign parentage in 1900 were the Germans, the Irish, and the English, including in the latter term the English Canadians, the Scotch, and the Welsh, and that these groups, representing persons of German or British parentage, comprised two-thirds (67.2 per cent) of the total. A separate presentation is made in the table for the foreign born of foreign parents, or immigrants, and for the native born of foreign parents, or the children of immigrants. Of the former there were 5,845,919 engaged in gainful occupations in 1900, of which number 3,283,399, or 56.1 per cent, were of German or British parentage. Of the native born of foreign parents, or the children of immigrants, there were 5,320,442 engaged in gainful occupations, of which number 4,233,420, or 79.5 per cent, were of German or British parentage. The latter percentage is much larger than the former, simply because the English, Irish, and Germans represent an early immigration movement as compared with other nationalities, and accordingly the second generation has attained greater relative importance as a working force in the community. In fact, in the case of the Germans, the Irish, and the English and Welsh, the second generation of workers is numerically greater than the first (see Table LXX), the only other nationality of which this is true being the French, whose immigration is comparatively insignificant but belongs to the same period. A comparison with an earlier census shows that the relative importance of the British and Germans in the first generation of foreign workers, or immigrant class, has undergone a marked decrease. In 1880 the total number of foreign born gainfully employed was 3,494,647, of whom 2,829,652, or 81 per cent, were born in Germany, Great Britain, Ireland, or Canada. In 1900 the corresponding percentage for foreign born of German or British parentage, including both English and French Canadians, was 59.8. The figures for the census of 1900, being based upon the birthplace of the parents of the immigrants, are not entirely comparable with those of the census of 1880, which are based upon the birthplace of the immigrants themselves. The comparison is sufficiently exact, however, to measure approximately the declining importance of the British and German elements in the foreign born working population, which is the result of the preponderant immigration of other nationalities in recent years. This relative decline has been to a large extent offset by the increasing importance of these elements in the second generation of foreign workers.

The figures presented in Table LXX for persons engaged in gainful occupations are analyzed by sex in Table LXXII.

SUMMARY AND ANALYSIS OF RESULTS.

² Includes all other foreign countries.

Table LXXII possesses significance, in that it indicates for each sex separately what proportion of the population of each specified parentage was gainfully occupied in 1900. It will be noted that for the different countries this proportion varies for males from more than one-half to three-fourths, and for females from approximately one-eleventh to one-fourth, of the total number. In the case of males the French showed the highest proportion gainfully occupied. This is closely followed by the proportions for a number of other nationalities, notably the Hungarian, Irish, Scotch, and English and Welsh.

The proportion of females at work in 1900 was highest for the Irish (24.8 per cent), followed by the French Canadians (20.1 per cent), and lowest for the Italians (8.9 per cent). A good share of the Irish were engaged in domestic and personal service, but in the case of the French Canadians a very large proportion were employed as mill and factory operatives.

In Table LXXIII, which follows, is presented, for continental United States, a distribution by birthplace of parents of the total number of persons and the number of each sex engaged in gainful occupations and in each of the five main classes of occupations.

immigration is recent, the second generation of course consists principally of children; if, on the other hand, the immigration is of earlier date, the proportion of children in the second generation is correspondingly small. Therefore, among the native born of foreign parents the percentage gainfully occupied depends largely upon the period of immigration. For example, the small percentage of native born persons of Russian, Hungarian, or Italian parentage gainfully occupied in 1900 is doubtless due to the fact that the influx of immigrants from Russia, Hungary, and Italy is of a comparatively recent date, so that in 1900 the native born children of these immigrants were in most cases too young to engage in gainful occupations. Conversely, the native born population of Irish, Scotch, English and Welsh, French, or German parentage show the largest percentages at work—evidently because these nationalities represent a comparatively early immigration movement. In case of the foreign born the period of immigration does not exert much influence, because the great majority of immigrants are of working age when they come to this country; but such variations as exist are probably due largely to differences in the age constitution or in the proportions of the sexes, the higher percentages indicating perhaps a relatively low proportion of children or of females.

The 11,166,361 workers of foreign parentage in continental United States in 1900 constituted over three-eighths (38.4 per cent) of the total number of persons gainfully occupied. The per cent distribution of this class of gainful workers according to specified countries of parentage is presented in Table LXXI.

TABLE LXXI.—*Per cent distribution, by birthplace of parents, of persons of foreign parentage engaged in gainful occupations, for all such persons and for the native and foreign born separately: 1900.*

It is evident from this table that the three most important constituents in our working population of foreign parentage in 1900 were the Germans, the Irish, and the English, including in the latter term the English Canadians, the Scotch, and the Welsh, and that these groups, representing persons of German or British parentage, comprised two-thirds (67.2 per cent) of the total. A separate presentation is made in the table for the foreign born of foreign parents, or immigrants, and for the native born of foreign parents, or the children of immigrants. Of the former there were 5,845,919 engaged in gainful occupations in 1900, of which number 3,283,399, or 56.1 per cent, were of German or British parentage. Of the native born of foreign parents, or the children of immigrants, there were 5,320,442 engaged in gainful occupations, of which number 4,233,420, or 79.5 per cent, were of German or British parentage. The latter percentage is much larger than the former, simply because the English, Irish, and Germans represent an early immigration movement as compared with other nationalities, and accordingly the second generation has attained greater relative importance as a working force in the community. In fact, in the case of the Germans, the Irish, and the English and Welsh, the second generation of workers is numerically greater than the first (see Table LXX), the only other nationality of which this is true being the French, whose immigration is comparatively insignificant but belongs to the same period. A comparison with an earlier census shows that the relative importance of the British and Germans in the first generation of foreign workers, or immigrant class, has undergone a marked decrease. In 1880 the total number of foreign born gainfully employed was 3,494,647, of whom 2,829,652, or 81 per cent, were born in Germany, Great Britain, Ireland, or Canada. In 1900 the corresponding percentage for foreign born of German or British parentage, including both English and French Canadians, was 59.8. The figures for the census of 1900, being based upon the birthplace of the parents of the immigrants, are not entirely comparable with those of the census of 1880, which are based upon the birthplace of the immigrants themselves. The comparison is sufficiently exact, however, to measure approximately the declining importance of the British and German elements in the foreign born working population, which is the result of the preponderant immigration of other nationalities in recent years. This relative decline has been to a large extent offset by the increasing importance of these elements in the second generation of foreign workers.

The figures presented in Table LXX for persons engaged in gainful occupations are analyzed by sex in Table LXXII.

SUMMARY AND ANALYSIS OF RESULTS.

¹ Includes Newfoundland.

² Includes all other foreign countries.

Table LXXII possesses significance, in that it indicates for each sex separately what proportion of the population of each specified parentage was gainfully occupied in 1900. It will be noted that for the different countries this proportion varies for males from more than one-half to three-fourths, and for females from approximately one-eleventh to one-fourth, of the total number. In the case of males the French showed the highest proportion gainfully occupied. This is closely followed by the proportions for a number of other nationalities, notably the Hungarian, Irish, Scotch, and English and Welsh.

The proportion of females at work in 1900 was highest for the Irish (24.8 per cent), followed by the French Canadians (20.1 per cent), and lowest for the Italians (8.9 per cent). A good share of the Irish were engaged in domestic and personal service, but in the case of the French Canadians a very large proportion were employed as mill and factory operatives.

In Table LXXIII, which follows, is presented, for continental United States, a distribution by birthplace of parents of the total number of persons and the number of each sex engaged in gainful occupations and in each of the five main classes of occupations.

¹ Includes all other foreign countries.² Includes Newfoundland.³ Less than one-tenth of 1 per cent.

The significance of Table LXXIII consists in showing the relative importance of the elements of native and foreign parentage and of each specified parentage in each main class of occupations. Of the total working population in 1900, approximately three-fifths (61.6 per cent) were of native parentage and two-fifths (38.4 per cent) of foreign parentage. In agricultural pursuits, persons of native parentage had the largest percentage, and consequently those of foreign parentage the smallest, the percentages being 78.9 and 21.1, respectively. These proportions vary in the different classes, the other extreme being found in manufacturing and mechanical pursuits, where persons of native parentage formed less than one-half, and those of foreign parentage more than one-half, of those occupied in this class of pursuits, the exact percentages being 43.8 and 56.2, respectively. From these figures it is evident that persons of foreign parentage, considered as a class, have engaged in agricultural pursuits to a less extent, and in manufacturing and mechanical pursuits to a greater extent, than persons of native parentage. It is probable that this condition can be largely explained by the influence of the Southern and Southwestern states, which are agricultural communities and almost exclusively native, while,

on the other hand, the large manufacturing cities in the North and East show large proportions of persons of foreign parentage participating in the industries of those communities. It should be remembered, too, that manufacturing and mechanical pursuits include mining—an occupation in which large numbers of persons of foreign parentage are employed.

This table brings out the prominence of the German and Irish elements in the working force of the country. The two together constituted in 1900 almost one-fifth (19.7 per cent) of the total number of persons gainfully employed; the proportion which they represent of the total number in each of the main classes of occupations ranges from 10.5 per cent in agricultural pursuits to 27.8 per cent in manufacturing and mechanical pursuits.

The figures discussed in the preceding paragraphs relate to the distribution by parentage, as shown in Table LXXIII, of the total number of persons of both native and foreign parentage engaged in each main class of occupations. Table LXXIV, on the following page, gives by sex, for continental United States, a similar distribution of the persons of foreign parentage only, the total number being considered, in each case, as 100 per cent.

SUMMARY AND ANALYSIS OF RESULTS.

¹ Includes Newfoundland.² Includes all other foreign countries.

This table shows clearly the relative importance of the different nationalities among all the workers

of foreign parentage in each main class of occupations.

Making again the segregation previously employed of the British and German elements as representing the older and more important part of our population of foreign parentage, it is found that these elements combined constituted in 1900 about two-thirds of all the workers of foreign parentage engaged in agricultural pursuits, in domestic and personal service, and in manufacturing and mechanical pursuits, almost three-fourths of those engaged in trade and transportation, and fully three-fourths of those engaged in professional service. The exact percentages are as follows:

	Per cent.
Domestic and personal service	64.2
Agricultural pursuits	65.9
Manufacturing and mechanical pursuits	66.4
Trade and transportation	72.4
Professional service	75.5

The greater prominence of these elements in professional service than in the other classes of occupations is due largely to the influence of the English elements, for the Germans show greater prominence in agricultural pursuits, in trade and transportation, and in manufacturing and mechanical pursuits, and the Irish greater prominence in domestic and personal service and in trade and transportation.

A comparison of the sexes as regards the percentages presented in Table LXXIV reveals, in most cases, only minor differences. It is noticeable, however, that persons of Irish parentage represented in 1900 a much larger percentage of the female workers of foreign parentage than they did of the male. This greater relative importance of the female sex for this nationality appears in each main class of occupations as well as in all occupations combined. It indicates that among the Irish the females gainfully occupied were more numerous in proportion to the males so occupied than they were for any other nationality; and reference to Table LXXII shows also that females of Irish parentage were engaged in gainful occupations to a much greater extent than the females of any other element of foreign parentage.

Table LXXV gives, for continental United States, for both sexes and for each sex separately, a distribution, by main classes of occupations, of the total number of each specified parentage gainfully employed.

¹ Includes all other foreign countries.

This table is of especial interest as measuring the tendency of nationalities toward particular classes of occupations.

Of the total number of persons of foreign parentage gainfully occupied in 1900, 35.7 per cent were engaged in manufacturing and mechanical pursuits and only 19.7 per cent in agricultural pursuits. The corresponding percentages for those of native parentage were 17.3 and 45.7, respectively. The contrast between the percentages for these two elements of the population is less marked in the other classes of occupations; but the foreign element is represented by a somewhat larger percentage than the native in domestic and personal service and in trade and transportation, and by a somewhat smaller percentage in professional service.

In order that the proportions of the several nationalities engaged in each of the five main classes of occupations may be more readily compared, the percentages

shown in Table LXXV for males have been grouped in the following summary:

Per cent distribution, by main classes, of males of each specified parentage engaged in gainful occupations: 1900.

BIRTHPLACE OF PARENTS.	Agricultural pursuits.	Professional service.	Domestic and personal service.	Trade and transportation.	Manufacturing and mechanical pursuits.
Austria.....	9.6	1.8	21.9	14.3	52.4
Bohemia.....	35.4	1.6	14.8	11.2	37.0
Canada ¹ (English).....	26.4	4.5	14.8	23.6	30.7

Sweden.....	32.8	1.7	15.9	14.5	35.1
Switzerland.....	39.6	2.8	14.2	14.1	29.3

¹ Includes Newfoundland.

A comparison of the percentages in each column of the foregoing summary reveals rather wide variations in the extent to which males of the several nationalities engage in the different classes of occupations.

For every nationality except the Danish, Norwegian, Swiss, and Italian, the proportion of males engaged in manufacturing and mechanical pursuits exceeds the proportion engaged in any other class of occupations; it should be remembered, however, that miners and all kinds of mill and factory operatives, as well as workers of a higher grade, are included in the manufacturing and mechanical class. The largest proportion of the male workers of Danish, Norwegian, and Swiss parentage were engaged in agricultural pursuits. For the Bohemians and the Swedes, also, the proportions of male workers in this class of occupations were large, although smaller than the proportions in manufacturing and mechanical pursuits. Of the male workers among the Austrians, Hungarians, Italians, Poles, and Russians, comparatively few were engaged in agriculture.

Under professional service the percentage for males of every foreign nationality is very small; the Scotch lead, with 5.1 per cent, but the only other nationalities showing 3 per cent or more are the English and Welsh and the French (each 4.7 per cent), English Canadian (4.5 per cent), and Irish (3 per cent).

About two-fifths of all male workers of Italian parentage are found under domestic and personal service. This represents mostly the large number of Italians reported as laborers (not specified) and therefore included in this main class of occupations. For no other nationality is the proportion engaged in this class nearly so large as it is for the Italian; but the proportion for Poles, Hungarians, Irish, and Austrians exceeds one-fifth.

Under trade and transportation the nationalities contributing the largest percentages of their male workers were the Russian, the Irish, the English Canadian, the Scotch, the English and Welsh, and the German, in the order named.

Under manufacturing and mechanical pursuits appears the largest proportion shown by any nationality in any one class; 59.7 per cent, or considerably more than one-half, of the male workers of Hungarian parentage were occupied in pursuits under this class. But, as already indicated, the proportion under this head is large for nearly all nationalities; for seven—the Hungarian, the Austrian, the French Canadian, the Russian, the Polish, the Scotch, and the English and Welsh—it exceeds 40 per cent.

The following is a summary for female workers of the percentages shown in Table LXXV, similar to that already presented for males:

Per cent distribution, by main classes, of females of each specified parentage engaged in gainful occupations: 1900.

BIRTHPLACE OF PARENTS.	Agricultural pursuits.	Professional service.	Domestic and personal service.	Trade and transportation.	Manufacturing and mechanical pursuits.
Austria	3.9	2.4	42.5	10.1	41.1
Bohemia	8.5	2.1	32.9	8.3	48.2
Canada ¹ (English)	2.3	12.1	40.5	15.6	29.5
Canada ¹ (French)	1.0	2.8	16.4	5.4	74.4
Denmark	6.1	6.0	57.8	8.8	21.3
England and Wales	4.1	12.0	31.6	15.7	36.6
France	4.8	11.1	38.9	12.0	35.2
Germany	4.8	5.4	41.4	13.7	34.7
Hungary	1.8	1.3	48.9	8.8	39.2
Ireland	1.9	6.6	42.7	13.2	35.6
Italy	3.6	1.8	19.1	11.0	64.5
Norway	8.6	7.3	60.1	7.1	16.9

Russia	2.2	1.5	18.6	16.6	61.1
Scotland	4.3	12.2	35.8	15.6	32.1
Sweden	3.2	3.8	68.5	6.1	18.4
Switzerland	7.4	7.8	44.7	10.7	29.4

¹ Includes Newfoundland.

It is evident from this summary that the two leading classes of occupations for female workers of foreign parentage are domestic and personal service and manufacturing and mechanical pursuits. For six of the specified nationalities the latter class of occupations shows the highest percentage, and the former the next highest. They comprised the French Canadian, the Italian, the Russian, the Polish, the Bohemian, and the English and Welsh. For the other nationalities, eleven in number, domestic and personal service was the leading class of occupations, while manufacturing and mechanical pursuits was next in importance.

The concentration of female workers of foreign parentage in domestic and personal service is here clearly indicated. For nine of the seventeen specified nationalities, more than 40 per cent of the total number of female workers are found in this class of occupations. To this general tendency French Canadians, Italians, and Russians formed the most marked exceptions, showing much larger proportions in the class of manufacturing and mechanical pursuits. The percentage for French Canadians in this class is 74.4, the largest proportion shown by any nationality in any one class. This is caused by the large number of females among French Canadians who seek employment in the mills and factories of New England, and is apparently the most marked instance of the tendency of female workers of foreign parentage to engage in one line of occupations.

If under each class of occupations a selection be made of those nationalities which are represented by the largest percentages, the lists will show considerable similarity to those for male workers as given in the summary on the preceding page. It will be found that among the small proportions of female workers engaged in agricultural pursuits the four nationalities showing the highest

SUMMARY AND ANALYSIS OF RESULTS.

excix

percentages are the Norwegian (8.6 per cent), the Bohemian (8.5 per cent), the Swiss (7.4 per cent), and the Danish (6.1 per cent); that four nationalities—the Scotch, the English Canadian, the English and Welsh, and the French—have contributed over 10 per cent of their female workers to the occupations included under professional service; that three—the Swedish, the Norwegian, and the Danish—have contributed over 50 per cent to domestic and personal service; that four—the Russian, the Scotch, the English and Welsh, and the

English Canadian—show 15 per cent or over engaged in trade and transportation; and that four—the French Canadian, the Italian, the Russian, and the Polish—show more than 50 per cent occupied in manufacturing and mechanical pursuits.

In Table LXXVI, for continental United States, the analysis of the workers of each nationality is carried still further, so as to show for males and females the proportion not only in each main class of occupations, but in each of the principal occupation groups as well.

Agricultural pursuits	2,470	2.2	Seamstresses	3,701	3.3
Farmers, planters, and overseers	1,901	1.7	Shirt, collar, and cuff makers	886	0.8
All others in this class	569	0.5	Silk mill operatives	1,140	1.0
			Tailoresses	1,755	1.6
			Textile mill operatives (not otherwise specified) ²	2,469	2.2
			Tobacco and cigar factory operatives	726	0.6
			Woolen mill operatives	1,134	1.0
			All others in this class	6,931	6.1

¹ Includes all other foreign countries.² Includes carpet factory operatives and "other textile mill operatives."³ Includes all workers in iron and steel and other metals.

Perhaps the most significant fact revealed by this table is the confirmation of the tendency, already indicated by the more general figures, for nationalities represented in the recent immigration movement to concentrate in a few callings, which in some cases become popularly regarded as characteristic occupations, while among those nationalities composing the earlier movement (and thus where the second generation has become influential) there is a decided tendency to engage in a greater diversity of callings.

The tendencies here referred to may be compared by enumerating for each country of parentage as many of the leading occupations taken in the order of their importance as will include at least 50 per cent of the male workers of that parentage. This enumeration is presented in the following summary:

Leading occupations for males of each specified parentage: 1900.

BIRTHPLACE OF PARENTS.	Occupations.	Per cent of all male workers of the specified parentage.	Cumulative per cent.
Norway	Farmers, planters, and overseers	33.0
	Agricultural laborers	20.5	53.5
Hungary	Miners and quarrymen	29.2
	Laborers (not specified)	21.7	50.9
Denmark	Farmers, planters, and overseers	27.0
	Agricultural laborers	15.4	42.4
	Laborers (not specified)	9.9	52.3
Italy	Laborers (not specified)	32.0
	Miners and quarrymen	8.8	40.8
	Steam railroad employees	6.0	46.8
	Merchants and dealers (except wholesale)	5.8	52.6
Bohemia	Farmers, planters, and overseers	22.2
	Agricultural laborers	12.8	35.0
	Laborers (not specified)	12.2	47.2
	Tailors	5.9	53.1

SUMMARY AND ANALYSIS OF RESULTS.

	Steam railroad employees	2.5	51.5

¹ Includes Newfoundland.

By this grouping the extent of concentration, in special occupations, of male workers of each specified parentage is clearly indicated. Beginning with the Norwegians, who have so generally engaged in agriculture that 53.5 per cent, or more than half of the male workers of that nationality, were comprised in the two classes of farmers and farm laborers, there is shown to be a decreasing specialization, and consequently an increasing number of callings required to include at least half of the male workers. It will be observed that workers of the nationalities which show the greatest diversity of callings are those comprised in the older immigration movement, the last nationality shown by this arrangement being the Scotch, for which ten occupations are required to include half of all the male workers of that nationality.

Further examination of the proportionate representation of the various callings in each specified nationality shows that to a marked extent the group of callings having the second highest percentage is closely related to, or dependent upon, the one which shows the highest percentage. For example, if the largest percentage recorded for any one nationality is found to be farmers and overseers, in most cases the next largest percentage will be that for agricultural laborers. The only exceptions to this resemblance which appear are found among the nations participating in the earlier immigration movement. For England and Wales and Scotland the two highest percentages are for farmers, planters, and overseers and the comparatively unrelated calling of miners and quarrymen, while for Ireland and France the two highest percentages are for laborers (not specified) and farmers, planters, and overseers.

For females the relation between the highest and next highest percentage is not so clearly marked as in the case of males. The highest percentages for this sex are presented in the following summary, in which, as in the summary for males, the occupations enumerated include at least half of the total number of workers under each specified parentage:

Leading occupations for females of each specified parentage: 1900.

BIRTHPLACE OF PARENTS.	Occupations.	Per cent of all female workers of the specified parentage.	Cumulative per cent.
Sweden	Servants and waitresses	56.4

¹ Includes Newfoundland.

The principal point of similarity between workers of the two sexes appears to be the tendency to show less specialization and hence greater diversity of callings among persons of British or German parentage, or in general among those nationalities represented in the earlier immigration movement.

The tendency of all female workers of foreign parentage to concentrate in a few callings is very clearly brought out by the above summary. But ten occupations are required to include more than half of all the female workers under each parentage group. Furthermore, for fourteen of the seventeen nationalities specified the highest percentage is that shown for servants and waitresses. These figures so clearly indicate

the tendency of women of foreign parentage gainfully occupied to secure employment as servants and waitresses that it is of interest to notice the sequence of nationalities in this respect.

Per cent of female workers of each specified parentage engaged as servants and waitresses: 1900.

BIRTHPLACE OF PARENTS.	Per cent.
Sweden	56.4

France	22.3
Scotland	20.6
England and Wales	18.1
Russia	14.3
Canada ¹ (French)	10.3
Italy	9.2

¹ Includes Newfoundland.

The highest percentage in the above summary is shown for Sweden, more than half of all the female workers of Swedish nationality being engaged as servants and waitresses. Five nationalities showed more than one-third thus occupied. Three conspicuous exceptions to this very marked tendency were females of Italian, French Canadian, and Russian parentage. The female workers of these nationalities are to be found generally in manufacturing and mechanical pursuits, either engaged as mill and factory operatives or as seamstresses and tailoresses. The percentage engaged as servants and waitresses is also comparatively low for the English and Welsh and the Scotch, indicating, probably, the greater diversity of callings followed by female workers of these nationalities. The latter fact is possibly due to some extent to the effect of a longer period of residence in the United States, the influence of which has been referred to in connection with male workers. But the contrast in this respect between the earlier and the later immigration movement does not appear to be so marked for females as for the other sex.

The general tendency of males and females of foreign parentage gainfully employed is apparently toward different occupation classes; the males tend in general toward manufacturing and mechanical pursuits for the most of the nationalities specified, and for the others toward agricultural pursuits. But for the females, the tendency is decidedly toward domestic and personal service.

Plates 10, 11, and 12 present, in the form of diagrams, the distribution of wage-earners of specified parentage by principal occupations.

DISTRIBUTION OF PERSONS OCCUPIED BY CONJUGAL CONDITION.

PROPORTION OF GAINFUL WORKERS IN EACH CONJUGAL CLASS.

Table LXXVII shows for each conjugal class the number and per cent of persons of each sex 10 years of age and over engaged in gainful occupations in continental United States in 1890 and 1900. The conjugal classes distinguished in the census statistics are the single, the married, the widowed, the divorced, and the unknown. In this table, and in those which follow, the comparatively few persons whose conjugal condition is unknown—constituting only 0.2 per cent of the total population—have been classified with the single; and the word “single” used in this discussion must be understood to include the “unknown.”

TABLE LXXVII.—Number of males and of females in each conjugal class engaged in gainful occupations compared with the total number of the same sex and conjugal class 10 years of age and over: 1890 and 1900.

CONJUGAL CONDITION.	MALES 10 YEARS OF AGE AND OVER.			FEMALES 10 YEARS OF AGE AND OVER.

¹ Includes unknown. ² Corrected figures; see explanation on page lxvi.

Probably the extent to which males engage in gainful occupations is not much affected by conjugal condition, the differences in the percentages which appear in the above table being due mainly to differences in the age constitution of the several conjugal classes. The youth or young men who have not yet completed their education and begun to earn their own living are almost all single; accordingly, the percentage engaged in gainful occupations is smaller for this conjugal class than for the married men. Similarly, the differences in the percentages between the married, the widowed, and the divorced may be explained by differences in the proportion incapacitated for labor by reason of old age. Probably if the comparison for males were confined to persons between 25 and 55 years of age, there would be no material variations in the percentages of the different conjugal classes gainfully employed.

In case of females, on the other hand, matrimony has a direct and a very marked effect on the statistics of occupations. Comparatively few married women are “gainfully employed” in the sense in which the term is used for the purposes of the census, a married woman keeping house for her own family or assisting in the household duties without pay not being considered as having a gainful occupation. Accordingly, the proportion of married women reported as gainfully occupied in 1900 was, as would be expected, relatively small, only 5.6 per cent.

For single women and for widows the proportion gainfully employed was approximately 31 per cent. In the case of divorced women it was considerably higher, reaching 55.3 per cent. While it is not improbable that women are more ready to accept or sue for divorce when conscious of the ability to take care of themselves, and that consequently the divorced class, for this sex, is largely recruited by those able and willing to take up an occupation, this conclusion would not be a safe deduction from the census figures, owing to the contrasts in the age grouping of the three unmarried conjugal classes. Divorced women as a class are much younger than the widowed, 71.3 per cent of the divorced and only 24 per cent of the widowed being under 45. The following summary shows for continental United States the age grouping of these two classes, and also that of the single:

Distribution, by age groups, of the total number of single, widowed, and divorced females 15 years of age and over: 1900.

CONJUGAL CONDITION.	FEMALES 15 YEARS OF AGE AND OVER.								
	Total. ¹	15 to 24 years.		25 to 44 years.		45 to 64 years.		65 years and over.

Widowed.....	2,706,206	61,881	2.3	586,468	21.7	1,152,727	42.6	905,130	33.4
Divorced...	114,146	15,542	13.6	65,798	57.7	28,677	25.1	4,129	3.6

¹ Exclusive of age unknown.

² Includes unknown.

It appears from this summary that the percentage coming within the age group 25 to 44 was much larger for the divorced than for either the widowed or the single. The differences between these three conjugal classes as regards the proportion gainfully employed are doubtless explained in part by these differences in age distribution.

Table LXXVIII shows for each element of the white population by nativity, and for the negro, the number and proportion of males and of females gainfully employed in each conjugal class in continental United States in 1900.

STATISTICS OF OCCUPATIONS.

TABLE LXXVIII.—NUMBER OF MALES AND OF FEMALES IN EACH PRINCIPAL ELEMENT OF THE POPULATION ENGAGED IN GAINFUL OCCUPATIONS COMPARED WITH THE TOTAL NUMBER OF THE SAME SEX AND ELEMENT IN EACH CONJUGAL CLASS 10 YEARS OF AGE AND OVER: 1900.

¹ Includes unknown.

The proportion of married males gainfully employed in 1900 does not vary much, approximating 95 per cent in each element. In the class of single males the contrasts are more marked, the percentage for foreign white (84.8) being decidedly higher than for any other element and that for negroes (72.8) decidedly higher than for either of the native white elements (61.8 and 64.1). To some extent these contrasts are due to differences in the age constitution of the several elements. This factor explains in part the exceptionally high percentage of gainfully employed in the foreign white element. The great majority of immigrants are above the usual school age when they come to this country, and consequently the proportion within that age period is much smaller for the foreign born than for the native population. This is shown by the following statement of the percentages which the males from 10 to 19 years of age formed of the total number of males 10 years of age and over in each element of the population in 1900:

Native white—native parents.....	29.0
Native white—foreign parents.....	34.1
Foreign white.....	7.9
Negro.....	32.1

Another factor which affects the percentages is the social and economic status of the several elements. The higher any class rises in the scale of wealth and social position, the more prolonged is the period of education, and the older the age at which the individual takes up a gainful employment. At the one extreme the children are taken from school to contribute to the family support as soon as their labor becomes in any degree remunerative; at the other they do not begin to earn their living until after the completion of a college education, supplemented perhaps by professional study. This extension of the period of education reduces the percentage gainfully employed, the reduction being apparent mainly in the class of single. It is probably for that reason chiefly that the percentage of single men gainfully employed was considerably lower in 1900

for the native white elements than for the negroes, and somewhat lower for the native white of native parents than for the native white of foreign parents; and doubtless the difference in this respect between the foreign and native white is affected to some extent by this same cause as well as by the contrast in age grouping already noted.

In the proportion of married women engaged in gainful occupations the negro race is sharply differentiated from the white, the proportion for negroes being 26 per cent, while in none of the white elements of the population did it come up to 4 per cent. In the class of single females, as in that of single males, the percentage gainfully employed was highest for foreign whites, negroes coming next, and then the two native white elements. The contrast between the native white of native parents and the native white of foreign parents is, however, much more marked for single females than for single males.

In the class of widowed females the percentage gainfully employed was higher for native white of foreign parents than for either of the other white elements, and lowest for foreign white. This difference may perhaps be explained by the rather striking differences in the age grouping of this conjugal class, as shown for continental United States by the following summary:

Distribution, by age groups, of the total number of widows 15 years of age and over in each of the white elements of the population: 1900.

GENERAL NATIVITY AND COLOR.	WIDOWS 15 YEARS OF AGE AND OVER.

SUMMARY AND ANALYSIS OF RESULTS.

CXXV

It is evident that the native white widow of foreign parents is comparatively young, for the widows of this nativity under 45 years of age in 1900 constituted 42.5 per cent of the total number 15 years of age and over, while the corresponding percentage for native white of native parents was only 20.1, and for foreign white only 13.8.

CONJUGAL CONDITION OF MALES ENGAGED IN SPECIFIED OCCUPATIONS.

The following table shows for continental United States in 1900 the number of males of each conjugal class in the principal occupation groups for that sex, with the percentage which each class formed of the total number of males in the occupation group in 1890 and 1900:

TABLE LXXIX.—DISTRIBUTION, BY CONJUGAL CONDITION, OF MALES ENGAGED IN SPECIFIED OCCUPATIONS IN 1900, WITH PER CENT DISTRIBUTION FOR 1890 AND 1900.

¹ Includes unknown.² Includes stove, furnace, and grate makers, wheelwrights, and "other metal workers."³ Less than one-tenth of 1 per cent.⁴ Includes carpet factory operatives, hosiery and knitting mill operatives, and "other textile mill operatives."

The following are the occupation groups in 1900 in which the percentage of married males exceeded 70:

OCCUPATIONS.	Per cent.
Hotel keepers	85.1
Farmers, planters, and overseers	82.5
Manufacturers and officials, etc	78.1
Merchants and dealers (wholesale)	77.8
Foremen and overseers	77.4
Saloon keepers	76.6
Officials (government)	75.5
Watchmen, policemen, firemen, etc	75.1
Merchants and dealers (except wholesale)	75.0

OCCUPATIONS—continued.

OCCUPATIONS—continued.	Per cent.
Clergymen	74.8
Officials of banks and companies	74.8
Millers	73.7
Janitors and sextons	73.4
Gardeners, florists, nurserymen, etc	72.4
Livery stable keepers	72.3
Restaurant keepers	72.2
Physicians and surgeons	71.9
Brewers and maltsters	71.7
Cabinetmakers	71.6
Undertakers	70.9
Carpenters and joiners	70.8

In the following occupation groups in 1900 the percentage of married males was exceptionally low (less than 45):

OCCUPATIONS.	Per cent.
Teachers and professors in colleges, etc	44.7
Porters and helpers (in stores, etc.)	44.5
Wood choppers	44.4
Printers, lithographers, and pressmen	43.9
Textile mill operatives (not otherwise specified)	43.5
Launderers	42.9
Telegraph and telephone operators	41.9
Cotton mill operatives	41.8
Bartenders	41.4
Silk mill operatives	41.4
Salesmen	40.8
Clerks and copyists	37.0
Hostlers	36.8
Servants and waiters	31.9
Stenographers and typewriters	21.3
Agricultural laborers	16.3
Soldiers, sailors, and marines (U. S.)	12.2
Messengers and errand and office boys	4.1

The above percentages, however, are not a satisfactory measure of the tendency toward matrimony on the part of the persons engaged in the specified occupations because, as already pointed out, the per cent distribution by conjugal condition is to a large degree determined by the age constitution of the group under consideration. The exceptionally low per cent of married men among

agricultural laborers, for instance, does not indicate that the agricultural laborer is less apt to marry than another man or that he marries later in life; it is but a natural result of the fact that nearly 70 per cent of the males in this occupation are under 25 years of age. A large proportion of them are in fact younger members of the farmer's family. Most of them cease to be agricultural laborers as soon as they reach the marrying age; they become farmers themselves, or take up some other pursuit than agriculture. There are a number of other occupations—such as servants and waiters, salesmen, clerks and copyists, hostlers, stenographers and typewriters—which, in a similar way, are apt to lead to a different occupation in maturer years. On the other hand, there are occupations—such as merchants and dealers, manufacturers and officials, foremen and overseers, officials of banks and companies—which, as a rule, are not taken up until after a preparatory training in some other employment or position. These factors, which affect the age constitution of the occupation group, also affect the classification by conjugal condition. In the following table for continental United States the males in each of the specified occupation groups in 1900 are distributed, on a percentage basis, both by age periods and by conjugal classes, the occupation groups being arranged in the order of the percentage of males over 25 years of age:

TABLE LXXX.—PER CENT DISTRIBUTION, BY AGE GROUPS AND BY CONJUGAL CONDITION, OF MALES IN SPECIFIED OCCUPATIONS, WITH THE DIFFERENCE BETWEEN THE PER CENT 25 YEARS OF AGE AND OVER AND THE PER CENT MARRIED, WIDOWED, OR DIVORCED: 1900.

OCCUPATIONS.	PER CENT IN EACH SPECIFIED AGE GROUP.				PER CENT IN EACH CONJUGAL CLASS.				Per cent 25 years and over.	Per cent married, widowed, or divorced.	Difference.

¹ Includes unknown.² Less than one-tenth of 1 per cent.

A comparison of the figures in the preceding table indicates that the percentage of single males tends to increase with the increase in the per cent of males between 10 and 24 years, while the per cent of married, widowed, and divorced tends to decrease. This relationship between the percentages is a natural result of the fact that almost all males under 25 years of age are single, while the great majority of those 25 and over are married. Table LXXX shows the percentage 25 years of age and over and also the percentage married, widowed, or divorced. The comparison of these two percentages affords a fairly good measure of the tendency toward matrimony in the different occupations—the one percentage showing the proportion which has entered what might be termed “the marrying age,” and the other the proportion which has, in fact, married.

The last column of the table shows the difference between the two percentages—that is, the amount by which the percentage 25 years and over exceeds the percentage married, widowed, or divorced. A relatively large difference indicates a tendency toward prolonged bachelorhood or late marriage in that occupation. If, on the other hand, the difference is small, it indicates that comparatively few in that occupation remain long unmarried after reaching 25 years of age. Take, for instance, the occupation of lawyers—93.3 per cent of the lawyers were 25 and over, but only 72 per cent had been married. In the case of foremen and overseers, the per cent 25 and over (93.9) was almost the same as for lawyers, but the per cent of married, widowed, or divorced was 81.3. This indicates that the tendency toward early matrimony is much more pronounced in this occupation than in that of lawyers. A comparison of the figures in the last column shows that in the majority of cases (67 out of 104) the difference between the percentage 25 years and over and the percentage of married, widowed, or divorced ranges from 11 to 18. A difference below 11 indicates an exceptionally strong tendency toward early matrimony, while a difference above 18 indicates a tendency to prolong the period of bachelorhood.

The following are the occupation groups in 1900 in which the difference between the two percentages exceeded 18:

OCCUPATIONS.	Difference.
Launderers	35.8
Bartenders	31.6
Soldiers, sailors, and marines (U. S.)	30.4
Actors, professional showmen, etc	26.7
Boatmen and sailors	26.5
Lumbermen and raftsmen	26.5
Servants and waiters	25.6
Hostlers	25.0
Musicians and teachers of music	23.0
Teachers and professors in colleges, etc	22.2
Engineers (civil, etc.) and surveyors	22.0
Stock raisers, herders, and drovers	21.9
Wood choppers	21.5
Dentists	21.3
Lawyers	21.3

OCCUPATIONS—continued.

	Difference.
Architects, designers, draftsmen, etc	20.1
Journalists	19.3
Bookkeepers and accountants	19.2
Food preparers (not otherwise specified)	18.3

This list, in which the difference noted is exceptionally large, indicating that the number of single men is large in proportion to the total number 25 years of age and over, includes many occupations the pursuit of which involves a roving life or is characterized by frequent changes of residence. This is notably true of actors and soldiers, sailors, and marines, and to a less degree of civil engineers and surveyors, stock raisers, herders, and drovers, lumbermen and raftsmen, and wood choppers. It is probably in some degree true of journalists, servants and waiters, and hostlers. Apparently the life of a rover is not conducive to early matrimony. One would perhaps expect to find commercial travelers in this list, and the difference for this occupation (17.9) is in fact high, although not quite high enough to bring it above the limit adopted for the list.

The following are the occupation groups in 1900 in which the difference between the two percentages was below 11:

OCCUPATIONS.	Difference.
Woolen mill operatives	10.6
Oil well and oil works employees	10.6
Saw and planing mill employees	10.4
Woodworkers (not otherwise specified)	10.2
Brewers and maltsters	10.0
Textile mill operatives (not otherwise specified)	9.9
Cabinetmakers	9.7
Blacksmiths	9.6
Paper and pulp mill operatives	9.4
Tailors	9.2
Millers	8.4
Hotel keepers	8.1
Glassworkers	7.7
Silk mill operatives	7.6
Turpentine farmers and laborers	6.4
Farmers, planters, and overseers	4.3
Cotton mill operatives	1.6

In this list, in which the number of single is small in proportion to the number 25 years and over, are included one or two occupations in which a wife is a rather valuable adjunct from a business standpoint. This is the case with farmers and hotel keepers. Many of these occupations, however, represent pursuits in which the maximum income is attained at a rather early age. The majority of cotton mill operatives, for instance, are probably receiving as high wages at 25 as they will ever get if they continue in that occupation. They are in a position to marry at an early age and maintain the standard of living which is customary in that social class. This is true of most mill operatives, and is a condition conducive to early matrimony. But

¹ Messengers and errand and office boys have been omitted from this comparison because the age grouping of this occupation is so abnormal—all but 5.8 per cent of the total number being under 25 years of age.

STATISTICS OF OCCUPATIONS.

in the professions and in other occupations requiring a long preparatory training, the income which would justify marriage is perhaps not ordinarily attained until a man is past 30.

PROPORTION OF DIVORCED MALES IN SPECIFIED OCCUPATIONS.

Special interest attaches to the percentage of persons in each occupation reported as divorced. It should be remembered, however, that this percentage does not accurately measure the prevalence of divorce, for the census inquiry does not seek to ascertain the number who have ever been divorced, but only the number living in the divorced state on the census day, or June 1 of the year in which the census is taken. The returns, moreover, are doubtless in some degree deficient, since, as pointed out in the Twelfth Census, Report on Population (Part II, page lxxviii), many persons who are really divorced are reported as single. Moreover, it can not be taken for granted that the deficiency appears to the same extent in all occupations, for it is not improbable that the degree of sensitiveness in regard to admitting the fact of divorce, and also the active influence of conscience in preventing prevarication may vary in different grades of society, and therefore in different occupations. Nevertheless, this does not destroy the value of a comparison by occupation of persons reported in the census as living in a state of divorce. But a better basis of comparison than that afforded by the percentages in Tables LXXIX and LXXX will be obtained if the number of persons reported as divorced is compared not with the total number in the given occupation, but with the total number exclusive of single. For the possibility of divorce does not begin until after marriage, and accordingly the number of persons who might be divorced is limited by the number who have been married. The effect of making this change in the basis on which the percentages are computed may be illustrated by reference to the returns for government officials (males) as compared with those for teachers and professors (males). The percentage which the divorced formed of the total number in the occupation was larger for government officials than for teachers (see Table LXXIX). But over 50 per cent of the male teachers were single, and therefore have never had the possibility of divorce, while for government officials the percentage of single was less than 20; and by comparing the percentages which the divorced in each case formed of the total married, widowed, or divorced it was found that the percentage was larger for teachers than it was for government officials, being 0.45 and 0.41, respectively. In other words, there were more divorced males among teachers in proportion to the number who have been married than there were among government officials.

The following table shows, for each of the principal occupation groups in 1900, the percentage which divorced males formed of the total number of married, widowed, or divorced males in continental United States:

TABLE LXXXI.—Number of divorced males engaged in specified occupations compared with the number of married, widowed, or divorced males so occupied: 1890 and 1900.

¹ Includes stove, furnace, and grate makers, wheelwrights, and "other metal workers."² Includes carpet factory operatives, hosiery and knitting mill operatives, and "other textile mill operatives."

The percentage of divorced males in 1900, as computed in the preceding table, was 0.5 for all occupations; that is to say, 5 out of every 1,000 males gainfully employed who were or had been married were reported to the census as living in the divorced state on the census day. Of the five main classes, domestic and personal service showed the highest percentage (0.8) and agricultural pursuits the lowest (0.4). In the specified occupation groups the percentages ranged from 0.2 to 2.4; in the great majority of cases (91 out of 104) they lay between 0.3 and 0.9, inclusive.

The following list gives the occupation groups in 1900 in which the percentage was exceptionally high, not less than 0.9:

OCCUPATIONS.	Per cent.
Soldiers, sailors, and marines (U. S.)	2.4
Hostlers	1.8
Actors, professional showmen, etc.	1.7
Agricultural laborers	1.5
Bartenders	1.5
Servants and waiters	1.3
Wood choppers	1.2
Musicians and teachers of music	1.2
Stock raisers, herders, and drovers	1.0
Photographers	1.0
Paper hangers	1.0
Barbers and hairdressers	0.9
Lumbermen and raftsmen	0.9
Clock and watch makers and repairers	0.9
Painters, glaziers, and varnishers	0.9

It will be found that most of the occupations in this list are occupations in which, according to the rough test furnished by Table LXXX, there is a high proportion of bachelors; that is, they are occupations in which the difference obtained by deducting the per cent of males who are or have been married from the per cent 25 years of age and over is exceptionally large. In fact nine of the fifteen occupations in this list appear also in the list on page ccix, giving the occupations in which the tendency to defer marriage appears to be exceptionally strong. It would be unsafe, however, to conclude from this comparison that a prolongation of the period of bachelorhood increases the probability of divorce when once the marriage tie has been formed; yet this is a proposition which apparently derives some further support from the fact that those occupations in which the per cent of divorced males is exceptionally low are most of them occupations in which, as indicated by Table LXXX, early marriages appear to be exceptionally prevalent. The occupation groups in which the per cent of divorced males in 1900 as computed on the basis of the number of males who were or had been married was not over 0.3, are as follows:

OCCUPATIONS.	Per cent.
Silk mill operatives	0.2
Clergymen	0.2
Foremen and overseers	0.3
Wireworkers	0.3

STATISTICS OF OCCUPATIONS.

OCCUPATIONS—continued.

	Per cent.

Textile mill operatives (not otherwise specified)	0.3
Merchants and dealers (wholesale)	0.3
Manufacturers and officials, etc	0.3
Bleachery and dye works operatives	0.3
Leather curriers and tanners	0.3

In all these occupations except one (clergymen) the difference between the percentage of males 25 years of age and over and the percentage who have been married is comparatively small (see Table LXXX) indicating, as

already remarked, a tendency toward early matrimony. This might seem to contradict the rather common impression that it is the early marriage which is most apt to be the imprudent marriage leading to divorce. But, in general, probably the most that can be said is that some of the conditions which promote single life and defer marriage also promote divorce.

CONJUGAL CONDITION OF FEMALES ENGAGED IN SPECIFIED OCCUPATIONS.

The following table shows for continental United States in 1900 the number of females of each conjugal class in each of the principal occupation groups for that sex, with the percentage which each class formed of the total number engaged in the occupation group in 1890 and 1900:

TABLE LXXXII.—DISTRIBUTION, BY CONJUGAL CONDITION, OF FEMALES ENGAGED IN SPECIFIED OCCUPATIONS IN 1900, WITH PER CENT DISTRIBUTION FOR 1890 AND 1900.

OCCUPATIONS.	NUMBER: 1900.					PER CENT: 1900.				PER CENT: 1890.

SUMMARY AND ANALYSIS OF RESULTS.

ccxxiii

The majority of women gainfully employed are single, the percentage of single in all occupations combined, in 1900, being 68.2. The following occupation groups comprise all those in which the proportion of single in 1900 exceeded 90 per cent:

Per cent distribution, by conjugal condition, of females engaged in the occupation groups showing the highest percentage of single: 1900.

OCCUPATIONS.	Single. ¹	Married.	Widowed.	Divorced.
Stenographers and typewriters.....	95.0	2.4	2.0	0.6
Boxmakers (paper).....	93.7	3.6	2.4	0.3
Bookbinders.....	93.4	2.6	3.7	0.3
Bookkeepers and accountants.....	93.0	4.0	2.5	0.5
Telegraph and telephone operators.....	92.9	4.0	2.6	0.5
Packers and shippers.....	92.3	4.3	2.9	0.5
Teachers and professors in colleges, etc.	92.2	4.5	2.9	0.4
Silk mill operatives.....	92.0	5.2	2.5	0.3
Saleswomen.....	90.7	5.1	3.6	0.6
Printers, lithographers, and presswomen.	90.2	5.9	3.1	0.8
Clerks and copyists.....	90.2	4.9	4.3	0.6

¹ Includes unknown.

The following summary shows the percentages for each conjugal class in the occupation groups in which the percentages of single women in 1900 were lowest:

Per cent distribution, by conjugal condition, of females engaged in the occupation groups showing the lowest percentage of single: 1900.

OCCUPATIONS.	Single. ¹	Married.	Widowed.	Divorced.
Farmers, planters, and overseers.....	9.1	15.6	73.4	1.9
Boarding and lodging house keepers.....	14.0	26.3	55.7	4.0
Merchants and dealers (except wholesale).	25.2	28.3	44.7	1.8
Laundresses.....	30.1	33.3	34.2	2.4
Laborers (not specified).....	49.7	25.3	23.4	1.6
Nurses and midwives.....	58.7	12.7	27.0	1.6
Housekeepers and stewardesses.....	59.5	12.3	25.7	2.5
Agricultural laborers.....	64.4	26.7	8.3	0.6
Dressmakers.....	69.1	14.3	14.8	1.8
Seamstresses.....	71.2	10.7	16.5	1.6

¹ Includes unknown.

A low percentage for single, of course, means a relatively high percentage for other conjugal classes; and the above list includes in fact all but two (tobacco and cigar factory operatives and cotton mill operatives) of the ten occupations showing the highest percentage of married women; all but one (servants and waitresses) of the ten showing the highest percentage of widowed; and all but one (musicians and teachers of music) of the ten showing the highest percentage of divorced.

PROPORTION OF MARRIED WOMEN AT WORK.

As the employment of married women possesses special sociological significance in its possible effect on the institution of the family and the home, the returns for this class of gainful workers are presented with rather more detail than those for other conjugal classes.

The following table shows by states and territories, and by geographic divisions, the number of married females, with the number and per cent engaged in gainful occupations, for 1890 and 1900:

TABLE LXXXIII.—Number of married women engaged in gainful occupations compared with the total number of married women, by states and territories: 1890 and 1900.

Military and naval	367	25	6.8

The percentages of married women engaged in gainful occupations are largest in the Southern states, indicating no doubt the effect of the negro element. Outside of the South, the largest percentages appear in some of the New England and Western states. In the agricultural states of the Middle West the percentages are comparatively low. It will be noticed that the percentage of married women gainfully employed was greater in 1900 than in 1890 not only for the United States as a whole, but for each of the main geographic

divisions and for each state with the exception of Maryland and Louisiana. The percentage of single women and of widows gainfully employed likewise increased during this decade, as is seen by reference to Table LXXVII. This indicates that married women are simply participating in a movement which is general on the part of their sex; but the small percentage of married women gainfully employed shows a relatively greater increase than the larger percentages for the single and the widowed.

DISTRIBUTION OF MARRIED WOMEN AT WORK BY SPECIFIED OCCUPATIONS.

Of the 769,477 married women engaged in gainful occupations in continental United States in 1900, 217,257, or 28.2 per cent, were native white of native parents, 68,976, or 9 per cent, were native white of foreign par-

ents, 102,169, or 13.3 per cent, were foreign white, and 376,096, or 48.9 per cent, were negro. Almost one-half of the total number, then, were negroes. Attention has already been called to the contrast between the negro and the white races as regards the extent to which married women are gainfully employed, and it will be seen that Table LXXVIII shows that the numbers given above represent in the three elements of the white females less than 4 per cent of the total number married, while in case of negro females the number represents 26 per cent of the total.

The distribution, by classes of occupations and by principal occupation groups, of the married women gainfully employed in each element of the population is given for continental United States in 1900 in the following table:

TABLE LXXXIV.—DISTRIBUTION, BY SPECIFIED OCCUPATIONS, OF MARRIED WOMEN IN EACH PRINCIPAL ELEMENT OF THE POPULATION: 1900.

¹ Less than one-tenth of 1 per cent.

Of the married women gainfully employed in 1900, a larger proportion (41.9 per cent of the total) were engaged in domestic and personal service than in any other of the five main classes of occupations. The class, agricultural pursuits, comes next with a percentage of 29.5. The great majority of the married females in this class of occupations were negro women employed as agricultural laborers. A considerable proportion (10.4 per cent) of the native white married women of native parents were farmers, planters, and overseers; a smaller proportion (7.9 per cent) were agricultural laborers. About one-fifth (20.1 per cent) of the mar-

ried women gainfully employed were engaged in manufacturing and mechanical pursuits. The proportion was still larger for each of the three white elements of the population, but was very small for negroes. Of the occupations included under this main class, dress-makers showed a larger percentage than any other. It is noticeable that over 95 per cent of the negro women gainfully employed were engaged either in agricultural pursuits or in domestic and personal service, and that about 65 per cent were either agricultural laborers or laundresses.

DISTRIBUTION OF PERSONS OCCUPIED BY MONTHS UNEMPLOYED.

INQUIRY AS TO UNEMPLOYED.

The importance of securing information concerning the number of persons having gainful occupations but who are temporarily unemployed has led to the inclusion in the population schedule of a question concerning the number of months unemployed during the census year. While it is possible that future census inquiry may succeed in obtaining complete and satisfactory answers to this question, the reliability of the returns so far secured is still undetermined.

The value of statistics upon this subject is principally to measure the increase or decrease in the opportunity of wage-earners to secure employment, but it must be remembered that idleness, which is reported in certain classes of occupations, is, with few exceptions, voluntary, while that reported for other classes may be involuntary. In the first group are farmers, merchants, bankers, manufacturers, and, in general, those persons claiming occupation who possess capital or who labor for themselves; in the second group are laborers, artisans, clerks, teachers, and wage-earners generally. The census returns include all persons who are gainfully occupied; therefore a general percentage showing the proportion of all those who are unemployed during some portion of the census year is drawn necessarily from two opposite classes—those who are idle because they choose to be, and those who are idle because they can not obtain work. Moreover, within these groups the reasons for nonemployment are very numerous and often at variance. The influence and measure of voluntary and involuntary idleness could be reasonably determined if information concerning the cause of idleness were available. Obviously this can not be secured in a general census enumeration.

The question regarding months unemployed was asked first at the census of 1880, but the information thus secured was not tabulated. This was due partly to the fact that the amount of labor required to tabulate the results of the main inquiries of that census without mechanical assistance involved so much expense and delay that the returns for several important sub-

jects were either tabulated in part only or not at all; but another reason for not tabulating the returns of months unemployed was the existence of grave doubt as to the reliability of the information which had been secured.

In 1890 the question was again placed upon the schedule and the returns were tabulated and published for that census. They showed that apparently 15.1 per cent of persons having gainful occupations were unemployed during some part of the census year. In presenting the results, however, attention was called to the fact that they were the first published statistics upon this subject and should be regarded as approximate.¹ Even with this conservative position many eminent authorities disagreed, declining to accept, even with qualifications, the Eleventh Census returns concerning persons out of employment.²

Again in 1900 the importance of the subject led Congress to specify the question regarding nonemployment as one of the inquiries to be made at the Twelfth Census. The tabulated results show that of all persons claiming gainful occupations, 22.3 per cent were unemployed³ during some portion of the census year.

COMPARISON OF RETURNS OF 1890 AND 1900.

The results for continental United States in 1900 are summarized, by general nativity and color, in Table LXXXV.

¹This is the first time in the Federal census that information of this character has been compiled and presented in connection with the statistics of occupations derived from answers made on the population schedule * * * The statistics of occupations with respect to persons unemployed are approximately but not absolutely true, and this should be always borne in mind by those using the figures contained in the tables relating to this subject. Eleventh Census, Population, Part II, pages cxxxvi and cxxxix.

²The census made an effort by direct inquiry to find out whether persons were unemployed in their principal occupation during the year, and for how long they were thus unemployed. The investigation does not seem to have been very successful, and the data are so uncertain that the detailed analysis by occupations seems to me entirely useless. * * * The question in regard to unemployment by months might better be abandoned. Report of the American Economic Association on the Federal Census, March, 1899. Statistics of Occupations, by Richmond Mayo-Smith.

³See explanatory notes on page xxviii.

STATISTICS OF OCCUPATIONS.

¹ Based upon corrected figures; see explanation on page lxvi.

From this comparison a decided difference appears in the proportions of each sex reported as unemployed in 1900 as compared with 1890. Each of these two census years was a period of prosperity; therefore the economic conditions to some extent were similar, and it is reasonable to suppose that accurate returns at the censuses of 1890 and 1900 would indicate little variation in the proportion of the unemployed in many callings at least.

With returns available for two censuses only, and those at variance under apparently similar conditions, it is evident that the results of one more census at least are necessary before definite conclusions can be reached concerning the comparative accuracy of the statistics

already secured. There are reasons, however, for accepting the figures for 1900 as more correctly reflecting actual proportions of nonemployment than did those of 1890. To a few of these reasons, attention may be profitably called.

1. *Simpler and more definite schedule and instructions to enumerators in 1900.*—Comparison of the schedules and instructions for the two census years under consideration throws some light upon the probable accuracy of returns concerning nonemployment secured in 1890 as compared with those of 1900.

The schedule for 1890 was known as a "family schedule," designed to include entries for from 1 to 10 persons. The inquiries were printed one under the other in the first or left-hand column; the following five columns, numbered from 1 to 5, were devoted to returns for individuals. This arrangement was duplicated for columns 6 to 10 on the reverse side of the sheet. To enter details concerning the head of a family, for example, the enumerator wrote the answers one under the other in column 1, in accordance with the questions running down the page in the inquiry column. Facts concerning the next member of the same family appeared in column 2. A separate schedule was employed for each family. This requirement compelled each enumerator to handle an average of about four hundred schedules, the total number of schedules approximating fifteen millions. Upon this schedule question 17 was: "Months unemployed during the census year (June 1, 1889 to May 31, 1890)." Concerning this question the enumerators received the following instructions:

If a person having a gainful occupation was unemployed during any part of the census year it should be so stated in months and parts of months. If, as may often happen, a person was unemployed at his usual occupation for some time during the census

year and yet found other temporary employment for some part or the whole of the time, this fact should be clearly stated. For instance, a person's occupation may be that of "farm laborer," at which he may have had no employment for three months during the census year. During two of these three months, however, he may have worked in a shoe shop, so that, so far as actual idleness is concerned, he was only out of work one month. * * * Indicate the number of months unemployed at occupation by inserting the figures, in parenthesis, after the name of the occupation itself. In the case just cited the answer to inquiry 16 would appear as "farm laborer (3)" and the answer to inquiry 17 as "1." For all persons not engaged in gainful occupations the symbol "X" should be used.

In 1900 the Census Office returned to the form of schedule used in 1880. A column for names of individuals appeared at the left; the questions were printed at the top of successive columns, so that when a name had been entered the answers to questions appeared across the page on the same line with the individual's name. As each side of the sheet contained fifty lines, it was possible to enumerate 100 persons on one schedule. The enumerators, therefore, were compelled to handle but a fraction of the schedules necessary in 1890. Column 20 upon the schedule for 1900, under "occupation, trade, or profession of each person 10 years of age and over," was headed "months not employed." Concerning this question the instructions issued to enumerators were as follows:

The object of this question is to get the number of months (or parts of months) in the census year (June 1, 1899 to May 31, 1900) during which each person having a gainful occupation was not employed. For those who have no gainful occupation, leave the column blank.

The law does not contemplate that this question shall apply solely to the principal occupation in which the person may have been engaged during the year, but it is the intent to find out the number of months (or parts of months) during which a person ordinarily engaged in gainful labor was not employed at all.

A return is required in columns 19 and 20 for each and every person 10 years of age and over who was engaged in gainful labor during any part of the census year (June 1, 1899 to May 31, 1900, inclusive), or who is ordinarily occupied in remunerative work but during the census year was unable to secure work of any kind.

From the foregoing summary it will be observed not only that the form of the schedule was superior in 1900 to that of 1890, but that the 1900 instructions to enumerators were plainer, briefer, and more direct. Furthermore, by the instructions of 1890, previously quoted, an attempt was made to secure two answers to one question—the number of months unemployed at usual or regular occupation, and the number of months not employed at any occupation. This attempt resulted disastrously; the returns for the second half of the question were obviously unreliable, and were not compiled. The returns which were tabulated and published are, therefore, presumably the answer to the first question, but as so much confusion existed in the minds of enumerators concerning the other half, it is probable

that the published statistics actually represent a combination of answers to both questions.¹

2. *A closer and more thorough enumeration in 1900.*—There has been a general tendency toward increased accuracy and completeness in census returns from decade to decade. The influence of this tendency is more noticeable upon certain classes of inquiries than upon others. It is especially evident in those more recently added to the schedule. In such cases some allowance must be made for the effect upon comparative figures of this progressive improvement.

Test comparison of returns concerning months unemployed appearing upon schedules for 1880, 1890, and 1900 were made while the preparation of this volume was in progress. An effort was even made to tabulate, for an entire state, the 1880 returns of months unemployed, but they were found to be so defective and unsatisfactory as to possess no value for any purpose. In many cases the enumerators had completely misunderstood their instructions, and some had reported the reverse of the question.

The schedules for 1890 which were examined showed improvement over those of 1880 in the treatment of returns relating to months unemployed, but a comparison of the schedules of 1890 with those of 1900 for certain enumeration districts in Chicago and elsewhere, showed unmistakable evidence of more thorough and systematic work in 1900.

It is obvious that if the real proportions of nonemployment at the two census years under discussion had been similar, a more thorough enumeration in 1900 than in 1890 would have resulted merely in larger figures, affecting all classes to about the same extent, and thus retaining the same general relations and proportions as the less complete returns secured in 1890. This is exactly the result which the returns for 1900 show when compared with those for 1890, as is evident from the comparisons which follow.

In Table LXXXVII is presented, for continental United States, a comparison of the number and per cent of the persons reported as unemployed for some portion of the census year, by main classes of occupations, for both 1890 and 1900.

¹ These figures only show the number and approximate length of time unemployed with regard to the principal occupation in which persons so reported were usually engaged and upon which they depended chiefly for a livelihood. They do not show, therefore, the actual length of time for which they were unemployed in any form of remunerative labor, that is, the net period, after making allowance for the time when not engaged at their principal or usual occupation, during which their services may have been utilized at some other kind of work. Although the census enumerators were fully instructed on this point, the returns were not considered complete enough to warrant their compilation. * * * In this connection it should be stated that in some cases the census enumerators misinterpreted the instructions relative to persons unemployed, and reported persons as unemployed from 7 to 12 months where it was plainly evident that they really meant that they were employed the number of months stated in the schedule. Eleventh Census, Population, Part II, pages cxxxvi and cxxxviii.

STATISTICS OF OCCUPATIONS.

¹ See explanatory notes on page xxviii.² Corrected figures; see explanation on page lxvi.

A comparison shows that the apparent increase in the proportion of the unemployed comprehends all the main classes of occupations, and both sexes. Pursuing the analysis to occupations in detail it will be observed that the result remains the same. The num-

ber and per cent of males unemployed in each of the 140 groups of occupations are presented for continental United States in Table LXXXVIII, while a similar presentation, under each main class, of the principal callings for females is given in Table LXXXIX.

TABLE LXXXVIII.—NUMBER OF MALES IN SPECIFIED OCCUPATIONS UNEMPLOYED DURING ANY PORTION OF THE CENSUS YEAR COMPARED WITH THE TOTAL NUMBER OF MALES SO OCCUPIED: 1890 AND 1900.

STATISTICS OF OCCUPATIONS.

These tables show that the apparent increase in 1900 in the proportion of those out of employment during some part of the census year included all but 15 of the 140 groups specified for males and all but 7 of the 63 groups specified for females. These cases of decrease in the proportion unemployed were as follows:

Occupations showing decrease in 1900, as compared with 1890, in the per cent of males or of females unemployed during any portion of the census year.

SEX AND OCCUPATIONS.	PER CENT UNEMPLOYED IN—	
	1900	1890
<i>Males.</i>		
Gardeners, florists, nurserymen, etc.	12.3	13.3
Foremen and overseers	4.7	5.4
Merchants and dealers (wholesale)	3.4	3.6
Officials of banks and companies	2.4	3.7
Other chemical workers	15.5	19.5
Miners and quarrymen	44.3	47.9
Butter and cheese makers	20.4	27.7
Carpet factory operatives	25.0	25.6
Cotton mill operatives	13.1	13.2
Hosiery and knitting mill operatives	20.3	31.5
Woolen mill operatives	19.5	22.0
Other textile mill operatives	18.7	20.7
Charcoal, coke, and lime burners	26.2	26.4
Glovemakers	17.1	38.8
Rubber factory operatives	31.0	35.0
<i>Females.</i>		
Physicians and surgeons	4.2	6.7
Glovemakers	20.0	32.8
Potters	34.4	40.0
Rubber factory operatives	39.6	40.9
Textile mill operatives:		
Hosiery and knitting mill	20.0	29.9
Woolen mill	21.1	25.2
Not specified	18.6	18.7

Of the 22 exceptions here presented, 8 show changes of 1 or less in the per cent and may be regarded as stationary. Of the remaining groups, glovemakers and hosiery and knitting mill operatives show for each sex the largest decreases, and are followed for males by butter and cheese makers and rubber factory operatives, and for females by potters and woolen mill operatives. These decreases, however, serve to emphasize the fact that the apparent increase in the proportion of the unemployed is practically the only change in 1900, as compared with 1890.

It appears from Tables LXXXVIII and LXXXIX that most of the callings which showed the greatest proportion of nonemployment in 1900, in general, occupied the same relative position in 1890. This fact is clearly indicated by Table xc, in which the occupations specified in the two preceding tables are rearranged in the order of the proportion of nonemployment for males in 1900.

TABLE XC.—Per cent which the number of males and of females in specified occupations unemployed during any portion of the census year forms of the total number of the same sex so occupied: 1890 and 1900.

OCCUPATIONS.	PER CENT OF MALES UNEMPLOYED IN—		PER CENT OF FEMALES UNEMPLOYED IN—	
	1900	1890	1900	1890
Glassworkers	59.9	53.1	45.5	39.1

By this grouping the different occupations assume a marked similarity in rank for both census years. In 1900 glassworkers showed the largest proportion of males unemployed, while physicians showed the smallest. These occupations were also the extremes in 1890. The same tendency appears in the other callings presented in this table. The apparent increase in practically all specified occupation groups, in the proportion of persons unemployed, therefore presents a further uniformity in the distribution of the increase.

It should be remembered that the returns of nonemployment are a class of statistics not expected to show a progressive increase, such as would be the case in

those for population, immigration, wealth, etc., but on the contrary must fluctuate in order to be normal. If the enumeration at the censuses of 1890 and 1900 had been equally accurate, the proportion of the unemployed, especially in the occupations subject to change, would be likely to show marked variations. Increases in the proportion of those unemployed would appear in some and decreases in others, thus properly reflecting the influence upon different callings of such factors as the weather, industrial conditions, the money market, state of trade, etc. But in certain other callings obviously removed from fluctuation, the proportion from decade to decade, if once accurately established, would be unlikely to show marked variation.

Table xc includes practically all lines of business and professional activity. Among these the sources of occupational prosperity are so diverse that no accurate enumeration of those unemployed during some portion of the census year could be made which would not show a decrease in the proportion of the unemployed in some callings, no matter what degree of industrial depression might happen to exist.

3. *Reasonableness of the proportion of months unemployed shown in 1900.*—It is of course true that the full working strength of a community or of the nation is never exerted. If steady employment were obtainable in every calling merely upon application, a considerable proportion of those claiming gainful occupations would nevertheless be idle for some part of the year. Old age, illness, travel, bereavement, recreation, competence, a change of employers with interval between, tendency to idleness, and climatic conditions are a few of the causes which together result in a considerable proportion of persons who are without employment during some portion of a year for reasons wholly unconnected with ability or inability to secure employment. Moreover, there is a problem of enumeration which doubtless has resulted in some confusion. On the one hand, some enumerators may report school teachers as possessing permanent employment because they are paid by the year, while others may base their returns on the fact of idleness for several months and report teachers as without employment during a portion of the year. In these cases the same basis of fact contributes opposite returns. It will be remembered that for the group of male teachers and professors in schools and colleges 30.8 per cent were reported in 1890 unemployed during some portion of the year, while 55 per cent were so reported in 1900. This group is one of those most unlikely to show marked fluctuations from year to year in the proportion of nonemployment. The violent change indicated by the returns may have been due to a more complete enumeration or to conflicting returns, as above suggested, or probably to both.

A second reason for idleness, also in no way asso-

ciated with industrial conditions, is the fact that certain occupations are what may be termed intermittent, such as glassworking, inland lake and river service, school teaching, and certain out-of-door callings—notably farm service, stone masonry, etc. In some occupations of the intermittent class compensation is graded to partially cover the period of enforced idleness, but in an enumeration of persons unemployed during some portion of a year, the proportion in such occupations as those mentioned, some of which are extensive, is necessarily high and appreciably affects the final proportions secured for all occupations, although the reasons for nonemployment in other callings may be entirely different.¹

To these considerations must be added those which are directly related to inability to secure employment, such as the effect of competition, shown in the decline of special industries in one locality because of more favorable conditions in another, to changes in tariff laws, to industrial combinations, overdoing new industries, wage disputes, overburdened professions, influx of immigration, and the increased participation of women in gainful pursuits. These conditions and many others are eddies in the great current of national activity, the influences of which are as yet unmeasured, but evidently in the aggregate they involve a considerable and varying interruption in continuous employment for great numbers of persons.

¹ The causes of irregularity vary greatly. In all of the establishments connected with agriculture, as in agricultural implements, etc., the regularity of employment depends largely upon the harvest, the length of the seasons, and the consequent purchasing power of agriculturists. Some industries can, from their very nature, be carried on only at certain seasons of the year, and then for a very brief period, as the canning of fruits and vegetables and the gathering of ice. Other industries are also affected by the season of the year, but in these, work continues for a longer period than in those just mentioned, as in brickmaking, the building trades, and hatmaking. In some industries the heat of summer is too great to allow of constant labor in this season, as in some of the glass industries, while in other cases advantage has to be taken of the winter to procure raw material which is consumed at other seasons of the year, as at charcoal blast furnaces. Tenth Census, Statistics of Wages, page xxxiv.

Furthermore, it should be observed that the age limit of 10 years set by the census inquiry must materially increase the proportion of persons out of employment during some portion of the census year, since, for persons of both sexes from 10 to 20 years of age, uninterrupted employment during 12 months is likely to be the exception rather than the rule.

Elsewhere in this report attention is called to the deficiency in the returns of 1890 for agricultural laborers between the ages of 10 and 15 years, and the omission there shown is supplied by employing a mean of the figures based upon the proportion at work in 1880 and 1900. This correction results in an addition of over half a million agricultural laborers to the age class specified. It was obviously impossible, however, to determine how many of the persons thus added were unemployed during some portion of the census year, but the proportion necessarily must have been very large, for the age period affected is the one in which gainful occupation upon the farm is generally intermittent in order to permit attendance at school. Therefore, the number and percentage for 1890 of agricultural laborers unemployed during a portion of the census year must be definitely regarded as too low.

These considerations strongly suggest the reasonableness of the proportions shown by the returns of 1900, by which it appears that approximately four persons out of five who claimed gainful occupations were continuously employed throughout the census year, while the fifth person was idle for a period varying from 1 to 12 months.

STATISTICS OF NONEMPLOYMENT AS SHOWN AT THE TWELFTH CENSUS.

Table xci presents, for continental United States, the distribution of those unemployed during part or all of the census year by three periods, 1 to 3 months, 4 to 6 months, and 7 to 12 months, by sex, general nativity, and color.

TABLE XCI.—DISTRIBUTION, BY PERIODS OF MONTHS, OF MALES AND OF FEMALES IN EACH ELEMENT OF THE POPULATION UNEMPLOYED DURING THE CENSUS YEAR: 1900.

GENERAL NATIVITY AND COLOR.	MALES UNEMPLOYED. ¹						FEMALES UNEMPLOYED. ¹

SUMMARY AND ANALYSIS OF RESULTS.

CCXXXV

From this table it will be observed that in 1900 about one-half of all the males claiming gainful occupations but not continuously employed were idle from one to three months, while of the three periods considered, the longest, seven to twelve months, shows much the smallest proportion—less than 11 per cent. The proportions for females, though not quite so extreme, show a tendency similar to that for males.

It should be noted that among white males the largest proportion of those idle in the seven to twelve month group is found among the foreign born and the native born of foreign parentage, while among white females the largest proportion is found among the native born of

native parentage. The figures presented for other races show that the division of unemployed negro males into periods of idleness results in tendencies similar to those shown by the white males, but with more marked contrast; a larger proportion being found in the period one to three months, and only 5.5 per cent in the longest period of idleness. The proportions for negro females show the same tendency, compared with those for white females.

Table xcii classifies the unoccupied, for continental United States, by three periods of nonemployment and five main occupation classes.

TABLE XCII.—DISTRIBUTION, BY PERIODS OF MONTHS, OF MALES AND OF FEMALES IN EACH MAIN CLASS OF OCCUPATIONS UNEMPLOYED DURING THE CENSUS YEAR: 1900.

CLASSES OF OCCUPATIONS.	MALES UNEMPLOYED. ¹						FEMALES UNEMPLOYED. ¹

¹ See explanatory notes on page xxviii.

By this grouping the same general proportions pointed out in connection with the previous table reappear. The largest proportion of idleness among males for the longest period is found in the professional class, and among females in the trade and transportation class. For both sexes agriculture shows the smallest proportion unemployed during the longest period.

Table xciii distributes persons unemployed during some portion of the census year in each of the five occupational classes, by states and territories, and shows the percentage which the number unemployed forms of the total number claiming occupations within each group.

¹See explanatory notes on page xxviii.

Inspection of this table shows that the highest proportion of nonemployment for agricultural pursuits and for domestic and personal service is found in the South Central division; for professional service and for manufacturing and mechanical pursuits in the North Central; and for trade and transportation in the Western. The North Atlantic division presents the smallest proportion of nonemployment in four out of the five classes, and in the fifth exceeds the lowest by only one-half of 1 per cent.

The states composing the North Atlantic division constitute the most densely populated portion of the country. These states are not prominent in agriculture, but within their boundaries are located a large proportion of the manufacturing and other industrial interests of the country; while much of the foreign commerce centers in the great coast cities. It is possible that the comparatively low rate of nonemployment in these states, as shown by Table xciii, indicates that conditions are more settled in this region, that industries are better established here than elsewhere, and consequently offer more continuous employment, and that the traditional frugality and industry of the region encourage uninter-

rupted labor, or the shortest possible intervals of idleness.

Attention, however, has previously been called to the fact that the figures concerning nonemployment can not be regarded as definite or final, and that caution must be observed in reaching conclusions based solely upon them. It is probable that the apparently low proportion of persons unemployed in the states of the North Atlantic division—already pointed out—is not a statistical fact of significance, but merely an illustration of the problems of enumeration which attend this subject.

The accuracy of census enumeration varies, as is well known, in different parts of the country, and from the nature of the inquiry it is probable that the question concerning nonemployment would be more accurately answered in country districts than in cities. In the latter the questions are frequently answered by persons having little knowledge of such details as this question demands, and obviously there are other reasons why answers to the question concerning nonemployment may be expected to be more accurate in rural than in urban districts.

It will be recalled that the North Atlantic division

shows much the largest proportion of population in places having 2,500 inhabitants or more. The distribution in 1900 was as follows:

GEOGRAPHIC DIVISIONS.	PER CENT OF TOTAL POPULATION DWELLING IN—		
	Country districts.	Places of 2,500 and over.	Cities of 100,000 and over.
North Atlantic	31.8	68.2	35.8
South Atlantic	78.6	21.4	7.5
North Central	61.5	38.5	17.9
South Central	84.5	15.5	4.2
Western	59.4	40.6	14.1

GENERAL SUMMARY.

POPULATION ENGAGED IN GAINFUL OCCUPATIONS.

In collecting statistics of occupations only persons 10 years of age and over are considered.

In 1900 the total number of persons engaged in gainful occupations in the United States, including Alaska, Hawaii, and the military and naval stations abroad, but not including Porto Rico, the Philippine Islands, or the islands of Tutuila and Guam was 29,287,070.

The generalizations and comparisons which follow are restricted to the returns for continental United States, which consists of that part of the United States on the continent of North America south of the Canadian boundary, and therefore excludes Alaska, Hawaii, and the military and naval stations abroad.

In continental United States the total number of persons engaged in gainful occupations in 1900 was 29,073,233, which was one-half, 50.2 per cent, of the population 10 years of age and over, and nearly two-fifths, 38.3 per cent, of the entire population. Of this number, 23,753,836 were males and 5,319,397 were females.

The males gainfully employed constituted 80 per cent, or four-fifths, of the male population 10 years of age and over, and 61.2 per cent, or more than three-fifths, of the total male population. The females gainfully employed constituted 18.8 per cent of the female population 10 years of age and over and 14.3 per cent of the total female population.

The number of persons returned as gainfully employed at the census of 1890 was 22,735,661. But it is estimated that 582,522 children with gainful occupations were omitted from the enumeration, so that the corrected total would be 23,318,183. To get a total comparable with the returns of 1900 it is necessary furthermore to add the estimated number of persons gainfully employed in Indian Territory and on Indian reservations. This brings the total for 1890 up to 23,416,625.

On the basis of this corrected total the increase from 1890 to 1900 in the number of persons gainfully employed in continental United States was 5,656,608, or

From this summary it appears that only 31.8 per cent of the population of the North Atlantic division in 1900 was living in country districts—that is, outside of places containing 2,500 inhabitants or more—as compared with very much higher proportions for each of the other geographic divisions of the country.

It is clear, therefore, that the significance of the lower rate of nonemployment shown in the North Atlantic division should be qualified by the uncertainty which exists concerning the accuracy of the returns on this subject; and it is equally clear that no specific conclusions can be drawn regarding nonemployment which can not be assailed on similar grounds.

24.2 per cent. The total population during the same period increased 20.7 per cent. In the decade 1880 to 1890 the number of persons gainfully employed increased 34.1 per cent and the total population 24.9 per cent.

The proportion of the entire population of continental United States gainfully employed increased from a little over one-third in 1880 to almost two-fifths in 1900, the percentages being 34.7 in 1880, 37.2 in 1890, and 38.3 in 1900. The proportion of the population 10 years of age and over gainfully employed increased from 47.3 per cent in 1880 to 50.2 per cent in 1900.

The proportion of males 10 years of age and over gainfully employed increased from 78.7 per cent in 1880 to 80 per cent in 1900. The corresponding increase for females was more marked, the percentage advancing from 14.7 in 1880 to 18.8 in 1900.

The proportion of males 10 years of age and over gainfully employed does not vary greatly in different states and territories, being usually between 75 and 85 per cent.

The corresponding percentages for females vary more widely, ranging from 7.9 in Oklahoma to 38 in South Carolina. In the manufacturing states of the North, and in those Southern states where the negro element is prominent, the percentage is comparatively high. In the agricultural states of the Middle West and in most of the states lying farther west, it is comparatively low.

CLASSIFICATION BY OCCUPATIONS.

The scheme of classification adopted for the Twelfth Census distinguished 303 specified occupations or 140 occupation groups. These were classified under five main heads—agricultural pursuits, professional service, domestic and personal service, trade and transportation, and manufacturing and mechanical pursuits. Occupations connected with mining and fishing were included under the last of these five heads.

Of the total number of males gainfully employed, 39.6 per cent were engaged in agricultural pursuits;

24.3 per cent in manufacturing and mechanical pursuits; 17.9 per cent in trade and transportation; 14.7 per cent in domestic and personal service; and 3.5 per cent in professional service.

Agricultural pursuits constitute, therefore, the most important class of occupations for this sex. More than one-half of the males in this main class are farmers, planters, and overseers and about two-fifths are agricultural laborers.

More than seven-tenths of the males classified under domestic and personal service are laborers (not specified).

Under trade and transportation the leading occupation groups for males are those of retail merchants and dealers; steam railroad employees; clerks and copyists; draymen, hackmen, and teamsters; and salesmen. The number of males in these five groups make up about two-thirds of the total number in this main class.

The males engaged in manufacturing and mechanical pursuits are widely distributed in a number of occupation groups, of which the two largest are those of miners and quarrymen and carpenters and joiners, these two including about one-fifth of the total number of males in this class.

In the North Atlantic division the number of males engaged in manufacturing and mechanical pursuits is considerably larger than the number engaged in any other main class of occupations, constituting 39.1 per cent, or nearly two-fifths, of the total number of male workers in this division.

In each of the other geographic divisions, agricultural pursuits constitute the most important branch of occupations, being 54.9 per cent, or more than one-half, of all male workers in the South Atlantic division; 41.7 per cent, or two-fifths, of all in the North Central division; and 66.3 per cent, or two-thirds, of all in the South Central division.

In the Western division the percentage of male workers engaged in agricultural pursuits, 29.9, is not much higher than the percentage engaged in manufacturing and mechanical pursuits, 26.4. This is because manufacturing and mechanical pursuits include mining, which is an important occupation in that section of the country.

Of the total number of females gainfully employed, 39.4 per cent were engaged in domestic and personal service, this being the most important branch of occupations for this sex; 24.7 per cent were engaged in manufacturing and mechanical pursuits; 18.4 per cent in agricultural pursuits; 9.4 per cent in trade and transportation; and 8.1 per cent in professional service.

More than two-thirds of the total number of females engaged in agricultural pursuits are agricultural laborers and about one-third are farmers, planters, and overseers; more than three-fourths in professional service are teachers and professors; about three-fifths in domestic and personal service are servants and

waitresses; nearly four-fifths in trade and transportation are saleswomen, stenographers and typewriters, clerks and copyists, and bookkeepers and accountants; more than one-fourth in manufacturing and mechanical pursuits are dressmakers and over one-fifth are textile mill operatives.

In each geographic division between 35 and 45 per cent of all females gainfully employed were engaged in domestic and personal service, and in the South Atlantic, North Central, and Western divisions the percentage is larger than that for any other class of occupations; but in the North Atlantic division a larger per cent of females were engaged in manufacturing and mechanical pursuits than in domestic and personal service, and in the South Central division a larger per cent were engaged in agricultural pursuits.

The percentage of female workers engaged in agricultural pursuits is exceptionally high in all states in which the negro element is especially prominent.

In each sex the proportion of gainful workers engaged in agricultural pursuits and in domestic and personal service was smaller in 1900 than it was in 1880, while the proportion engaged in manufacturing and mechanical pursuits, in trade and transportation, and in professional service was larger; but between 1890 and 1900 there has been some increase in the proportion of male workers engaged in domestic and personal service and some decrease in the proportion of female workers engaged in manufacturing and mechanical pursuits.

The decrease in the proportion of female workers engaged in domestic and personal service from 41.6 per cent in 1890 to 39.4 per cent in 1900 was the result of a very marked decrease in the proportion employed as servants and waitresses—from 30.4 per cent in 1890 to 24.1 per cent in 1900—partially offset by proportionate increases in some of the other occupations classified under domestic and personal service.

The increase in the proportion of female workers engaged in trade and transportation from 5.7 per cent in 1890 to 9.4 per cent in 1900 represents an exceptionally large increase in the employment of women as saleswomen, stenographers and typewriters, and bookkeepers and accountants.

It is evident, then, that manufacturing, trade and transportation, and the professions are absorbing an increasing proportion of the growing army of workers of each sex, while the agricultural class represents a diminishing proportion.

NATIVITY AND COLOR OF THE WORKING POPULATION.

Of the total number of males gainfully employed, 50.3 per cent, or one-half, were native white of native parents; 17.3 per cent were native white of foreign parents; 20.5 per cent were foreign white; 11.3 per cent were negroes; and 0.6 per cent were Chinese, Japanese, and Indians.

Of the total number of females gainfully employed, the native white of native parents constituted only 36.2 per cent, much less than the corresponding per cent for males; the native white of foreign parents constituted 22.3 per cent; the foreign white, 16.5 per cent; the negro, 24.8 per cent; and the Chinese, Japanese, and Indians, 0.2 per cent.

Among native white of native parents 77.3 per cent of the males 10 years of age and over were gainfully employed; for native white of foreign parents the corresponding per cent is 75.4; for foreign white, 89.7; and for negroes, 84.1. The percentage, therefore, is highest for foreign white, and lowest for native white of foreign parents.

The proportion of females gainfully employed is much higher among the negroes than among the whites, the percentages for the different elements being as follows: For negroes, 40.7; for native white of foreign parents, 21.7; for foreign white, 19.1; and for native white of native parents, 13.

Among male workers in every class of occupations the native white of native parents are more prominent than any other element of the population, constituting in professional pursuits 64.1 per cent of the total number of males; in agricultural pursuits, 60.4; in trade and transportation, 50.9; in manufacturing and mechanical pursuits, 39.9; and in domestic and personal service, 36.1.

As shown by a comparison of the above percentages the native white males of native parents attain their greatest relative importance in the professions and in agriculture. A comparison of the corresponding percentages for the other elements of the population shows that the native white of foreign parents attain their greatest relative importance in manufacturing and mechanical pursuits and in trade and transportation; the foreign white in manufacturing and mechanical pursuits and in domestic and personal service; the negro in domestic and personal service and in agricultural pursuits.

About three-fifths (59.5 per cent) of the females engaged in agricultural pursuits were of the negro race; about one-third (32.6 per cent) were native white of native parents. These two elements combined comprise over 90 per cent of all females in this class of occupations. Most of the negro females engaged in agricultural pursuits are farm laborers, but the majority of the native white females of native parents in this branch of occupations are farmers.

In domestic and personal service 32.6 per cent of the total number of females were negroes; 27.9 per cent were native white of native parents; 22.3 per cent were foreign white; and 17.1 per cent were native white of foreign parents.

Nine-tenths of the females engaged in professional pursuits were native white and more than six-tenths native white of native parents.

The native white constitute 86.6 per cent of the females engaged in trade and transportation and 75.8 per cent of those engaged in manufacturing and mechanical pursuits, the native white of native parents being hardly more numerous in either of these classes of occupations than the native white of foreign parents.

Among female workers, the native white of native parents attain their greatest prominence in professional service; the native white of foreign parents, in trade and transportation; the foreign white, in domestic and personal service; and the negro, in agricultural pursuits.

AGE CLASSIFICATION OF THE WORKING POPULATION.

In the census classification of persons gainfully employed according to age, the age groups are as follows: 10 to 15, 16 to 20, 21 to 24, 25 to 34, 35 to 44, 45 to 54, 55 to 64, 65 years and over, and age unknown.

Approximately 95 per cent of all males in each of the four age groups between the ages of 21 and 54, inclusive, were engaged in gainful occupations.

The percentage of males gainfully employed is highest in the age group 35 to 44, in which it reaches 96.6.

The percentage of females gainfully employed is highest in the age group 16 to 20, in which it reaches 32.3. In the next age group, 21 to 24, it is almost as high, being, in fact, 30.8; but in the age group 25 to 34 it falls to 19.9, indicating, no doubt, the effect of matrimony in depleting the ranks of gainful workers of this sex. The percentage declines slowly but steadily in the successive age groups above 34.

In every age group above 25 the per cent of males gainfully employed was lower in 1900 than in 1890; in each of the two age groups under 25 it was higher.

In every age group except that of "age unknown" the per cent of females gainfully employed was higher in 1900 than in 1890.

There are no very marked differences between the principal elements of the population—native white of native parents, native white of foreign parents, foreign white, and negro—as regards the per cent of the males gainfully employed in the age groups between 21 and 64, inclusive.

In the youngest age group, 10 to 15, and in the oldest, 65 years and over, the percentage of males gainfully employed is much higher for negroes than it is for any of the white elements.

In the age group 16 to 20, the per cent of males gainfully employed is slightly higher for foreign white than it is for negroes, and is considerably higher for each of these elements than it is for either of the native white elements.

The per cent of females gainfully employed is highest for the negro element in every age group except that of 16 to 20, in which it is highest for the foreign white element.

In each of the white elements of the population the per cent of females gainfully employed undergoes a

marked reduction after the age of 24, but in the negro element the percentage shows no marked reduction until the age of 65 is reached. It is evident that in the case of negro women matrimony has little effect in reducing the percentage gainfully employed.

One-fourth (25.3 per cent) of all males gainfully employed are between the ages of 25 and 34, inclusive, almost one-half (48.6 per cent) are between 16 and 34, and more than two-thirds (68.4 per cent) are between 16 and 44.

The per cent of males between the ages of 16 and 44 is highest (74.8) in trade and transportation and lowest (61.6) in agricultural pursuits.

The per cent of males under 21 is exceptionally high (22.7) in agricultural pursuits, because of the extent to which boys are employed on their fathers' farms; and it is exceptionally low (4.6) in professional service, because of the long period of preparatory training required in this class of occupations.

The proportion of male workers in the period of old age, 55 years and over, is about 15 per cent in agricultural pursuits and in the professions, and about 10 per cent in each of the other main classes of occupations.

The females engaged in gainful occupations are as a class much younger than the males. Almost one-third (32.4 per cent) of the female workers, but hardly more than one-sixth (17.3 per cent) of the male, are under 21 years of age; or, taking a higher age limit, one-half (49.3 per cent) of the former, but less than three-tenths (28.6 per cent) of the latter, are under 25 years of age.

PROPORTION OF FEMALES IN GAINFUL OCCUPATIONS.

Of the total number of persons engaged in gainful occupations in 1900, 81.7 per cent, or more than four-fifths, were males and 18.3 per cent were females. The proportion of females in 1890 was 17.2 per cent and in 1880, 15.2 per cent, showing that there has been a marked advance in the relative importance of this sex among the gainful workers of the country.

In domestic and personal service the per cent of females in 1900 was 37.5; in professional service, 34.2; in manufacturing and mechanical pursuits, 18.5; in trade and transportation, 10.6; and in agricultural pursuits, 9.4.

In all of these main classes of occupations, except domestic and personal service, the percentage of females was higher in 1900 than in 1890; and in all of them, without exception, it was higher in 1890 than in 1880.

The most marked increase was that shown for trade and transportation, in which the per cent of females advanced from 3.4 in 1880 to 6.9 in 1890 and to 10.6 in 1900. This represents the increasing extent to which women are employed as stenographers and typewriters, telegraph and telephone operators, bookkeepers and accountants, clerks and copyists, and saleswomen.

The advance in the percentage for agricultural pur-

suits from 7.7 in 1880 to 8.4 in 1890 and to 9.4 in 1900 represents mainly an increase in the occupation of farmers, planters, and overseers, in which the per cent of females increased from 1.3 in 1880 to 4.3 in 1890 and to 5.4 in 1900; in the occupation of farm laborers the proportion of females is much higher—15 per cent, in fact—but is not increasing.

In nearly all the occupations classified under professional service the per cent of females has advanced steadily since 1880; in the occupation of teachers, which for this sex is by far the most important of these occupations, the per cent increased from 67.8 in 1880 to 70.8 in 1890 and to 73.4 in 1900.

In manufacturing and mechanical pursuits the per cent of females was 16.7 in 1880, 18.1 in 1890, and 18.5 in 1900. The slight advance in the last decade is the net result of divergent changes in different occupations: in some of the principal textile industries, in paper and pulp mills, and in rubber factories the per cent of females among the operatives has decreased; but among confectioners, boot and shoe makers and repairers, gold and silver workers, bookbinders, boxmakers, glovemakers, and tobacco and cigar factory operatives it has increased.

In domestic and personal service the per cent of females increased from 34.6 in 1880 to 39.5 in 1890, and then decreased to 37.5 in 1900. The decrease from 1890 to 1900 represents a small decrease in the proportion of females for two of the most important occupations for this sex, namely, those of servants and waitresses and of laundresses, partially offset by increases in other less important occupations.

PROPORTIONS OF MEN, WOMEN, AND CHILDREN IN THE WORKING POPULATION.

The analysis of the working population by sex has been supplemented by a further analysis into four main classes determined by sex and age, namely, men, women, boys, and girls.

Men and women, in this classification, include all persons 16 years of age and over. This age limit was adopted in order to obtain figures which were comparable with those of 1880, when only three age periods were distinguished in the occupation statistics, namely, 10 to 15, 16 to 59, and 60 and over.

The total number of gainful workers in continental United States in 1900 comprised 22,489,425 men, 4,833,630 women, and 1,750,178 children, of whom 1,264,411 were boys and 485,767 were girls.

Men constituted 77.3 per cent of the total number of gainful workers in continental United States in 1900; women, 16.6 per cent; and children, 6.1 per cent. The corresponding percentages in 1880 were 80, 13.5, and 6.5, respectively. Accordingly the per cent of women increased during the twenty-year period, while the per cent of men and children decreased.

A comparison of the figures for 1900 by states shows that the proportion of men among gainful workers

ranged from 91.4 per cent in Wyoming to 58.4 per cent in South Carolina; that of women from 31.8 per cent in the District of Columbia to 6.6 per cent in Wyoming; and that of children from 16.6 per cent in South Carolina to 1 per cent in Montana.

In general, the proportions of women and of children are comparatively small in most of the Western states and comparatively large in most of the Southern states. The percentage of women is also large in the North Atlantic states, notably in Massachusetts (26.3) and in Rhode Island (25.1). For children the percentages in the North Atlantic states are much lower than in the Southern states, but not so low as in the Western states.

Between 1880 and 1900 the proportion of women among gainful workers increased in every state except three. In the majority of states there was also an increase in the proportion either of boys or of girls or of both. In only four states was there any increase in the proportion of men.

A comparison of the figures by occupation classes shows an increase in the proportion of women and a decrease in the proportion of men in each of the five main classes. The proportion of children increased in agricultural pursuits, trade and transportation, and manufacturing and mechanical pursuits, and decreased in domestic and personal service.

Of the 58 occupation groups, in which men formed not less than 10 nor more than 95 per cent of the total in 1900, there are 11 in which the percentage of men was higher in 1900 than in 1880; 45 in which the percentage of women was higher; and 31 in which the percentage of children was higher.

The following is a statement of the occupations referred to in which the percentage of men increased from 1880 to 1900: Butter and cheese makers, 91.5 to 94.7; tool and cutlery makers, 92.3 to 94.7; barbers and hairdressers, 92.5 to 94.6; brassworkers, 90.2 to 93.7; glassworkers, 84 to 85.2; paper and pulp mill operatives, 65.7 to 71.8; tailors, 60.2 to 68.5; cotton mill operatives, 38.4 to 42.6; servants and waiters, 13.8 to 15.4; launderers, 11.1 to 12.9; and nurses, 7.4 to 10.1.

The proportion of women appears to be increasing in most occupations in which both sexes are represented. The following enumeration shows the increase from 1880 to 1900 in the per cent of women for some of the most important of these occupations: Farmers, planters, and overseers, 1.3 to 5.4; laborers (not specified), 2.8 to 4.1; boarding and lodging house keepers, 64.6 to 83.4; teachers and professors in colleges, etc., 67.6 to 73.3; musicians and teachers of music, 43 to 56.4; artists and teachers of art, 22.5 to 43.8; bookkeepers, clerks, stenographers, etc., 5.7 to 23.9; telegraph and telephone operators, 5.3 to 29.3; packers and shippers, 5.1 to 28.6; tobacco and cigar factory operatives, 11.9 to 28.2; boot and shoe makers and repairers, 10.2 to 17.4; hosiery and knitting mill operatives, 54.8 to 60; woolen mill operatives, 34.9 to 37.1; silk mill operatives, 40 to

48.6; printers, lithographers, and presswomen, 4.6 to 9.9; boxmakers, 38.7 to 51.7; and bookbinders, 36.8 to 47.2.

Although there was a small decrease between 1880 and 1900 in the percentage which children formed of the total number of persons in all occupations, there are many occupation groups in which the percentage increased, the following being some of the more important: Agricultural laborers, 21.6 to 23.9; cotton mill operatives, 16.5 to 18; salesmen and saleswomen, 1.3 to 3.3; tobacco and cigar factory operatives, 8 to 8.8; tailors and tailoresses, 3.6 to 4.7; boot and shoe makers and repairers, 1.9 to 4; hosiery and knitting mill operatives, 15.1 to 17.6; launderers and laundresses, 1.1 to 1.8; and printers, lithographers, and pressmen, 2.8 to 4.1.

The following are some of the more important occupations which show a decrease in the percentage for children between 1880 and 1900: Servants and waiters, 10.3 to 8.1; laborers (not specified), 5.5 to 4.9; bookkeepers, clerks, stenographers, etc., 3.5 to 2.6; woolen mill operatives, 11.3 to 9.1; and glassworkers, 13.4 to 10.7.

PROPORTIONS OF ADULTS AND YOUNG PERSONS IN THE WORKING POPULATION.

In a further analysis of the figures for 1900 the two groups, men and women, have each been subdivided into young persons, from 16 to 20 years of age, and adults, 21 years and over.

Young persons of the male sex constituted in 1900, 9.8 per cent of the total working population of continental United States; young persons of the female sex, 4.2 per cent. Adult males constituted 67.5 per cent of this total, and adult females, 12.4 per cent.

Young persons of the male sex constituted in 1900, 30.9 per cent of all messengers and errand and office boys; 26.2 per cent of all agricultural laborers; 20 per cent of all United States soldiers, sailors, and marines; 18.9 per cent of all clerks and copyists; 18.3 per cent of all glassworkers and of all trunk and leather-case makers; 16.2 per cent of all bottlers and soda water makers; 16.1 per cent of all printers, lithographers, and pressmen; and 16 per cent of all electricians.

Young persons of the female sex constituted in 1900, 33.5 per cent of all paper box makers; 26.2 per cent of all shirt, collar, and cuff makers; 25.5 per cent of all milliners; 23.9 per cent of all servants and waiters; 23.5 per cent of all stenographers and typewriters; 23.1 per cent of all seamstresses; 17.8 per cent of all textile mill operatives; 15.8 per cent of all dressmakers; 15 per cent of all packers and shippers; 14.9 per cent of all housekeepers and stewards; 12.3 per cent of all teachers and professors in colleges, etc.; 11.9 per cent of all telegraph and telephone operators; 10.6 per cent of all nurses and midwives; and 10.2 per cent of all musicians and teachers of music.

CHILDREN IN GAINFUL OCCUPATIONS.

In 1900 out of a total of 9,613,252 children from 10 to 15 years of age, 1,750,178, or 18.2 per cent, were engaged in gainful occupations; of this number, 1,264,411 were males and 485,767 were females.

The proportion of children engaged in gainful occupations appears to be increasing. In 1880, out of a total of 6,649,483 children from 10 to 15 years of age, 1,118,356, or 16.8 per cent, were engaged in gainful occupations. The proportion of male children engaged in gainful occupations increased from 24.4 per cent in 1880 to 26.1 per cent in 1900; the proportion of female children, from 9 per cent in 1880 to 10.2 per cent in 1900.

Of the male children at work, 54 per cent were native white of native parents; 15.9 per cent were native white of foreign parents; 4.6 per cent were foreign white; and 25.2 per cent were negroes.

Of the female children at work, 31.8 per cent were native white of native parents; 19.1 per cent were native white of foreign parents; 8.2 per cent were foreign white; and 40.6 per cent were negroes.

The percentage of native white of native parents is accordingly much larger among male children at work than among female, while the percentages of native white of foreign parents and of foreign white and of negroes are much larger among female children at work than among male.

Of the native white male children of native parents, 24.3 per cent were gainfully employed; of the native white male children of foreign parents, 16.9 per cent; of foreign white male children, 29.2 per cent; and of negro male children, 49.3 per cent.

The per cent is higher for native white male children of native parents than for native white male children of foreign parents, mainly because of the greater extent to which the native white parents are engaged in agricultural pursuits.

Of the native white female children of native parents, 5.7 per cent were gainfully employed; of the native white female children of foreign parents, 7.9 per cent; of the foreign white female children, 20.3 per cent; and of the negro female children, 30.6 per cent.

More than two-thirds (67.6 per cent) of the male children at work and more than two-fifths (42.7 per cent) of the female were engaged in agricultural pursuits. Of the male children at work, 13.5 per cent were engaged in manufacturing and mechanical pursuits; 10.8 per cent in domestic and personal service; and 7.9 per cent in trade and transportation. Of the female children at work, 29.2 per cent were engaged in domestic and personal service; 23.3 per cent in manufacturing and mechanical pursuits; and 4.6 per cent in trade and transportation. The per cent engaged in professional service was only 0.2 for either sex.

Of the male children engaged in agricultural pursuits

the majority (59.7 per cent) were native white of native parents, while 30.2 per cent were negro and 9.7 per cent were foreign white children or native white children of foreign parents.

Of the female children engaged in this class of occupations the great majority (71.4 per cent) were negroes, while 26 per cent were native white of native parents and only 2.2 per cent were foreign white children or native white of foreign parents.

In trade and transportation 49.7 per cent of the male children and 66.1 per cent of the female were either foreign white children or native white children of foreign parents; in manufacturing and mechanical pursuits these two elements constituted 53.9 per cent of the male children and 59.8 per cent of the female. Most of the other children employed in these two main classes of occupations were native white of native parents, the number of negro children being comparatively small.

Of the male children in domestic and personal service, 42.6 per cent were native white of native parents, 23.9 per cent were either native white of foreign parents or foreign white, and 33 per cent were negro; of the female children in this class of occupations, 34.3 per cent were native white of native parents, 31.8 per cent were either native white of foreign parents or foreign white, and 33.7 per cent were negro.

Of the total number of children from 10 to 15 years of age gainfully employed, 8.1 per cent were 10 years of age, 9.1 per cent were 11, 12.7 per cent were 12, 15.3 per cent were 13, 23.2 per cent were 14, and 31.6 per cent were 15. More than one-half (54.8 per cent) of the total number were either 14 or 15 years of age, and hardly more than one-sixth (17.2 per cent) were under 12 years of age.

The per cent under 12 was exceptionally high in the occupations of agricultural laborers, servants and waiters, cotton mill operatives, and laborers (not specified).

A comparison by states shows that the per cent of male children under 12 years of age gainfully employed was highest (27.2) in Alabama and lowest (0.5) in Massachusetts. The per cent was high in almost all the Southern states, and was higher in most of the states of the agricultural and mining West than it was in the manufacturing East.

FOREIGN BORN IN GAINFUL OCCUPATIONS.

In continental United States the number of persons of foreign birth engaged in gainful occupations in 1900 was 5,851,399, representing 20.1 per cent, or one-fifth, of the total number of gainful workers. The per cent of foreign born was a little larger in 1890, being 22.5, but in 1880 it was precisely the same, namely, 20.1; so the immigration of twenty years has not increased the relative importance of the foreign born in the working population of the country.

The per cent of gainful workers—that is, the per cent

which the number of persons engaged in gainful occupations forms of the total number 10 years of age and over—was 48.6 for the native born and 57.7 for the foreign born. On comparing the figures by sex, it appears that among females the per cent of workers was practically as high for the native born as it was for the foreign born, being 18.8 for the former and 19.2 for the latter; but among males the contrast is marked, 89.8 per cent, or nine-tenths, of the foreign born 10 years of age and over being gainfully employed and only 77.7 per cent of the native born. A part of this difference undoubtedly reflects the comparative poverty prevailing among immigrants, impelling them to engage in gainful occupations at an early age; but to a great extent the difference is a natural result of the fact that the native born population contains a much larger proportion of children and young persons.

About one-third (32.9 per cent) of all male workers engaged in manufacturing and mechanical pursuits and hardly more than one-tenth (11.2 per cent) of those engaged in agricultural pursuits were foreign born, these two classes of occupations representing, respectively, the highest and lowest percentages of foreign born shown for this sex in any of the main classes of occupations.

Among female workers also the class of occupations showing the lowest per cent of foreign born (4.3) is that of agricultural pursuits; but the highest per cent is that shown for domestic and personal service (22.5), although the per cent for manufacturing and mechanical pursuits (21.5) is almost as high.

The proportion of foreign born among females engaged in agricultural pursuits advanced from 1.2 per cent in 1880 to 4.3 per cent in 1900. With this exception the proportion of foreign born shows a decrease in each main class of occupations and for each sex.

The decrease was especially marked for females engaged in trade and transportation, among whom the per cent of foreign born declined from 24.8 in 1880 to 12.6 in 1900. This change probably represents the influx of native females in certain of the occupations included in this main class, notably those of stenographers and typewriters, telegraph and telephone operators, clerks and copyists, and saleswomen.

A comparison by occupation groups for male workers shows that the per cent of foreign born was highest—ranging from 76.3 to 50.4—among tailors, brewers and maltsters, launderers, hucksters and peddlers, cabinet-makers, bakers, bleachery and dye works operatives, and hat and cap makers; and was lowest—ranging from 6.3 to 8.8—among lawyers, telegraph and telephone operators, agricultural laborers, teachers and professors, stenographers and typewriters, and dentists.

A similar comparison for female workers shows that the per cent of foreign born was highest—ranging from 42.1 to 32.1—among merchants and dealers (except wholesale), tailoresses, cotton mill operatives, and woolen mill operatives; and was lowest—ranging from

0.8 to 9.5—among agricultural laborers, teachers and professors, telegraph and telephone operators, musicians and teachers of music, laborers (not specified), stenographers and typewriters, printers, lithographers, and presswomen, bookkeepers and accountants, and clerks and copyists.

Most of the occupations in which the per cent of foreign born is exceptionally low and that of native born correspondingly high, are included under professional service or under trade and transportation, and demand more than an ordinary degree of intelligence or education. The high per cent of native born among females employed as agricultural laborers and as laborers (not specified) reflects the extent to which negro women are engaged in these occupations.

GAINFUL WORKERS OF FOREIGN PARENTAGE.

Of gainful workers in continental United States in 1900, 11,166,361, or 38.4 per cent, were persons of foreign parentage. Of this number, 5,845,919 were born in foreign countries and 5,320,442 were born in the United States, these two groups representing, respectively, immigrants and children of immigrants.

The gainful workers of foreign parentage have been classified by countries or nationalities according to the birthplace of both parents, or of one parent only when the other is a native of this country. The classification distinguishes seventeen specified nationalities.

Of the total number of workers of foreign parentage, 29.5 per cent were of German parentage, 21.7 per cent were of Irish parentage, and 16 per cent were of English parentage (including the English Canadian, the Scotch, and the Welsh); so that 67.2 per cent, or two-thirds, of the total number of gainful workers of foreign parentage in continental United States in 1900 were of British or German extraction.

The proportions of the total number of workers of foreign parentage represented by the other specified nationalities were as follows: The Scandinavian (Norway, Sweden, and Denmark) constituted 7.8 per cent of the total; the French Canadian, 3.1 per cent; the Italian, 2.9 per cent; the Polish and the Russian, each 2.2 per cent; the Austrian, 1.7 per cent; the Bohemian, 1.2 per cent; the French, 1.1 per cent; and the Hungarian and the Swiss, each 1 per cent. The gainful workers belonging to other foreign countries constituted 4.1 per cent of the total; those of mixed foreign parentage (father and mother born in different foreign countries), 4.5 per cent.

The British and German elements were of much more importance in the second generation than in the first, constituting 79.5 per cent of the workers of foreign parentage born in this country and only 56.1 per cent of those born abroad. This difference indicates the decline in the relative importance of immigration from British and German countries in recent years.

The Scandinavian element (Norway, Sweden, and

Denmark), on the other hand, while constituting 10.9 per cent of the first or immigrant generation, constituted only 4.4 per cent of the second generation; similarly, the Italian represented 5.1 per cent of the first generation and only 0.4 per cent of the second. This difference in the percentage is a natural result of the fact that the Scandinavian and Italian immigration is comparatively recent.

Of the total number of gainful workers of foreign parentage, 35.7 per cent were engaged in manufacturing and mechanical pursuits and only 19.7 per cent in agricultural pursuits; while of the total number of workers of native parentage, 45.7 per cent were engaged in agricultural pursuits and only 17.3 per cent in manufacturing and mechanical pursuits.

Of the total number (11,166,361) of gainful workers of foreign parentage, 9,094,871, or 81.4 per cent, were males and 2,071,490, or 18.6 per cent, were females.

For every nationality of foreign parentage, except the Norwegian, the Swiss, the Danish, and the Italian, the number of males engaged in manufacturing and mechanical pursuits exceeded the number in any other main class of occupations.

Among the Norwegians, the Swiss, and the Danes the largest number of male workers were engaged in agricultural pursuits, and among the Italians the largest number were engaged in domestic and personal service, most of them being laborers (not specified).

Under manufacturing and mechanical pursuits the Hungarians are represented by a larger percentage than any other foreign nationality, 59.7 per cent, or nearly three-fifths, of the total number of Hungarian male workers being found in this class of occupations. Other nationalities showing exceptionally high percentages for males in this class are the Austrian (52.4 per cent), the French Canadian (49.4 per cent), the Russian (45.8 per cent), the Polish (44.5 per cent), the Scotch (41.2 per cent), and the English and Welsh (40.6 per cent). A large proportion of the Hungarians and of the Austrians reported under manufacturing and mechanical pursuits were miners and quarrymen; a large proportion of the French Canadians were textile mill operatives; and a large proportion of the Russians were tailors.

A large proportion of the Italian (32 per cent), Hungarian (21.7 per cent), Polish (27.4 per cent), Austrian (17.9 per cent), and Irish (15 per cent) males were reported as laborers (not specified) and classified, therefore, under domestic and personal service.

A considerable proportion of the Russian (30.6 per cent), Irish (25.8 per cent), English Canadian (23.6 per cent), Scotch (22.7 per cent), English and Welsh (21.4 per cent), German (20.4 per cent), and French (20.2 per cent) males were engaged in trade and transportation. The majority of the Russian males in this branch of occupations were either retail merchants and dealers, hucksters and peddlers, or salesmen; for the Irish, English Canadian, Scotch, German, and French males,

the most important occupations under this main head were those of draymen, hackmen, teamsters, etc., clerks and copyists, salesmen, retail merchants and dealers, and steam railroad employees.

The only nationalities of foreign parentage showing more than 4 per cent of the male workers engaged in professional pursuits are the Scotch, the English and Welsh, the French, and the English Canadian, the highest percentage, that for the Scotch, being 5.1. The per cent for each of these nationalities, though not high, exceeds that for the native white of native parents (4.4).

For female workers of foreign parentage, the two leading classes of occupations are domestic and personal service and manufacturing and mechanical pursuits. In six specified nationalities of foreign parentage, comprising the French Canadian, the Italian, the Russian, the Polish, the Bohemian, and the English and Welsh, the number of female workers engaged in manufacturing and mechanical pursuits exceeded the number in domestic and personal service; in the other specified nationalities the latter class of occupations was larger than the former.

In most foreign nationalities the leading occupation for females is that of servants and waitresses, which comprises over 55 per cent of the Swedes of this sex engaged in gainful occupations, between 40 and 50 per cent of the Norwegians, the Danes, and the Hungarians, about 35 per cent of the Austrians, and about 30 per cent of the Irish, Swiss, and Germans.

More than one-half (52.5 per cent) of the French Canadian females engaged in gainful occupations were textile mill operatives, and somewhat more than one-third (36 per cent) of the Russian and a little more than one-third (33.9 per cent) of the Italian workers of this sex were either tailoresses, dressmakers, or seamstresses. For all these nationalities the proportion of female workers employed as servants and waitresses was comparatively small.

In general, the diversification of occupations for either sex of foreign parentage is most marked among the nationalities which belong to the earlier immigration movement, comprising the English, Scotch, Irish, and German.

CONJUGAL CONDITION OF THE WORKING POPULATION.

The conjugal classes distinguished in the census are the single, the married, the widowed, the divorced, and the unknown; but in the statistics here presented, the unknown—comprising only 0.2 per cent of the total population—are included with the single.

Among males, 66.4 per cent of the single were gainfully employed, 94.2 per cent of the married, 77.1 per cent of the widowed, and 89.3 per cent of the divorced.

The difference between these percentages is mainly a result of the difference in the age constitution of the several conjugal classes. A large proportion of the

single males are boys or young men, consequently a comparatively small proportion are gainfully employed. The proportion of old men is larger among the widowed and divorced than among the married, consequently the per cent gainfully employed is smaller.

Among females, 31.3 per cent of the single were gainfully employed, 5.6 per cent of the married, 31.5 per cent of the widowed, and 55.3 per cent of the divorced.

In the case of females matrimony has a marked effect on the per cent gainfully employed, comparatively few married women being engaged in gainful occupations.

Divorced women as a class are younger than widows, and this may explain in part the fact that the per cent gainfully employed is higher.

A comparison of the statistics by nativity and color shows that the proportion of single males gainfully employed is highest (84.8 per cent) among the foreign white and lowest (61.8 per cent) among the native white of native parents; the proportion of married men gainfully employed does not vary much, being approximately 95 per cent in each element of the population; the proportion of widowers gainfully employed is highest (89.5 per cent) among negroes and lowest among foreign white (70.2 per cent).

The comparison by race and nativity for females reveals wider differences, the per cent of single females gainfully employed ranging from 60.9 among foreign white to 21.5 among native white of native parents, and the per cent of widowed from 67 among negroes to 20.7 among foreign white. In the proportion of married women gainfully employed the contrast between the negroes and the whites is very marked; in each of the white elements of the population the proportion is under 4 per cent, but in the negro element it is 26 per cent.

In each group of occupations the proportions in the several conjugal classes again depend largely upon the age constitution of the group; in occupations, such as that of agricultural laborers, in which the percentage of young persons is large, the percentage of single is also large, while in occupations, such as that of farmers, planters, and overseers, in which the per cent of young persons is small, the per cent of single is likewise small.

But other factors besides that of age constitution doubtless have considerable influence on conjugal condition; for instance, the length of time required to secure an income sufficient to support a wife and family accord-

ing to the standard of living prevailing in the social class represented by the occupation. Among lawyers, for instance, the per cent of single men is exceptionally high in proportion to the per cent 25 years of age and over, while among textile mill operatives it is low.

A high percentage of single in proportion to the percentage over 25 years of age is observable in many callings which involve a roving life or frequent changes of residence, such as the occupations of actors, sailors, civil engineers and surveyors, lumbermen and raftsmen, and wood choppers.

In all occupations combined the number of males reported as divorced constituted 0.5 per cent of the number reported as married, widowed, or divorced; that is to say, for every 1,000 male workers who were or had been married at the time the Twelfth Census was taken, 5 were reported as living in the divorced state.

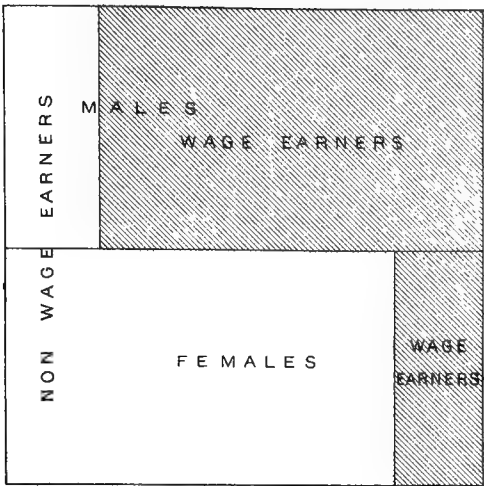

In different occupations the per cent of divorced males, as computed on the basis of the number married, widowed, or divorced, ranges from 2.4 for soldiers, sailors, and marines (U. S.) to 0.2 for silk mill operatives.

The majority of females gainfully employed are single, the exact percentage of single in all occupations combined being 68.2. In different occupations the per cent of single ranges from 9.1 for farmers, planters, and overseers to 95 for stenographers and typewriters. For the leading occupations for this sex the percentages of single are as follows: Teachers and professors, 92.2; saleswomen, 90.7; servants and waitresses, 78.9; cotton mill operatives, 78.8; seamstresses, 71.2; dress-makers, 69.1; agricultural laborers, 64.4; housekeepers and stewardesses, 59.5; nurses and midwives, 58.7; laborers (not specified), 49.7; laundresses, 30.1; and farmers, planters, and overseers, 9.1.

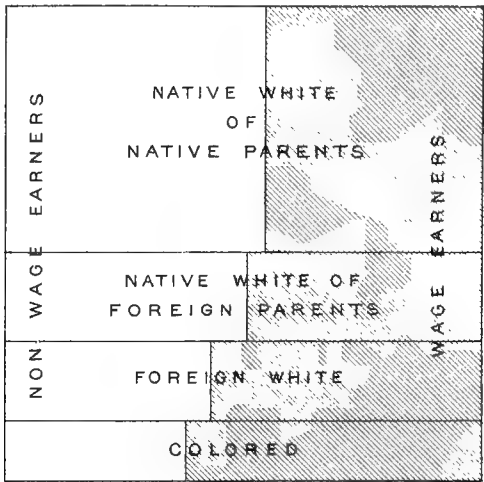

These 12 occupations include all those in which the number of females exceeded 100,000. The comparatively low per cent of single among laundresses and laborers (not specified) probably reflects the extent to which married negro women were engaged in these occupations. Of the females occupied as farmers, planters, and overseers, 73.4 per cent were widows.

In every conjugal class the per cent of females gainfully employed increased during the decade 1890 to 1900, as follows: Single, from 29.1 to 31.3 per cent; married, from 4.6 to 5.6 per cent; widowed, from 29.3 to 31.5 per cent; and divorced, from 49 to 55.3 per cent.

APPENDIX A.

INSTRUCTIONS TO ENUMERATORS CONCERNING THE RETURN OF OCCUPATIONS AT THE CENSUSES OF 1870, 1880, 1890, AND 1900.

CENSUS OF 1870.

OCCUPATION.

The inquiry "Profession, Occupation, or Trade," is one of the most important questions of this schedule. Make a study of it. Take especial pains to avoid unmeaning terms, or such as are too general to convey a definite idea of the occupation. Call no man a "factory hand" or a "mill operative." State the kind of a mill or factory. The better form of expression would be, "works in cotton mill," "works in paper mill," etc. Do not call a man a "shoemaker," "bootmaker," unless he makes the entire boot or shoe in a small shop. If he works in (or for) a boot and shoe factory, say so.

Do not apply the word "jeweler" to those who make watches, watch chains, or jewelry in large manufacturing establishments.

Call no man a "commissioner," a "collector," an "agent," an "artist," an "overseer," a "professor," a "treasurer," a "contractor," or a "speculator," without further explanation.

When boys are entered as apprentices, state the trade they are apprenticed to, as "apprenticed to carpenter," "apothecary's apprentice."

When a lawyer, a merchant, a manufacturer, has retired from practice or business, say "retired lawyer," "retired merchant," etc. Distinguish between fire and life insurance agents.

When clerks are returned, describe them as "clerk in store," "clerk in woolen mill," "R. R. clerk," "bank clerk," etc.

Describe no man as a "mechanic" if it is possible to describe him more accurately.

Distinguish between stone masons and brick masons.

Do not call a bonnet maker a bonnet manufacturer, a lace maker a lace manufacturer, a chocolate maker a chocolate manufacturer. Reserve the term Manufacturer for proprietors of establishments: always give the *branch* of manufacture.

Whenever merchants or traders can be reported under a single word expressive of their special line, as "grocer," it should be done. Otherwise, say dry goods merchant, coal dealer, etc.

Add, in all cases, the class of business, as wholesale (wh.), retail (ret.), importer (imp.), jobber, etc.

Use the word *Huckster* in all cases where it applies.

Be very particular to distinguish between farmers and farm labor-

ers. In agricultural regions this should be one of the points to which the Assistant Marshal should especially direct his attention.

Confine the use of the words "glover," "hatter," and "furrier" to those who *actually make*, or make up, in their own establishments, all, or a part, of the gloves and hats or furs which they sell. Those who only sell these articles should be characterized as "glove dealer," "hat and cap dealer," "fur dealer."

Judges (state whether Federal or State, whether probate, police, or otherwise) may be assumed to be lawyers, and that addition, therefore, need not be given; but all other *officials* should have their profession designated, if they have any, as "retired merchant, governor of Massachusetts," "paper manufacturer, representative in legislature." If anything is to be omitted, leave out the office, and put in the occupation.

As far as possible distinguish machinists as "locomotive builders," "engine builders," etc.

Instead of saying "packers," indicate whether you mean "pork packers" or "crockery packers," or "mule packers."

The organization of domestic service has not proceeded so far in this country as to render it worth while to make distinction in the character of work. Report all as "domestic servants."

Cooks, waiters, etc., in hotels and restaurants, will be reported separately from domestic servants.

The term "house-keeper" will be reserved for such persons as receive distinct *wages* or *salary* for the service. Women keeping house for their own families or for themselves, without any other gainful occupation, will be entered as "keeping house." Grown daughters assisting them will be reported without occupation.

You are under no obligation to give any man's occupation just as he expresses it. If he cannot tell intelligently what he *is*, find out what he *does*, and characterize his profession accordingly.

The inquiry as to Occupation will not be asked in respect to infants or children too young to take any part in production. Neither will the doing of domestic errands or family chores out of school be considered an occupation. "At home" or "attending school" will be the best entry in the majority of cases. But if a boy or girl, whatever the age, is earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry, the occupation should be stated.

CENSUS OF 1880.

OCCUPATION.

In the column numbered 13 is to be reported the occupation of each person 10 years of age and upwards.

The inquiry "profession, occupation, or trade," is one of the most important questions of this schedule. Make a study of it. Take especial pains to avoid unmeaning terms, or such as are too general to convey a definite idea of the occupation. Call no man a "factory hand" or a "mill operative." State the kind of a mill or factory. The better form of expression would be, "works in

cotton mill," "works in paper mill," etc. Do not call a man a "shoemaker," "bootmaker," unless he makes the entire boot or shoe in a small shop. If he works in (or for) a boot and shoe factory, say so.

Do not apply the word "jeweler" to those who make watches, watch chains, or jewelry in large manufacturing establishments.

Call no man a "commissioner," a "collector," an "agent," an "artist," an "overseer," a "professor," a "treasurer," a "contractor," or a "speculator," without further explanation.

When boys are entered as apprentices, state the trade they are

apprenticed to, as "apprenticed to carpenter," "apothecary's apprentice." Students or scholars should be reported under those names.

When a lawyer, a merchant, a manufacturer, has retired from practice or business, say "retired lawyer," "retired merchant," etc. Distinguish between fire and life insurance agents.

When clerks are returned, describe them as "clerk in store," "clerk in woolen mill," "R. R. clerk," "bank clerk," etc.

Describe no man as a "mechanic," if it is possible to describe him more accurately.

Distinguish between stone masons and brick masons.

Do not call a bonnet maker a bonnet manufacturer, a lace maker a lace manufacturer, a chocolate maker a chocolate manufacturer. Reserve the term "manufacturer" for proprietors of establishments; always give the *branch* of manufacture, as cotton manufacturer, woolen manufacturer, etc.

Whenever merchants or traders can be reported under a single word expressive of their special line, as "grocer," it should be done. Otherwise, say dry goods merchant, coal dealer, etc.

Use the word "huckster" in all cases where it applies.

Be very particular to distinguish between farmers and farm laborers. In agricultural regions this should be one of the points to which the Enumerator should especially direct his attention.

Confine the use of the words "glover," "hatter," and "furrier" to those who *actually make*, or make up, in their own establishments, all, or a part, of the gloves and hats or furs which they sell. Those who only sell these articles should be characterized as "glove dealer," "hat and cap dealer," "fur dealer."

Judges (state whether Federal or State, whether probate, police,

or otherwise) may be assumed to be lawyers, and that addition, therefore, need not be given; but all other *officials* should have their profession designated, if they have any, as "retired merchant, governor of Massachusetts," "paper manufacturer, representative in legislature." If anything is to be omitted, leave out the office, and put in the occupation.

The organization of domestic service has not proceeded so far in this country as to render it worth while to make distinction in the character of work. Report all as "domestic servants."

Cooks, waiters, etc., in hotels and restaurants, will be reported separately from domestic servants, as "cook in hotel," etc.

The term "house-keeper" will be reserved for such persons as receive distinct *wages* or *salary* for the service. Women keeping house for their own families or for themselves, without any other gainful occupation, will be entered as "keeping house." Grown daughters assisting them will be reported without occupation.

You are under no obligation to give any man's occupation just as he expresses it. If he can not tell intelligibly what he *is*, find out what he *does*, and characterize his profession accordingly.

The inquiry as to occupation will not be asked in respect to infants or children too young to take any part in production. Neither will the doing of domestic errands or family chores out of school be considered an occupation. "At home" or "attending school" will be the best entry in a majority of cases. But if a boy or girl, whatever the age, is earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry, the occupation should be stated.

CENSUS OF 1890.

PROFESSION, TRADE, OR OCCUPATION, AND MONTHS UNEMPLOYED.

16. *Profession, trade, or occupation.*—This is a most important inquiry. Study these instructions closely, and in reporting occupations avoid the use of unmeaning terms. A person's occupation is the profession, trade, or branch of work upon which he chiefly depends for support, and in which he would ordinarily be engaged during the larger part of the year. General or indefinite terms which do not indicate the kind of work done by each person must not be used. You are under no obligation to give a person's occupation just as he expresses it. If he can not tell intelligibly what he *is*, find out what he *does*, and describe his occupation accordingly. The name of the place worked in or article made or worked upon should not be used as the sole basis of the statement of a person's occupation. Endeavor to ascertain always the *character of the service rendered or kind of work done*, and so state it.

The illustrations given under each of the general classes of occupation show the nature of the answers which should be made to this inquiry. They are not intended to cover all occupations, but are indicative of the character of the answers desired in order to secure, for each person enumerated, properly descriptive designations of service rendered or work done by way of occupation and as the means of gaining a livelihood.

Agricultural pursuits.—Be careful to distinguish between the *farm laborer*, the *farmer*, and *farm overseer*; also between the *plantation laborer*, the *planter*, and *plantation overseer*. These three classes must be kept distinct, and each occupation separately returned.

Do not confuse the *agricultural laborer*, who works on the farm or plantation, with the general or day laborer, who works on the road or at odd jobs in the village or town. Distinguish also between *woodchoppers* at work regularly in the woods or forests and the laborer, who takes a job occasionally at chopping wood.

Make a separate return for *farmers* and *planters* who own, hire, or carry on a farm or plantation, and for *gardeners*, *fruit growers*, *nurserymen*, *florists*, *vine-growers*, etc., who are engaged in raising

vegetables for market or in the cultivation of fruit, flowers, seeds, nursery products, etc. In the latter case, if a man combines two or more of these occupations, be careful to so state it, as *florist*, *nurseryman* and *seed-grower*.

Avoid the confusion of the *garden laborer*, *nursery laborer*, etc., who hires out his services, with the proprietor gardener, florist, nurseryman, etc., who carries on the business himself or employs others to assist him.

Return as *dairymen* or *dairywomen* those persons whose occupation in connection with the farm has to do chiefly with the dairy. Do not confuse them with employees of butter and cheese or condensed milk factories, who should be separately returned by some distinctive term.

Return *stock-herders* and *stock-drovers* separately from *stock-raisers*.

Do not include *lumbermen*, *raftsmen*, *log-drivers*, etc., engaged in hauling or transporting lumber (generally by water) from the forest to the mill, with the employees of lumber yards or lumber mills.

Fishing.—For *fishermen* and *oystermen* describe the occupation as accurately as possible. Be careful to avoid the return of fishermen on vessels as sailors. If they gain their living by fishing, they should be returned as "fishermen," and not as sailors.

Mining and quarrying.—Make a careful distinction between the *coal miners* and *miners of ores*; also between miners generally and *quarrymen*. State the kind of ore mined or stone quarried.

Do not return *proprietors* or *officials* of mining or quarrying companies as miners or quarrymen, but state their business or official position accurately.

Professional pursuits.—This class includes *actors*, *artists* and *teachers of art*, *clergymen*, *dentists*, *designers*, *draftsmen*, *engravers*, *civil engineers* and *surveyors*, *mechanical* and *mining engineers*, *government clerks* and *officials*, *journalists*, *lawyers*, *musicians* and *teachers of music*, *physicians*, *surgeons*, *professors* (in colleges and universities), *teachers* (in schools), and other pursuits of a professional nature. Specify each profession in detail, according to the fact. These are cited simply as illustrations of these classes of pursuits.

Distinguish between *actors, theatrical managers, and showmen.*

Make a separate return for *government clerks* occupying positions under the national, state, county, city, or town governments from clerks in offices, stores, manufacturing establishments, etc.; also distinguish *government officials.*

Return *veterinary surgeons* separately from other surgeons.

Distinguish *journalists, editors, and reporters* from *authors* and other *literary persons* who do not follow journalism as a distinct profession.

Return separately *chemists, assayers, metallurgists, and other scientific persons.*

Domestic and personal service.—Among this class of occupations are comprised *hotel keepers, boarding-house keepers, restaurant keepers, saloon keepers, and bartenders; housekeepers, cooks, and servants* (in hotels, boarding-houses, hospitals, institutions, private families, etc.); *barbers and hairdressers; city, town, and general day laborers; janitors, sextons, and undertakers; nurses and midwives; watchmen, policemen, and detectives.* Specify each occupation or kind of service rendered in detail, according to the fact. The above are given only as examples of the occupations which would naturally be included under this general class of work.

Distinguish carefully between *housekeepers, or women who receive a stated wage or salary for their services, and housewives, or women who keep house for their own families or for themselves, without any gainful occupation.* The occupation of grown daughters who assist in the household duties without fixed remuneration should be returned as "*Housework—without pay.*"

As stated under agricultural pursuits, do not confuse *day laborers, at work for the city, town, or at odd jobs, with the agricultural laborer, at work on the farm or plantation or in the employ of gardeners, nurserymen, etc.* State specifically the *kind of work done in every instance.*

Clerks in hotels, restaurants, and saloons should be so described and carefully distinguished from *bartenders.* In many instances bartenders will state their occupation as "*clerk*" in wine store, etc., but the character of the service rendered by such persons will readily determine whether they should be classed as "*bartenders*" or not.

Stationary engineers and firemen should be carefully distinguished from *engineers and firemen* employed on locomotives, steamboats, etc.

Soldiers, sailors, and marines enlisted in the service of the United States should be so returned. Distinguish between officers and enlisted men, and for civilian employees return the kind of service performed by them.

Pursuits of trade and transportation.—Distinguish carefully between *real estate agents, insurance agents, claim agents, commission agents, etc.* If a person is a real estate agent and also an auctioneer, as is often the case, return his occupation as *real estate agent and auctioneer.*

Return accountants, bookkeepers, clerks, cashiers, etc., separately, and state the kind of service rendered, as *accountant—insurance; bookkeeper—wholesale dry goods; clerk—gas company; cashier—music store.*

Do not confound a clerk with a salesman, as is often done, especially in dry goods stores, grocery stores, and provision stores. Generally speaking, the persons so employed are to be considered as salesmen, unless the bulk of their service is in the office on the books and accounts; otherwise they should be returned as *salesman—dry goods; salesman—groceries, etc.*

Stenographers and typewriters should be reported separately, and should not be described simply as "*clerks.*"

Distinguish carefully between *bank clerks, cashiers in banks, and bank officials, describing the particular position filled in each case.* In no case should a *bank cashier* be confounded with cashiers in stores, etc.

Distinguish between foremen and overseers, packers and shippers, porters and helpers, and errand, office, and messenger boys in stores, etc., and state in each case the character of the duties performed by them, as *foremen—wholesale wool house; packer—crockery; porter—rubber goods; errand boy—dry goods; messenger boy—telegraph.*

State the kind of merchants and dealers, as *dry goods merchant, wood and coal dealer, etc.* Whenever a single word will express the business carried on, as *grocer*, it should be so stated.

In the case of hucksters and peddlers also state the kind of goods sold, as *peddler—tinware.*

Distinguish *traveling salesmen* from salesmen in stores, and state the kind of goods sold by them.

Return *boarding and livery-stable keepers* separately from *hostlers* and other stable employees.

Distinguish also between *expressmen, teamsters, draymen, and carriage and hack drivers.*

Steam railroad employees should be reported separately, according to the nature of their work, as *baggage men, brakemen, conductors, laborers on railroad, locomotive engineers, locomotive firemen, switchmen, yardmen, etc.*

Officials of railroad, telegraph, express, and other companies should be separately returned and carefully distinguished from the employees of such companies.

Boatmen, canalmen, pilots, longshoremen, stevedores, and sailors (on steam or sailing vessels) should be separately returned.

Telegraph operators, telephone operators, telegraph linemen, telephone linemen, electric-light men, etc., should be kept distinct, and a separate return made for each class.

Manufacturing and mechanical pursuits.—In reporting occupations pertaining to manufactures there are many difficulties in the way of showing the kind of work done rather than the article made or the place worked in. The nature of certain occupations is such that it is well nigh impossible to find properly descriptive terms without the use of some expression relating to the article made or place in which the work is carried on.

Do not accept "*maker*" of an article or "*works in*" mill, shop, or factory, but strive always to find out the particular work done.

Distinguish between persons who tend machines and the unskilled workman or laborer in mills, factories, and workshops.

Describe the proprietor of the establishment as a "*manufacturer,*" and specify the branch of manufacture, as *cotton manufacturer, etc.* In no case should a manufacturer be returned as a "*maker*" of an article.

In the case of apprentices, state the trade to which apprenticed, as *Apprentice—carpenter, etc.*

Distinguish between *butchers, whose business is to slaughter cattle, swine, etc., and provision dealers, who sell meats only.*

Distinguish also between a *glover, hatter, or furrier* who actually make or make up in their own establishments all or part of the gloves, hats, or furs which they sell, and the person who simply deals in but does not make these articles.

Do not use the words "*factory operative,*" but specify in every instance the kind of work done, as *cotton mill—spinner; silk mill—weaver, etc.*

Do not describe a person in a printing office as a "*printer*" where a more expressive term can be used, as *compositor, pressman, press feeder, etc.*

Make the proper distinction between a *clock or watch "maker"* and a *clock or watch "repairer."* Do not apply the word "*jeweler*" to those who make watches, watch chains, or jewelry in large establishments.

Avoid in all cases the use of the word "*mechanic,*" and state whether a *carpenter, mason, house painter, machinist, plumber, etc.*

Do not say "*finisher,*" "*molder,*" "*polisher,*" etc., but state the article finished, molded, or polished, as *brass finisher, iron molder, steel polisher, etc.*

Distinguish between *cloak makers, dressmakers, seamstresses, tailors, etc.* In the case of *sewing-machine operators*, specify the work done.

Other occupations.—When a lawyer, merchant, manufacturer, etc., has retired from practice or business, say *retired lawyer, retired merchant, etc.*

The distinction to be made between *housewives, housekeepers*, and those assisting in *housework* has already been stated under "DOMESTIC AND PERSONAL SERVICE." For the large body of persons, particularly young women, who live at home and do nothing, make the return as "No occupation." With respect to infants and children too young to take any part in production or to be engaged in any stated occupation, distinguish between those at home and those attending school. For those too young to go to school, or who for some reason did not attend school during the census year, write the words *At home*, and for those who attended school during some part of the school year write the words, *At school—public*, or *At school—private*, according to the kind of school. If taught by a governess or tutor, it should be so stated. The student at college or engaged in special studies should be reported separately from *scholars in public or private schools*.

The doing of domestic errands or family chores out of school hours, where a child regularly attends school, should not be considered an occupation. But if a boy or girl, whatever the age, is

earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry, the kind of work performed should be stated.

17. *Months unemployed during the census year (June 1, 1889 to May 31, 1890).*—If a person having a gainful occupation was unemployed during any part of the census year it should be so stated in months and parts of months. If, as may often happen, a person was unemployed at his usual occupation for some time during the census year and yet found other temporary employment for some part or the whole of the time, this fact should be clearly stated. For instance, a person's occupation may be that of "Farm laborer," at which he may have had no employment for three months during the census year. During two of these three months, however, he may have worked in a shoe shop, so that, so far as actual idleness is concerned, he was only out of work one month. In all such cases, where the non-employment returned in answer to Inquiry 17 does not represent actual idleness as regards the person's usual occupation given in answer to Inquiry 16, indicate the number of months unemployed at occupation by inserting the figures, in parenthesis, after the name of the occupation itself. In the case just cited, and as shown in the "illustrative example," the answer to Inquiry 16 would appear as "Farm laborer (3)" and the answer to Inquiry 17 as "1." For all persons not engaged in gainful occupations the symbol "X" should be used.

CENSUS OF 1900.

OCCUPATION, TRADE, OR PROFESSION.

153. NOTE.—The following instructions concerning the return of the occupation, trade, or profession in column 19 do not, in the main, form a part of the instructions contained in the portfolio or the instructions printed at the bottom of the illustrative example. These instructions are very important, however, and must be not only read but studied carefully.

154. Column 19. *Occupation.*—This question applies to every person 10 years of age and over who is at work, that is, occupied in gainful labor, and calls for the profession, trade, or branch of work upon which each person depends chiefly for support, or in which he is engaged ordinarily during the larger part of the time. (See paragraph 223.)

155. This is a most important question. In reporting occupations avoid the use of general or indefinite terms which do not indicate the *kind of work done*. You need not give a person's occupation just as he expresses it. If he can not tell intelligibly what he *is*, find out what he *does*, and describe his occupation accordingly. Endeavor to ascertain always the *kind of work done*, and so state it.

156. Indicate in every case the kind of work done or character of service rendered. Do not state merely the article made or worked upon, or the place where the work is done. For example, the reply "carriage builder," or "works in carriage factory," is unsatisfactory, because men of different trades, such as blacksmiths, joiners, wheelwrights, painters, upholsterers, work together in building carriages. Such an answer, therefore, does not show what kind of work the person performs.

157. Return every person according to his own occupation, not that of his employer. For example, describe a blacksmith employed by a manufacturer of carriages as a carriage blacksmith and not as a carriage builder, or a cooper employed by a brewery as a cooper and not a brewer, etc.

158. If a person has two occupations, enter the more important one, that is, the one from which he gets the more money. If you can not learn that, enter the one in which he spends the more time. For example, describe a person who gets most of his income by managing a farm, but also preaches, as a "farmer," but if he gets more income from his preaching, describe him as a "preacher" and not as a farmer.

159. Sometimes you will find a person engaged in one occupation, but claiming a different one. This will be common in certain resorts for invalids. Such persons often take up for the time occupations different from those followed at home. For example, you may find a

clergyman canvassing for books or a physician herding cattle. In such a case ask from which occupation the person gets the more money or to which he gives more time during the year.

160. If a married woman has a gainful occupation, return the occupation accordingly, whether she does the work at her home or goes regularly to a place of employment, and whether she is regularly or only occasionally so employed. For example, "milliner," "dress-maker," "nurse," etc.

161. In farming sections, where a farm is found that is under the management or supervision of a woman as owner or tenant, return the occupation of such woman as "farmer" in all cases.

162. Report a student who supports himself by some occupation according to the occupation, if more time is given to that, but as a student, if more time is given to study. Thus report a student who does stenographic work as a student unless more of his time is spent in stenography. Report a salesman in a grocery store, who attends a night school as "salesman, groceries," because most of his day is spent in the store. (See paragraph 219.)

163. Many a person who does not follow any occupation still has an income. In that case indicate the source of the income. Report a person whose income comes from the rent of lands or buildings as "landlord." Report a person who receives his income, or most of it, from money loaned at interest, or from stocks, bonds, or other securities, as a "capitalist."

164. Abbreviations.—The space in column 19 is somewhat narrow, and it may be necessary to use the following abbreviations (but no others):

Agric., for agricultural.

Agt., for agent.

Asst., for assistant.

Co., for company.

Comsn., for commission.

Dept., for department.

Fcty., for factory.

Insur., for insurance.

Merch., for merchant.

Mfg., for manufacturing.

Mfr., for manufacturer.

Pres., for president.

R. R., for railroad or railway.

Sch., for school.

Secy., for secretary.

Supt., for superintendent.

Tele., for telegraph.

Teleph., for telephone.

Trav., for traveling, or traveler.

Treas., for treasurer.

165. The illustrations given under this head show the nature of the answers which should be made to this inquiry. They are not intended to cover all occupations, but are merely examples of the answers desired in order to secure a proper description of the character of the service rendered or kind of work done by each and every person engaged in gainful labor.

AGRICULTURAL PURSUITS.

166. Do not confuse a *farmer* with a *farm laborer*. If a person works on a farm for a stated wage (in money or its equivalent), even though he may be a son or other relative of the person who conducts the farm, he should be entered as a *farm laborer*, and not as a *farmer*. On the other hand, if a person owns or rents a farm, or operates it with or for another person, for a fixed share of the products, he should be entered as a *farmer*, and not as a *farm laborer*. Enter the older children of a farmer (who work on the farm) as *farm laborers*, except when a father and son (or sons) jointly operate the farm for fixed shares of the product. (See paragraph 300.)

167. Do not confuse a *day laborer* at work for the city, town, or at odd jobs with a *farm laborer* at work on the farm or plantation or in the employ of gardeners, nurserymen, etc. Do not say simply "*laborer*," but state in every case the *kind* of work done, as *day laborer*, *farm laborer*, *garden laborer*, etc. If a person is a *laborer* in a mill, workshop, or factory, specify the fact, in addition to the word *laborer*, as *laborer (cement works)*, etc.

168. Distinguish between a *wood chopper* at work regularly in the woods or forests and an ordinary *laborer* who takes a job occasionally at chopping wood.

169. Distinguish between a *farmer* or a *planter* who owns, hires, or carries on a farm or plantation, and a *gardener*, *fruit grower*, *nurseryman*, *florist*, or *vine grower*, etc., who is engaged in raising vegetables for market or in the cultivation of fruit, flowers, seeds, nursery products, etc.

170. Avoid the confusion of the *garden laborer*, *nursery laborer*, etc., who hires out his services, with the proprietor *gardener*, *florist*, *nurseryman*, etc., who carries on the business himself or employs others to assist him.

171. Return as a *dairyman* or *dairywoman* any person whose occupation in connection with the farm has to do chiefly with the dairy. Do not confuse such a person with an employee of a butter and cheese or condensed milk factory, who should be separately returned by some distinctive term.

172. Return a *stock herder* or *stock drover* separately from a *stock raiser*.

173. Do not include a *lumberman*, *raftsman*, *log driver*, etc., engaged in hauling or transporting lumber (generally by water) from the forest to the mill with an employee of a lumber yard or a lumber mill.

FISHING.

174. For a *fisherman* or *oysterman* describe the occupation as accurately as possible. Be careful to avoid the return of a fisherman on a vessel as a sailor. If he gains his living by fishing, he should be returned as a "*fisherman*," and not as a sailor.

MINING AND QUARRYING.

175. Make a careful distinction between a *coal miner* and a *miner of ores*; also between a *miner* and a *quarryman*. State the *kind* of ore mined or stone quarried.

176. Do not return a *proprietor* or *official* of a mining or quarrying company as a *miner* or *quarryman*, but state his business or official position accurately.

PROFESSIONAL PURSUITS.

177. Specify each profession in detail, according to the fact, as follows: *Actor*, *artist* or *teacher of art*, *clergyman*, *dentist*, *designer*, *draftsman*, *engraver*, *civil engineer* or *surveyor*, *mechanical* or *mining engineer*, *government clerk* or *official*, *journalist*, *lawyer*, *librarian*, *musician* or *teacher of music*, *physician*, *surgeon*, *professor* (in college or university), *teacher* (in school), or other pursuits of a professional nature.

178. Distinguish between an *actor*, a *theatrical manager*, and a *showman*.

179. Return a *government official*, in the service of the national, state, county, city, or town government, by the title of his office, if that

is the occupation upon which he depends chiefly for a livelihood; otherwise by his usual trade or profession.

180. Distinguish between a *government clerk* occupying a position under the national, state, county, city, or town government and a clerk in an office, store, manufacturing establishment, etc.

181. Return a *veterinary surgeon* separately from another surgeon.

182. Distinguish a *journalist*, *editor*, or *reporter* from an *author* or other literary person who does not follow journalism as a distinct profession.

183. Return a *chemist*, *assayer*, *metallurgist*, or other scientific person by his distinctive title.

DOMESTIC AND PERSONAL SERVICE.

184. Specify each occupation or kind of service rendered in detail, according to the fact, as *hotel keeper*, *boarding-house keeper*, *restaurant keeper*, *saloon keeper*, or *bartender*; *housekeeper*, *cook*, or *servant* (in hotel, boarding-house, hospital, institution, private family, etc.); *barber* or *hairdresser*; *janitor*, *sexton*, or *undertaker*; *nurse* or *midwife*; *watchman*, *policeman*, or *detective*. The above are given only as examples of the occupations which would naturally be included under this general class of work.

185. Return as a *housekeeper* a woman who receives a stated wage or salary for her services, and do not confuse her with a woman who keeps house for her own family or for herself, without any gainful occupation, or with a grown daughter who assists in the household duties without pay. A wife or daughter who simply keeps house for her own family should not be returned as a housekeeper in any case. (See paragraph 218.)

186. A clerk in a hotel, restaurant, or saloon should be so described and carefully distinguished from a *bartender*. In many instances a bartender will state his occupation as "*clerk*" in wine store, etc., but the character of the service rendered by such a person will readily determine whether he should be classed as a "*bartender*," or as a "*clerk*."

187. A *stationary engineer* or *fireman* should be carefully distinguished from a *locomotive engineer* or *fireman*.

188. A *soldier*, *sailor*, or *marine* enlisted in the service of the United States should be so returned. Distinguish between an officer and an enlisted man, and for a civilian employee state the kind of service performed by him.

PURSUITS OF TRADE AND TRANSPORTATION.

189. Distinguish carefully between a *real estate agent*, *insurance agent*, *claim agent*, or *commission agent*, etc.

190. If a person combines two or more of these occupations, as is often the case, return the occupation from which he derives the larger share of his income.

191. Return an *accountant*, *bookkeeper*, *clerk*, *cashier*, etc., according to his distinctive occupation, and state the kind of service rendered, as *accountant—insurance*; *bookkeeper—wholesale dry goods*; *clerk—gas company*; *cashier—music store*.

192. Do not confound a clerk with a salesman, as is often done, especially in dry goods stores, grocery stores, and provision stores. Generally speaking, a person so employed is to be considered as a salesman, unless most of his service is in the office on the books and accounts; otherwise he should be returned as *salesman—dry goods*; *salesman—groceries*, etc.

193. A *stenographer* or *typewriter* should be reported as such, and should not be described simply as a "*clerk*."

194. Distinguish carefully between a *bank clerk*, *cashier in bank*, or *bank official*, describing the particular position filled in each case. In no case should a *bank cashier* be confounded with a cashier in a store, etc.

195. Distinguish between a *foreman* and *overseer*, a *packer* and *shipper*, a *porter* and *helper*, and an *errand*, *office*, and *messenger boy* in a store, etc., and state in each case the character of the duties performed by him, as *foreman—wholesale wool*; *packer—crockery*; *porter—rubber goods*; *errand boy—dry goods*; *messenger boy—telegraph*.

196. State the kind of merchant or dealer, as *dry goods merchant*, *wood and coal dealer*, etc. Whenever a single word will express the business carried on, as *grocer*; it should be used.

197. In the case of a huckster or peddler also state the kind of goods sold, as *peddler—tinware*.

198. Distinguish a traveling salesman from a salesman in a store, return the former as a "*commercial traveler*," and state the kind of goods sold by him.

199. Return a *boarding or livery stable keeper* separately from a *hostler* or other stable employee.

200. Distinguish also between an *expressman*, *teamster*, *drayman*, and *carriage and hack driver*.

201. A steam railroad employee should be reported according to the nature of his work, as *baggage man*, *brakeman*, *conductor*, *railroad laborer*, *locomotive engineer*, *locomotive fireman*, *switchman*, *yardman*, etc.

202. An official of a railroad, telegraph, express, or other company should be returned by his title and carefully distinguished from an employee of such company.

203. Return a *boatman*, *canalman*, *pilot*, *longshoreman*, *steward*, or *sailor* (on a steam or sailing vessel) according to his distinctive occupation.

204. A *telegraph operator*, *telephone operator*, *telegraph lineman*, *telephone lineman*, *electric-light man*, etc., should be reported according to the nature of the work performed.

MANUFACTURING AND MECHANICAL PURSUITS.

205. In reporting this class of occupations there are many difficulties in the way of showing the kind of work done rather than the article made or the place worked in. The nature of certain occupations is such that it is well-nigh impossible to find properly descriptive terms without the use of some expression relating to the article made or place in which the work is carried on.

206. Do not accept "maker" of an article or "works in" mill, shop, or factory, but strive always to find out the particular work done.

207. Do not use the words "factory operative," but specify the kind of work done, as *cotton mill—spinner*; *silk mill—weaver*, etc.

208. Avoid in all cases the use of the word "mechanic," and state whether a *carpenter*, *mason*, *house painter*, *machinist*, *plumber*, etc.

209. Do not say "finisher," "molder," "polisher," etc., but describe the work done, as *brass finisher*, *iron molder*, *steel polisher*, etc.

210. Distinguish between a person who tends machines and the unskilled workman or laborer in mills, factories, and workshops.

211. Describe the proprietor of the establishment as a "manufacturer," and specify the branch of manufacture, as *cotton manufacturer*, etc. In no case should a manufacturer be returned as a "maker" of an article.

212. In the case of an apprentice, state the trade to which apprenticed, as *Apprentice—carpenter*, etc.

213. Distinguish between a *butcher*, whose business is to slaughter cattle, swine, etc., and a *provision dealer*, who sells meats.

214. Distinguish also between a *glover*, *hatter*, or *furrier* who actually makes in his own establishment all or part of the gloves, hats, or furs which he sells, and a person who simply deals in but does not make these articles.

215. Do not describe a person in a printing office as a "printer" where a more expressive term can be used, as *compositor*, *pressman*, *press feeder*, etc.

216. Make the proper distinction between a *clock or watch "maker"* and a *clock or watch "repairer."* Do not apply the word "jeweler" to those who make watches, watch chains, or jewelry in large establishments.

217. Distinguish between a *cloakmaker*, *dressmaker*, *seamstress*, *tailoress*, etc. In the case of a *sewing-machine operator*, specify the kind of work done.

NONGAINFUL PURSUITS.

218. If a person is attending school write "at school." No entry in column 19 should be made, however, for a lawyer, merchant, manufacturer, etc., who has retired from practice or business; nor for a wife or daughter living at home and assisting only in the household duties without pay (see paragraph 185); nor for a person too old to work, or a child under 10 years of age not at school.

219. The doing of domestic errands or family chores out of school hours, where a child regularly attends school, is not an occupation. But if a boy or girl, above 10 years of age, is earning money regularly by labor, contributing to the family support, or appreciably assisting in mechanical or agricultural industry, the kind of work performed should be stated. (See paragraph 162.)

220. In the case of an inmate of an institution or home, such as a hospital, asylum, home for the aged, soldiers' home, penitentiary, jail, etc., no entry is required in column 19 unless the inmate is actually engaged in remunerative work for which he receives a stated wage in addition to his board. The occupation of an officer or regular employee of such institution or home, however, is to be entered in this column, the same as for all other persons having a gainful occupation.

221. *Column 20. Months not employed.*—The object of this question is to get the number of months (or parts of months) in the census year (June 1, 1899 to May 31, 1900) during which each person having a gainful occupation was not employed. For those who have no gainful occupation, leave the column blank.

222. The law does not contemplate that this question shall apply solely to the principal occupation in which the person may have been engaged during the year, but it is the intent to find out the number of months (or parts of months) during which a person ordinarily engaged in gainful labor was not employed at all.

223. A return is required in columns 19 and 20 for each and every person 10 years of age and over who was engaged in gainful labor during any part of the census year (June 1, 1899 to May 31, 1900, inclusive), or who is ordinarily occupied in remunerative work but during the census year was unable to secure work of any kind. In the latter case enter his customary occupation, as *carpenter*, *bricklayer*, etc., in column 19 and the figure "12" in column 20 to show that although he had an occupation or trade, he was not employed at all during the year at that or any other kind of work.

APPENDIX B.

SUMMARY OF THE STATE AND TERRITORIAL LAWS REGULATING THE EMPLOYMENT OF CHILDREN.

[The following is a synopsis of the legislation relative to the employment of children in the several states and territories as it existed at the period of the Twelfth Census. Reference is made in footnotes, wherever necessary, to changes since 1900 in laws operative at that time as well as to legislation effected since 1900 and for which no provision theretofore had been made.]

ALABAMA.¹

Acts of 1896-97. Act No. 486.—SEC. 27. No women shall be employed to work or labor in or about the mines in this State, or any boy under the age of twelve years be so employed.

ALASKA.

Revised Statutes, 1901. Civil Code.—SEC. 2231. Every parent, guardian or other person in the Territory of Arizona, having control of any child or children between the ages of eight and fourteen years, shall be required to send such child or children to a public school, or private school taught by a competent instructor, for a period of at least twelve weeks in each year, six weeks of which time shall be consecutive. *Provided*, That such parent, guardian or other person having control of such child or children shall be excused from such duty by the school board of the district whenever it shall be shown to its satisfaction that one of the following reasons exists therefor, to wit:

1. That such child is taught at home by a competent instructor in such branches as are usually taught in the public schools.

2. That such child has already acquired the branches of learning taught in the public schools.

3. That such parent, guardian or other person is not able by reason of poverty to properly clothe such child.

4. That such child is in such physical or mental condition (as declared by a competent physician, if required by the board) to render such attendance inexpedient or impracticable.

5. That there is no school taught the requisite length of time within two and one-half miles of the residence of such child by the nearest traveled road: *Provided*, That no child shall be refused admission to any public school on account of race or color.

Penal Code.—SEC. 242. Any person, whether as parent, relative, guardian, employer or otherwise, having in his care, custody, or control, any child under the age of sixteen years, who shall sell, apprentice, give away, let out, or otherwise dispose of any

such child to any person under any name, title or pretense for the vocation, use, occupation, calling, service, or purpose of singing, playing on musical instruments, rope walking, dancing, begging, or peddling, in any public street or highway, or in any mendicant or wandering business whatsoever, and any person who shall take, receive, hire, employ, use, or have in custody, any child for such purposes, or either of them, is guilty of a misdemeanor.

ARKANSAS.²

Digest of 1894. Ch. 109.—SEC. 5051. No person under the age of fourteen years, or female of any age, shall be permitted to enter any mine to work therein; nor shall any boy under the age of sixteen years, unless he can read and write, be allowed to work in any mine, and no owner, agent or operator of any mine operated by a shaft or slope shall place in charge on any engine whereby men are lowered into or hoisted out of the mines, any but an experienced, competent and sober person, not under eighteen years of age. * * *

CALIFORNIA.³

Penal Code. Vol. IV. (Page 87.) Act of March 30, 1878.—SEC. 1.⁴ Any person, whether as parent, relative, guardian, employer, or otherwise, having the care, custody, or control of any child under the age of sixteen years, who shall exhibit, use, or employ, or who shall in any manner or under any pretense sell, apprentice, give away, let out, or otherwise dispose of any such child to any person, under any name, title, or pretense, in or for the vocation, occupation, service, or purpose of singing, playing on musical instruments, rope or wire walking, dancing, begging, or peddling, or as a gymnast, acrobat, contortionist, or rider, in any place whatsoever, or for or in any obscene, indecent, or immoral purpose, exhibition, or practice whatsoever, or for or in any mendicant or wandering business whatsoever, or for or in any business, exhibition, or vocation injurious to the health or dangerous to the life or limb of such child; or who shall cause, procure, or encourage any such child to engage therein—shall be guilty * * * *Provided*, That nothing in this section contained shall apply to or affect the employment or use of any such child as a singer or musician in any church, school, or academy, or the teaching or learning of the science or practice of music; or the employment of any such child as a musi-

² Acts of 1903 provide, in general, that no child under 10 years of age shall be employed; that no child under 12 years of age shall be employed in or about any factory or manufacturing establishment; that no child under the age of 14 years shall be so employed unless he can read and write the English language; and that such child must attend school for at least 12 weeks of each year, 6 weeks of which shall be consecutive.

³ In 1900 there was no compulsory school law, but by the statutes and amendments to the codes, 1903, it is provided, in general, that each parent, guardian, or other person having control or charge of any child between the ages of 8 and 14 years shall be required to send such child to a public school, during each school year, for a period of at least 5 months of the time during which a public school is in session, and that at least 18 weeks of such attendance shall be consecutive.

⁴ Amended by acts of 1901, chapter 158, section 67, and age limit reduced from 16 to 14 years.

¹ By the laws of 1903 employment is forbidden of children under 12 years of age in factories.

cian at any concert or other musical entertainment, on the written consent of the mayor of the city or president of the board of trustees of the town where such concert or entertainment shall take place.

SEC. 2. Every person who shall take, receive, hire, employ, use, exhibit, or have in custody any child under the age and for any of the purposes mentioned in the preceding section, shall be guilty of a like offense, and punished by a like punishment as therein provided.

Acts of 1889. Ch. 7.—SEC. 2.¹ No child under ten years of age shall be employed in any factory, workshop, or mercantile establishment; and every minor under sixteen years of age when so employed shall be recorded by name in a book kept for the purpose, and a certificate (duly verified by his or her parent or guardian, or if the minor shall have no parent or guardian, then by such minor, stating age and place of birth of such minor,) shall be kept on file by the employer, * * *

COLORADO.

Mills' Annotated Statutes of 1891. Ch. 26.—SEC. 413. Any person who shall take, receive, hire or employ, any children under fourteen years of age in any underground works, or mine, or in any smelter, mill or factory, shall be guilty of a misdemeanor, and upon conviction thereof before any justice of the peace or court of record, shall be fined * * *

SEC. 417. It shall be unlawful for any person, persons or corporation to employ any child under the age of fourteen to labor in any business whatever during the school hours of any school day of the school term of the public school in the school district where such child is, unless such child shall have attended some public or private day school where instruction was given by a teacher qualified to instruct in those branches required to be taught in the public school of the state of Colorado, or shall have been regularly instructed at home in such branches, by some person qualified to instruct in the same, at least twelve weeks in each year, eight weeks at least of which shall be consecutive, and shall, at the time of such employment, deliver to the employer a certificate in writing, signed by the teacher, certifying to such attendance or instruction; and any person, persons or corporation who shall employ any child contrary to the provisions in this section shall, upon conviction, be deemed guilty of a misdemeanor, * * *

Ch. 85.—SEC. 3185. * * * No young person under twelve years of age, or woman or girl of any age, shall be permitted to enter any coal mine to work therein, nor any person under the age of sixteen years, unless he can read and write.

Acts of 1891. (Page 59.)—SEC. 1. It shall be unlawful for any person having the care, custody, or control of any child under the age of fourteen years, to exhibit, use or employ as an actor or performer in any concert hall or room where intoxicating liquors are sold or given away, or in any variety theatre, or for any illegal, obscene, indecent or immoral purpose, exhibition or practice whatsoever, or for or in any business, exhibition, or vocation injurious to the health or dangerous to the life or limb of such child, or cause, procure or encourage such child to engage therein. Nothing in this section contained shall apply to or affect the employment or use of any such child as a singer or musician in any church, school or academy, or at any respectable entertainment, or the teaching or learning the science or practice of music.

SEC. 2. It shall also be unlawful for any person to take, receive, hire, employ, use, exhibit or have in custody any child under the age and for the purpose prohibited in the first section of this act.

CONNECTICUT.²

General Statutes of 1888. Ch. 99.—SEC. 1417. Every person who shall exhibit, use, employ, apprentice, give away, let out, or otherwise dispose of any child under the age of twelve years, in or

for the vocation, occupation, service or purpose of rope or wire walking, dancing, skating, bicycling, or peddling, or as a gymnast, contortionist, rider, or acrobat, in any place whatever; or for or in any obscene, indecent, or immoral purpose, exhibition, or practice, whatsoever; or for or in any business, exhibition, or vocation injurious to the health, or dangerous to the life or limb of such child; or who shall cause, procure, or encourage any such child to engage therein, shall be fined * * * But nothing herein shall prevent the employment of any such child as a singer or musician, in any church or school, or in learning or teaching the science or practice of music.

Ch. 106.—SEC. 1753 (as amended by *Ch. 118, Acts of 1895*). No child under fourteen years of age shall be employed in any mechanical, mercantile, or manufacturing establishment.

Acts of 1898. Ch. 227.—SEC. 3 (as amended by *Ch. 210, Acts of 1895*). No person over fourteen and under sixteen years of age, who can not read and write, shall be employed in any town where evening schools are established under the provisions of this act, unless he can produce every school month of twenty days a certificate from a teacher of an evening school established under this act, showing that he has attended such school eighteen consecutive evenings in the current school month and is a regular attendant. Any person who shall employ a child contrary to the provisions of this section shall be fined * * *

Public Laws of 1899. Ch. 19.—All parents and those who have the care of children shall bring them up in some honest and lawful employment, and instruct them or cause them to be instructed in reading, writing, spelling, English grammar, geography and arithmetic. And every parent or other person having control of any child over seven and under sixteen years of age shall cause such child to attend a public day school regularly during the hours and terms while the public school in the district wherein such child resides is in session, or while the school is in session where provision for the instruction of such child is made according to law * * * unless the parent or person having control of such child can show that the child is elsewhere receiving regularly thorough instruction during said hours and terms in the studies taught in the public schools. Children over fourteen years of age shall not be subject to the requirements of this section while lawfully employed to labor at home or elsewhere. * * *

Ch. 41.—SEC. 1. Any person who shall employ any child under fourteen years of age during the hours while the school which such child should attend is in session, and any person who shall authorize or permit on premises under his control any such child to be so employed, shall be fined * * *

DELAWARE.

Revised Code of 1852. Ed. of 1893. Ch. 131.—SEC. 2. Any person having the care, custody, or control of any minor child under the age of fifteen years who shall in any manner sell, apprentice, give away, or otherwise dispose of such minor, or any person who shall take, receive, or employ such child for the vocation or occupation of rope or wire walking or dancing, or as an acrobat or gymnast, or any person who, having the care, custody, or control of any minor child whatsoever, and shall sell, apprentice, give away, or otherwise dispose of such minor, or who shall take, receive, or employ such minor for begging or any obscene, indecent, or illegal exhibition or vocation, or any vocation injurious to the health or dangerous to the life or limb of such child engaged therein, etc., shall be deemed guilty of a misdemeanor, * * *

DISTRICT OF COLUMBIA.

United States Statutes, 1885. Ch. 58.—SEC. 3. * * * Any person, having in his custody or control a child under the age of fourteen years, who shall in any way dispose of it with a view to its being

¹ Amended by acts of 1901, chapter 205, section 2, and age limit raised from 10 to 12 years.

² By acts of 1901 every person or corporation employing a child under 16 years of age in any mechanical, mercantile, or manufacturing establishment is required to obtain a certificate showing that the child is over 14 years of age.

employed as an acrobat, or a gymnast, or a contortionist, or a circus-rider, or a rope-walker, or in any exhibition of a like dangerous character, or as a beggar, or mendicant, or pauper, or street-singer, or street-musician; or any person who shall take, receive, hire, employ, use, exhibit, or have in custody any child of the age last named for any of the purposes last enumerated, shall be deemed guilty of a misdemeanor, * * *

FLORIDA.¹

Revised Statutes of 1892. Part 5. Title 2.—SEC. 2733. Whoever hires or employs or causes to be hired or employed any minor, knowing such minor to be under the age of fifteen years and under the legal control of another, without the consent of those having such legal control, for more than sixty days, shall be punished * * *

GEORGIA.

Code of 1882. Part IV. Title I.—SEC. 4612 (f). Any person whatever who shall sell, apprentice, give away, or let out, or otherwise dispose of, any child under twelve years old, to any person, for the vocation, occupation, or service of rope or wire walking, begging, or as a gymnast, contortionist, circus rider, acrobat or clown, or for any indecent, obscene or immoral exhibition, practice or purpose whatever, shall be guilty of a misdemeanor, and punishable under section 4310 of this Code; and whoever, under such selling, apprenticing, or letting out, shall receive and use such child, for any of the purposes herein condemned, shall be guilty and punishable in a like manner.

HAWAII.²

Laws for Territories. Acts of 1890-91. Ch. 564.—SEC. 12. No child under twelve years of age shall be employed in the underground workings of any mine * * *

Civil Laws, 1897. (Page 80.)—SEC. 117. The attendance of all children between six and fifteen years of age, both inclusive, at either a public or private school is obligatory. And it shall be incumbent upon all parents, guardians and others having the responsibility and care of children of such ages, to send them to some such school. Provided that such attendance shall not be compulsory in the following cases, but in no others:

First. Where there is no school in the school district where such child resides, and the distance to the nearest school exceeds four miles.

Second. When such child shall be physically or mentally unable to attend school, of which fact the certificate of a duly qualified physician shall be evidence.

Third. When a competent person is employed as tutor in the family wherein such child resides, and proper instruction is thereby imparted.

Fourth. Where any child of not less than the age of thirteen years shall have passed the required examinations of both Primary and Grammar school grades, as such requirements shall from time to time exist.

IDAHO.

Constitution. Art. 13.—SEC. 4. The employment of children under the age of fourteen (14) years in underground mines is prohibited.

Revised Statutes, 1887.—SEC. 672. Every present guardian or other person in the Territory of Idaho, having control and charge of a child or children between the ages of eight and fourteen years,

¹ Acts of 1901, chapter 4971, section 2 prohibits the employment or use of "any child under the age of fourteen years for or in the vocation, occupation, service or purpose of singing, playing on musical instruments, rope or wire walking, dancing, begging or peddling, or as a gymnast, contortionist, rider, acrobat, or for or in any obscene, indecent or immoral purpose, exhibition or practice, or for or in any business, exhibition or vocation injurious to the health or dangerous to the life or limbs of such child," etc.

² By the laws of 1901 it is provided that it shall be unlawful for any keeper or proprietor of any place where intoxicating or spirituous liquors are sold or dispensed, to employ any minor in or about the room where such liquors are sold or dispensed.

shall be required to send such child or children to a public school for a period of twelve weeks in each school year, at least eight weeks of which shall be consecutive, unless such child or children are excused from such attendance by the Board of School Trustees of the School District in which such parents or guardians reside, upon its being shown to their satisfaction that the bodily or mental condition of such child or children has been such as to prevent his, or her, or their attendance at school; or application to study for the period required, or that such child or children are taught in a private school or at home in such branches as are usually taught in a primary school, or have already acquired the ordinary branches of learning taught in the public schools; provided in case a public school shall not be taught for a period of twelve weeks, or any part thereof, during the year, within two miles by the nearest traveled road of the residence of any such parent or guardian within the school district—he or she shall not be liable to the provisions of this act.

ILLINOIS.³

Revised Statutes of 1891. Ch. 38.—SEC. 42a (as amended by Laws of 1895, Page 113). It shall be unlawful for any person having the care, custody or control of any child under the age of fourteen years to exhibit, use or employ, or in any manner, or under any pretense, sell, apprentice, give away, let out or otherwise dispose of any such child to any person in or for the vocation or occupation, service or purpose of singing, playing on musical instruments, rope or wire walking, dancing, begging or peddling, or as a gymnast, contortionist, rider or acrobat in any place whatsoever, or for any obscene, indecent or immoral purpose, exhibition or practice whatsoever, or for, or in any business, exhibition or vocation injurious to the health, or dangerous to the life or limb of such child, or cause, procure or encourage any such child to engage therein. Nothing in this section contained shall apply to or affect the employment or use of any such child as a singer or musician in any church, school or academy, or in the teaching or learning the science or practice of music.

SEC. 42b (as amended by Laws of 1895, Page 113). It shall also be unlawful for any person to take, receive, hire, employ, use, exhibit or have in custody any child under the age and for the purposes prohibited in section 42a hereof.

Acts of 1897. (Page 90.)—SEC. 1. No child under the age of fourteen years shall be employed, permitted or suffered to work for wages at any gainful occupation hereinafter mentioned.

SEC. 2. It shall be the duty of every person, firm or corporation, agent or manager of any firm or corporation employing minors in any mercantile institution, store, office, laundry, manufacturing establishment, factory or workshop within this State to keep a register in said mercantile establishment, store, office, laundry, manufacturing establishment, factory or workshop in which said minors shall be employed or permitted or suffered to work, in which register shall be recorded the name, age and place of residence of every child employed, or permitted or suffered to work therein under the age of sixteen years, and it shall be unlawful for any person, firm or corporation, agent or manager of any firm or corporation to hire or employ, or to permit or to suffer to work in any mercantile institution, store, office, laundry, manufacturing establishment, factory or workshop, any child under the age of sixteen years and over the age of fourteen years, unless there is

³ By the laws of 1903 it is provided that no child under the age of 14 years shall be employed while the public schools are in session; that a register shall be kept, showing the name, age, and place of residence of every child employed or permitted to work over 14 and under 16 years of age; that an age and school certificate shall be required for any child employed under 16 and over 14 years of age; that no minor over 14 and under 16 years of age unable to read and write shall be employed while a public evening school is maintained unless such minor is a regular attendant at such evening school; that no child under 16 years of age shall be employed about machinery or in dangerous occupations, etc.

By the laws of 1903 it is also required that every person having control of any child between the ages of 7 and 14 years shall annually cause such child to attend some public or private school, for the entire time during which the school attended is in session, which period shall not be less than 110 days of actual teaching.

first provided and placed on file in such mercantile institution, office, laundry, manufacturing establishment, factory, or workshop an affidavit made by the parent or guardian stating the name, date and place of birth of such child. If such child have no parent or guardian, then such affidavit shall be made by the child.

SEC. 6. No child under the age of sixteen years shall be employed, or permitted or suffered to work by any person, firm or corporation in this State at such extra hazardous employment whereby its life or limb is in danger, or its health is likely to be injured, or its morals may be deprived.

Acts of 1899. (Page 236.)—SEC. 22. No boy under the age of fourteen years, and no woman or girl of any age shall be permitted to do any manual labor in or about any mine, and before any boy can be permitted to work in any mine he must produce to the mine manager or operator thereof an affidavit from his parent or guardian or next of kin, sworn and subscribed to before a justice of the peace or notary public, that he, the said boy, is fourteen years of age.

INDIANA.

Annotated Statutes of 1894. Ch. 5.—SEC. 2241. Any person having the care, custody or control of any minor child under the age of fifteen years, who shall in any manner sell, apprentice, give away, or otherwise dispose of such child, and any person who shall take, receive, or employ such child for the vocation or occupation of rope or wire walking, or as an acrobat, gymnast, contortionist, or rider, and any person who, having the care, custody or control of any minor child shall sell, apprentice, give away or otherwise dispose of such child, or who shall take, receive or employ such child for any obscene, indecent or illegal exhibition or vocation, or any vocation injurious to the health or dangerous to the life or limb of such child engaged therein, etc., shall be guilty * * *

SEC. 2242. Any person having the care, custody or control, lawful or unlawful, of any minor child under the age of eighteen years, who shall apprentice, give away, let out, hire, or otherwise dispose of such minor to any person for the purpose of singing, playing on musical instruments, begging, or for any mendicant business whatever, in the streets, roads or other highways of the state, and whosoever shall take, receive, hire, employ, use or have in custody any such (minor) for the vocation, occupation, calling, service or purpose of singing, playing upon musical instruments or begging upon the streets, roads or other highways of the state, or for any mendicant business whatever, shall be guilty * * *

Acts of 1897. Ch. 65.—SEC. 2. No child under fourteen years of age shall be employed in any manufacturing establishment within this State. * * * and it shall be unlawful for any proprietor, agent, foreman or other person in or connected with a manufacturing establishment to hire or employ any child under the age of sixteen years to work therein without there is first provided and placed on file in the office an affidavit made by the parent or guardian, stating the age, date and place of birth of said child; * * * (No child under the age of sixteen years shall be employed in any manufacturing establishment who can not read and write simple sentences in the English language, except during the vacation of the public schools in the city or town where such minor lives. * * *)

Thornton's Statutes, 1897.—SEC. 6259. Every parent, guardian, or other person in the State of Indiana, having control or charge of any child or children between the ages of eight and fourteen years, shall be required to send such child or children to a public, private, or parochial school, or to two or more of these schools, each school year for a period of at least twelve (12) consecutive weeks in each school year: *Provided*, That any and all children that have completed the first eight years of work of the common schools of the State of Indiana and have received certificates of graduation from the common schools shall be exempt from the provisions of this Act: *Provided*, That children who are physically or mentally

incapacitated for the work of the common schools are exempt from the provisions of this Act; * * *

Acts of 1899. Ch. 142.—SEC. 2. No child under fourteen years of age shall be employed in any manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery, or printing office within this State. It shall be the duty of every person employing young persons under the age of sixteen years to keep a register, in which shall be recorded the name, birthplace, age and place of residence of every person employed by him under the age of sixteen years; and it shall be unlawful for any proprietor, agent, foreman or other person connected with a manufacturing or mercantile establishment, mine, quarry, laundry, renovating works, bakery or printing office to hire or employ any young person to work therein without there is first provided and placed on file in the office an affidavit made by the parent or guardian stating the age, date and place of birth of said young person; * * * No young person under the age of sixteen years, who is not blind, shall be employed in any establishment aforesaid, who cannot read and write simple sentences in the English language, except during the vacation of the public schools in the city or town where such minor lives. * * *

SEC. 4. No person, company, corporation or association shall employ or permit any young person to have the care, custody, management of or to operate any elevator.

KENTUCKY.³

Statutes of 1894. Ch. 18.—SEC. 326. A person who, for gain or reward, employs or causes to be employed, or who exhibits, uses, or who has in his custody for the purpose of exhibiting or employing any child actually or apparently under the age of sixteen years, or any person who, having the care, custody, or control of such

¹ Supplement, Code of Iowa, 1902, provides that any person having control of any child of the age of 7 to 14 years inclusive, in proper physical and mental condition to attend school, shall cause such child to attend some public, private, or parochial school for at least 12 consecutive school weeks in each school year.

² By the General Statutes of Kansas, 1901, it is required that every parent or other person having control of any child between the ages of 8 and 14 years shall send such child to a public or private school for at least 12 weeks in each year, 6 weeks of which time shall be consecutive.

³ By acts of 1902 it is made unlawful for any person to employ a child of less than 14 years of age in any workshop, factory, or mine.

child, as parent, relative, guardian, employer, or otherwise, sells, lets out, gives away, or in any way procures or consents for gain or reward to the employment or exhibition of such child, either, first, in begging or receiving alms, or in any mendicant occupation; second, or (being a female) in peddling or in any wandering occupation; third, or male or female in any indecent or immoral occupation or practice, or in the exhibition of any such child when insane or idiotic; or, fourth, of any practice or exhibition of unusual danger to the life, limb, health, or morals of the child, is guilty * * *

LOUISIANA.

Acts of 1886. Regular session. Act No. 43.—SEC. 1. No boy under the age of twelve years, and no girl under the age of fourteen years, shall be employed in any factory, warehouse or workshop where the manufacture of any goods whatever is carried on, or where any goods are prepared for manufacturing.

SEC. 2. No child under the age of fourteen years shall be employed by any person to labor in any factory, warehouse, workshop, clothing, dressmaking or millinery establishment, or where any goods are manufactured or prepared for manufacturing, or attend itinerant musicians through the streets of any town or city within this State, unless such child shall have attended some public or private day school, where instruction was given by a teacher qualified to instruct in such branches as are usually taught in primary schools, at least four months of the twelve months next preceding the month in which such child shall be so employed; *provided*, that a certificate of such attendance from the director of the school district or principal of public or private school in which such child shall have so attended school, shall be evidence of a compliance with the provisions of this section, if acted upon by the employer in good faith. * * *

Acts of 1892. Act No. 59.—SEC. 1. Any person who employs or exhibits or gives away for the purpose of employing or exhibiting a child under fifteen years of age, for the purpose of walking on a wire or rope, or riding or performing as a gymnast, contortionist or acrobat, in any circus or theatrical exhibition or in any public place whatsoever or who causes, procures or encourages any such child to engage therein, shall be punished * * *

Act No. 60.—SEC. 1. No child under the age of twelve years shall be permitted to operate or clean any part of the machinery in a factory while such part is in motion by the aid of steam, water or other mechanical power, or to clean any part of such machinery that is in dangerous proximity to such moving part.

MAINE.¹

Public Laws, 1887. Ch. 139.—SEC. 5. No child under twelve years of age, shall be employed in any manufacturing or mechanical establishment in this state. * * *

SEC. 6. No child under fifteen years of age shall be employed in any manufacturing or mechanical establishment in this state, except during vacations of the public schools in the city or town in which he resides, unless during the year next preceding the time of such employment, he has for at least sixteen weeks, attended some public or private school, eight weeks of which shall be continuous; nor shall such employment continue unless such child in each and every year, attend some public or private school for at least sixteen weeks, and no child shall be so employed who does not present a certificate made under or by the direction of the school committee, superintendent of the public schools, or the teacher of a private school, that such child has so attended school. * * *

SEC. 8. Every owner, superintendent or overseer of any such manufacturing or mechanical establishment shall require and keep on file, a certificate of the age and place of birth of every child under sixteen years of age employed therein, so long as such child

is so employed, which certificate shall also state in the case of a child under fifteen years of age, the amount of his school attendance during the year next preceding such employment. * * *

MARYLAND.²

*Code of Public General Laws, 1888. Art. 27.*³—SEC. 273. Any person having in his care, custody or control any child under the age of sixteen years, whether as parent, guardian, relative, employer or otherwise, who shall sell, apprentice, give away, let out or otherwise dispose of any such child to any person under any name, title or pretense whatever, and any person, whether as parent, guardian, relative, employer or otherwise, who shall take, receive, hire, employ, use or have in custody any such child for the vocation, use, occupation, calling, service or purpose of singing, playing on musical instruments, rope walking, dancing, peddling, begging or any mendicant or wandering business whatsoever, shall be deemed guilty * * *

Code of Public General Laws, 1894. Ch. 317.—SEC. 4.⁴ No proprietor or owner of any mill or factory in this State, other than establishments for manufacturing canned goods, or manager, agent, foreman or other person in charge thereof, shall, after the first day of October in the year eighteen hundred and ninety-four, employ or retain in employment in any such mill or factory, any person or persons under twelve years of age; * * * provided, that nothing in this section shall apply to Frederick, Washington, Queen Anne's, Carroll, Wicomico, Caroline, Kent, Somerset, Cecil, Calvert, St. Mary's, Prince George's, Howard, Baltimore, Worcester and Harford counties.

MASSACHUSETTS.⁵

Acts of 1894. Ch. 508.—SEC. 31. No child under the age of fourteen years shall be permitted to clean any part of the machinery in a factory when such part is in motion by the aid of steam, water, or other mechanical power, or to clean any part of such machinery which is in dangerous proximity to such moving part.

SEC. 32.⁶ No person, firm, or corporation shall employ or permit any person under fifteen years of age to have the care, custody, management or operation of any elevator, or shall employ or permit any person under eighteen years of age to have the care, custody, management or operation of any elevator running at a speed of over two hundred feet a minute.

SEC. 49. No person shall employ or exhibit or sell, apprentice or give away for the purpose of employing or exhibiting, a child under fifteen years of age, in dancing, playing on musical instruments, singing, walking on a wire or rope, or riding or performing as a gymnast, contortionist or acrobat, in any circus or theatrical exhibition, or in any public place whatsoever, or cause, procure or encourage any such child to engage therein; *provided*, That nothing in this section shall be construed to prevent the education of children in vocal and instrumental music, or their employment as musicians in any church, chapel or school, or school exhibition, or to prevent their taking part in any concert or musical exhibition

²By the laws of 1902 it is provided that no child (in the city of Baltimore and Allegany county) under 16 years of age shall be employed in any mill or factory other than establishments for manufacturing canned goods, without a certificate stating that such child is more than 12 years of age; that no minor (in the city of Baltimore and Allegany county) over 12 and under 16 years of age who can not read and write shall be employed unless such minor is a regular school attendant; that no child under the age of 12 years, or female of any age, nor boys under 14 years unless they can read and write, may be employed in mines; that every child (in the city of Baltimore and Allegany county) between the ages of 8 and 12 years shall attend some day school regularly for the entire period each year that school is in session, and also every child between the ages of 12 and 16 years, if not lawfully employed; and that no minor shall be employed to sell or dispense beer or spirituous liquors where they are to be drunk upon the premises.

³Addition to article 27, by acts of 1902, chapter 506, section 141a, prohibits the employment of minors under 16 years in handling intoxicating liquors in any brewing or bottling establishment.

⁴Repealed and reenacted by acts of 1902, chapter 566, section 4, raising age limit from 12 to 14 years and adding Garrett, Talbot, and Montgomery counties.

⁵Acts of 1901 prohibit the employment of minors under 18 years of age in the manufacture of acids when such employment is dangerous or injurious to the health of such minors.

⁶Amended by acts of 1902, chapter 350, sections 1 and 2, by which the age is raised from 15 to 16 years and the speed limit reduced from 200 to 100 feet a minute.

¹Laws of 1903 provide, in general, that every child between the ages of 7 and 15 years shall attend some public or private school during the time such school is in session.

on the special written permission of the mayor and aldermen of a city or of the selectmen of a town.

Acts of 1898. Ch. 494.—SEC. 1. No child under fourteen years of age shall be employed in any factory, workshop or mercantile establishment. No such child shall be employed in any work performed for wages or other compensation, to whomsoever payable, during the hours when the public schools of the town or city in which he resides are in session, nor be employed at any work before the hour of six o'clock in the morning or after the hour of seven o'clock in the evening.

SEC. 2. No child under sixteen years of age shall be employed in any factory, workshop or mercantile establishment unless the person or corporation employing him procures and keeps on file and accessible to the truant officers of the town or city, and to the district police and inspectors of factories, an age and schooling certificate * * *

SEC. 7. No person shall employ any minor over fourteen years of age, and no parent, guardian or custodian shall permit to be employed any such minor under his control, who can not read at sight and write legibly simple sentences in the English language, while a public evening school is maintained in the town or city in which such minor resides, unless such minor is a regular attendant at such evening school or at a day school: * * *

Ch. 496.—SEC. 12. Every child between seven and fourteen years of age shall attend some public day school in the town or city in which he resides during the entire time the public day schools are in session, * * * the attendance of a child upon a public day school shall not be required if such child has attended for a like period of time a private day school approved by the school committee of such town or city * * * or if such child has been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or has already acquired the branches of learning required by law to be taught in the public schools, or if his physical or mental condition is such as to render such attendance inexpedient or impracticable. * * *

Acts of 1899. Ch. 413.—SEC. 1. No minor under eighteen years of age shall be employed in handling intoxicating liquors, or in handling packages containing intoxicating liquors, in any brewery or bottling establishment where intoxicating liquors are prepared for sale or offered for sale.

MICHIGAN.¹

Howell's Annotated Statutes of 1882. Ed. of 1883. Ch. 52.—SEC. 1998. Any person having the care, custody, or control of any child under sixteen years of age, who shall exhibit, use, or employ, or who shall apprentice, give away, let out or otherwise dispose of any such child to any person in or for the vocation, service or occupation of rope or wire walking, gymnast, contortionist, rider, or acrobat, dancing or begging, in any place whatsoever, or for any obscene, indecent, or immoral purpose, exhibition or practice whatsoever, or for any exhibition injurious to the health or dangerous to the life or limb of such child, or who shall cause, procure, or encourage such child to engage therein, and any person who shall take, receive, hire, employ, use, exhibit, or have in custody any such child for any of the purposes mentioned in this section, shall be deemed guilty * * *

Acts of 1885. Act No. 39.—SEC. 2 (*as amended by Act No. 116, Acts of 1891*). No child under the age of fourteen years shall be employed by any person to labor in any business, or shall be licensed or granted permit by the mayor of any city or the president of any village in this State, or by any other officer authorized by law, to issue licenses or permits, to carry on the business of peddling papers or blacking boots unless such child shall have attended some pub-

lic or private day school where instruction was given by a teacher qualified to instruct in such branches as are usually taught in primary schools, at least four months of the twelve months next preceding the month in which said child shall be so employed, licensed or granted permit as aforesaid, except in districts in which only three months of school are taught by a qualified teacher: * * *

Acts of 1895. Act No. 184.—SEC. 3. No child under the age of sixteen years shall be employed by any person, firm or corporation conducting any manufacturing establishment in this State, at employment whereby its life or limb is endangered, or its health is likely to be injured or its morals may be depraved by such employment. No female under the age of twenty-one years and no male under the age of eighteen years shall be allowed to clean machinery while in motion.

Public Acts of 1899. Act No. 77.—SEC. 2.² No child under fourteen years of age shall be employed in any manufacturing establishment within this State. It shall be the duty of every person employing children to keep a register, in which shall be recorded the name, birthplace, age and place of residence of every person employed by him under the age of sixteen years, * * * and it shall be unlawful for any manufacturing establishment to hire or employ any child under the age of sixteen years without there is first provided and placed on file a sworn statement made by the parent or guardian, stating the age, date and place of birth of said child, and that the child can read and write. * * *

MINNESOTA.

General Statutes of 1894. Ch. 92a.—SEC. 6539. A person who employs, or causes to be employed, or who exhibits, uses, or has in his custody for the purpose of exhibiting or employing, any child apparently or actually under the age of sixteen years, or who, having the care, custody, or control of such child as parent, relative, guardian, employer, or otherwise, sells, lets out, gives away, or in any way procures, or consents to the employment or exhibition of such a child, either,

1. As a rope or wire walker, dancer, gymnast, contortionist, rider, or acrobat; or,
2. In begging or receiving alms, or in any mendicant occupation; or,
3. In any indecent or immoral exhibition or practice; or,
4. In any practice or exhibition dangerous or injurious to the life, limb, health, or morals of the child;
5. At any labor of any kind outside of the family of such child's residence, before seven o'clock in the morning or after six o'clock in the evening;

—Is guilty * * *

Laws of 1895. Ch. 171.—SEC. 2. No child under the age below which all children are by law required to attend school shall in the year next succeeding any birthday of said child be employed at any occupation during the hours in which the public schools in the town or city in which he resides are in session, unless or until in said year he has attended some school for at least a period of time equal to that required by law for attendance of school.

SEC. 4. No child under sixteen years of age who can not read and write simple sentences in the English language shall, except in vacations of the public schools be employed at any indoor occupation, provided such child is not a regular attendant at a day or evening school.

SEC. 6. No person, firm or corporation shall employ or permit any child under sixteen (16) years of age to have the care, custody, management or operation of any elevator, or permit any person under eighteen (18) years of age to have the care, custody, management or operation of any elevator running at a speed of over two (200) hundred feet a minute.

¹ By Public Acts, 1901, school attendance is compulsory between the ages of 8 and 15 years, and in cities between the ages of 7 and 15 years, for a period of at least 4 months in each school year; except in cities having a duly constituted police force, where attendance is not limited to 4 months, but is required for the entire school year.

² Amended by Public Acts, 1901, number 113, section 2, prohibiting the employment of children under the age of 14 years in hotels or stores (as well as in manufacturing establishments); but this section does not apply to canning factories or evaporating works.

SEC. 7. No child actually or apparently under sixteen (16) years of age shall be employed in any factory, workshop or mercantile establishment, or in the service of any public telegraph, telephone or district messenger company or other corporation, unless the person, firm or corporation employing said child procures and keeps on file the certificate required * * *

SEC. 8. * * * Said certificate shall contain a statement of the name, birthplace, date of birth, and age of child at date of statement. * * * The certificate shall also contain a statement or certificate by the officer issuing the same that the child can read at sight and write legibly simple sentences in the English language, or that said child, if unable so to read and write, is regularly attending a day or evening school or has been excused * * *

Acts of 1897. Ch. 360.—SEC. 2. No child under fourteen (14) years of age shall be employed at any time in any factory or workshop, or about any mine. No such child shall be employed in any mercantile establishment nor in the service of any telegraph, telephone or public messenger company, except during the vacation of the public schools in the town where such child is employed. No child under sixteen (16) years of age shall be employed at any occupation dangerous or injurious to life, limb, health or morals; * * *

General Laws, 1899. Ch. 226.—SEC. 1. Every parent, guardian or other person, who resides in any school district or city, and who has control of any child or children of or between the ages of 8 and 16 years, shall send such child or children to a public, parochial or private school in each year during the entire time the public schools in such district or city are in session.

Provided, however, that such child or children may be excused from such attendance for the whole or any part of such period by the school board or board of education of the school district or city in which such parent, guardian or person having control resides, upon its being shown to the satisfaction of such board:

(1) That such parent, guardian or other person having control is not able by reason of poverty to clothe such child properly; or (2) That such child's bodily or mental condition is such as to prevent his attendance at school or application to study for the period required; or (3) That such child is taught at home in such branches of study as are usually taught in public schools, subject to the same examination as other pupils of such district or city; or (4) That such child has already acquired the ordinary branches required by law; or (5) That such child is actually engaged in some useful occupation, employment or service permitted by law.

MISSISSIPPI.

Annotated Code of Mississippi, 1892.—SEC. 1003. Any person who shall persuade, entice, or decoy away from its father or mother, with whom it resides, any child under the age of twenty-one years if a male, or eighteen if a female, being unmarried, for the purpose of employing such child without the consent of its parents, or one of them, shall, upon conviction, * * *

MISSOURI.¹

Acts of 1895. (Page 205.)—SEC. 1. It shall be unlawful for any person having the care, custody or control of any child under the age of fourteen years to exhibit, use or employ, or in any manner, or under any pretense, sell, apprentice, give away, let out or otherwise dispose of any such child to any person in or for the vocation or occupation, service or purpose of singing, playing on musical instruments, rope or wire walking, dancing, begging or peddling, or as a gymnast, contortionist, rider or acrobat in any place whatsoever, or for any obscene, indecent or immoral purpose, exhibition or practice whatsoever, or for or in any business, exhibition or vocation injurious to the health or dangerous to the life or limb of such child, or cause, procure or encourage any such child to engage therein. * * * Nothing in this section

contained shall apply to or affect the employment or use of any such child as a singer or musician in any church, school or academy, or at any respectable entertainment, or the teaching or learning the science or practice of music.

Acts of 1897. (Page 143.)—SEC. 1. No child under the age of fourteen years shall be employed in any manufacturing or mechanical establishment in this state wherein steam, water or other mechanical power is used in the manufacturing process carried on therein, or, where the work to be done by such child would, in the opinion of two reputable physicians in the locality where such work is to be done, be dangerous to the health of such child.

MONTANA.²

Code of Montana, Penal, 1895. Ch. II.—SEC. 472. Any person, whether as parent, relative, guardian, employer or otherwise, having in his care, custody or control any child under the age of sixteen years, who shall sell, apprentice, give away, let out or otherwise dispose of any such child to any person, under any name, title, or pretense, for the vocation, use, occupation, calling, service or purpose of singing, playing on musical instruments, rope walking, dancing, begging or peddling in any public street or highway, or in any mendicant or wandering business whatever, and any person who shall take, receive, hire, employ, use or have in custody any child for such purposes, or either of them, is guilty * * *

SEC. 474. Every person who receives or employs any child under fourteen years of age in any underground works or mine, or in any similar business, is punishable * * *

Political Code of Montana.—SEC. 1920.³ Every parent, guardian or other person in the state of Montana, having control of any child or children between the ages of eight and fourteen years, shall be required to send such child or children to a public school, or private school taught by a competent instructor, for a period of at least twelve weeks in each year, six weeks of which time shall be consecutive: *Provided,* that such parent, guardian or other person having control of such child or children shall be excused from such duty by the school board of the district whenever it shall be shown to their satisfaction, subject to appeal as provided by law, that one of the following reasons exist therefor, to-wit:

1. That such child is taught at home by a competent instructor in such branches as are usually taught in the public schools.
2. That such child has already acquired the branches of learning taught in the public schools.
3. That such parent, guardian or other person is not able by reason of poverty, to properly clothe such child.
4. That such child is in such a physical or mental condition (as declared by a competent physician, if required by the board) to render such attendance inexpedient or impracticable.
5. That there is no school taught the requisite length of time within two and one-half miles of the residence of such child by the nearest traveled road; * * *

NEBRASKA.⁴

Criminal Code (as amended by Acts of 1899. Ch. 108.)—SEC. 245aa. Any male or female child under the age of ten years shall not be employed in any manufacturing, mechanical industrial or mercantile establishment.

² Laws of 1902 provide that children under 14 years of age employed during the school term shall present an age and schooling certificate; and that all minors over 14 and under 16 years of age who can not read and write shall attend school.

³ Amended by laws of 1902, chapter xlv, section 1, making attendance compulsory for the full time that the school attended is in session, and raising the minimum attendance from 12 weeks to 16 weeks, and also requiring that all children between the ages of 14 and 16 years, not regularly employed, shall attend school for the full term.

⁴ Annotated Statutes of Nebraska, 1903, provide that every person having control of any child between the ages of 7 and 15 years shall cause such child to attend public day schools not less than two-thirds of the entire time the school is in session, and in no case shall such attendance be for a shorter period than 12 weeks; except in the case of children 14 years of age who are of necessity employed, and children who have received instruction for a like period of time in some private or parochial school.

¹ By acts of 1901 no male person under the age of 12 years, nor female of any age, and no boy under the age of 14 years who can not read and write, shall be permitted to work in any mine.

SEC. 245bb. Any male or female child under the age of fourteen years shall not be employed in any manufacturing, mechanical industrial or mercantile establishment, except during the vacations of the public schools; unless during the year next preceding such employment, said child has for at least twenty weeks attended some public or private day school where the English is taught; nor shall such employment continue unless such child shall in each and every year attend school as herein provided, and no child shall be so employed who does not present a certificate * * * of their compliance with the requirements of this section * * *

SEC. 245cc. Any owner, superintendent or overseer of any such establishment, shall require and keep on file, open to the inspection of the public, a certificate of the age, place of birth and residence of every male and female child under sixteen years of age employed therein, so long as such child is so employed; which certificate shall also state, in case the child is under fourteen years of age, the amount of said child's school attendance during the year next preceding his employment, and such certificate shall be signed by the president and secretary of the school board of the school district in which such child resides, * * *

NEVADA.

Compiled Laws, 1900.—SEC. 1380. Every parent, guardian, or other person in the State of Nevada, having control and charge of a child or children between the ages of eight and fourteen years, shall be required to send such child or children to a public school for a period of at least sixteen weeks in each school year, at least eight weeks of which shall be consecutive, unless such child or children are excused from such attendance by the Board of School Trustees of the school district in which such parents or guardians reside, upon it being shown to their satisfaction that the bodily or mental condition of such child or children has been such as to prevent his, her, or their attendance at school, or application to study, for the period required, or that such child or children are taught in a private school, or at home, in such branches as are usually taught in a primary school, or have already acquired the ordinary branches of learning taught in the public school; *provided*, in case a public school shall not be taught for the period of sixteen weeks, or any part thereof, during the year, within two miles by the nearest traveled road, of the residence of any person within the school district, * * *

NEW HAMPSHIRE.¹

Public Statutes of 1891. Ch. 93.²—SEC. 10. No child under the age of ten years shall be employed in any manufacturing establishment.

SEC. 11. No child under the age of sixteen years who can not read and write shall be employed in any manufacturing establishment during the time the public schools in the district in which he resides are in session.

SEC. 12 (*as amended by Acts of 1899.* Ch. 84). Children not included under the provisions of the preceding section shall not be employed in a manufacturing establishment unless they shall first furnish to the person proposing to employ them a certificate of the school board of the district in which they reside that they have attended some public or private day school in which the com-

mon English branches are taught during the preceding year as follows: If under sixteen and over fourteen years of age, twelve weeks; if under fourteen and over twelve years of age, six months, or such part thereof as the schools in the district in which they reside were in session; and if under twelve and over ten years of age, the whole time the schools were in session in such district. Except that children who are graduates of a regularly graded grammar school, approved by the state superintendent of public instruction, or who have an education equal to that of such graduates, may be granted employment certificates by the school committee of the district in which they reside.

Ch. 265.—SEC. 3. If any person shall employ or exhibit a child under the age of fourteen years in dancing, playing on musical instruments, singing, walking on a wire or rope, or riding or performing as a gymnast, contortionist, or acrobat in any circus or theatrical exhibition, or in any public place whatsoever, or shall cause, procure, or encourage any such child to engage therein, or if any person having the custody or control of any such child shall permit him to be so employed, such person shall be fined * * * but nothing in this section shall be construed to prevent the education of children in vocal and instrumental music, or their employment as musicians in any church, chapel, or school, or school exhibition, or to prevent their taking part in any concert or musical exhibition.

NEW JERSEY.³

Laws of 1885. (Page 212.)—SEC. 4. No minor, under eighteen years of age, or woman, shall be required to clean any part of the mill gearing or machinery in any factory or workshop while the same is in motion or work between the fixed or traversing part of any machine while it is in motion by the action of steam, water or other mechanical power.

Supplement of 1886. (Page 195.)—SEC. 26. Any person, whether as parent, relative, guardian, employer or otherwise, having in his or her care, custody or control any child or children under the age of twelve years, who shall sell, apprentice, give away, let out, employ, or otherwise dispose of any such child or children to any person, under any name, title or pretense, for the vocation, use, occupation, calling, service or purpose of singing, playing on musical instruments, rope walking, dancing, begging in any public street or highway, or in any mendicant or wandering business whatsoever, and any person who shall take, receive, hire, employ, use or have in custody any such child or children for the purpose above named, or any of them, shall be deemed to be guilty * * *

SEC. 18. (Page 380.)—Any person who shall take, receive, hire or employ any child under twelve years of age in any underground works or mine or like place whatsoever, shall be guilty * * *

SEC. 9.⁴ (Page 407.)—* * * no boy under the age of twelve years, nor any girl under fourteen years of age, shall be employed in any factory, workshop, mine or establishment where the manufacture of any goods whatever is carried on.

Acts of 1887. Ch. 177.—SEC. 7. No minor below the age of sixteen shall be employed at any work dangerous to health, without a certificate of fitness from a reputable physician.

Acts of 1900. Ch. 96.—SEC. 155. No child under the age of fifteen years shall be employed by any person, company or corporation to labor in any business whatever, unless such child shall have attended within twelve months immediately preceding such employment some public or private school. Such attendance shall be for five days or four evenings every week during a period of at least sixteen weeks which may be divided into two terms of eight consecutive weeks each, so far as the arrangements of school terms will permit.

¹ By acts of 1902 it is required, in general, that every person having the legal control of a child between the ages of 7 and 12 years, shall send such child to a public or private school each day while such school shall be in session.

⁴ Amended by acts of 1903, chapter 201, section 1, in which the age limit for boys is raised from 12 to 14 years.

¹ Public Statutes of 1901 require, in general, that every person having "control of a child between the ages of 8 and 16 years residing in a school district in which a public school is annually taught shall cause such child to attend the public school for 12 weeks at least in every year, six weeks at least of which shall be consecutive * * *".

² Amended by acts of 1901, chapter 61, sections 10, 11, and 12; in section 10 the age for employment in manufacturing establishments is raised from 10 to 12 years, and the employment prohibited of children under 14 years of age in any manufacturing establishment, or in any mechanical, mercantile, or other employment, during the time when the public schools are in session. Section 11 amends the old law by prohibiting employment of children under 16 years of age in any manufacturing establishment, or in any mechanical, mercantile, or other employment, during the time the public schools are in session without presenting certificates stating age and ability to read and write. Section 12 provides that no minor who can not read and write shall be employed, while a public evening school is maintained, unless he is a regular attendant at such evening school or at a day school.

NEW MEXICO.

Laws for Territories. Acts of 1890-91. Ch. 564.—SEC. 12. No child under twelve years of age shall be employed in the underground workings of any mine * * *

NEW YORK.

Acts of 1892. Ch. 309.—SEC. 292. A person who employs or causes to be employed, or who exhibits, uses, or has in custody, or trains for the purpose of the exhibition, use or employment of, any child actually or apparently under the age of sixteen years; or who having the care, custody or control of such a child as parent, relative, guardian, employer, or otherwise, sells, lets out, gives away, so trains, or in any way procures or consents to the employment, or to such training, or use, or exhibition of such child; or who neglects or refuses to restrain such child from such training, or from engaging or acting, either

1. As a rope or wire walker, gymnast, wrestler, contortionist, rider or acrobat; or upon any bicycle or similar mechanical vehicle or contrivance; or,

2. In begging or receiving or soliciting alms in any manner or under any pretense, or in any mendicant occupation; or in gathering or picking rags, or collecting cigar stumps, bones or refuse from markets; or in peddling; or,

3. In singing; or dancing; or playing upon a musical instrument; or in a theatrical exhibition; or in any wandering occupation; or,

4. In any illegal, indecent or immoral exhibition or practice; or in the exhibition of any such child when insane, idiotic, or when presenting the appearance of any deformity or unnatural physical formation or development; or,

5. In any practice or exhibition or place dangerous or injurious to the life, limb, health or morals of the child, is guilty of a misdemeanor. But this section does not apply to the employment of any child as a singer or musician in a church, school or academy; or in teaching or learning the science or practice of music; or as a musician in any concert or in a theatrical exhibition; with the written consent of the mayor of the city, * * *

Ch. 673.—SEC. 3. No person, firm or corporation shall employ or permit any child under the age of fifteen years to have the care, custody, management of or to operate any elevator or shall employ or permit any person under the age of eighteen years to have the care, custody, management or operation of any elevator running at a speed of over two hundred feet a minute.

Acts of 1897. Ch. 415.—SEC. 70. A child under the age of fourteen years shall not be employed in any factory in this state. A child between the ages of fourteen and sixteen years shall not be so employed, unless a certificate executed by a health officer be filed in the office of the employer.

SEC. 72. Such certificate shall state the date and place of birth of the child, if known, and describe the color of the hair and eyes, the height and weight and any distinguishing facial marks of such child, and that, in the opinion of the officer issuing such certificate, such child is upwards of fourteen years of age, and is physically able to perform the work which he intends to do.

SEC. 73. No such certificate shall be granted unless it appears to the satisfaction of such board, department, commissioner or officer that the child applying therefor has regularly attended at a school in which reading, spelling, writing, arithmetic, English grammar and geography are taught, or upon equivalent instruction by a competent teacher elsewhere than at a school, for a period equal to one school year, during the year previous to his arriving at the age of fourteen years, or during the year previous to applying for such certificate, and is able to read and write simple sentences in the English language.

SEC. 74. A child of fourteen years of age, who can read and write simple sentences in the English language, may be employed in a factory during the vacation of the public schools of the city or school district where such child resides * * *

SEC. 76. Each person owning or operating a factory and employing children therein shall keep, or cause to be kept in the office of such factory, a register, in which shall be recorded the name, birth-place, age and place of residence of all children so employed under the age of sixteen years. * * *

SEC. 162. A child under the age of fourteen years shall not be employed in any mercantile establishment, except that a child upwards of twelve years of age may be employed therein during the vacation of the public schools of the city or district where such establishment is situated. No child under the age of sixteen years shall be employed in any mercantile establishment, unless such child shall produce a certificate issued as provided in this article, to be filed in the office of such establishment.

SEC. 165. No such certificate shall be issued unless it appears to the satisfaction of such board, department, commissioner or officer, that the child applying therefor has regularly attended at a school in which reading, spelling, writing, arithmetic, English grammar and geography are taught, or upon equivalent instruction by a competent teacher elsewhere than at a school, for a period equal in length to one school year, during the year previous to his arriving at the age of fourteen years, * * *

SEC. 166. Children of the age of twelve years or more who can read and write simple sentences in the English language may be employed in mercantile establishments during the vacation of the public schools in the city or school district where such children reside, * * *

Acts of 1899. Ch. 375.—SEC. 91. No male child under the age of eighteen years, nor any female, shall be employed in any factory in this state in operating or using any emery, corundum, stone or emery polishing or buffing wheel. * * *

NORTH CAROLINA.¹

Acts of 1897. Ch. 251.—SEC. 7. * * * No boy under twelve years of age shall be allowed to work in any mine, * * *

NORTH DAKOTA.

Constitution. Art. 17.—SEC. 209. The labor of children under twelve years of age shall be prohibited in mines, factories and workshops in this state.

Revised Codes of 1895. Ch. 9.—SEC. 762. No child between eight and fourteen years of age shall be employed in any mine, factory or workshop or mercantile establishment, or, except by his parents or guardian, in any other manner, during the hours when the public schools in the city, village or district are in session, unless the person employing him shall first procure a certificate from the superintendent of schools of the city or village, if one is employed, otherwise from the clerk of the school board or board of education, stating that such child has attended school for the period of twelve weeks during the year, as required by law, * * *

Code of 1899. Ch. 9. Art. 14.—SEC. 759. Every parent, guardian or other person having control of any child between eight and fourteen years of age, shall be required to send such child to a public school in the district, city or village in which he resides at least twelve weeks in each school year, six weeks of which shall be consecutive; * * * provided, that such parent, guardian or other person having control of any child shall be excused from such duty by the school board of the district or the board of education of the city or village, whenever it shall be shown to their satisfaction, subject to appeal as provided by law, that one of the following reasons therefor exists:

1. That such child is taught for the same length of time in a private school, approved by such board; * * *

2. That such child has already acquired the branches of learning taught in the public schools.

¹ Acts of 1903 provide that no child under 12 years of age may be employed in any factory or manufacturing establishment other than oyster canning and packing manufactories; and all parents, or persons standing in relation of parent, upon so hiring their children, shall furnish a written statement of the age of such children.

3. That such child is in such a physical or mental condition (as declared by the county physician if required by the board), as to render such attendance inexpedient or impracticable. If no school is taught the requisite length of time within two and one-half miles of the residence of such child by the nearest route, such attendance will not be enforced * * *

OHIO.

Revised Statutes. Part IV. Penal. Title 1.—SEC. 6984. Whoever takes, receives, hires, employs, uses, exhibits, or in any manner, or under any pretense, sells, apprentices, gives away, lets out, or otherwise disposes of, to any person, any child under the age of fourteen years, for or in the vocation, occupation, service, or purpose of singing, playing on musical instruments, rope or wire walking, dancing, begging, or peddling, or as a gymnast, contortionist, rider, or acrobat, or for or in any obscene, indecent, or immoral purpose, exhibition, or practice, or for or in any business, exhibition, or vocation injurious to the health or dangerous to the life or limbs of such child, or causes, or procures, or encourages, any such child to engage therein, * * * shall be fined * * *

Acts of 1890. (Page 161.)—SEC. 1. No child under the age of sixteen years, shall be employed by any person, firm, or corporation in this state, at employment whereby its life or limb is endangered, or its health is likely to be injured, or its morals may be depraved by such employment.

Acts of 1898. (Page 123.)—SEC. 1.¹ No child under the age of thirteen years shall be employed in any factory, workshop, mercantile or other establishment, directly or indirectly; and no boy under fifteen years of age, and no girl under sixteen years of age, shall be employed at any work performed for wages or other compensation, or in assisting any person employed as a wage-earner, when the public schools in which district such child resides are in session, providing this act shall not apply to females working at household work.

Acts of 1900. (Page 180.)—SEC. 1. No child under fifteen years of age shall be allowed to work in any mine, during the school term of the public schools in the district in which such minor resides, and no child under fourteen years of age shall be employed in any mine during the vacation interim of the public schools in the school district in which such minor resides, and in all cases of minors applying for work the agent of such mine shall see that the provisions of this section are not violated; he shall also keep a record of all minors employed by him, or by any person employed in said mines, giving the name, age, place of birth, parents' name and residence, with character of employment, and he shall demand from such minor proof that he has complied with the requirements of the school laws; * * *

Revised Statutes of 1900.—SEC. 4022-1.² All parents, guardians and other persons who have care of children, shall instruct them, or cause them to be instructed, in reading, spelling, writing, English grammar, geography, and arithmetic. Every parent, guardian or other person having charge of any child between the ages of eight and fourteen years, shall send such child to a public, private or parochial school for the following period: In city districts, in each school year beginning September first, not less than twenty weeks, at least ten weeks of which, commencing within the first four weeks of the school year, shall be consecutive; and in special, village and township districts, not less than sixteen weeks in each school year, eight of which, commencing with the first four weeks

of the school year shall be consecutive, unless the child is excused from such attendance by the superintendent of the public schools, in city or other districts having such superintendent, or by the clerk of the board of education in village, special and township districts not having such superintendent, or by the principal of the private or parochial school, upon a satisfactory showing, either that the bodily or mental condition of the child does not permit of its attendance at school, or that the child is being instructed at home by a person qualified, in the opinion of the superintendent of schools in city or other districts having such superintendent, or the clerk of the board of education in special, village and township districts not having such superintendent, to teach the branches named in this section. * * * All children between the ages of eight and sixteen years, not engaged in some regular employment, shall attend school for the full term the schools of the district in which they reside are in session during the school year, unless excused for the reasons above named.

4022-2.² No child under the age of fourteen years shall be employed by any person, company or corporation during the school term, and while the public schools are in session, unless the parent, guardian or person in care of such child, shall have fully complied with the requirements of section 4022-1 of this act. Every person, company or corporation shall require proof of such compliance before employing any such minor, and shall make a written record of the proof given, * * *

4022-3.² All minors over the age of fourteen and under the age of sixteen years, who can not read and write the English language, shall attend school at least one-half of each day, or attend a public night school, or take regular private instruction from some person qualified, * * * until such minor can obtain a certificate * * * that he or she can read at sight and write legibly simple sentences in the English language. * * *

OKLAHOMA.

Laws for Territories. Acts of 1890-91. Ch. 564.—SEC. 12. No child under twelve years of age shall be employed in the underground workings of any mine * * *

OREGON.

No law operative in 1900 for the employment of children.³

PENNSYLVANIA.⁴

Brightly's Purdon's Digest. 12th Ed., 1894. (Page 1015.)—SEC. 9. Any person having the care, custody or control, lawful or unlawful, for (of) any minor child under the age of eighteen years, who shall use such minor or apprentice, give away, let out, hire or otherwise dispose of such minor to any person, for the purpose of singing, playing on musical instruments, begging, or for any men-

³ General Laws of 1903 provide that no child under 14 years of age shall be employed in any factory, store, workshop, in or about any mine, or in the telegraph, telephone, or public messenger service; that children of said age shall not be employed in any work for wages or other compensation during the hours when public schools are in session; that school attendance shall be compulsory for children under 14 years of age during the whole of the school term, and for children under 15 years of age who are not lawfully employed; that minors under the age of 16 years who can not read and write the English language shall not be employed while a school is maintained in the town or city where such minors reside; and that all persons or corporations employing children under 16 years of age shall keep a register recording the name, age, date of birth, and place of residence of such children, and shall file an affidavit from parents or guardians stating the name, date, and place of birth, and place of school attended by such children.

⁴ By acts of 1901 it is provided that no person, association, agency, or corporation shall employ, use, or have in custody any child under the age of 18 years or shall endeavor to secure any minor child, for the purpose of taking part in any theatrical performance, or athletic exhibition, or of singing, or of playing upon musical instruments, without the consent of parents or guardians of such child; that no minor under 16 years of age shall be allowed to clean machinery while in motion, and that no minor under 14 years of age shall operate or otherwise have the care or custody of an elevator. By the same acts it is required that every parent, guardian, or other person in control of a child between the ages of 8 and 16 years shall send such child to a day school continuously during the entire time such school is in session, except children between the ages of 13 and 16 years who can read and write the English language and are regularly employed.

¹ Amended by acts of 1902, page 598, section 1, raising the age for employment in factories, workshops, mercantile, or other establishments, from 13 to 14 years; reducing the age from 15 and 16 years to 14 years for other employments when the schools are not in session; and requiring persons employing minors under the age of 18 years to keep a register recording the name, birthplace, age, and place of residence of such minors.

² Amended by acts of 1902, page 615, which provide that school attendance shall be for the full school term, which shall in no case be for less than 24 weeks; that children under the age of 14 years, who are employed, shall present an age and schooling certificate, or if between the ages of 14 and 16 years, a satisfactory proof of ability to read and write legibly the English language.

dicant business whatsoever, in the streets, roads or other highways of this commonwealth, and whosoever shall take, receive, hire, employ, use or have in custody any such minor, for the vocation, occupation, calling, service or purpose of singing, playing upon musical instruments or begging, upon the streets, roads or other highways of the commonwealth, or for any mendicant business whatever, shall be guilty * * *

SEC. 10. Any person having the care, custody or control of any minor child under the age of fifteen years, who shall in any manner sell, apprentice, give away or permit such child to sing, dance, act, or in any manner exhibit, in any dance-house whatever, or in any concert-saloon, theatre or place of entertainment, where wines or spirituous or malt liquors are sold or given away, or with which any place for the sale of wines or spirituous or malt liquors is directly or indirectly connected, by any passage-way or entrance, and any proprietor of any dance-house whatever, or any such concert-saloon, theatre or place of entertainment, so employing any such child, shall be guilty * * *

SEC. 11. Any person having the care, custody or control of any minor child under the age of fifteen years, who shall in any manner sell, apprentice, give away or otherwise dispose of such child, and any person who shall take, receive or employ such child for the vocation or occupation of rope or wire-walking, or as an acrobat, gymnast, contortionist or rider, and any person who, having the care, custody or control of any minor child whatsoever, shall sell, apprentice, give away or otherwise dispose of such child, or who shall take, receive or employ such child for any obscene, indecent or illegal exhibition or vocation, or any vocation injurious to the health or dangerous to the life or limb of such child engaged therein, etc., shall be guilty * * *

SEC. 112.¹ (*Page 1342.*) No boy under the age of fourteen (14) years, and no woman or girl of any age, shall be employed or permitted to be in any mine for the purpose of employment therein. Nor shall a boy under the age of twelve years, or a woman or girl of any age, be employed or permitted to be in or about the outside structures or workings of a colliery for the purpose of employment, but it is provided, however, that this prohibition shall not affect the employment of a boy or female of suitable age in an office or in the performance of clerical work at a colliery.

SEC. 306. No boy under the age of twelve years, or any woman or girl of any age, shall be employed or permitted to be in the workings of any bituminous coal mine for the purpose of employment, or for any other purpose; and no boy under the age of sixteen shall be permitted to mine or load coal in any room, entry or other working place unless in company with a person over sixteen years of age * * *

Acts of 1897. Act No. 26.—SEC. 2 (as amended by Act No. 123, Acts of 1897). No child under thirteen years of age shall be employed in any factory, manufacturing or mercantile industry, laundry, workshop, renovating works or printing office within this State. It shall be the duty of every person so employing children to keep a register in which shall be recorded the name, birthplace, age and place of residence, name of parent or guardian, and date when such employment ceases, of every person so employed by him under the age of sixteen years. And it shall be unlawful for any factory, manufacturing or mercantile industry, laundry, workshop, renovating works or printing office, to hire or employ any child under the age of sixteen years, without there is first provided and placed on file an affidavit made by the parent or guardian, stating the age, date and place of birth of said child. If said child have no parent or guardian, then such affidavit shall be made by the child, * * * And after the first of January, one thousand eight hundred and ninety-eight, it shall be unlawful for

any manufacturing establishment, mercantile industry, laundry, renovating works, printing office, mercantile or other industrial establishment to employ any minor who can not read and write in the English language, unless he presents a certificate of having attended during the preceding year, an evening or day school for a period of sixteen weeks. * * *

RHODE ISLAND.

General Laws of 1896. Ch. 64.—SEC. 1.² Every person having under his control a child between the ages of seven and fifteen years shall annually cause such child to regularly attend for at least eighty full school days some public day-school in the town or city in which such child resides; and while such child is not lawfully employed at labor at home or elsewhere said person shall cause such child to attend a public day-school regularly during the days and hours that the public schools are in session in the city, town, or district where such child resides; * * * *provided*, that if the person so charged shall prove, or shall present a certificate, made by or under the direction of the school committee of the city or town wherein he resides, setting forth that the child has attended for the required period of time a private day-school approved by the school committee of the city or town where said school is located, or that the child has been otherwise furnished for a like period of time with the means of education, or has already acquired the elementary branches of learning taught in the public schools, or that his physical or mental condition was such as to render his attendance inexpedient or impracticable, or that the child was destitute of clothing suitable for attending school and that the person in charge of said child was unable to provide such clothing, or that the child has been excused from attending school by the school committee of the city or town where he resides, then such penalty shall not be incurred.

SEC. 5.³ No child between the ages of twelve and fifteen years shall be employed in any manufacturing, mechanical or mercantile establishment, or by any telegraph or telephone company in this state, except during the vacations of the public schools of the city, town or district in which such child resides, unless, during the twelve months next preceding such employment, he shall have attended school as provided for * * *

Ch. 68.—SEC. 1. No child under twelve years of age shall be employed in any factory, manufacturing or mercantile establishment, within this state. It shall be the duty of every person, firm or corporation employing children, to keep a register in which shall be recorded the name, birthplace, age and place of residence of every person employed under the age of sixteen years; * * *

Ch. 115.—SEC. 4. Every person having the custody or control of any child under the age of sixteen years, who shall exhibit, use or employ, or shall in any manner or under any pretense sell, apprentice or give away, let out or otherwise dispose of any such child to any person in or for the vocation, occupation, service or purpose of rope or wire walking, begging or as a gymnast, contortionist, equestrian-performer or acrobat, in any place whatsoever; or for or in any obscene, indecent or immoral purpose, exhibition or practice whatsoever; or for or in any business, exhibition or vocation injurious to the health or morals or dangerous to the life or limb of such child, or who shall cause, procure or encourage any such child to engage therein, shall for every such offense be imprisoned * * *

² Amended by laws of 1902, chapter 1009, section 1, requiring school attendance for the entire school term for all children between 7 and 15 years of age, who have not completed the elementary studies taught in the first eight years of school attendance, exclusive of kindergarten instruction, but excepting children 13 years of age and over who are lawfully employed, and also children over 12 years of age who are excused in order to be employed when their wages are necessary for the support of the family.

³ Amended by acts of 1902, chapter 1009, section 5, and raising the age for any employment from 12 to 13 years, and requiring any minor under the age of 15 years who is employed to present a certificate stating name, place and date of birth, and the name and residence of the person having control of such minor.

¹ Amended by laws of 1903, act number 266, section 1, in which the age limit for employment in mines is raised from 14 to 16 years, and in the outside structures or workings of a colliery, from 12 to 14 years.

SOUTH CAROLINA.

No law operative in 1900 for the employment of children.¹

SOUTH DAKOTA.²

Acts of 1890. Ch. 112.—SEC. 11. All corporations or individuals working mines in South Dakota who shall employ, or permit to be employed, in such mines any children under fourteen years of age shall be deemed guilty * * *

Acts of 1897. Ch. 57. (Page 159.)—SEC. 3. No child between eight and fourteen years of age shall be employed in any mine, factory or workshop or mercantile establishment, or, except by his parent or guardian, in any other manner during the hours when the public schools in the city, town, village or district, are in session, unless the person, firm or corporation employing him shall first procure a certificate from the superintendent of the schools of the city, town or village, if one be employed, otherwise from the clerk of the school board or board of education, stating that such child has attended school for the period of twelve weeks during the year, as required by law, or has been excused from attendance * * *

TENNESSEE.

Acts of 1893. Ch. 159.—SEC. 1.³ It shall be unlawful for any proprietor, foreman, owner, or other person to employ any child less than twelve (12) years of age in any workshop, mill, factory, or mine in this state.

TEXAS.

No law operative in 1900 for the employment of children.⁴

UTAH.

Acts of 1896. Ch. 28.—SEC. 1. It shall be unlawful for any person, firm or corporation to employ any child under fourteen years of age, or any female, to work in any mine or smelter in the State of Utah.

Laws of 1897. Ch. 14. (Page 161.)—SEC. 1. Every parent, guardian, or other person having control of any child between eight and fourteen years of age, shall be required to send such child to a public, district, or private school in the district in which he resides, at least twenty weeks in each school year, ten weeks of which shall be consecutive; *Provided*, that in each year such parent, guardian, or other person having control of any child shall be excused from such duty by the school board of the district or the board of education of the city, as the case may be, whenever it shall be shown to their satisfaction that one of the following reasons exists:

1st. That such child is taught at home in the branches prescribed by law for the same length of time as children are required by law to be taught in the district school.

2nd. That such child has already acquired the branches of learning taught in the district schools.

3rd. That such child is in such physical or mental condition (which may be certified by a competent physician if required by the board) as to render such attendance inexpedient or impracticable.

¹ Acts of 1903 provide (with some exceptions) that from the 1st day of May, 1903, no child under the age of 10 years shall be employed in any factory, mine, or textile manufacturing establishment; and after the 1st day of May, 1904, no child under the age of 11 years, and after the 1st day of May, 1905, no child under the age of 12 years, shall be so employed. Any child whose parents or guardian shall furnish a certificate stating that such child has attended school not less than 4 months of the current school year and can read and write may be employed in textile establishments during the months of June, July, and August; and in the employment of any child under the age of 12 years in any factory, mine, or textile manufacturing establishment an affidavit stating the age of such child shall be required and placed on file.

² The Code of South Dakota, 1903, provides, in general, that every person having control of a child between the ages of 8 and 14 years shall send such child to some public day school, annually, for a period of at least 12 weeks, at least 8 weeks of which shall be consecutive.

³ Amended by acts of 1901, chapter 34, section 1, raising the age limit for employment in workshops, factories, or mines from 12 to 11 years.

⁴ Acts of 1903 provide, in general, that no child under the age of 12 years shall be employed to labor in or about any mill, factory, manufacturing establishment, or other establishment using machinery; nor shall any child between the ages of 12 and 14 years who can not read and write the English language be so employed; and no child under 16 years of age shall be employed to labor in or about any mine, distillery, or brewery.

cable. If no such school is taught the requisite length of time within two and one-half miles of the residence of such child by the nearest road, such attendance shall not be enforced.

4th. That such child is attending some public, district, or private school.

5th. That the services of such child are necessary to the support of a mother or an invalid father.

VERMONT.⁵

Revised Laws of 1880. Ch. 202.—SEC. 4320. An owner, agent, superintendent or overseer of a manufacturing or mechanical establishment who knowingly employs or permits to be employed in such establishment a child under ten years of age, or employs a child under fifteen years of age more than ten hours in one day, and a parent or guardian who allows or consents to such employment, shall be fined * * *

Vermont Statutes of 1894.—SEC. 711 (*as amended by Public Acts, 1896. No. 19*). A person having the control of a child between the ages of eight and fifteen years, shall cause such child to attend a public school at least twenty-eight weeks in a year, and such attendance shall be continuous, beginning with the school year, unless the child is mentally or physically unable to attend, has already acquired the branches required by law to be taught in the public school, or is otherwise being furnished with the same education.

SEC. 712. No child under fifteen years of age shall be employed in a mill or factory unless such child has attended public school twenty-six weeks during the current year, and deposited with the owner or overseer of such mill or factory a certificate of such attendance at school, signed by the teacher thereof.

SEC. 713. A child under fourteen who can not read and write shall not be employed during the sessions of the school such child should attend.

VIRGINIA.⁶

Supplement to the Code, 1898. Ch. clxxxv.—SEC. 3795a. 2. It shall be unlawful for any person having the care, custody, or control of any child under the age of fourteen years to sell, apprentice, give away, let, or hire out, or otherwise dispose of such child to any person in or for the vocation or occupation, service, or purpose of rope or wire-walking, begging, or peddling, or as a gymnast, contortionist, rider, or acrobat in any place whatsoever, or for any obscene, indecent, or immoral purpose, exhibition, or practice whatsoever, or for or in any business, exhibition, or vocation injurious to the health or morals or dangerous to the life or limb of such child, or cause, procure, encourage, or permit any such child to engage therein.

3. It shall also be unlawful for any person to take, receive, hire, employ, use, exhibit, or have in custody any child under the age aforesaid for any of the purposes prohibited in the second section of this act.

WASHINGTON.

Hill's Annotated Statutes and Codes of 1891. Title xxxv.—SEC. 2227. No boy under the age of fourteen years, and no female of any age, shall be employed or permitted to be in any mine for the purpose of employment therein, nor shall a boy under the age of twelve years be employed or permitted to be in or about the outside structures or workings of a colliery for the purpose of employment; *provided, however*, that this prohibition shall not affect the employment of a boy of suitable age in an office or in the performance of clerical work at a colliery. * * *

Codes and Statutes of 1897. Title xv.—SEC. 2341. All parents, guardians and other persons in this state having or who may hereafter have immediate custody of any child or children between

⁵ Laws of 1902 prohibit the employment in barrooms of any male person under the age of 21 years.

⁶ Acts of 1902-3 provide that no child under 12 years of age shall be employed in any manufacturing, mechanical, or mining operations.

the ages of eight and fifteen years, shall send the same to school at least three months in each year.

Laws of 1899. Ch. cxi. (Page 280.)—SEC. 1 Every person residing in a city containing ten thousand or more inhabitants, having under his control a child between the ages of seven and fifteen years, shall annually cause such child to regularly attend some public day school at least six full school months, and for every neglect of such duty the person so offending shall be fined * * * *Provided*, If the person so charged shall prove, or shall present a certificate made by or under the direction of the board of directors of the city wherein he resides, setting forth that the child has attended for the required time a private day school approved by the board of directors of the city wherein such school is located, or that the child has otherwise been furnished for a like period of time with the means of education, or has already attained a reasonable proficiency in the common school branches of the first eight years as outlined in the course of study for the common schools of the State of Washington, or that his physical or mental condition was such as to render his attendance inexpedient or impracticable, or that the child, for satisfactory reasons, has been excused from attending school by the board of directors of the city in which he resides, then such penalty shall not be incurred.

SEC. 5. No child under the age of fifteen years shall be employed in any manufacturing, mechanical or mercantile establishment, or by any telegraph or telephone company in this state, except during the vacations of the public schools of the city in which such child resides, unless during the twelve months next preceding such employment, he shall have attended school as provided for in section one of this act, or has already attained a reasonable proficiency in the common school branches for the first eight years as outlined in the course of study for common schools of the State of Washington, or shall have been excused by the board of directors of the city in which such child resides; nor shall such employment continue unless such child shall attend school each year, or until he shall have acquired the elementary branches of learning taught in the public schools as above provided.

SEC. 6. No child under the age of fifteen years shall be so employed who does not present a certificate made by or under the direction of the board of directors of the district in which such child resides, of his compliance with the requirements of section five of this act; and said certificate shall also give the place and date of birth of such child as nearly accurate as may be; * * *

WEST VIRGINIA.¹

Code. Ed. of 1891. Appudic.—SEC. 13. No boy under twelve years of age, nor female person of any age, shall be permitted to work in any coal mine, * * *

SEC. 1. (*Page 998.*) No minor under twelve years of age shall be employed in any mine or in any factory, workshop, manufactory or establishment where goods or wares are manufactured; * * *

Code of West Virginia, 1899. Ch. 45.—SEC. 10a.² Every person having under his control a child or children between the ages of eight and fourteen years shall cause such child or children to attend some public school in the city, independent district, or district in which he resides, and such attendance shall continue for at least sixteen weeks of the school year, provided the school be in session as many as sixteen weeks, * * * *Provided*, that if such child or children have attended for a like period of time a private day

¹ Acts of 1901 provide, in general, that no person in control of a child under the age of 15 years, shall in any manner dispose of such child for the vocation or occupation of rope or wire walking, or as an acrobat, gymnast, contortionist, or rider, or permit such child to sing, dance, or act, or in any manner exhibit such child in any dance house, concert saloon, theater, or place of entertainment where wines or spirituous or malt liquors are sold or given away; that no person in control of any minor child whatever, shall dispose of such child for any obscene, indecent, or illegal exhibition or vocation, or for any vocation injurious to the health, or dangerous to the life or limb of such child; and that no person having control of any child under the age of 18 years shall dispose of such child for the purpose of singing, playing on musical instruments, begging, or for any mendicant business whatsoever in the streets, roads, or other highways.

² Amended by laws of 1903, chapter 26, page 106, and raising the period of school attendance from sixteen weeks to twenty weeks yearly, beginning with the beginning of the school term.

school, or if such child or children have been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or have already acquired such branches, or if his physical or mental condition is such as to render such attendance inexpedient, or impracticable, such penalty shall not be incurred; *Provided, further*, That in case there be no public school in session within two miles by the nearest traveled road of any person in the school district, he shall not be liable to the provisions of the act. * * *

WISCONSIN.

Annotated Statutes of 1899. Ch. clxxvi.—SEC. 4587a. 1. Any person having the care, custody, or control of any child under the age of fourteen years, who shall exhibit, use, or employ, or who shall in any manner, or under any pretense, sell, apprentice, give away, let out, or otherwise dispose of any such child to any person, in any place whatsoever, for any obscene, indecent, or immoral purposes, exhibition, or practice whatsoever; or for any business, exhibition, or vocation injurious to the health or dangerous to the life or limb of such child; or who shall cause, procure, or encourage any such child to engage therein, shall be deemed guilty * * *

2. Any person who shall take, receive, hire, employ, use, exhibit, or have in custody any child under the age, and for any of the purposes mentioned in the preceding section, shall be deemed guilty * * *

Revised Statutes of 1898.—SEC. 439a.³ Any person having under his control any child between the ages of seven and thirteen years shall cause such child to attend some public or private school for at least twelve weeks in each school year; provided, that this section shall not apply to any child who is being otherwise instructed in the elementary branches of learning for a like period, or who has already acquired such knowledge, or whose mental or physical condition is such as to render his attendance at school and application to study inexpedient or impracticable, or who lives more than two miles from any school by the nearest traveled road, or who is excused for sufficient reasons by any Court of record. * * *

Acts of 1899. Ch. 274.—SEC. 1.⁴ No child under fourteen years of age shall be employed at any time in any factory or workshop or in or about any mine. No such child shall be employed in any mercantile establishment, laundry or in the telegraph, telephone or public messenger service, except during the vacation of the public schools in the town, district or city where such child is employed.

SEC. 2.⁴ It shall be the duty of every person, firm or corporation, agent or manager of any firm or corporation employing minors in any mercantile establishment, store, office, laundry, manufacturing establishment, factory or workshop or in the telegraph, telephone or public messenger service within this state to keep a register in said mercantile establishment, etc., in which register shall be recorded the name, age, date of birth, place of residence of every child employed or permitted or suffered to work therein under the age of sixteen years; and it shall be unlawful for any person, firm or corporation, agent or manager of any firm or corporation to hire or employ or to permit or suffer to work in any mercantile establishment, store, office, laundry, manufacturing establishment, factory or workshop, telegraph, telephone or public messenger service any child under the age of sixteen years unless there is first provided and placed on file in such mercantile establishment, etc., an affidavit made by the parent stating the name, date and place of birth and name and place of the school attended of such child. If such child have no parent or guardian, then such affidavit shall be made by the child, * * *

³ Amended by acts of 1903, chapter 189, section 1, in which the age period is 7 to 14 years instead of 7 to 13 years, and including children between the ages of 14 and 16 years not lawfully employed; instead of a minimum period of 12 weeks, the attendance shall be for the time the school is in session, which time shall be, in cities, not less than 8 calendar months, and in towns, villages and districts, not less than 5 calendar months.

⁴ Amended by laws of 1901, chapter 182, sections 1 and 2, by the addition of bowling alley, barroom, and beer garden to the establishments named.

SEC. 7. No firm, person or corporation shall employ or permit any child under sixteen years of age to have the care, custody, management or operation of any elevator.

Acts of 1899. Ch. 330.—SEC. 3. No license shall be granted for a theatrical exhibition or public show in which children under fifteen years of age are employed as acrobats, contortionists or in any feats of gymnastics or equestrianism, when in the opinion of the board of officers authorized to grant licenses such children are employed in such manner as to corrupt their morals or impair their physical health.

WYOMING.¹

Revised Statutes of 1899. Title 16. Ch. 13.—SEC. 2289. It shall be unlawful for any person having the care, custody or control of any child under the age of fourteen years to exhibit, use or employ, or in any manner, or under any pretense, sell, apprentice, give away, let out or otherwise dispose of any such child to any person, in or for the vocation or occupation, service or purpose of singing, playing on musical instruments, dancing, rope or wire walking, begging or peddling, or as a gymnast, contortionist, rider or acrobat, in any place whatsoever; or as an actor or performer in any concert

hall or room where intoxicating liquors are sold or given away, or in any variety theater, or for any illegal, obscene, indecent or immoral purpose, exhibition or practice whatsoever; or for or in any business exhibition or vocation, injurious to the health or dangerous to the life or limb of such child, or cause, procure or encourage such child to engage therein. Nothing in this section contained shall apply to or affect the employment or use of any child as a singer or musician in any church, school or academy, or at any respectable entertainment, or the teaching or learning the science or practice of music. * * *

SEC. 2295. Any person who shall take, receive, hire or employ, either in his or her own behalf, or as the agent, servant or employee of any person, persons, association of persons, copartnership, company, or corporation any boy or male child under the age of fourteen years, or any woman or girl of any age, or shall allow or permit the said persons to be in or about any coal, iron or other dangerous mine, or underground works or dangerous place whatsoever in this state, for the purpose of employment therein or thereabouts, shall be fined * * * *Provided, however,* That the provisions of this section shall not affect or apply to the employment of a boy or female of suitable age in an office or in the performance of clerical work at such mine, colliery or place.

¹ Laws of 1903 prohibit the employment of persons under the age of 18 years as hoisting engineers.

GENERAL TABLES.

UNITED STATES.

(Tables 1 to 30.)

EXPLANATORY NOTES.

The general tables for the United States present figures for the entire area of enumeration at the Twelfth Census, comprising the states and territories (including District of Columbia and Indian Territory) constituting what is termed continental United States, the outlying territories of Alaska and Hawaii, and persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

The general tables for the United States present, first (Table 1), the number of persons 10 years of age and over, distinguished by sex, engaged in each of 303 specified occupations; and, second (Tables 2 to 30), the number of persons 10 years of age and over, distinguished by sex, engaged in each of 140 groups of occupations, classified successively by general nativity, color, age periods, conjugal condition, parentage, and months unemployed. The tables are as follows:

- Table 1.—Total persons 10 years of age and over engaged in each of 303 specified occupations, classified by sex : 1900.
- Table 2.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex, general nativity, and color : 1900.
- Table 3.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations, distinguished as negro, Chinese, Japanese, and Indian, classified by sex : 1900.
- Table 4.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods : 1900.
- Table 5.—Native white persons of native parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods : 1900.
- Table 6.—Native white persons of foreign parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods : 1900.
- Table 7.—Foreign white persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods : 1900.
- Table 8.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods : 1900.
- Table 9.—Negro persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and age periods : 1900.
- Table 10.—Total persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age : 1900.
- Table 11.—Native white persons of native parentage 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age : 1900.
- Table 12.—Native white persons of foreign parentage 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age : 1900.
- Table 13.—Foreign white persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age : 1900.
- Table 14.—Colored persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age : 1900.
- Table 15.—Negro persons 10 to 15 years of age engaged in each of 140 groups of occupations, classified by sex and year of age : 1900.
- Table 16.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition : 1900.
- Table 17.—Native white persons of native parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition : 1900.
- Table 18.—Native white persons of foreign parentage 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition : 1900.
- Table 19.—Foreign white persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition : 1900.
- Table 20.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition : 1900.
- Table 21.—Negro persons 10 years of age and over engaged in each of 140 groups of occupations, classified by sex and conjugal condition : 1900.
- Table 22.—Total persons 10 years of age and over engaged in each of 140 groups of occupations, distributed according to parentage : 1900.
- Table 23.—Total males 10 years of age and over engaged in each of 140 groups of occupations, distributed according to parentage : 1900.
- Table 24.—Total females 10 years of age and over engaged in each of 140 groups of occupations, distributed according to parentage : 1900.
- Table 25.—Total persons 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed : 1900.

Table 26.—Native white persons of native parentage 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900.

Table 27.—Native white persons of foreign parentage 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900.

Table 28.—Foreign white persons 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900.

Table 29.—Colored persons 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900.

Table 30.—Negro persons 10 years of age and over engaged in each of 140 groups of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900.

A statement concerning the classification of occupations in 1900 as compared with former censuses is given in the explanatory text (Chapter I) preceding the general tables.

The terms used in certain of the general tables for the United States are explained as follows:

COLORED.—Persons of negro descent, Chinese, Japanese, and Indians. (See Tables 2, 8, 14, 20, and 29.)

NEGRO.—All persons of negro descent. (See Tables 3, 9, 15, 21, and 30.)

INDIAN.—All Indians (including the Eskimos of Alaska), whether living in tribal relations or among the general population. (See Table 3.)

PARENTAGE:

Foreign parentage (or parents).—All persons, either of native or foreign birth, having either one or both parents foreign born. (See Tables 2, 6, 12, 18, 22, 23, 24, and 27.)

Mixed foreign parentage.—All persons, either of native or foreign birth, having both parents foreign born but of different nationalities, as father born in Ireland and mother born in England, father born in Germany and mother born in Austria, etc. (See Tables 22, 23, and 24.)

Native parentage (or parents).—All persons, either of native or foreign birth, having both parents native born, or one parent native born and one parent for whom the birthplace is unknown, or both parents for whom the birthplace is unknown. Persons of this last description are sometimes referred to by the term "unknown parentage," but they are not of sufficient importance numerically to justify separate classification and are accordingly included with the class of native parentage. (See Tables 2, 5, 11, 17, 22, 23, 24, and 26.)

UNEMPLOYED.—Persons ordinarily engaged in gainful labor but not employed during some portion of the census year (June 1, 1899 to May 31, 1900). (See Tables 25 to 30.) The statistics are presented in connection with the occupations upon which persons so reported depend chiefly for support or in which they are usually engaged for the larger part of the time, in order to show to what extent the different classes of productive workers were unemployed during any portion of the census year, either at their customary occupation or in any other form of remunerative work, as more fully explained in the analytical text preceding the general tables.

GENERAL TABLES—THE UNITED STATES.

7

TABLE 1.—TOTAL PERSONS 10 YEARS OF AGE AND OVER ENGAGED IN EACH OF 303 SPECIFIED OCCUPATIONS, CLASSIFIED BY SEX: 1900.

[The figures presented in this table relate to the entire area of enumeration at the Twelfth Census. See explanatory note on page 5.]

OCCUPATIONS.	Total.	Males.	Females.	OCCUPATIONS.	Total.	Males.	Females.
Population 10 years of age and over	58,224,600	29,928,804	28,295,796	Domestic and personal service—Cont'd.			
All occupations	29,287,070	23,957,778	5,329,292	Launderers and laundresses	387,013	51,302	335,711

Chemists, assayers, and metallurgists	8,887	8,639	248	Foremen and overseers (not specified)	16,025	14,623	1,402
Musicians and teachers of music	92,264	39,887	52,377	Hostlers	65,381	65,302	79
Officials (government)	90,290	82,164	8,126	Hucksters and peddlers	76,872	73,935	2,937
Officials (national government)	40,595	34,159	6,436	Livery stable keepers	33,680	33,490	190
Officials (state government)	4,345	4,070	275	Merchants and dealers (except wholesale)	792,887	758,755	34,132
Officials (county government)	22,777	22,054	723	Boots and shoes	15,239	14,812	427
Officials (city or town government)	22,573	21,881	692	Cigars and tobacco	15,367	14,273	1,094
Physicians and surgeons	132,225	124,826	7,399	Clothing and men's furnishings	18,097	17,805	292
Teachers and professors in colleges, etc.	446,797	118,748	328,049	Coal and wood	20,866	20,606	260
Teachers	439,522	111,936	327,586	Drugs and medicines	57,346	56,168	1,178
Professors in colleges and universities	7,275	6,812	463	Dry goods, fancy goods, and notions	45,840	41,487	4,353
Other professional service	13,904	11,558	2,346	General store	33,031	32,089	942
Veterinary surgeons	8,190	8,176	14	Groceries	156,557	146,887	9,670
Not specified	5,714	3,382	2,332	Liquors and wines	13,119	12,928	191
Domestic and personal service	5,693,778	3,594,613	2,099,165	Lumber	16,774	16,692	82
Barbers and hairdressers	131,383	125,801	5,582	Produce and provisions	34,194	33,525	669
Bartenders	88,937	88,497	440	Not specified	366,457	351,483	14,974
Boarding and lodging house keepers	71,371	11,860	59,511	Merchants and dealers (wholesale)	42,343	42,082	261
Hotel keepers	54,931	46,886	8,045	Messengers and errand and office boys	71,695	65,032	6,663
Housekeepers and stewards ²	155,524	8,421	147,103	Bundle and cash boys	10,508	6,116	4,392
Janitors and sextons	56,620	48,585	8,035	Messengers	44,460	43,159	1,301
Janitors	51,226	43,282	7,944	Office boys	16,727	15,757	970
Sextons	5,394	5,303	91	Officials of banks and companies	74,246	72,975	1,271
Laborers (not specified) ¹	2,640,420	2,516,263	124,157	Bank officials and cashiers	14,295	14,024	271
Elevator tenders	12,691	12,661	30	Officials (insurance and trust companies, etc.)	5,339	5,227	112
Laborers (coalyard)	9,373	9,361	12	Officials (trade companies)	20,479	20,002	477
Laborers (general)	2,588,283	2,464,207	124,076	Officials (transportation companies)	34,133	33,722	411
Longshoremen	20,934	20,916	18	Packers and shippers	59,769	39,781	19,988
Stevedores	9,139	9,118	21	Porters and helpers (in stores, etc.)	54,274	53,708	566
				Salesmen and saleswomen	611,787	462,531	149,256

¹In agricultural districts agricultural laborers and, similarly, in manufacturing districts unskilled workmen are often reported simply as "laborers."

²Includes paid housekeepers in private families, hotels, etc., matrons in public and private institutions, and stewards and stewardesses.

³Sailors at sea are liable to be omitted unless they are actual members of families which are enumerated.

⁴Includes all persons so occupied, irrespective of where they are employed.

Quarrymen.....	34,598	34,535	63				

¹ Includes all persons so occupied, irrespective of where they are employed.² In agricultural districts agricultural laborers and, similarly, in manufacturing districts unskilled workmen are often reported simply as "laborers."³ Frequently returned as "sailors." In many cases where the avocation is followed for only a portion of the year they are reported under some other branch of industry.⁴ Includes employees of foundries, furnaces, and rolling mills. See "metals and metal products other than iron and steel."⁵ Molders are classified under "iron and steel workers," "brassworkers," and "other metal workers."⁶ Separated, as far as possible, according to kind of work done, as metal work, woodwork, etc.

STATISTICS OF OCCUPATIONS.

TABLE 2.—TOTAL PERSONS 10 YEARS OF AGE AND OVER ENGAGED IN EACH OF 140 GROUPS OF

OCCUPATIONS.	AGGREGATE.			NATIVE BORN.			FOREIGN BORN.		
	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.
Manufacturing and mechanical pursuits—Con.									
<i>Chemicals and allied products.</i>									
79 Oil well and oil works employees	24,626	24,573	53	22,087	21,993	44	2,589	2,580	9
80 Other chemical workers	14,723	12,035	2,688	9,217	6,918	2,299	5,506	5,117	389
<i>Clay, glass, and stone products.</i>									
81 Brick and tile makers, etc.	49,934	49,456	478	34,932	34,506	426	15,002	14,950	52
82 Glassworkers	49,999	47,378	2,621	38,881	36,597	2,284	11,118	10,781	337
83 Marble and stone cutters	54,525	54,382	143	30,172	30,083	89	24,353	24,299	54
84 Potters	16,140	13,200	2,940	12,171	9,686	2,485	3,969	3,514	455
<i>Fishing and mining.</i>									
85 Fishermen and oystermen	74,573	72,768	1,805	58,406	56,668	1,738	16,167	16,100	67
86 Miners and quarrymen	570,535	569,541	994	317,581	316,992	589	252,954	252,549	405
<i>Food and kindred products.</i>									
87 Bakers	79,407	75,061	4,346	35,789	32,575	3,214	43,618	42,486	1,132
88 Butchers	113,449	113,071	378	73,211	73,009	202	40,238	40,062	176
89 Butter and cheese makers	19,261	18,613	648	14,590	14,108	482	4,671	4,505	166
90 Confectioners	31,242	22,023	9,219	21,118	14,077	7,041	10,124	7,946	2,178
91 Millers	40,576	40,390	186	34,567	34,399	168	6,009	5,991	18
92 Other food preparers	32,442	27,269	5,173	17,212	13,173	4,039	15,230	14,096	1,134
<i>Iron and steel and their products.</i>									
93 Blacksmiths	227,076	226,880	196	163,933	163,781	152	63,143	63,099	44
94 Iron and steel workers	290,724	287,427	3,297	186,700	184,168	2,532	104,024	103,259	765
95 Machinists	283,432	282,861	571	204,944	204,519	425	78,488	78,342	146
96 Steam boiler makers	33,087	33,079	8	23,301	23,293	8	9,786	9,786	0
97 Stove, furnace, and grate makers	12,473	12,430	43	9,469	9,434	35	3,004	2,996	8
98 Tool and cutlery makers	28,122	27,376	746	19,740	19,121	619	8,382	8,255	127
99 Wheelwrights	13,539	13,529	10	10,131	10,123	8	3,408	3,406	2
100 Wireworkers	18,487	16,701	1,786	9,801	8,372	1,429	8,686	8,329	357
<i>Leather and its finished products.</i>									
101 Boot and shoe makers and repairers	209,047	169,537	39,510	133,283	99,366	33,917	75,764	70,171	5,593
102 Harness and saddle makers and repairers	40,193	39,598	595	29,851	29,334	517	10,342	10,264	78
103 Leather curriers and tanners	42,684	40,925	1,759	22,746	21,370	1,376	19,938	19,555	383
104 Trunk and leather-case makers, etc.	7,051	6,472	1,579	4,777	3,498	1,279	2,274	1,974	300
<i>Liquors and beverages.</i>									
105 Bottlers and soda water makers, etc.	10,546	9,752	794	6,897	6,244	653	3,649	3,508	141
106 Brewers and maltsters	20,984	20,709	275	5,937	5,825	112	15,047	14,884	163
107 Distillers and rectifiers	3,145	3,116	30	2,519	2,490	29	626	625	1
<i>Lumber and its remanufactures.</i>									
108 Cabinetmakers	35,641	35,574	67	15,492	15,442	50	20,149	20,132	17
109 Coopers	37,226	37,113	113	25,737	25,646	91	11,489	11,467	22
110 Saw and planing mill employees	161,687	161,314	373	128,934	128,696	339	32,753	32,719	34
111 Other woodworkers	112,011	104,982	7,029	78,571	72,436	6,135	33,440	32,496	944
<i>Metals and metal products other than iron and steel.</i>									
112 Brassworkers	26,760	25,870	890	16,831	16,209	622	9,929	9,661	268
113 Clock and watch makers and repairers	24,188	19,373	4,815	16,599	12,751	3,848	7,589	6,622	967
114 Gold and silver workers	26,146	19,766	6,380	18,020	12,895	5,125	8,126	6,871	1,255
115 Tin plate and tinware makers	70,613	68,838	1,775	53,039	51,650	1,489	17,574	17,288	286
116 Other metal workers	56,628	54,308	2,320	33,650	31,910	1,740	22,978	22,398	580
<i>Paper and printing.</i>									
117 Bookbinders	30,286	14,651	15,635	24,372	10,466	13,906	5,914	4,185	1,729
118 Boxmakers (paper)	21,098	3,796	17,302	17,576	2,787	14,789	3,522	1,009	2,518
119 Engravers	11,156	10,703	453	8,227	7,817	410	2,929	2,886	43
120 Paper and pulp mill operatives	36,329	26,905	9,424	25,056	18,016	7,040	11,273	8,889	2,384
121 Printers, lithographers, and pressmen	155,333	139,344	15,989	131,966	117,137	14,829	23,367	22,207	1,160
<i>Textiles.</i>									
122 Bleachery and dye works operatives	22,289	20,503	1,786	10,868	9,629	1,239	11,421	10,874	547
123 Carpet factory operatives	19,372	10,371	9,001	12,106	5,749	6,357	7,266	4,622	2,644
124 Cotton mill operatives	246,391	125,788	120,603	152,126	77,552	74,574	94,265	48,236	46,029
125 Hosiery and knitting mill operatives	47,120	12,630	34,490	37,994	9,696	28,298	9,126	2,934	6,192
126 Silk mill operatives	54,460	22,023	32,437	36,629	11,635	24,994	17,831	10,388	7,443
127 Woolen mill operatives	73,196	42,566	30,630	45,038	24,238	20,800	28,158	18,328	9,830
128 Other textile mill operatives	104,619	53,437	51,182	64,298	28,940	35,358	40,321	24,497	15,824
129 Dressmakers	347,076	2,128	344,948	288,767	994	287,773	58,309	1,134	57,175
130 Hat and cap makers	22,733	15,110	7,623	13,359	7,491	5,868	9,374	7,619	1,755
131 Milliners	87,881	1,739	86,142	77,889	1,133	76,756	9,992	606	9,386
132 Seamstresses	151,379	4,837	146,542	120,623	1,611	119,012	30,756	3,226	27,530
133 Shirt, collar, and cuff makers	39,431	30,941	8,490	31,231	5,434	25,797	8,201	3,057	5,144
134 Tailors and tailoresses	230,277	161,299	68,978	80,655	38,156	42,499	149,622	123,143	26,479
135 Other textile workers	29,612	8,878	20,734	21,164	4,632	16,532	8,448	4,246	4,202
<i>Miscellaneous industries.</i>									
136 Broom and brush makers	10,222	8,644	1,578	7,765	6,503	1,262	2,457	2,141	316
137 Charcoal, coke, and lime burners	14,464	14,433	31	7,985	7,966	19	6,479	6,467	12
138 Engineers and firemen (not locomotive)	224,546	224,369	177	166,101	165,952	149	58,445	58,417	28
139 Glovemakers	12,276	4,603	7,673	9,862	3,198	6,664	2,414	1,305	1,109
140 Manufacturers and officials, etc.	243,890	240,525	3,365	182,871	180,272	2,599	61,019	60,253	766
141 Model and pattern makers	15,083	14,879	204	10,821	10,654	167	4,262	4,225	37
142 Photographers	27,029	23,442	3,587	22,422	19,193	3,229	4,607	4,249	358
143 Rubber factory operatives	21,866	14,992	6,874	13,649	8,528	5,121	8,217	5,964	2,253
144 Tobacco and cigar factory operatives	131,464	47,966	43,498	90,238	57,751	32,487	41,226	30,215	11,011
145 Upholsterers	30,839	28,681	2,158	22,443	20,606	1,837	8,396	8,075	321
146 Other miscellaneous industries	471,800	380,026	91,774	336,863	264,672	72,191	134,937	116,054	18,883

TABLE 18.—NATIVE WHITE PERSONS OF FOREIGN PARENTAGE¹ 10 YEARS OF AGE AND OVER ENGAGED IN EACH OF 140 GROUPS OF OCCUPATIONS, CLASSIFIED BY SEX AND CONJUGAL CONDITION: 1900—Continued.

OCCUPATIONS.	SINGLE AND UNKNOWN.			MARRIED.			WIDOWED.			DIVORCED.		
	Total.	Males.	Fe- males.	Total.	Males.	Fe- males.	Total.	Males.	Fe- males.	Total.	Males.	Fe- males.
Manufacturing and mechanical pur- suits—Continued.												
<i>Chemicals and allied products.</i>												
Oil well and oil works employees.....	1,482	1,477	5	2,254	2,253	1	91	89	2	9	9
Other chemical workers.....	2,741	1,473	1,268	972	946	26	64	38	26	5	4	1
<i>Clay, glass, and stone products.</i>												
Brick and tile makers, etc.....	4,706	4,612	94	3,081	3,075	6	172	169	3	16	16
Glassworkers.....	8,975	8,136	839	5,569	5,548	21	224	210	14	24	22	2
Marble and stone cutters.....	6,022	5,989	33	6,329	6,325	4	387	384	3	39	39
Potters.....	2,738	1,866	872	1,513	1,476	37	86	60	26	11	9	2
<i>Fishing and mining.</i>												
Fishermen and oystermen.....	3,313	3,308	5	2,608	2,597	11	288	287	1	34	34
Miners and quarrymen.....	59,756	59,634	122	34,430	34,383	47	1,936	1,928	8	289	289
<i>Food and kindred products.</i>												
Bakers.....	10,287	9,134	1,153	6,597	6,409	188	479	275	204	56	36	20
Butchers.....	15,733	15,655	78	16,293	16,268	25	642	624	18	106	106
Butter and cheese makers.....	2,511	2,384	127	2,333	2,300	33	64	46	18	11	11
Confectioners.....	6,746	3,089	3,657	2,814	2,574	240	430	132	298	42	20	22
Millers.....	1,999	1,969	40	3,872	3,866	6	164	163	1	18	18
Other food preparers.....	5,029	3,254	1,775	1,893	1,781	112	160	89	71	23	11	12
<i>Iron and steel and their products.</i>												
Blacksmiths.....	18,978	18,949	29	26,711	26,696	15	1,399	1,395	4	163	163
Iron and steel workers.....	43,335	41,856	1,479	34,027	33,971	56	1,692	1,669	23	171	169	2
Machinists.....	47,545	47,383	162	36,571	36,541	30	1,636	1,625	11	149	149
Steam boiler makers.....	6,012	6,011	1	5,799	5,798	1	280	280	23	23
Stove, furnace, and grate makers.....	2,374	2,354	20	2,308	2,305	3	87	86	1	11	11
Tool and cutlery makers.....	4,076	3,768	308	3,365	3,350	15	149	142	7	23	22	1
Wheelwrights.....	934	934	1,285	1,285	91	91	7	7
Wireworkers.....	3,775	2,877	898	1,620	1,596	24	68	51	17	4	2	2
<i>Leather and its finished products.</i>												
Boot and shoe makers and repairers.....	37,798	21,390	16,408	14,825	13,838	987	1,373	903	470	179	98	81
Harness and saddle makers and repairers.....	4,934	4,720	214	5,465	5,444	21	312	305	7	58	56	2
Leather curriers and tanners.....	6,671	5,900	771	4,324	4,295	29	217	201	16	14	11	3
Trunk and leather-case makers, etc.....	2,104	1,329	775	725	709	16	46	37	9	8	6	2
<i>Liquors and beverages.</i>												
Bottlers and soda water makers, etc.....	2,644	2,247	397	1,271	1,258	13	61	49	12	9	4	5
Brewers and maltsters.....	2,261	2,171	90	2,086	2,083	3	80	76	4	8	8
Distillers and rectifiers.....	270	261	9	389	389	14	14	3	3
<i>Lumber and its remanufactures.</i>												
Cabinetmakers.....	2,689	2,669	20	3,402	3,393	9	179	177	2	21	21
Coopers.....	4,556	4,530	26	4,744	4,740	4	328	324	4	38	38
Saw and planing mill employees.....	11,719	11,662	57	8,532	8,526	6	397	396	1	68	68
Other woodworkers.....	18,114	15,968	2,146	12,514	12,404	110	644	585	59	73	63	10
<i>Metals and metal products other than iron and steel.</i>												
Brassworkers.....	6,094	5,694	400	4,076	4,054	22	190	181	9	20	19	1
Clock and watch makers and repairers.....	4,575	2,693	1,882	2,159	2,076	83	170	117	53	21	16	5
Gold and silver workers.....	7,504	4,329	3,175	2,596	2,481	115	170	100	70	27	11	16
Tin plate and tinware makers.....	11,972	11,194	778	9,675	9,653	22	495	476	19	60	57	3
Other metal workers.....	10,540	9,356	1,184	6,180	6,149	31	362	329	33	70	68	2
<i>Paper and printing.</i>												
Bookbinders.....	12,294	3,788	8,506	2,341	2,166	175	348	107	241	26	9	17
Boxmakers (paper).....	9,923	1,088	8,835	604	373	231	203	20	183	20	2	18
Engravers.....	2,617	2,416	201	1,882	1,880	2	73	70	3	8	8
Paper and pulp mill operatives.....	8,032	4,143	3,889	3,499	3,286	213	246	106	140	23	8	15
Printers, lithographers, and pressmen.....	35,366	29,793	5,573	18,727	18,514	213	940	804	136	101	76	25
<i>Textiles.</i>												
Bleachery and dye works operatives.....	3,614	2,943	671	1,990	1,951	39	157	117	40	9	7	2
Carpet factory operatives.....	5,579	2,034	3,545	1,314	1,064	250	239	42	197	14	8	6
Cotton mill operatives.....	33,511	13,066	20,445	7,389	5,052	2,337	906	220	686	100	23	77
Hosiery and knitting mill operatives.....	14,950	2,789	12,161	1,328	870	458	297	41	256	40	5	35
Silk mill operatives.....	17,708	4,255	13,453	1,690	1,358	332	261	58	203	28	2	26
Woolen mill operatives.....	20,168	8,511	11,657	5,206	4,342	864	531	209	322	51	18	33
Other textile mill operatives.....	32,877	11,163	21,714	6,761	5,381	1,380	975	273	702	74	10	64
Dressmakers.....	101,173	297	100,876	9,085	74	9,021	9,877	40	9,837	1,213	2	1,211
Hat and cap makers.....	4,887	1,933	2,954	1,603	1,471	132	194	75	119	11	2	9
Milliners.....	26,931	214	26,717	2,321	220	2,101	1,317	13	1,304	208	208
Seamstresses.....	38,736	567	38,169	2,506	215	2,291	4,074	23	4,051	469	2	467
Shirt, collar, and cuff makers.....	13,291	1,530	11,761	1,281	703	578	566	41	525	36	2	34
Tailors and tailoresses.....	36,740	12,761	23,979	10,782	9,423	1,359	1,944	441	1,503	200	47	153
Other textile workers.....	7,047	1,026	6,021	1,086	706	380	408	41	367	49	3	46
<i>Miscellaneous industries.</i>												
Broom and brush makers.....	2,387	1,609	778	918	881	37	80	59	21	8	4	4
Charcoal, coke, and lime burners.....	339	336	3	307	307	15	15	3	3
Engineers and firemen (not locomotive).....	17,739	17,712	27	31,350	31,334	16	1,441	1,439	2	146	146
Gloves makers.....	2,652	654	1,998	599	285	314	107	13	94	25	3	22
Manufacturers and officials, etc.....	13,248	12,679	569	37,773	37,591	182	1,784	1,553	231	152	143	9
Model and pattern makers.....	2,013	1,913	100	2,060	2,051	9	91	89	2	6	6
Photographers.....	3,196	2,388	808	2,427	2,326	101	152	101	51	33	24	9

STATES AND TERRITORIES.

(Tables 31 to 41.)

EXPLANATORY NOTES.

The general tables for states and territories present figures for the United States, comprising the entire area of enumeration at the Twelfth Census; for continental United States, comprising that part of the United States lying on the continent of North America south of the Canadian boundary; for each state and territory included within the area designated as continental United States; for each of the outlying territories of Alaska and Hawaii; and for the military and naval population (including civilian employees, etc.) stationed abroad.

The general tables for states and territories present, first (Table 31), the number of persons 10 years of age and over, distinguished by sex, engaged in all gainful occupations and in each of 5 main classes of occupations; second (Tables 32 and 33), the number of persons 10 years of age and over, distinguished by sex, engaged in each of 303 specified occupations; third (Tables 34 to 40), the number of persons 10 years of age and over, distinguished by sex, engaged in all gainful occupations and in each of 5 main classes of occupations, classified successively by general nativity and color, age periods, conjugal condition, parentage, and months unemployed; and, fourth (Table 41), for each state and territory, the number of males and females 10 years of age and over, respectively, engaged in selected groups of occupations (including, in many cases, minor occupation designations), classified by general nativity, color, conjugal condition, months unemployed, age periods, and parentage. The tables are as follows:

Table 31.—Total persons 10 years of age and over engaged in gainful occupations and in each class of occupations, classified by sex: 1900.

Table 32.—Total persons 10 years of age and over engaged in each of 303 specified occupations: 1900.

Table 33.—Total males and females 10 years of age and over engaged in each of 303 specified occupations: 1900.

Table 34.—Total persons 10 years of age and over engaged in gainful occupations and in each class of occupations, classified by sex, general nativity, and color: 1900.

Table 35.—Total persons 10 years of age and over engaged in gainful occupations and in each class of occupations, classified by sex and age periods: 1900.

Table 36.—Total persons 10 to 15 years of age engaged in gainful occupations and in each class of occupations, classified by sex and year of age: 1900.

Table 37.—Total persons 10 years of age and over engaged in gainful occupations and in each class of occupations, classified by sex and conjugal condition: 1900.

Table 38.—Total males 10 years of age and over engaged in gainful occupations and in each class of occupations, distributed according to parentage: 1900.

Table 39.—Total females 10 years of age and over engaged in gainful occupations and in each class of occupations, distributed according to parentage: 1900.

Table 40.—Total persons 10 years of age and over engaged in gainful occupations and in each class of occupations who were unemployed during some portion of the census year, classified by sex and months unemployed: 1900.

Table 41.—Total males and females 10 years of age and over engaged in selected groups of occupations, classified by general nativity, color, conjugal condition, months unemployed, age periods, and parentage: 1900.

A statement concerning the classification of occupations in 1900 as compared with former censuses is given in the explanatory text (Chapter I) preceding the general tables.

The terms used in certain of the general tables for states and territories are explained as follows:

UNITED STATES.—The entire area of enumeration at the Twelfth Census, comprising the states and territories constituting what is termed continental United States; the outlying territories of Alaska and Hawaii; and persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory. (See Tables 31 and 34 to 40.)

CONTINENTAL UNITED STATES.—That part of the United States lying on the continent of North America south of the Canadian boundary. (See Tables 31 and 34 to 40.)

MILITARY AND NAVAL.—Persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory. (See Tables 31 and 34 to 40.)

HAWAII: WHITE.—The figures for white persons in Hawaii include Caucasians, Hawaiians, part Hawaiians, and South Sea Islanders. (See Tables 34 and 41.)

COLORED.—Persons of negro descent, Chinese, Japanese, and Indians. (See Tables 34 and 41.)

NEGRO.—All persons of negro descent. (See Tables 34 and 41.)

PARENTAGE:

Foreign parentage (or parents).—All persons, either of native or foreign birth, having either one or both parents foreign born. (See Tables 34, 38, 39, and 41.)

Mixed foreign parentage.—All persons, either of native or foreign birth, having both parents foreign born but of different nationalities, as father born in Ireland and mother born in England, father born in Germany and mother born in Austria, etc. (See Tables 38, 39, and 41.)

Native parentage (or parents).—All persons, either of native or foreign birth, having both parents native born, or one parent native born and one parent for whom the birthplace is unknown, or both parents for whom the birthplace is unknown. Persons of this last description are sometimes referred to by the term “unknown parentage,” but they are not of sufficient importance numerically to justify separate classification and are accordingly included with the class of native parentage. (See Tables 34, 38, 39, and 41.)

UNEMPLOYED.—Persons ordinarily engaged in gainful labor but not employed during some portion of the census year (June 1, 1899 to May 31, 1900). (See Tables 40 and 41.) The statistics are presented in connection with the occupations upon which persons so reported depend chiefly for support or in which they are usually engaged for the larger part of the time, in order to show to what extent the different classes of productive workers were unemployed during any portion of the census year, either at their customary occupation or in any other form of remunerative work, as more fully explained in the analytical text preceding the general tables.

STATISTICS OF OCCUPATIONS.

TABLE 31.—TOTAL PERSONS 10 YEARS OF AGE AND OVER ENGAGED IN GAINFUL

STATES AND TERRITORIES.		POPULATION 10 YEARS OF AGE AND OVER.			PERSONS ENGAGED IN GAINFUL OCCUPATIONS.			PERSONS ENGAGED IN AGRICULTURAL PURSUITS.
